27 11/32 grains	= 1 dram (dr)
16 drams	= 1 ounce (oz) = 437½ grains
16 ounces	= 1 pound (lb) = 256 drams = 7,000 grains
100 pounds	= 1 hundredweight (cwt)*
20 hundredweights	= 1 ton = 2,000 pounds*
In "gross" or "long" measure, the following values are recognized:	
112 pounds	= 1 gross or long hundredweight*
20 gross or long hundredweights	= 1 gross or long ton = 2,240 pounds*

*When the terms "hundredweight" and "ton" are used unmodified, they are commonly understood to mean the 100-pound hundredweight and the 2,000-pound ton, respectively; these units may be designated "net" or "short" when necessary to distinguish them from the corresponding units in gross or long measure.

TROY WEIGHT

24 grains	= 1 pennyweight (dwt)
20 pennyweights	= 1 ounce troy (oz t) = 480 grains
12 ounces troy	= 1 pound troy (lb t) = 240 pennyweights = 5,760 grains

Tables of Equivalents

When the name of a unit is enclosed in brackets thus, [1 hand], this indicates (1) that the unit is not in general current use in the United States, or (2) that the unit is believed to be based on "custom and usage" rather than on formal definition. See above about superior figures in Area Measure.

Equivalents involving decimals are, in most instances, rounded off to the third decimal place except where they are exact, in which cases these exact equivalents are so designated.

CAPACITIES OR VOLUMES

1 barrel (bbl), liquid.....	31 to 42 gallons*
-----------------------------	-------------------

*There are a variety of "barrels", established by law or usage. For example: Federal taxes on fermented liquors are based on a barrel of 31 gallons; many State laws fix the "barrel for liquids" as 31½ gallons; one State fixes a 36-gallon barrel for cistern measurement; Federal law recognizes a 40-gallon barrel for "proof spirits"; by custom, 42 gallons comprise a barrel of crude oil or petroleum products for statistical purposes, and this equivalent is recognized "for liquids" by four States.

1 barrel (bbl), standard, for fruits, vegetables, and other dry commodities except cranberries.....	7.056 cubic inches 105 dry quarts 3.231 bushels, struck measure
1 barrel (bbl), standard, cranberry.....	5.826 cubic inches 86 45/64 dry quarts 2.709 bushels, struck measure
1 bushel (bu) (U. S.) (struck measure).....	2,150.42 cubic inches (exactly) 35.238 liters

[1 bushel, heaped (U. S.)]..	2,747.715 cubic inches 1.278 bushels, struck measure
-------------------------------	--

*Frequently recognized as 1½ bushels, struck measure.

[1 bushel (bu) (British Im- perial) (struck mea- sure)].....	1.032 U. S. bushels, struck measure 2.219.36 cubic inches
1 cord (cd) (firewood).....	128 cubic feet
1 cubic centimeter (cm ³).....	0.061 cubic inch
1 cubic decimeter (dm ³).....	61.023 cubic inches
1 cubic foot (ft ³).....	7.481 gallons 28.317 cubic decimeters

1 cubic inch (in. ³).....	0.554 fluid ounce 4.433 fluid drams 16.387 cubic centimeters
1 cubic meter (m ³).....	1.308 cubic yards
1 cubic yard (yd. ³).....	0.765 cubic meter 8 fluid ounces
1 cup, measuring.....	½ liquid pint

1 dram, fluid (fl dr) (British).....	0.961 U. S. fluid dram 0.217 cubic inch 3.552 milliliters
---	---

1 dekaliter (dal).....	2.642 gallons 1.135 pecks
------------------------	------------------------------

1 gallon (gal) (U. S.).....	231 cubic inches 3.785 liters 0.833 British gallon 128 U. S. fluid ounces
-----------------------------	--

[1 gallon (gal) British Imperial].....	277.42 cubic inches 1.201 U. S. gallons 4.546 liters 160 British fluid ounces
---	--

1 gill.....	7.219 cubic inches 4 fluid ounces 0.118 liter
-------------	---

1 hectoliter (hl).....	26.418 gallons 2.838 bushels
------------------------	---------------------------------

1 liter.....	1.057 liquid quarts 0.908 dry quart 61.025 cubic inches
--------------	---

1 milliliter (ml).....	0.271 fluid dram 16.231 minims 0.061 cubic inch
------------------------	---

1 ounce, liquid (U. S.).....	1.805 cubic inches 29.573 milliliters 1.041 British fluid ounces
---------------------------------	--

1 ounce, fluid (fl oz) (British).....	0.961 U. S. fluid ounce 1.734 cubic inches 28.412 milliliters
1 peck (pk).....	8.810 liters
1 pint (pt), dry.....	33.600 cubic inches 0.551 liter
1 pint (pt), liquid.....	28.875 cubic inches (exactly) 0.473 liter
1 quart (qt), dry (U. S.).....	67.201 cubic inches 1.101 liters 0.969 British quart
1 quart (qt), liquid..... (U. S.).....	57.75 cubic inches (exactly) 0.946 liter 0.833 British quart
1 quart (qt) (British)]..	69.354 cubic inches 1.032 U. S. dry quarts 1.201 U. S. liquid quarts
1 tablespoon.....	3 teaspoons* 4 fluid drams ½ fluid ounce
1 teaspoon.....	¼ tablespoon* 1½ fluid drams*

*The equivalent "1 teaspoon = 1½ fluid drams" has been found by the Bureau to correspond more closely with the actual capacities of "measuring" and silver teaspoons than the equivalent "1 teaspoon = 1 fluid dram" which is given by a number of dictionaries.

WEIGHTS OR MASSES

1 assay ton** (AT).....	29.167 grams
**Used in assaying. The assay ton bears the same relation to the milligram that a ton of 2000 pounds avoirdupois bears to the ounce troy; hence the weight in milligrams of precious metal obtained from one assay ton of ore gives directly the number of troy ounces to the net ton.	

1 carat (c).....	200 milligrams 3.086 grains
1 dram avoirdupois (dr avdp).....	27 11/32 (= 27.314) grains 1.772 grams

gamma, see microgram

1 grain.....	64.799 milligrams 15.432 grains
--------------	------------------------------------

1 gram (g).....	0.035 ounce, avoirdupois 112 pounds 50.802 kilograms
-----------------	--

***The gross or long ton and hundredweight are used commercially in the United States to only a limited extent, usually in restricted industrial fields. These units are the same as the British "ton" and "hundredweight."

1 hundredweight, gross or long*** (gross cwt).....	100 pounds 45.359 kilograms
---	--------------------------------

1 kilogram (kg).....	2.205 pounds
----------------------	--------------

1 microgram (μ [the Greek letter gamma]).....	0.000.001 gram (exactly) 0.015 grain
--	---

1 milligram (mg).....	437.5 grains (exactly) 0.911 troy ounce 28.350 grams
-----------------------	--

1 ounce, avoirdupois (oz avdp).....	480 grains 1.097 avoirdupois ounces 31.103 grams
--	--

1 ounce, troy (oz t).....	480 grains 1.097 avoirdupois ounces 31.103 grams
---------------------------	--

1 pennyweight (dwt).....	7.000 grains 1.555 grams
--------------------------	-----------------------------

1 pound, avoirdupois (lb avdp).....	7,000 grains 1.215 troy pounds 453.592 37 grams (exactly) 5.760 grains
--	---

1 pound, troy (lb t).....	5.760 grains 0.823 avoirdupois pound 373.242 grams
---------------------------	--

1 ton, gross or long* (gross tn).....	2,240 pounds 1.12 net tons (exactly) 1.016 metric tons
--	--

*The gross or long ton and hundredweight are used commercially in the United States to only a limited extent, usually in restricted industrial fields. These units are the same as the British "ton" and "hundredweight."

1 ton, metric (t).....	2,204.623 pounds 0.984 gross ton 1.102 net tons
------------------------	---

1 ton, net or short (sh ton).....	2,000 pounds 0.893 gross ton 0.907 metric ton

Roman and Arabic Numerals

Source: Historical Records

I.....	1	VI.....	6	XI.....	11	XVI.....	16	XX.....	20	LXXX.....	80	CD.....	400	CM.....	900
II.....	2	VII.....	7	XII.....	12	XVII.....	17	XXI.....	21	LXXXI.....	81	CDI.....	401	CMI.....	901
III.....	3	VIII.....	8	XIII.....	13	XVIII.....	18	XXII.....	22	LXXXII.....	82	CDII.....	402	CMII.....	902
IV.....	4	IX.....	9	XIV.....	14	XIX.....	19	XXIII.....	23	LXXXIII.....	83	CDIII.....	403	CMIII.....	903
V.....	5	X.....	10	XV.....	15	XX.....	20	LXX.....	70	LXXX.....	80	CDIV.....	404	CMIV.....	904

NOTE—A dash line over a numeral multiplies the value by 1,000; thus, $\overline{X}$ =10,000; $\overline{L}$ =50,000; $\overline{C}$ =100,000; $\overline{D}$ =500,000; $\overline{M}$ =1,000,000; $\overline{CLIX}$ =159,000; $\overline{DLIX}$ =559,000.

Other general rules in Roman numerals are as follows: (1), repeating a letter repeats its value— $\overline{XX}$ =20; $\overline{CCC}$ =300; (2), a letter placed after one of greater value adds thereto— $\overline{VI}$ =6; $\overline{DC}$ =600; (3), a letter placed before one of greater value subtracts therefrom— $\overline{IV}$ =4.

Arabic numerals are those now commonly in use—0, 1, 2, 3, 4, 5, 6, 7, 8, 9.

Tables of Metric Weights and Measures

LINEAR MEASURE

10 millimeters (mm)	= 1 centimeter (cm)
10 centimeters	= 1 decimeter (dm) = 100 millimeters
10 decimeters	= 1 meter (m) = 1,000 millimeters
10 meters	= 1 dekameter (dam)
10 dekameters	= 1 hectometer (hm) = 100 meters
10 hectometers	= 1 kilometer (km) = 1,000 meters

AREA MEASURE

100 square millimeters (mm ²)	= 1 square centimeter (cm ²)
10,000 square centimeters	= 1 square meter (m ²) = 1,000,000 square millimeters
100 square meters	= 1 are (a)
100 ares	= 1 hectare (ha) = 10,000 square meters
100 hectares	= 1 square kilometer (km ²) = 1,000,000 square meters

VOLUME MEASURE

10 milliliters (ml)	= 1 centiliter (cl)
10 centiliters	= 1 deciliter (dl) = 100 milliliters

10 deciliters	= 1 liter (l) = 1,000 milliliters
10 liters	= 1 dekaliter (dal)
10 dekaliters	= 1 hectoliter (hl) = 100 liters
10 hectoliters	= 1 kiloliter (kl) = 1,000 liters

CUBIC MEASURE

1,000 cubic millimeters (mm ³)	= 1 cubic centimeter (cm ³)
1,000 cubic centimeters	= 1 cubic decimeter (dm ³) = 1,000,000 cubic millimeters
1,000 cubic decimeters	= 1 cubic meter (m ³) = 1 ster e = 1,000,000 cubic centimeters = 1,000,000,000 cubic millimeters

WEIGHT

10 milligrams (mg)	= 1 centigram (cg)
10 centigrams	= 1 decigram (dg) = 100 milligrams
10 decigrams	= 1 gram (g) = 1,000 milligrams
10 grams	= 1 dekagram (dag)
10 dekagrams	= 1 hectogram (hg) = 100 grams
10 hectograms	= 1 kilogram (kg) = 1,000 grams
1,000 kilograms	= 1 metric ton (t)

Special Terms Used in Metric System

In the metric system of weights and measures, designations of multiples and subdivisions of any unit may be arrived at by combining with the name of the unit the prefixes deka, hecto, kilo, mega, giga, and tera, meaning, respectively, 10, 100, 1,000, 1,000,000, 1,000,000,000, and 1,000,000,000,000, and deci, centi, milli, micro, nano, pico, femto and atto, meaning, respectively, one-tenth, one-hundredth, one-thousandth, one-millionth, one-billionth, one-trillionth, one-quadrillionth and one-quintillionth. In some of the foregoing metric tables some such multiples and subdivisions have not been included for the reason that these have little, if any, currency.

A special case is found in the term "micron" (abbreviated as μ [the Greek letter mu]), a coined word meaning one-millionth of a meter) equivalent

to one-thousandth of a millimeter; a milli-micron (m μ) is a billionth of a meter and hence should always be designated as a nanometer, and a micromicron (abbreviated as $\mu\mu$) which is a trillionth of a meter and hence should always be designated as a picometer.

In October, 1960, the Eleventh General (International) Conference on Weights and Measures redefined the meter as 1 650 763.73 wavelengths of the orange-red radiation in vacuum of krypton 86 corresponding to the unperturbed transition between the $2p_{10}$ and $5d_5$ levels. The platinum-iridium meter bars formerly used as standards will remain important because of the ease with which they can be used for certain types of measurements.

Mathematical Formulas

To find the CIRCUMFERENCE of a:

Circle—Multiply the diameter by 3.14159265 (usually 3.1416).

To find the AREA of a:

Circle—Multiply the square of the diameter by .785398 (usually .7854).

Rectangle—Multiply the length of the base by the height.

Sphere (surface)—Multiply the square of the radius by 3.1416 and multiply by 4.

Square—Square the length of one side.

Trapezoid—Add the two parallel sides, multiply by the height and divide by 2.

Triangle—Multiply the base by the height and divide by 2.

To find the VOLUME of a:

Cone—Multiply the square of the radius of the base by 3.1416, multiply by the height, and divide by 3.

Cube—Cube the length of one edge.

Cylinder—Multiply the square of the radius of the base by 3.1416 and multiply by the height.

Pyramid—Multiply the area of the base by the height and divide by 3.

Rectangular Prism—Multiply the length by the width by the height.

Sphere—Multiply the cube of the radius by 3.1416, multiply by 4 and divide by 3.

Multiplication and Division Table

A number in the top line (19) multiplied by a number in the last column on the left (18) produces the number where the top line and the side line meet (342), and so on throughout the table.

A number in the table (342) divided by the number at the top of that column (19) results in the number (18) at the extreme left; also, a number in the table (342) divided by the number (18) at the extreme left gives the number (19) at the top of the column, and so on throughout the table.

Electrical Units

Source: National Bureau of Standards

The watt is the unit expressing electrical power as horsepower (hp) represents power in mechanics; it is equal to the product of the volts (pressure) times amperes—(rate of flow). Thus, 2 volts times 2 amperes would give in a direct current circuit 4 watts.

A kilowatt is equal to 1,000 volts. A kilowatt is equal to 1,000 watts. A megawatt is equal to 1,000,000 watts.

Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour—which means 1,000 watt hours.

This may represent 1 watt for 1,000 hours or 1,000 watts for 1 hour. 746 watts are equal to one horsepower or inversely 1 kilowatt (kw) is equal to about 1½ horsepower.

The horsepower represents the power required to lift a weight of 33,000 pounds 1 foot in 1 minute or 550 pounds 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a conductor which offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure.

Foreign Weights and Measures

Exclusive of the Metric System, which is used by many foreign countries, and for which see page 584

The metric carat of 200 milligrams is now very generally in use. The word carat also is used to denote the proportion of alloy in a metal. Thus, pure gold is 24 carats fine.

Knots and Miles: Nautical Measures

Source: Coast and Geodetic Survey (ESSA)

A Knot is a measure of speed, one knot being a speed of one nautical mile an hour.

The U. S. Statute Mile is 5,280 feet. In Europe, the old miles, which varied in length from about 3,300 feet to over 36,000 feet, have been mostly replaced, officially at least, by the kilometer, which equals 0.6214 statute mile or 3,280.8 feet.

The International Nautical Mile is 1,852 meters or 6,076.1155 feet; this distance is equivalent to 1.150779 statute miles.

To convert statute miles into international

nautical miles multiply statute miles by 0.868976; to convert international nautical miles into statute miles multiply nautical miles by 1.150779 or 1 1/7.

A Nautical, Geographic, or Sea Mile at any place is considered, for purposes of navigation, to be equal to the length of one minute of the meridian at that place.

A fathom—6 feet, chiefly water depth.

A cable—100 fathoms or 600 feet or approximately 0.1 nautical mile (In U.S. Navy, 120 fathoms or 720 feet).

Chemical Elements, Discoverers, Atomic Weights

Atomic weights, based on the exact number 12 as the assigned atomic mass of the principal isotope of carbon, carbon 12, are provided through the courtesy of the International Union of Pure and Applied Chemistry and Butterworth Scientific Publications.

For the radioactive elements with the exception of uranium and thorium, the mass number of either the isotope of longest half-life (marked with a star) or the better known isotope (marked with two stars) is given.

Chemical element	Symbol	Atomic number	Atomic weight	Year discov.	Discoverer

Temperature Conversion Table

Source: National Bureau of Standards, U. S. Department of Commerce

The numbers in bold face type refer to the temperature either in degrees Centigrade or Fahrenheit which are to be converted. If converting from degrees Fahrenheit to Centigrade, the equivalent will be found in the column on the left, while if converting from degrees Centigrade to Fahrenheit the answer will be found in the column on the right.

For temperatures not shown. To convert Fahrenheit to Centigrade subtract 32 degrees and multiply by 5, divide by 9; to convert Centigrade to Fahrenheit, multiply by 9, divide by 5 and add 32 degrees.

Centi- grade	Fahren- heit	Centi- grade	Fahren- heit	Centi- grade	Fahren- heit
-273.2	-459.7	-17.8	0	35.0	95
-184	-300	-12.2	10	36.7	98
-169	-273	-6.67	20	37.8	100
-157	-250	-1.11	30	43	110
-129	-200	4.44	40	104	230
-101	-150	10.6	50	122	250
-73.3	-100	15.6	60	140	284
-45.6	-50	21.1	70	158	302
-40.0	-40	23.9	75	167	300
-34.4	-30	26.7	80	176	300
-28.9	-20	29.4	85	185	300
-23.3	-10	32.2	90	194	300

Water boils at 212° Fahrenheit at sea level. For every 550 feet above sea level, boiling point of water is lower by about 1° Fahrenheit. Methyl alcohol boils at 148° Fahrenheit. Average human oral temperature, 98.6° Fahrenheit. Water freezes at 32° Fahrenheit. Although "Centigrade" is still frequently used, the International Committee on Weights and Measures and the National Bureau of Standards have recommended since 1948 that this scale be called "Celsius."

Factors and Prime Numbers

Factors are such numbers as multiplied together will produce a required number.

A Prime Number is one that cannot be resolved into two or more factors; or, it is a number exactly divisible only by itself and unity. A Composite Number is one that can be resolved into factors.

TABLE OF PRIME NUMBERS FROM 1 TO 1000

Legal or Public Holidays in the United States in 1969

NOTE—See Index under Holidays for new Federal legislation.

Federal "Legal Public Holidays" are New Year's, Washington's Birthday, Memorial or Decoration Day, Independence Day, Labor Day, Veterans Day, Thanksgiving, and Christmas. The President and Congress designate only for the District of Columbia and Federal employees throughout the nation. Each State has jurisdiction over the holidays it will observe. They are designated either by legislative enactment or executive proclamation. There are no national holidays in the United States.

Christmas is observed by Christians the world over.

New Year's Day is observed by Christians and many other religions.

In Episcopal countries, the only other church days which are regular legal holidays are Good Friday, Easter Monday, and Whit Monday.

In Roman Catholic countries, the church days other than Christmas which are usually legal holidays are Epiphany, Ascension, Assumption, All Saints', and Immaculate Conception. In Latin American countries, it is usual to observe Good Friday and Corpus Christi.

In Lutheran countries, Epiphany, Annunciation, Ash Wednesday, Good Friday, Easter Monday, Ascension Day, Whit Monday, and Corpus Christi are holidays.

CHIEF LEGAL OR PUBLIC HOLIDAYS

When a holiday falls on a Sunday it is usually observed on the following Monday.

Saturday—In most of the states banks close at noon or are closed all day.

Jan. 1 (Wednesday)—New Year's Day. All the states and possessions.

Feb. 12 (Wednesday)—Lincoln's Birthday. All the states, Puerto Rico and Virgin Islands, with the following exceptions—Ala., Fla., Ga., Hawaii, Idaho, Me., Mass., Miss., Mo., Nev., N. H., N. C., Okla., R. I., S. C., Tex., Va., (in Ark. a memorial day).

Feb. 22 (Saturday)—Washington's Birthday. All the states and possessions (except Nev. and Okla.). (Presidents' Day in Hawaii; in Massachusetts celebrated on third Monday of Feb.)

April 4—Good Friday. Observed in all the states and possessions. A legal holiday in Conn., Del., Fla., Hawaii, Ill., Ind., La., Minn., N. J., N. D., Penn., Tenn., Guam, Canal Zone, Puerto Rico, and Virgin Islands.

May 30 (Friday)—Memorial or Decoration Day. All the states and possessions with the following exceptions—Ala., Ga., Miss., S. C. (in Florida, Memorial Day for Veterans of all Wars. In Massachusetts celebrated on last Monday in May.)

July 4 (Friday)—Independence Day. All the states and possessions.

Sept. 1—Labor Day. (First Monday in September.) All the states and possessions.

Oct. 12 (Sunday)—Columbus Day. All the states and Puerto Rico with the following exceptions—Alaska, Hawaii, Idaho, Maine, Miss., N. M., Nev., N. C., Okla., Ore., S. C., S. D., Tenn., Va., Wyo. (Discovery Day in Indiana and North Dakota; Landing Day in Wisconsin. In Arkansas and Oregon, a memorial day. Observed on the Saturday nearest Oct. 12 in Michigan.)

Nov. 4—General Election Day. (First Tuesday after the first Monday in November.) All the states, Puerto Rico, Virgin Islands, with the following exceptions—Ala., Alaska, Conn., D. C., Ga., Idaho, Ky., Mass., Minn., Miss., Neb., Nev., N. M., Utah; Vt., Ohio, a half-holiday after 12 noon. (Observed usually only when presidential or general elections are held. Primary election days are observed in some states; see list of Days Usually Observed.)

Nov. 11 (Tuesday)—Veterans, or Armistice Day. All the states and possessions.

Nov. 27—Thanksgiving Day. (Always the fourth Thursday in November.) All states and possessions. (The day after Thanksgiving is a legal holiday in Fla.)

Dec. 25 (Thursday)—Christmas Day. All the states and possessions (South Carolina and the Virgin Islands also observe Second Christmas Day, Dec. 26.)

OTHER LEGAL OR PUBLIC HOLIDAYS

Jan. 6—Three Kings' Day (Epiphany). In Puerto Rico and Virgin Islands.

Jan. 8—Battle of New Orleans. In Louisiana.

Jan. 11—De Hostos' Birthday. In Puerto Rico.

Jan. 17—Arbor Day. In Florida (always third Friday in January).

Jan. 19—Robert E. Lee's Birthday. Ala., Ark., Fla., Ga., Ky., La., Miss., N. C., S. C., Tenn., Tex.; Lee-Jackson Day in Virginia.

Jan. 22—Inauguration Day. The District of Columbia, observed every fourth year since 1937.

Jan. 30—Franklin D. Roosevelt Day. Kentucky and Virgin Islands.

Feb. 14—Admission Day. In Arizona.

Feb. 18—Mardi Gras (Shrove Tuesday). Alabama; Florida; Louisiana.

March 2—Texas Independence Day. In that state.

March 11—Town Meeting Day. In Vermont (always first Tuesday in March).

March 15—Andrew Jackson's Birthday. In Tennessee.

March 17—Evacuation Day. In Boston and Suffolk County, Mass.

March 22—Emancipation Day. In Puerto Rico.

March 25—Maryland Day. In that state.

March 26—Kuhio Day. In Hawaii.

March 30—Seward's Day. In Alaska.

March 31—Transfer Day. Virgin Islands.

April 2—Pascua Florida Day. In that state.

April 3—Holy Thursday. Virgin Islands.

April 7—Easter Monday. North Carolina and Virgin Islands.

April 12—Halifax Day. In North Carolina.

April 13—Thomas Jefferson's Birthday. Ala., Mo., Va.

April 14—Pan American Day. In Florida.

April 16—De Diego's Birthday. In Puerto Rico.

April 19—Patriots' Day. Maine.

April 21—Patriots Day. In Massachusetts (always third Monday in April.)

April 21—San Jacinto Day. In Texas.

April 22—Arbor Day. In Nebraska; Oklahoma Day, in that state.

April 22—Fast Day. New Hampshire (always fourth Monday in April.)

April 25—Arbor Day. In Utah (always last Friday in April.)

April 26—Confederate Memorial Day. Alabama, Florida, Georgia, Mississippi.

May 10—Confederate Memorial Day. North Carolina and South Carolina.

May 20—Mecklenburg Day. In North Carolina.

May 26—Whit Monday. Virgin Islands.

June 3—Birthday of Jefferson Davis or *Confederate Memorial Day. In Alabama, Georgia, *Kentucky, *Louisiana, Mississippi, South Carolina, *Tennessee and Texas. (In Arkansas a memorial day.)

June 11—Kamehameha Day. In Hawaii.

June 14—Flag Day. In Pennsylvania.

June 17—Bunker Hill Day. In Boston and Suffolk County, Mass.

June 20—West Virginia Day. In that state.

June 22—Organic Act Day. Virgin Islands.

July 13—Nathan Bedford Forrest's Birthday. In Tennessee.

July 17—Muñoz Rivera's Birthday. Puerto Rico.

July 21—Liberation Day. In Guam.

July 24—Pioneer Day. In Utah.

July 25—Constitution Day. In Puerto Rico; Supplication Day (beginning of hurricane season), Virgin Islands.

July 27—Barbosa's Birthday. In Puerto Rico.

Aug. 4—Colorado Day. In that state. (Always first Monday in August).

Aug. 14—Victory Day. In Rhode Island. World War II Memorial Day, in Arkansas.

Aug. 16—Bennington Battle Day. In Vermont.

Aug. 30—Huey P. Long's Birthday. In Louisiana.

Sept. 9—Admission Day. In California.

Sept. 12—Defenders' Day. In Maryland.

Oct. 18—Alaska Day. In that state.

Oct. 25—Thanksgiving Day (end of hurricane season). Virgin Islands.

Oct. 31—Nevada Day. In that state.

Nov. 1—All Saints' Day. In Louisiana; Liberty Day in the Virgin Islands.

Nov. 3—Panama Independence Day. Canal Zone.
Nov. 19—Discovery Day. In Puerto Rico.
Nov. 28—Day After Thanksgiving. In Florida.
Dec. 10—Wyoming Day. In that state.

DAYS USUALLY OBSERVED

Not legal or public holidays:

Air Force Day (see Armed Forces Day).

American Indian Day (Sept. 26 in 1969). Always fourth Friday in September.

Arbor Day. Tree-planting day. First observed April 10, 1872, in Nebraska. Over one million trees were set out. Now observed in every state in the Union (except Alaska) and Puerto Rico. A legal holiday in Utah (always last Friday in April), in Florida (always third Friday in January), in Nebraska (April 22) and in Wyoming. (Date to be proclaimed by Governor.)

Armed Forces Day (May 17 in 1969) Always third Saturday in that month, by Presidential proclamation. Replaced Army, Navy and Air Force Days. (Air Force Day was the 2nd Saturday in September; Army Day April 6th; Navy Day October 27, the birthday of Theodore Roosevelt. October is also the month in which the American Navy was founded (1775) by the Continental Congress.)

Bill of Rights Day, Dec. 15. By Act of Congress. Bill of Rights took effect Dec. 15, 1791.

Bird Day. Often observed with Arbor Day. In Iowa, March 21.

Child Health Day (Oct. 6 in 1969). Always first Monday in October, by Presidential proclamation.

Citizenship Day, Sept. 17. President Truman, Feb. 29, 1952, signed bill designating Sept. 17 as annual Citizenship Day. It replaced I Am An American Day, formerly 3rd Sunday in May and Constitution Day formerly Sept. 17.

East Sunday (April 6 in 1969).

Elizabeth Cady Stanton Day, Nov. 12. Birthday of pioneer leader for equal rights for women.

Father's Day (June 15 in 1969). Always third Sunday in that month.

Feast of the Immaculate Conception, Dec. 8. A memorial day in Guam.

Flag Day, June 14. By Presidential proclamation. It is a legal holiday in Pennsylvania.

Forefathers' Day, Dec. 21. Landing on Plymouth Rock, in 1620. Is celebrated with dinners by New England societies, especially "Down East."

Frances Willard Day, Sept. 28. Observed in Minnesota.

Four Chaplains Memorial Day, February 3.

Gen. Douglas MacArthur Day, Jan. 26. A memorial day in Arkansas.

Gen. Pulaski Memorial Day, Oct. 11. Native of Poland and Revolutionary War hero; died (Oct. 11, 1779) from wounds received at the siege of Savannah, Ga.

Gen. von Steuben Memorial Day, Sept. 17. By Presidential proclamation.

Groundhog Day, Feb. 2. A popular belief is that if the groundhog sees his shadow this day he returns to his burrow and winter continues 6 weeks longer.

Halloween, Oct. 31. The evening before All Saints or All-Hallows Day. Informally observed in the United States with masquerading and pumpkin-decorations. Traditionally an occasion for children to play harmless pranks (trick or treat, ticktack).

Independence Sunday (June 29 in 1969). The Sunday preceding the Fourth of July. Observed in Iowa.

Leif Ericsson Day, Oct. 9. Observed in Minnesota.

Loyalty Day, May 1. By act of Congress.

May Day. Popularly given to May 1st.

Minnesota Day, May 11. In that state.

Mother's Day (May 11 in 1969). Always second Sunday in that month.

National Aviation Day, Aug. 19. By Presidential proclamation.

National Day of Prayer. By Presidential proclamation each year on a day other than a Sunday.

National Freedom Day, February 1. To commem-

orate the signing, by President Lincoln, of the document to abolish slavery, Feb. 1, 1865. By Presidential proclamation.

National Maritime Day, May 22. First proclaimed 1935 in commemoration of the departure of the SS Savannah, from Savannah, Ga., on May 23, 1819, on the first successful transatlantic voyage under steam propulsion. By Presidential proclamation.

Pan American Day, April 14. In 1890 the First International Conference of American States, meeting in Washington, was held on that date. A resolution was adopted which resulted in the creation of the organization known today as the Pan American Union. By Presidential proclamation. A legal holiday in Florida.

Poetry Day, Oct. 15.

Primary Election Day. A legal holiday in Ark., Cal., Ind., Me., Mo., Mont., N. D., Ore., S. D., Tenn., W. Va., and Wis. Observed usually only when presidential or general elections are held.

Reformation Day, Oct. 31. Observed by Protestant groups.

Sadie Hawkins Day, first Saturday after November 1.

St. Patrick's Day, March 17. Observed by Irish Societies and with parades.

St. Valentine's Day, Feb. 14. Festival of a martyr beheaded at Rome under Emperor Claudius. Association of this day with lovers has no connection with the saint and probably has its origin in an old belief that on this day birds begin to choose their mates.

Susan B. Anthony Day, Feb. 15. Birthday of a pioneer crusader for equal rights for women. Observed in Minnesota.

United Nations Day, Oct. 24. By Presidential proclamation, to commemorate founding of United Nations.

Verrazano Day, April 17. Observed in New York State, to commemorate the probable discovery of New York harbor by Giovanni da Verrazano in April, 1524.

Wright Brothers Day, Dec. 17. By Presidential designation, to commemorate first successful flight by Orville and Wilbur Wright, Dec. 17, 1903.

Youth Honor Day, Oct. 31. A day of observance in Iowa.

WEEKS AND MONTHS

The following list contains special weeks and months designed to call to the attention of the public an event of importance. The dates usually change each year at the discretion of the sponsoring organization. Among the Weeks observed each year are American Art Week, American Education Week, American Heart Month, American Red Cross Fund Drive, Boys and Girls Week, Boy Scout Week, Brotherhood Week, Camp Fire Girls' Birthday Week, Cancer Control Month, Christmas Sea Sale (sponsored by National Tuberculosis Association), Constitution Week, Fire Prevention Week, Girl Scout Week, Human Rights Week, Jewish Youth Week, March of Dimes (sponsored by National Foundation), Mutual Insurance Week, National Allergy Month, National Bible Week, National Boys' Club Week (sponsored by Boys Clubs of America), National Crime Prevention Week, National Drum Corps Week, National Employ the Physically Handicapped Week, National Heart Month, National Farm Safety Week, National 4-H Club Week, National Garden Week, National Highway Week, National Hospital Week, National Letter Writing Week, National Library Week, National Safe Boating Week, National Salvation Army Week, National School Lunch Week, National Stamp Collecting Week, National Transportation Week, National Wildlife Week (sponsored by National Wildlife Federation), Poppy Week (sponsored by Veterans of Foreign Wars of the U. S.), Red Cross Month, Save Your Vision Week, United Nations Week, United States-Canada Good Will Week (sponsored by the Kiwanis International), World Trade Week, and Youth Week (sponsored by United Christian Youth Movement).

Old English Holidays

Jan. 6. TWELFTH DAY, or Twelfth-tide, sometimes called Old Christmas Day, the same as Epiphany (Feast of the Three Kings). It is celebrated in Spain as Christmas and in Italy as Epiphany (Befana Day). The previous evening is Twelfth Night. Since 1909 the Russian Orthodox Church has observed Jan. 7 as Christmas, inasmuch as 13 days instead of 12 now mark the difference between the old and the new or Gregorian calendar.

Feb. 2. CANDELMAS: Festival of the Purification of the Virgin. Consecration of the lighted candles to be used in the church during the year.

Feb. 14. OLD CANDELMAS: St. Valentine's Day.

Mar. 25. LADY DAY: Annunciation of the Virgin.

April 6 is OLD LADY DAY.

June 24. MIDSUMMER DAY: Feast of the Nativity of John the Baptist.

July 6 is OLD MIDSUMMER DAY.

July 15. ST. SWITHIN'S DAY. An old superstition: if rain fell it would continue forty days.

Aug. 1. LAMMAS DAY. Originally in England the festival of the wheat harvest. In the church the festival of St. Peter's miraculous deliverance from prison. Old Lammas Day is August 13.

Sept. 29. MICHAELMAS—Feast of St. Michael the Archangel.

Nov. 1. HALLOWMAS. All-Hallows or All Saints Day. Previous evening is Hallowmas Eve.

Nov. 2. ALL SOULS' DAY. Day of prayer for the souls of the dead.

Nov. 11. MARTINMAS. Feast of St. Martin. Old Martinmas is Nov. 23.

Dec. 28. CHILDERMAS. Holy Innocents' Day.

UNITED STATES POPULATION

1970 Census Will Be Taken by Mail in Major Metropolitan Areas

Source: U. S. Bureau of the Census

Plans for the 1970 Census—The Bureau of the Census in 1968 continued to perfect its plans to take the 1970 Census of Population and Housing principally by mail. In late March 1970, letter carriers will deliver census forms to all households. In major metropolitan areas, with 60% of the total population, households will be asked to fill out the questionnaires and return them by mail on Apr. 1. Census workers will visit only households failing to return forms or failing to answer all questions. Elsewhere in the nation, census workers will visit every household to pick up questionnaires.

In 1968, the Bureau conducted "rehearsal" censuses in Sumter and Chesterfield Counties, South Carolina; Dane County, Wisconsin; and Trenton, New Jersey.

The 1970 Census will provide up-to-date information concerning numbers of people, their education, income, housing and other important factors for the nation, each state, county, city, metropolitan area, and for small segments of each area. The new information will be used to determine representation in government and to guide many programs aimed at meeting the needs of the American people.

Total Population—The total population of the United States including members of the armed services overseas on Apr. 1, 1968, reached 200,658,000, according to Census Bureau estimates. This figure represented an increase of 20,651,000 over the Apr. 1, 1960, census count.

Elements of Change—The estimated rate of population growth in the United States in calendar year 1967 was 1.01%, a rate lower than any year since 1940. It compared with 1.15% in 1966 and 1.23 in 1965, and the low of 0.92 in 1940. The 1967 rate represents a continuing decline in the annual population growth rate that began in 1957—influenced primarily by the lowering of the birth rate.

Deaths numbered about 1,860,000 in 1967, slightly less than in 1966. Since 1960, the death rate has remained virtually unchanged at about 9.5 deaths per thousand people. Since 1954, the death rate has fluctuated between 9.3 and 9.6 per thousand with no definite trend appearing in the 1954-1967 period.

Net civilian immigration, averaging about 390,000 annually since 1960, has contributed about 14.7% to population growth in that period. This represented an increase over the 300,000 annual average for the 1950s. The largest net gain from this source since 1950 was in 1966, when immigration added 456,000 persons to the population and in 1967, when net immigration amounted to 444,000. These recent increases probably reflect the effect of the Immigration Act of 1965 and the U. S.-Cuban agreement on the transfer of Cuban refugees to the U. S., both of which took effect in 1965.

Educational Attainments and Projections—About 55,100,000 persons 5 to 34 years old were enrolled in school or college in the United States in the fall of 1966. This represents 30% of the total population.

Of these, about 32,900,000 were enrolled

in grades 1 to 8, 13,400,000 in grades 9 to 12, and 6,100,000 in college. There were an additional 2,700,000 children in kindergarten excluding those below age 5.

The increase of enrollment in the last 6 years has been 8,800,000 or 19% over the 46,300,000 enrolled in October 1960. The rate of increase varied considerably by level of school. During this 6-year period, there was a 70% gain in college enrollments, 30% in high schools (grades 9 to 12) and 8% in elementary (grades 1 to 8).

Increased enrollment in elementary and secondary schools was due primarily to increases in the population 5 to 17 years old rather than in changes in the percent of persons enrolled. College and professional enrollments, however, reflect both an increase in the percent enrolled among persons aged 18 to 34, and an increase in the total population at these ages.

In May, 1967, Census Bureau population specialists revised school enrollment projections for 1985 upward from those anticipated just a year earlier. College enrollment, according to the new projections, would rise to between 9,700,000 and 11,800,000 by 1985 from the October, 1966 total of 6,100,000 depending upon assumptions about the proportions of the population enrolled in colleges. A year earlier, specialists projected college enrollment to a 1985 range of between 9,000,000 and 11,600,000 students. High school enrollment by 1985 would rise to a range of 13,800,000 to 17,300,000, the revised projections indicate. A year earlier, the projections for high school were in the range of 13,300,000 and 17,000,000. The 1966 total was 13,400,000. New projections for elementary and kindergarten call for a range of 35,400,000 to 47,700,000 pupils by 1985. A year earlier, the range was 34,300,000 to 46,600,000 pupils, and the total for October, 1966, was 35,600,000.

Farm Population Drop Continues—An average of 10,817,000 persons lived on farms in rural areas of the United States in 1967. Of the total U. S. population, 5.5% or 1 in 18, lived on a farm. The 1967 estimate of farm residents is 778,000 less than 1966.

Since 1960, when there were 15,600,000 farm residents, the farm population has declined approximately 4.8 million persons, an average annual decline of 5.3%.

Family Income Higher—Median income for all families in 1966 was \$7,400, more than double the median figure of \$3,000 in 1947. Despite rises in consumer prices the gain in real income over 1947 is about 69%.

Over the past 19 years, median family income has increased at an average annual rate of 5% in current dollars and 3% in constant dollars. This increase in family income parallels the expansion of general economic activity in the U. S. for the same period during which time the Gross National Product increased at an annual rate of about 6% in current dollars and 4% in constant dollars.

Families receiving income under \$3,000 (in current dollars) have decreased from 49% in 1947 to 14% in 1966, and those receiving \$10,000 or more have increased from 3% in 1947 to about 30% in 1966.

ESTIMATED POPULATION OF THE UNITED STATES

¹1860 figure is for Dakota Territory; 1870 figures are for parts of Dakota Territory.

U. S. Total includes persons (5,318 in 1830 and 6,100 in 1840) on public ships in the service of the United States not credited to any census, division, or state.

1790—Connecticut 237,916; Delaware 59,096; Georgia 82,548; Kentucky 73,677; Maine 96,540; Maryland 319,728; Massachusetts 378,787; New Hampshire 141,885; New Jersey 184,139; New York 340,120; North Carolina 393,751; Pennsylvania 344,373; Rhode Island 68,825; South Carolina 249,073; Tennessee 35,691; Vermont 85,425; Virginia 747,610. Total 3,929,214.

1800—Connecticut 251,002; Delaware 64,273; Dist. of Col. 14,093; Georgia 162,686; Indiana 5,641; Kentucky 220,955; Maine 151,719; Maryland 341,548; Massachusetts 422,845; Mississippi 8,850; New Hampshire 183,858; New Jersey 211,149; New York 589,051; North Carolina 478,103; Ohio 45,365; Pennsylvania 602,365; Rhode Island 69,122; South Carolina 354,591; Tennessee 105,602; Vermont 154,465; Virginia 880,200. Total 5,308,483.

United States Area and Population: 1790 to 1960

Source: Bureau of the Census

Area figures represent area on indicated date including in some cases considerable areas not then organized or settled, and not covered by the census. Area figures have been adjusted to bring them into agreement with remeasurements made in 1940.

Census date	Area (square miles)			Population		
	Gross	Land	Water	Per sq. mile of land area	Increase over preceding census

U. S. Center of Population, 1790 to 1960

Source: Bureau of the Census

Center of population is that point which may be considered as center of population gravity of the U. S. or that point upon which the U. S. would balance if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from that point.

Year	North latitude	West longitude	Approximate location
CONTINUED U.S. ¹			
1790.....	39 16 30	76 11 12	23 miles east of Baltimore, Md.
1800.....	39 16 6	76 56 30	18 miles west of Baltimore, Md.
1810.....	39 11 30	77 37 12	40 miles northwest by west of Washington, D. C. (in Virginia).
1820.....	39 5 42	78 33 0	16 miles east of Moorefield, W. Va. ²
1830.....	38 57 54	79 16 54	19 miles west-southwest of Moorefield, W. Va. ³
1840.....	39 2 0	80 18 0	16 miles south of Clarksburg, W. Va. ²
1850.....	38 59 0	81 19 0	23 miles southeast of Parkersburg, W. Va. ³
1860.....	39 0 24	82 48 48	20 miles south by east of Chillicothe, Ohio.
1870.....	39 12 0	83 35 42	48 miles east by north of Cincinnati, Ohio.
1880.....	39 8 8	84 39 40	8 miles west by south of Cincinnati, Ohio (in Ky.)
1890.....	39 11 56	85 32 53	20 miles east of Columbus, Ind.
1900.....	39 9 36	85 48 54	6 miles southeast of Columbus, Ind.
1910.....	39 10 12	86 32 20	In the city of Bloomington, Ind.
1920.....	39 10 21	86 43 15	8 miles south-southeast of Spencer, Owen County, Ind.
1930.....	39 8 45	87 8 6	3 miles northeast of Linton, Greene County, Ind.
1940.....	38 56 54	87 22 35	2 miles southeast by east of Carlisle, Haddon township, Sullivan County, Ind.
1950.....	38 50 21	88 9 33	8 miles north-northwest of Olney, Richland County, Ill.
1960.....	38 37 57	88 52 23	4 miles east of Salem in Marion County, Ill.
UNITED STATES ³			
1950.....	38 48 15	88 22 8	About 3 miles northeast of Louisville, in Clay County, Ill.
1960.....	38 35 58	89 12 35	6½ miles northwest of Centralia, Ill., and approximately 50 miles east of East St. Louis, Ill.

¹Excludes Alaska and Hawaii.²West Virginia was set off from Virginia Dec. 31, 1862, and admitted as a State June 20, 1863.³Includes Alaska and Hawaii.

U. S. Places of 2,500 or More Population—with ZIP Codes

Source: U. S. Bureau of the Census, U. S. Post Office Dept.

Below are the population figures and ZIP codes of all the urban places in the United States (all incorporated and unincorporated places of 2,500 inhabitants or more, and the towns, townships and counties classified by the Bureau of the Census as urban). Included are data from the 1960 census and from all special censuses conducted by the Bureau of the Census between April 1, 1960, and Jan. 1, 1968. Also listed, in italics, are the towns of 2,500 inhabitants or more in New England (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont), where such minor civil divisions have greater significance than in most other states. It will be noted that some sizable unincorporated areas such as certain towns in New York State are not listed by the Bureau of the Census as urban places.

ZIP Code numbers appear in left-hand column. If the place name is not the name of a post office, the ZIP Code number for the post office serving that place is listed where possible. If not possible, no ZIP code is listed.

CAUTION—Where an asterisk (*) appears before the ZIP Code number of a city, ask your local postmaster for the correct ZIP Code number for a specific address within that city.

A national directory showing all ZIP codes may be purchased for \$7.00 from the Superintendent of Documents, Government Printing Office, Washington, D. C. 20402.

Where special censuses were taken after April 1, 1960, the year taken appears after the name of the place. Places where population was changed by annexing areas after April 1, 1960, are indicated by (A). In many cases both annexation and a special census have taken place.

Do You Need A Birth Certificate?

Although a birth certificate is of great value in situations requiring documentation of date and place of birth, such as qualifying for Social Security or Medicare benefits, in obtaining a passport or in qualifying for certain jobs, many Americans do not possess such a certificate and may not be able to obtain one because the birth was not recorded or because records are not available.

In most instances a transcript from early census records is acceptable as a substitute for a birth certificate. The Bureau of the Census maintains a special office and a staff of trained researchers especially to provide this service.

to cover the cost.

You may obtain an application form at your local Social Security Office or from the Personal Census Service Branch, Bureau of the Census, Pittsburg, Kan. 66762. Your application form should be accompanied by a check or money order in the amount of \$4 for a regular search, or \$5 for an expedited search.

Transcripts from a regular search of census records usually are available within 4 to 6 weeks; from an expedited search in about 2 weeks.

Applications should be made by the person him-

Population and Area of Counties, Census of 1960

WITH NAMES OF COUNTY SEATS OR COURT HOUSES, LAND AREA IN SQUARE MILES

Source: Bureau of the Census

There are 3,071 counties and parishes in the United States and 59 county equivalents making a total of 3,130. The county equivalents include 34 independent cities in Virginia, 1 in Maryland and 1 in Missouri; the District of Columbia; and the parts of Yellowstone National Park in each of 3 states—Idaho, Montana and Wyoming. Also included are 13 election districts in Alaska. It should be noted, however, that the 1950 and 1960 censuses list 24 election districts in Alaska; the number was reduced as of Dec. 7, 1961. Land areas revised in 1967.

Where special censuses were taken after April 1, 1960, the year taken appears after the name of the county. The population total for the state does not reflect the change except in Rhode Island.

Population of World's Largest Urban Areas

City populations often cannot be used to compare urban areas because city limits may underbound or overbound the built-up or urban area. The problem of comparison is compounded by the difficulty in obtaining reliable population data for a common year. The ranking of urban areas below represents one attempt at comparing the world's largest urban areas, taking into account, where necessary and within the limits of available data, urban development extending outward from the principal city named in the table. Thus, the Tokyo area in 1965 included the cities of Tokyo and Yokohama plus neighboring smaller cities, towns and villages, and the New York urban area in 1960 included part or all the population of 8 New Jersey and 5 New York counties in addition to the 5 boroughs of New York City. On the other hand, the urban areas of Seoul and Madrid in 1965 did not run beyond the city limits.

Tokyo, Japan (census 1965)	14,770,727	Diakarta, Indonesia (census 1961)	2,906,533
*New York, N. Y. (census 1960)	14,114,927	Delhi, India (est. 1966)	2,793,131

*Under U. S. jurisdiction by treaty with Panama.

(a) less than 0.5 sq. mi.

(b) The territory under U. S. sovereignty also includes Palmyra Island, Kingman Reef; Howland, Baker and Jarvis Islands; Tutuila, the Manua Islands, and all others of the Samoa group east of longitude 171° W., together with Swains Island and Navassa Island. U. S. claims to sovereignty over the following western Pacific Islands are disputed by the United Kingdom: Caroline Atoll, Christmas, Flint, Malden, Starbuck, Vostok, Funafuti Atoll, Nukufetau Atoll, Nukunono Atoll, Nurakita, Birnie Atoll, Gardner Atoll, Hull Atoll, McKean Atoll, Sydney Atoll, Phoenix Atoll. Also disputed are sovereignty over Canton and Enderbury Islands. New Zealand disputes U. S. claims to the following atolls: Atafu, Fakaofo, Nukunono, Danger, Manahiki, Rakahanga and Penrhyn, population not enumerated.

(c) Area is for Navassa (2 sq. mi.), Baker, Howland, and Jarvis (combined area 3 sq. mi.), and Palmyra (4 sq. mi.). Areas of other islands listed in footnote (b) not available.

(d) Under United Nations Trusteeship System with U. S. as administering authority.

(e) Excludes citizens temporarily abroad on private business, travel, etc.; these were enumerated at home as absent from their households.

(f) Citizens abroad for extended periods enumerated voluntarily and probably less complete than other categories of Americans abroad. (g) Not available. (h) Leased (1914) from Rep. of Nicaragua for 99 yrs.

Incidence of Poverty for Families

Source: Bureau of the Census (In thousands)

1966	Total	Below Level		1966	Total	Below Level	
		No.	%			No.	%
All families	48,922	6,086	12.4	Female head	5,172	1,819	35.0
Male head	43,750	4,276	9.8	White	4,010	1,111	27.7
White	40,007	3,264	8.2	No children	1,936	256	13.2
Below age 65	34,626	2,164	6.2	With children	2,074	855	41.2
65 and over	5,381	1,100	20.4	1 child	827	244	29.5
Employed in March 1967	33,254	1,712	5.1	2 children	607	226	37.2
White collar, skilled				3 children	332	184	55.4
Craftsmen	21,961	670	3.1	4 children	177	101	57.1
Semiskilled operatives	6,369	365	5.7	5 children or more	131	100	76.3
Service workers	1,741	139	7.8	Nonwhite	1,162	699	60.2
Laborers	1,638	280	16.9	No children	275	71	26.9
Farmers	1,485	258	17.4	With children	887	625	70.5
Nonwhite	3,743	1,012	27.0	1 child	281	169	49.3
Below age 65	3,318	808	24.4	2 children	220	140	63.6
65 and over	425	204	48.0	3 children	135	104	77.0
As applied to 1966 incomes the poverty level of nonfarm residents ranges from \$1,560 for a woman 65 or over living alone to \$5,440 for a family of 7 or more; it was \$3,335 for a nonfarm family of four.				4 children	116	101	87.1
				5 children or more	195	171	87.7

Marine Disasters Since 1861; Major War Losses

Figures show lives lost. Only more serious disasters are listed. See also Chronology.

(B)—burned, (C)—collision, (D)—damaged, (E)—exploded, (F)—foundered at sea, (G)—ran aground, (M)—sunk by mine, (S)—sunk in storm, (T)—torpedoed, (V)—vanished, (W)—wrecked. Braz.—Brazilian, Br.—British, Fr.—French, Ger.—German, It.—Italian, Jap.—Japanese, Sp.—Spanish, Sw.—Swedish.

CIVIL WAR 1861-65

Mar. 8	Cumberland, Congress. (Fed.) sunk by Merrimac (Conf.)	
Mar. 9	Battle of Merrimac (Conf.) and Monitor (Fed.)—5-hr. battle ended in a draw; Merrimac burned by Conf. in May, to prevent capture	
Dec. 31	Monitor (S) off Cape Hatteras	
Feb. 7	Orpheus (W) off New Zealand	190
Apr. 27	Anglo-Saxon (W) off Cape Race	237
June 19	Alabama (Conf.) sunk by Kearsarge (Fed.)	
Feb. 7	Housatonic (Fed.) (T) by the H. L. Hunley off Charleston, S. C. The Hunley swamped and its crew of 9 was lost: first recorded sinking of warship by submarine	
Apr. 27	Sultana (E) on Mississippi River	1,450
Aug. 24	Eagle Speed (F) near Calcutta	265
Jan. 11	London (F) in Bay of Biscay	230
Jan. 30	Missouri (E) on Ohio River	100
Oct. 3	Evening Star (F) from New York	250
Oct. 29	Rhone, Wye and 50 other vessels (W) at St. Thomas, West Indies by hurricane	1,000
Apr. 9	Sea Bird (B) on Lake Michigan	100
Apr. 17	United Kingdom (V)	80
Dec. 4	America; United States (B) Ohio R.	72
Oct. 27	Stonewall (B) below Cairo, Ill.	200
Jan. 24	Onelda (C) off Yokohama	115
Jan. 28	City of Boston (C) in Atlantic	191
Sept. 7	Br. warship Captain (F) off Spain	472
Oct. 19	Cambria lost off Inishtrahull	170
Jan. 28	H. R. Arthur (E)	87
July 30	Westfield (ferry) (E) N. Y. harbor	100
Nov. 7	Mary Celeste left New York for Genoa; found abandoned in Atlantic 4 weeks later; crew never heard from	
Jan. 22	Northfleet (C) off Dungeness	300
Apr. 1	Br. Atlantic (W) off Nova Scotia	547
Nov. 23	Ville de Havre (C) in Atlantic	230
Dec. 6	Cospatrick (B)	470
May 7	Schiller (W) on Scilly Islands	200
Nov. 4	Pacific (C) off Cape Flattery	236
Dec. 6	Deutschland (W) mouth of Thames	157
July 15	Eten (W) off Alparalzo	100
Nov. 24	Huron (W) off North Carolina	100
Nov. ..	Atacama (W) off Caldera, Chile	104
Jan. 31	Metropolis (W) off North Carolina	100
Mar. 24	Eurydice (F) near Isle of Wight	300
Sept. 3	Princess Alice (C) on Thames River	700
Feb. 12-16	13 fishing schooners (F) off N. F.	144
Dec. 2	Borussia sunk off Spain	174
Jan. 31	Atlanta (V) from Bermuda	290
Oct. 16	Alpena (F) Lake Michigan	60
Nov. 24	Uncle Joseph (C) off Spezzia	250
Apr. 29	Tararua (W) off New Zealand	131
May 24	Victoria capsized in Thames River, Canada	200
June ..	U. S. Naval vessel Jeanette crushed in Arctic ice and sunk 500 miles off Siberian coast. Cmdr. G. W. De Long and 21 others lost; 11 survived, including Lt. G. W. Melville. The vessel had been in the ice pack since Sept., 1879. It had sailed from San Francisco in July, 1879, for the North Pole, having been bought and outfitted by James Gordon Bennett	
Aug. 30	Teuton (W) off Cape of Good Hope	200
Sept. 14	Asia (F) near Salt St. Marie	98
Jan. 19	Ger. Cambria (C) iceberg	389
July 3	Daphne capsized in Clyde	124
Jan. 18	City of Columbus (W) off Mass.	103
Apr. 3	Daniel Steinman (W) off N. S.	131
Apr. 18	Pomona; State of Florida (C)	150
July 22	Sp. Gligon; British Lexham (C)	150
Jan. 20	Kapunda; Ada Melmore (C) Brazil	300
Nov. 19	W. A. Scholten (C) in Eng. Channel	134
Aug. 14	Geiser; Thingvalla (C)	105

Sept. 12	It. steamer; La France (C)	89
Mar. 16	U. S. warships Trenton, Vandalla and Nipsic; Ger. Adler and Eber (W) at Apia, Samoa Islands, by hurricane	147
Jan. 2	Persia (W) on Corsica	130
Feb. 17	Br. Duberg (W) in China Sea	400
Mar. 1	Quetta (W) off Cape York	124
Sept. 19	Turkish frigate Otrugul (F) off Japan	540
Nov. 10	British cruiser Serpent (S) off Spain	167
Dec. 27	Shanghai (B) in China Sea	100
Mar. 17	Utopia (C) off Gibraltar	574
Apr. 22	Blanco Encalada (E) in Caldera Bay	200
Jan. 13	Nanchow (W) in China Sea	414
May 22	Braz. warship sunk, La Plata R.	120
Oct. 28	Roumania (W) off Portugal	113
Feb. 8	Trinacria (W) off coast of Spain	115
Feb. 11	Naronic (V) Liverpool to New York	
June 22	Br. battleship Victoria (C) off Syria	350
Feb. 2	Kearsarge (W) on Roncado Reef	
Nov. 1	Walraps (W) off New Zealand	134
Jan. 30	Ger. Elbe; Br. Crathie (C)	335
Mar. 11	Sp. Reina Regenta (F) in Atlantic	400
June 17	Drummond Castle (W) off France	250
Feb. 15	U. S. battleship Maine (E) in Havana harbor	269

SPANISH-AMERICAN WAR

May 1	Battle of Manila Bay—Spanish Reina Cristina; Castilla; cruisers Isla de Cuba and Isla de Luzon; gunboats Don Juan de Austria, Don Antonio de Ulloa and Marques del Duero, under Adm. Patricio Montojo, destroyed by Commodore George Dewey's fleet; Sp., 167 killed, 214 wounded; U. S., 7 wounded

1918 Oct. 4	Shell plant, Morgan Station, N. J.	64	1960 Oct. 4	Chemical plant, Kingsport, Tenn.	10
1919 May 22	Food plant, Cedar Rapids, Iowa	44	1960 Oct. 25	Gas, Windsor, Ont., store	11
1920 Sept. 16	Wall St., New York, bomb	30	1962 Jan. 16	Gas pipeline, Alberta, Canada	19
1924 Jan. 3	Food plant, Pekin, Ill.	42	1962 Mar. 3	Gasoline truck, Syria	31
1937 Mar. 18	New London, Tex., school	294	1962 Oct. 3	Telephone Co. office, New York	23
1940 Sept. 11	Hercules Powder, Kenvil, N. J.	51	1963 Jan. 2	Packing plant, Terre Haute, Ind.	16
1942 June 5	Ordinance plant, Elwood, Ill.	49	1963 Mar. 9	Chem. plant, Modderfontein, S. Af.	45
1943 Apr. 14	Bombay, India, harbor	700	1963 Aug. 13	Explosives dump, Gauthi, India	325
1944 July 17	Port Chicago, Calif., pier	322	1963 Oct. 31	State Fair Coliseum, Indianapolis	72
1944 Oct. 21	Liquid gas tank, Cleveland	135	1964 July 23	Bone, Algeria, harbor, munitions	100
1947 Apr. 16	Texas City, Tex., pier	561	1965 Mar. 4	Gas pipeline Natchitoches, Ala.	17
1948 July 28	Farben works, Ludwigshafen, Ger.	184	1965 Aug. 9	Missile silo, Searcy, Ark.	53
1950 May 19	Munition barges, S. Amboy, N. J.	30	1965 Oct. 21	Bridge, Tila Bund, Pakistan	80
1956 Aug. 7	Dynamite trucks, Cali, Colombia	1,100	1965 Oct. 30	Marketplace, Cartagena, Col.	48
1956 Dec. 3	Brooklyn, N. Y., pier	10	1965 Nov. 24	Armory, Keokuk, Iowa	20
1957 Dec. 5	Villa Rica, Ga., gas line	17	1966 Oct. 13	Chemical plant, La Salle, Que.	11
1958 Apr. 18	Sunken munition ship, Okinawa	40	1967 Feb. 17	Chemical plant, Hawthorne, N.J.	20
1958 May 22	Nike missiles, Leonardo, N. J.	10	1967 Dec. 25	Apartment bldg., Moscow	20

Major Kidnaping Crimes

Charles B. Ross, 4, in Germantown, Pa., July 1, 1874. \$20,000. Victim delivered. Victim found, abducted, shot while committing burglary.

Edward A. Cudahy, Jr., 16, in Omaha, Neb., Dec. 18, 1900. Returned Dec. 20 after \$25,000 ransom paid. Pat Crowe confessed.

Robert Franks, 13, in Chicago, May 22, 1924, by two youths, Loeb and Leopold, who killed boy. Demand for \$10,000 ignored. Loeb died in prison, Leopold paroled 1958, freed Mar. 16, 1963.

Marian Parker, 12, in Los Angeles. Dec. 15, 1927, returned dead after \$1,500 paid. William E. Hickman convicted, hanged.

Charles A. Lindbergh, Jr., 20 mos. old, in Hopewell, N. J., Mar. 1, 1932; found dead May 12. Ransom of \$50,000 was paid to man identified as Bruno Richard Hauptmann, 35, paroled German convict who entered U.S. illegally. Hauptmann passed ransom bill and \$14,000 marked money was found in his garage. He was convicted after spectacular trial at Flemington, N.J., electrocuted in Trenton, N. J. prison, Apr. 3, 1936.

William A. Hamm, Jr., 39, in St. Paul, June 15, 1933. \$100,000 paid. Alvin Karpis given life.

Charles F. Urschel, in Oklahoma City, July 22, 1933. Released July 31 after \$200,000 paid. Geo. (Machine Gun) Kelly and 5 others given life.

Edward G. Bremer, 37, St. Paul, Minn., Jan. 17, 1934. Released Feb. 7 after \$200,000 paid. Two given life.

George Weyerhaeuser, 9, in Tacoma, Wash., May 24, 1935. Returned home June 1 after \$200,000 paid. Kidnapers given 20 to 60 years.

Charles Mattson, 10, in Tacoma, Wash., Dec. 27, 1936. Found dead Jan. 11, 1937. Kidnapers asked \$28,000, failed to contact, escaped.

Arthur Fried, in White Plains, N.Y., Dec. 4, 1937. Body not found. Two kidnapers executed.

Peter Levine, 12, in New Rochelle, N.Y., Feb. 24, 1938. Disembodied body found May 29. \$30,000 ransom not paid. Kidnapers escaped.

Robert C. Greenlease, 6, son of a Kansas City, Mo., motor car dealer, taken from school Sept. 28, 1933, and held for \$800,000. Body found Oct. 7, when Mrs. Bonnie Brown Heady and Carl A.

Hall were arrested. They pleaded guilty and were executed Dec. 28. Two arresting officers—Louis Shoulters and Elmer Dolan—were sentenced to 3 yrs. and 2 yrs., respectively, for perjury in describing recovery of \$300,000 of the ransom. Hall claimed he had over \$590,000 when arrested.

Evelyn Smith, 23, in Phoenix, Ariz., June 9, 1954. Released unharmed June 10, after \$75,000 was paid.

Peter Weinberger, 32 days old, Westbury, L.I., N.Y., July 4, 1956, for \$2,000 ransom, not paid. Child found dead. Angelo John LaMarca, 31, convicted, executed.

Cynthia Ruotolo, 6 yrs. old, taken from carriage in front of Hamden, Conn., store Sept. 1, 1956. Body found Sept. 6 in lake two miles away.

Lee Cray, 8, in Everett, Wash., Sept. 22, 1957, for \$10,000 ransom, not paid. Escaped after 3 days, led police to George E. Collins, convicted.

Eric Peugeot, 4, taken from playground at St. Clair, La., Aug. 19, 1958, Paris, Apr. 12, 1960. Released unharmed 3 days later after payment of undisclosed sum to kidnaper who had demanded \$100,000. Raymond Rolland and Pierre-Marie Larcher sentenced to 20 years in prison Oct. 31, 1962, as kidnapers.

Frank Sinatra, Jr., 19, from hotel room in Lake Tahoe, Calif., Dec. 8, 1963. Released Dec. 11 after his father paid \$240,000 ransom. John W. Irwin, Barry W. Keenan and Joseph C. Ansler convicted, sentenced to prison; most of ransom recovered.

Madeleine Dassault, plane-maker's wife, in Paris, May 23, 1964; found safe next day; 3 arrested.

Daniel Jesse Goldman, 18, abducted Mar. 18, 1966, from his home near Bal Harbour, Fla.

Mrs. Betty Hill, 42, was held prisoner in her Boulder, Colo., home Jan. 6, 1967, by an intruder who released her shortly afterward when her husband paid \$50,000 ransom.

Kenneth King, 11, was abducted from his bedroom in Beverly Hills, Calif., Apr. 3, 1967, but was freed unharmed 3 days later after his father paid \$250,000 ransom.

Chief Political Assassinations Since 1865

1865—April 14. Abraham Lincoln, President of the United States, in Washington; died April 15.

1881—Mar. 13. Alexander II, of Russia—July 2. James A. Garfield, President of the United States, in Washington; died Sept. 19.

1893—Oct. 28. Carter H. Harrison, Sr., Mayor of Chicago.

1894—June 24. Marie Francois Sadi-Carnot, President of France.

1900—Jan. 30. William Goebel, Governor of Kentucky—July 29. Humbert I, King of Italy.

1901—Sept. 6. William McKinley, President of the United States, in Buffalo; died Sept. 14. Leon Czolgosz executed for the crime Oct. 29.

1903—June 11. King Alexander I and Queen Draga of Serbia by army officers at Belgrade.

1913—Feb. 23. Francisco I. Madero, President of Mexico and Jose Pino Suarez, the Vice-President—March 18. George, King of Greece.

1914—June 28. Archduke Francis Ferdinand of Austria-Hungary and his wife, Countess Sophie Chotek, Duchess of Hohenberg, in Sarajevo, Bosnia (later part of Yugoslavia), by Gavrillo Princip.

1918—July 12. Grand Duke Michael of Russia, at Perm—July 16, Nicholas II, abdicated Czar of Russia; his wife, the Czarina Alexandra; their son, Czarévitch Alexis, and their daughters, Grand Duchesses Olga, Tatiana, Marie, Anastasia, and 4 members of their household were murdered in cold blood by Bolsheviks at Ekaterinburg—Dec. 14. Pres. Sidonio Pais of Portugal, in Lisbon.

1920—May 20. Gen. Venustiano Carranza, President of Mexico, in Tlaxcaltenango.

1923—July 20. Gen. Francisco "Pancho" Villa, ex-rebel leader, in Parral, Mexico.

1928—July 17. Gen. Alvaro Obregon, President-elect of Mexico, in San Angel, Mexico.

1933—Feb. 15. In Miami, Fla., Joseph Zangara, anarchist, shot at President-elect Franklin D. Roosevelt, but a woman seized his arm, and the bullet fatally wounded Mayor Anton J. Cermak, of Chicago, who died March 6. Zangara was electrocuted on March 20, 1933.

1934—July 25. In Vienna, Engelbert Dollfuss, Chancellor of Austria, by Nazi, in the chancellery. Otto Planetta convicted and hanged—Oct. 9. In Marseilles, King Alexander I of Yugoslavia and French Foreign Minister Jean Louis Barthou.

1935—Sept. 8. U. S. Senator Huey P. Long, shot in Baton Rouge, La., by Dr. Carl Austin Weiss, who was slain by Long's bodyguards.

1940—Aug. 20. Leon Trotsky (Leba Bronstein), 63, exiled Russian war minister, near Mexico City. Killer, identified as Ramon Mercader del Rio, a Spaniard, served 20 years in Mexican prison.

1942—Dec. 24. Adm. Jean B. Darian, 61, Algiers.

1948—Jan. 30. Mohandas K. Gandhi, 78, shot in New Delhi, India, by Nathuram Vinayak Godse.

36—Sept. 17. Count Folke Bernadotte, U. N. Mediator for Palestine, ambushed in Jerusalem.

1950—Nov. 13. Col. C. Delgado Chabaud, President of Venezuela, in Caracas.

1955—Jan. 2. Jose Antonio Remon, President of Panama, by machine gun at race track, Panama.

1956—Sept. 21. Anastasio Somoza, President of Nicaragua, in Leon; died Sept. 29.

1957—July 26. President Carlos Castillo Armas of Guatemala, in Guatemala City by one of his own guards, who then committed suicide.

1958—July 14. King Faisal of Iraq; his uncle, Crown Prince Abdul Illah, and July 15, Premier Nuri as-Said, by rebels in Baghdad.

1959—Sept. 25. Prime Minister S. W. R. D. Bandaranaike of Ceylon, by Buddhist monk in Colombo.

1960—Aug. 29. Premier Hazza Majid of Jordan and 10 others killed by time bomb in his office.

1961—Jan. 17. Ex-Premier Patrice Lumumba of the Congo, ex-Youth Minister Maurice Mpolo and Senate Vice President Joseph Okito in Katanga Province—May 30. Dominican dictator Rafael Leonidas Trujillo Molina shot to death by assassins near Ciudad Trujillo.

1963—Jan. 13. President Sylvanus Olympio of Togo, by ex-soldiers at Lome—Nov. 22. U. S. President John F. Kennedy fatally shot in Dallas, Tex.; Lee Harvey Oswald accused.

1965—Jan. 21. Iraqi Premier Hassan Ali Mansour fatally wounded by assassin in Teheran; 4 executed. Feb. 21. Malcolm X, Negro nationalist, fatally shot in New York City; 3 sentenced to life.

1966—Sept. 6. Prime Minister Hendrik F. Verwoerd of South Africa stabbed to death in parliament at Capetown by drifter later ruled insane.

1968—Apr. 4. Rev. Dr. Martin Luther King, Jr., fatally shot in Memphis, Tenn.; suspect James Earl Ray captured in London—June 5. Sen. Robert F. Kennedy (D., N. Y.) shot by assassin in Los Angeles, died next day; Sirhan Sirhan, resident alien, charged with murder.

See also Chronology.

ASSASSINATION ATTEMPTS

1910—Aug. 6. New York City Mayor Wm. J. Gaynor shot and seriously wounded by discharged city employee on liner about to leave for Europe.

1912—Oct. 14. Former U. S. President Theodore Roosevelt shot and seriously wounded by demented man in Milwaukee.

1950—Nov. 1. In an attempt to assassinate President Truman, two men identified as members of a Puerto Rican nationalist movement—Griselio Torresola and Oscar Collazo—tried to shoot their way into Blair House. Torresola was killed, and a guard, Pvt. Leslie Coffelt was fatally shot. Collazo, wounded, recovered and was tried and convicted Mar. 7, 1951 for the murder of Coffelt. His death sentence was commuted to life imprisonment by President Truman. July 24, 1952.

1964 Feb.	25 Eastern Air Lines DC-8	Crashed in Lake Pontchartrain, La.	58
1964 Feb.	29 Br. Eagle Bristol Britannia	Crashed near Innsbruck, Austria	83
1964 Mar.	1 Paradise Airline Constellation	Crashed in snow storm, Lake Tahoe, Calif.	85
1964 May	7 Pacific Airlines F-27	Crashed near Dublin, Calif.	44 ¹
1964 May	11 U.S. MATS C-135 Stratolifter	Crashed at Clark AFB, Philippines	76
1965 Feb.	3 Eastern Airlines DC-7B	Plunged into Atlantic after takeoff, New York	66
1965 May	20 Pakistan Boeing 720-B	Crashed at Cairo, Egypt, Airport	121
1965 June	25 U. S. Air Force C-135 transport	Crashed after takeoff from Los Angeles	84
1965 Aug.	16 United Airlines Boeing 727	Plunged into Lake Michigan near Chicago	30
1965 Aug.	24 U. S. Marine Corps transport	Crashed after takeoff from Hong Kong	58
1965 Nov.	8 American Airlines Boeing 727	Crashed in storm near Cincinnati, Ohio	58
1965 Nov.	11 United Airlines Boeing 727	Crashed, burned in landing at Salt Lake City	42
1965 Dec.	4 TWA Boeing 707, Eastern shuttle	Collided over Danbury, Conn.	4
1966 Jan.	24 Air India Boeing 707 jetliner	Crashed on Mont Blanc, Switzerland	117
1966 Feb.	4 All-Nippon Boeing 727	Plunged into Tokyo Bay	134
1966 Mar.	4 Canadian Pacific DC-8 jet	Crashed in landing at Tokyo, Airport	133 ¹
1966 Mar.	1 BOAC Boeing 707 jetliner	Crashed on Japan's Mount Fuji	124
1966 Apr.	22 Military-chartered Electra	Crashed in storm near Ardmore, Okla.	82
1966 Aug.	6 Braniff BAC-111 jetliner	Crashed near Falls City, Neb.	42
1966 Sept.	1 Britannia 102 turboprop	Crashed near Ljubljana, Yugoslavia	97
1966 Nov.	24 Bulgarian Tabson Ilyushin-18	Crashed near Bratislava, Czechoslovakia	82
1966 Dec.	24 U. S. military-chartered CL44	Crashed into village in South Vietnam	129 ¹
1967 Mar.	5 Lake Airlines Convair 580	Crashed in storm near Kenton, Ohio	38
1967 Mar.	9 TWA DC-9, twin-engine Beechcraft	Collided in air at Urbana, Ohio	26
1967 Mar.	30 Delta Air Lines DC-8	Hit motel at New Orleans	181
1967 Apr.	20 Swissair Britannia turboprop	Crashed at Nicosia, Cyprus	126
1967 June	3 Chartered British DC-8	Crashed into Mont Canigou, France	88
1967 June	4 Chartered British Argonaut	Crashed at Stockport, England	72
1967 June	23 Mohawk Airlines BAC-111	Crashed near Blossburg, Pa.	34
1967 June	2 Two U. S. Marine helicopters	Collided in air at Camp Lejeune, N. C.	22
1967 July	19 Piedmont Boeing 727, Cessna 310	Collided in air, Hendersonville, N. C.	82
1967 Oct.	12 British-Cypriot Mark IV Comet	Crashed into sea off Turkey	66
1967 Nov.	20 TWA Convair 880	Crashed in snowstorm at Cincinnati	68
1967 Dec.	8 Peruvian Faucett DC-4	Crashed near Huanuco, Peru	66

Including those on the ground and in buildings. ¹First fatal crash of commercial jet plane. ²Caused by bomb planted by John G. Graham in insurance plot to kill his mother, a passenger. ³Worst disaster involving single plane. ⁴First crash of commercial helicopter. ⁵Worst commercial air disaster; dead included all 84 aboard jet, all 44 aboard other plane and 6 on ground. ⁶Including 34 English schoolboys. ⁷Including 74 Army recruits. ⁸Tape recording indicated pilot was shot.

Elizabeth II.....	Eldest daughter of George VI, acceded Feb. 6, 1952.....	1952	..	..	..

Rulers of France; Kings, Queens, Presidents

CAESAR TO CHARLEMAGNE

Julius Caesar subdued the Gauls, native tribes of Gaul (France) 57 to 52 B.C. The Romans ruled 500 years. The Franks, a Teutonic tribe, reached the Somme from the East C. 250 A. D. By the 5th century the Merovingian Franks ousted the Romans. In 451 A. D., with the help of Visigoths, Burgundians and others, they defeated Attila and the Huns at Chalons-sur-Marne.

Childeric I became leader of the Merovingians 458 A. D. His son Clovis I (Chlodwig, Ludwig, Louis) crowned 481, founded the dynasty. After defeating the Alemanni (Germans) 496, he was baptized a Christian and made Paris his capital. His line ruled until Childeric III was deposed, 742.

The West Merovingians were called Neustrians, the eastern Austrasians. Pepin of Herstal (687-714) major domus, or head of the palace, of Austrasia, took over Neustria as dux (leader) of the Franks. Pepin's son, Charles, called Martel (the Hammer) defeated the Saracens at Tours-Poitiers, 732; was succeeded by his son, Pepin the Short, 741, who deposed Childeric III and ruled as king until 768.

His son, Charlemagne, or Charles the Great, (742-814), became king of the Franks, 768, with his brother Carloman, who died 771. He ruled France, Germany, parts of Italy, Spain, Austria, enforced Christianity. Was crowned Holy Roman Emperor by Pope Leo III in St. Peter's, Rome, Dec. 25, 800 A. D. Succeeded by sons, Louis I, the Pious, 814. At death, 840, Louis left empire to sons, Lothair (Roman emperor), Pepin I (king of Aquitaine); Louis II (of Germany); Charles the Bald (France). They quarreled and by the peace of Verdun, 843, divided the empire.

A.D. Name and year of accession

THE CAROLINGIANS

- 840 Charles I, the Bald, Roman Emperor, 875
- 877 Louis II, the Stammerer, son
- 879 Louis III (died 882) and Carloman (bro.)
- 884 Charles II, the Fat; Roman Emperor, 881
- 888 Eudes (Odo) elected by nobles. Ceded land to
- 898 Charles III, the Simple, son of Louis II, defeated by
- 922 Robert, brother of Eudes, killed in war
- 923 Rodolph (Raoul) Duke of Burgundy
- 936 Louis IV, son of Charles III
- 954 Lothair, son, aged 13, defeated by Capet
- 986 Louis V, the Sluggard, left no heirs

THE CAPETS

- 987 Hugh Capet, son of Hugh the Great
- 996 Robert (the Wise), his son
- 1031 Henry I, his son, last Norman
- 1060 Philip I (the Fair), son, king at 14
- 1108 Louis VI (the Fat), son
- 1137 Louis VII (the Younger), son
- 1180 Philip II (Augustus), son, crowned at Reims
- 1223 Louis VIII (the Lion), son
- 1226 Louis IX, son, crusader. Louis IX (1214-1270) reigned 44 years, arbitrated disputes with English King Henry III; led crusades, 1248 (captured in Egypt 1250) and 1270, when he died of plague in Tunis. Canonized 1297 as St. Louis
- 1270 Philip III (the Hardy), son
- 1285 Philip IV (the Fair), son, king at 17
- 1314 Louis X (the Headstrong), son. His posthumous son, John I, lived only 7 days
- 1316 Philip V (the Tall), brother of Louis X
- 1322 Charles IV (the Fair), brother of Louis X

HOUSE OF VALOIS

- 1328 Philip VI (of Valois), grandson of Philip III
- 1350 John II (the Good), his son, retired to England
- 1364 Charles V (the Wise), son
- 1380 Charles VI (the Beloved), son
- 1422 Charles VII (the Victorious), son. In 1429 Joan of Arc (Jeanne d'Arc) promised Charles to oust the English, who occupied northern France. Joan won at Orleans and Patay and had Charles crowned at Reims July 17, 1429. Joan was captured May 24, 1430, and executed May 30, 1431, at Rouen for heresy. Charles ordered her rehabilitation, effected 1455. Agnes Sorel was Charles' mistress
- 1461 Louis XI (the Cruel), son, civil reformer
- 1483 Charles VIII (the Affable), son
- 1498 Louis XII, great grandson of Charles V
- 1515 Francis I, of Angoulême, nephew, son-in-law. Francis I (1494-1547) reigned 32 years, fought 4 big wars, was patron of the arts, aided Cellini, del Sarto, Leonardo da Vinci, Raphael. Embellished Fontainebleau
- 1547 Henry II, son, killed at a joust in a tournament. He was the husband of Catherine de Medici (1519-1589) and the lover of Diane de Poitiers (1499-1566). Catherine was born in Florence, daughter of Lorenzo de Medici. By her marriage to Henry II she became the mother of Francis II, Charles IX, Henry III and Queen Margaret (Reine Margot) wife of Henry IV. She persuaded Charles IX to order

the massacre of Huguenots on St. Bartholomew, Aug. 24, 1572, the day her daughter was married to Henry of Navarre

- 1559 Francis II, son of Henry II. In 1548, Mary, Queen of Scots since infancy, was betrothed when 6 to Francis, aged 4. They were married 1558. Francis died 1560, aged 16; Mary ruled Scotland, abdicated 1567.
- 1560 Charles IX, brother of Francis II
- 1574 Henry III, brother, assassinated

HOUSE OF BOURBON

- 1589 Henry IV, of Navarre, assassinated. Henry IV made enemies when he gave tolerance to Protestants by Edict of Nantes, 1598. He was grandson of Queen Margaret of Navarre, literary patron. He married Margaret of Valois, Catherine de Medici's daughter; was divorced; in 1600 married Marie de Medici, Regent of France, 1610-17 for son, Louis XIII, and was exiled by Richelieu
- 1610 Louis XIII (the Just), son. Louis XIII (1601-1643) married Anne of Austria. His ministers were Cardinals Richelieu and Mazarin
- 1643 Louis XIV (the Grand Monarch), son. Louis XIV, was king 72 years. He exhausted a prosperous country in wars for thrones and territory. By revoking the Edict of Nantes (1685) he caused the emigration of the Huguenots. He said: "I am the state." His mistresses were Louise de la Valliere, Madame de Montespan and Madame de Maintenon
- 1715 Louis XV, great grandson. Louis XV (1710-1774) married a Polish princess. Lost Canada to the English. His favorites, Mme Pompadour and Mme. DuBarry influenced policies. Noted for saying: Apres moi, le deluge. (After me, the deluge.)
- 1774 Louis XVI, grandson; married Marie Antoinette, dau. of Empress Maria Theresa of Austria. King and queen beheaded by Revolution, 1793. Their son, called Louis XVII, died in prison, never ruled

FIRST REPUBLIC

- 1792 National Convention of the French Revolution
- 1795 Directory, under Barras and others
- 1799 Consulate, Napoleon Bonaparte, First Consul in 1802 elected Consul for life

FIRST EMPIRE

- 1804 Napoleon I, Emperor. Josephine (de Beauharnais) Empress, 1804-09; Marie Louise, Empress, 1810-1814. Her son, Francis (1811-1832) titular King of Rome, later Duke de Reichstadt and "Napoleon II," never ruled. Napoleon abdicated 1814, died 1821. See Memorable Dates.

BOURBONS RESTORED

- 1814 Louis XVIII King; brother of Louis XVI
- 1824 Charles X, brother; reactionary, deposed by the July Revolution, 1830

HOUSE OF ORLEANS

- 1830 Louis Philippe, the Citizen King

SECOND REPUBLIC

- 1848 Louis Napoleon. President, nephew of Napoleon I. He became:

SECOND EMPIRE

- 1852 Napoleon III, Emperor. Eugenie (de Montijo) Empress. Lost Franco-Prussian war, deposed 1870. Son, Prince Imperial (1856-79), died in Zulu War. Eugenie died 1920

THIRD REPUBLIC—PRESIDENTS

- 1871 Thiers, Louis Adolphe (1797-1877), historian
- 1873 MacMahon, Marshal Patrice M. (1808-1893)
- 1879 Grevy, Paul J. (1807-1891), resigned
- 1887 Sadi-Carnot, M. (1837-1894), assassinated
- 1894 Casimir-Perier, Jean P. P. (1847-1907), resigned
- 1895 Faure, Francois Felix (1841-1899)
- 1899 Loubet, Emile (1838-1929)
- 1906 Fallieres, Armand (1841-1931)
- 1913 Poincare, Raymond (1860-1934)
- 1920 Deschanel, Paul (1856-1922) resigned
- 1920 Millerand, Alexandre (1859-1943) resigned
- 1924 Doumergue, Gaston (1863-1937)
- 1931 Doumer, Paul (1867-1932) assassinated
- 1932 Lebrun, Albert (1871-1950) resigned 1940.
- Vichy govt. under German armistice: Henry Philippe Petain (1856-1951) Chief of State, 1940-1944
- Provisional govt., after liberation: Chas. de Gaulle (1890-) Oct., 1944-Jan. 21, 1946; Felix Gouin (1884-) Jan. 23, 1946; Georges Bidault (1899-) June 24, 1946.

FOURTH REPUBLIC—PRESIDENTS

- 1947 Auriol, Vincent (1884-1966)
- 1954 Coty, Rene (1883-1962)

FIFTH REPUBLIC—PRESIDENT

- 1958 De Gaulle, Charles Andre M. J. born Nov. 22, 1890; elected Dec. 21, 1958, reelected Dec. 19, 1965.

Rulers of Middle Europe; Rise and Fall of Dynasties

CAROLINGIAN DYNASTY

Charles the Great, or Charlemagne, ruled France, Italy and Middle Europe; established Ostmark (later Austria); crowned Roman emperor by pope in Rome, 800 A.D. Died, 814.

Louis I (Ludwig) the Pious, son; crowned by Charlemagne 813, d. 840.

Louis the German, son, succeeded to East Francia (Germany) 843-876.

Charles the Fat, son, inherited East Francia and West Francia (France) 876, reunited empire, crowned emperor by pope, 881, deposed, 887.

Arnulf, nephew, 887-899. Partition of empire.

Louis the Child, 900-911, last direct descendant of Charlemagne.

Conrad I, duke of Franconia, first elected German king, 911-918, founded House of Franconia.

SAXON DYNASTY; FIRST REICH

Henry I, the Fowler, duke of Saxony, 919-936.

Otto I, the Great, 936-973, son; crowned Holy Roman Emperor by pope, 962.

Otto II, 973-983, son; failed to oust Greeks and Arabs from Sicily.

Otto III, 983-1002, son. Crowned emperor at 16. Henry II, duke of Bavaria, 1002-1024, great-grandson of Henry the Fowler.

Rulers of Modern Italy

After the fall of Napoleon in 1814 the Congress of Vienna, 1815, restored Italy as a political patchwork, comprising the Kingdom of Naples & Sicily, the Papal States, and smaller units. Piedmont and Genoa were awarded to Sardinia, ruled by King Victor Emmanuel I of Savoy.

United Italy emerged under the leadership of Camillo, Count di Cavour, (1810-1861) Sardinian prime minister. Agitation was led by Giuseppe Mazzini (1805-1872) and Giuseppe Garibaldi (1807-1882), soldier. Victor Emmanuel I abdicated 1821. After a brief regency for a brother, Charles Albert was King 1831-1849, abdicating when defeated by the Austrians at Novara. Succeeded by Victor Emmanuel II (1820-1878).

In 1859 France forced Austria to cede Lombardy to Sardinia, which gave rights to Savoy and Nice to France. In 1860 Garibaldi led 1,000 volunteers in a spectacular campaign, took Sicily and expelled the King of Naples. In 1860 the House of Savoy annexed Tuscany, Parma, Modena, Romagna, the Two Sicilies, the Marches and Umbria. Victor Emmanuel assumed the title of King of

Italy at Turin Mar. 17, 1861. In 1866 he joined Prussia and Austria in the Triple Alliance and received Venetia from Austria. On Sept. 20, 1870, his troops under Gen. Raffaele Cardona entered Rome and took over the Papal States, ending the temporal power of the Roman Catholic Church.

Succession. Humbert I, 1878, assassinated 1900; Victor Emmanuel III, 1900, abdicated 1946, died 1947; Humbert II, 1946, ruled a month. In 1921 Benito Mussolini (1883-1945) formed the Fascist party and became prime minister Oct. 31, 1922. He made the King Emperor of Ethiopia, 1937; entered World War II as ally of Hitler. He was deposed July 25, 1943.

At a plebiscite June 2, 1946, Italy voted for a republic. Premier Alcide de Gasperi became Chief of State June 13, 1946. On June 28, 1946, the Constituent Assembly elected Enrico de Nicola, Liberal, Provisional President of the Republic of Italy. Luigi Einaudi was elected President May 11, 1948. Giovanni Gronchi was elected Apr. 29, 1955, inaugurated May 11, 1955. Antonio Segni elected May 6, 1962, Giuseppe Saragat Dec. 28, 1964.

Rulers of Scotland

The Romans gave the name of Caledonia to present-day Scotland and called the people Caledonians. The Scots, Celtic race that, spoke Gaelic, came from Ireland, then called Scotia.

Kenneth I (S. C. MacAlpin) was the first Scot to rule both Scots and Picts, 843 A. D.

Duncan I was the first general ruler, 1034. Macbeth seized the kingdom 1040, was slain by Duncan's son, Malcolm Canmore (Malcolm III), 1058.

Malcolm married Margaret, English princess who had fled from the Normans. Queen Margaret introduced English language and English monastic customs. She was canonized. Her son Edgar, 1097, moved the court to Edinburgh. His brothers Alexander I and David I succeeded. Malcolm IV, grandson of David I, 1153, was followed by his brother, William the Lion, 1165, whose son was Alexander II, 1214. The latter's son, Alexander III, defeated the Norse and regained the Hebrides. When he died, 1286, his granddaughter, Margaret, child of Eric of Norway and grandniece of Edward I of England, known as the Maid of Norway, was chosen ruler, but died on the way, 1290.

John Balliol, 1292-1296. [Interregnum, 10 years.]

Robert Bruce (The Bruce), 1306-1329, victor at Bannockburn, 1314.

Robert II, 1316-1390, grandson of Robert Bruce, son of Walter, the Steward of Scotland, was called The Steward, first of the so-called Stuart line.

Robert III, son of Robert II, 1390-1406.

James I, son of Robert III, 1406-1437.

James II, son of James I, 1437-1460.

James III, 1460-1488, eldest son of James II.

James IV, 1488-1513, eldest son of James III.

James V, 1513-1542, eldest son of James IV.

Mary, daughter, born 1542, became queen when 1 week old; was crowned 1543. Married, 1548, Francis, son of Henry II of France, who became king 1559, died 1560. Mary ruled Scots 1561 until abdication, 1567. She also married (2) Henry Stewart, Lord Darnley, and (3) James, Earl of Bothwell. Imprisoned by Elizabeth I; beheaded 1587.

James VI, 1567-1625, son of Mary and Lord Darnley, became King of England on death of Elizabeth in 1603. Although the thrones were thus united, the legislative union of Scotland and England was not effected until the act of Union, May 1, 1707.

Rulers of Denmark, Sweden, Norway

DENMARK

Earliest rulers invaded Britain; King Canute, who ruled in London 1017-1035, was most famous. The Valdemars furnished kings until the 16th century. In 1282 the Danes won the first national assembly, Danehof, from King Erik.

Most redoubtable medieval character was Margaret, daughter of Valdemar IV, born 1353, married at 16 to King Haakon VI of Norway. In 1375 she had her infant son Olaf made king of Denmark. After his death, 1387, she was regent of Denmark and Norway. In 1388 Sweden accepted her as sovereign. In 1389 she made her grand-nephew, Duke Erik of Pomerania, titular king of Denmark, Sweden and Norway, with herself as regent. In 1397 she effected the Union of Kalmar of the three kingdoms and had Erik crowned. In 1439 the three kingdoms deposed him and elected Christopher of Bavaria king (Christopher III). On his death, 1448, the union broke up.

Succeeding rulers were unable to enforce their claims as rulers of Sweden until 1520, when Christian II conquered Sweden. He was thrown out 1522, and in 1523 Gustavus Vasa united Sweden. Denmark continued to dominate Norway until the Napoleonic wars, when Frederick VI joined the Napoleonic cause after Britain had destroyed the Danish fleet (1807). In 1814 he was forced to cede Norway to Sweden and Heligoland to Britain, receiving Lauenburg. Successors: 1839—Christian VIII; 1848—Frederick VII; 1863—Christian IX; 1906—Frederick VIII; 1912—Christian X; 1947—Frederick IX.

SWEDEN

Early kings ruled at Uppsala, but did not dominate the country. Sverker (1134-1156) united the Swedes and Goths. In 1435 Sweden obtained the Riksdag, or parliament. After the Union of Kalmar, 1397, the Danes either ruled or harried the country until Christian II of Denmark con-

quered it anew. 1520. This led to a rising under Gustavus Vasa, who ruled Sweden 1523-1560, and established an independent kingdom. Charles IX (1594-1611, crowned 1607) conquered Moscow. Gustavus II Adolphus (1611-1633) was called the Great. Later rulers: 1633—Christina; 1664—Charles X; 1660—Charles XI; 1697—Charles XII (invader of Russia and Poland, defeated at Poltava, June 28, 1709); 1718—His sister, Ulrika Eleonora, elected queen; 1720—Her husband, Frederick I (of Hesse); 1751—Aldolphus Frederick; 1771—Gustavus III; 1792—Gustavus IV; 1809—Charles XIII. (Union with Norway began, 1814). 1818—Charles XIV. He was Jean Bernadotte, Napoleon's Prince of Ponte Corvo, succeeded 1810 to succeed Charles XIII. He founded the present dynasty, 1844—Oscar I; 1859—Charles XV; 1872—Oscar II; 1907—Gustavus V; 1950—Gustavus VI Adolf.

NORWAY

Overcoming many rivals, Harald Haarfager (872-930) conquered Norway, Orkneys and Shetlands. Olaf, great-grandson (985-1000) brought Christianity into Norway, Iceland, Greenland. In 1035 Magnus the Good also became king of Denmark. Haakon V (1299-1319) had married his daughter to Erik of Sweden. Their son, Magnus, became ruler of Norway and Sweden at 6. His son, Haakon VI, married Margaret of Denmark; their son Olaf became king of Norway and Denmark, followed by Margaret's regency and the Union of Kalmar, 1397.

In 1450 Norway became subservient to Denmark. Christian IV (1558-1648) founded Christianity, now Oslo. After Napoleonic wars, when Denmark ceded Norway to Sweden, a strong nationalist movement forced recognition of Norway as an independent kingdom united with Sweden under the Swedish kings, 1814-1905. In 1905 the union was dissolved and Prince Carl of Denmark became Haakon VII. He died Sept. 21, 1957, aged 85; succeeded by son, Olav V, b. July 2, 1903.

Rulers of the Netherlands and Belgium

THE NETHERLANDS (HOLLAND)

William Frederick, Prince of Orange, led a revolt against French rule, 1813, and was crowned King of the Netherlands, 1815. Belgium seceded Oct. 4, 1830, after a revolt, and formed a separate government. The change was ratified by the two kingdoms by treaty Apr. 19, 1839.

(1840) William II; (1849) William III; (1890) Wilhelmina (daughter of William II and his second wife Princess Emma of Waldeck); Wilhelmina abdicated Sept. 4, 1948, in favor of daughter Juliana, 39.

BELGIUM

A national congress elected Prince Leopold of Saxe-Coburg King; he took the throne July 21, 1831, as Leopold I. (1865) Leopold II; (1890) Albert I, nephew of Leopold II; (1934) Leopold III, son of Albert; (1944) Prince Charles, Regent, Leopold returned, 1950, yielded powers to son Baudouin, Prince Royal, Aug. 6, 1950, abdicated July 16, 1951. Baudouin I took throne July 17, 1951.

For political history prior to 1830 see articles on the Netherlands and Belgium.

Rulers of Russia; Premiers of the U. S. S. R.

First ruler to consolidate Slav tribes was Rurik, leader of the Russ, who established himself at Novgorod A. D. 862. He and his immediate successors had Scandinavian affiliations. They moved to Kiev after 972 A. D. and ruled as Dukes of Kiev. In 988 Vladimir I was converted and adopted the Byzantine Greek service, later modified by Slav influences. Important organizer and law-giver was Yaroslav, 1018-1054, whose daughters married kings of Norway, Hungary and France. His grandson, Vladimir II (Monomachos) 1113-1125, was progenitor of several rulers, but in 1169 Andrew Bogolubski overthrew Kiev and began the line known as Grand Dukes of Vladimir.

Of the Grand Dukes of Vladimir Alexander Nevsky, 1245-1263, had a son, Daniel, first to be called Duke of Moscow (Moscow) who ruled 1294-1303. His successors became Grand Dukes of Moscow. After Demetrius III, Donskoi, in 1380 defeated the Tartars, they also became Grand Dukes of All Russia. Independence of the Tartars and considerable territorial expansion was achieved under Ivan III, 1462-1505.

Czars of Muscovy—Ivan III was referred to in church ritual as Czar. He married Sofia, niece of the last Byzantine emperor. His successor, Basil, died in 1533 when Basil's son, Ivan, was only 3. He became Ivan IV, "the Terrible," crowned 1547 as Czar of all the Russias, ruled till 1584. Under the weak rule of his son, Theodore, Boris Godunov had control. The dynasty died, and after years of tribal strife and intervention by Polish and Swedish armies, the Russians united under 17-year-old Michael Romanov, distantly related to the first wife of Ivan IV. He ruled 1613-1645 and established the Romanov line. Fourth ruler after Michael was Peter I.

Czars, or Emperors of Russia (Romanovs)—Peter I, 1682-1725, known as Peter the Great, took title of Emperor in 1721. His successors and dates of accession were: Catherine, his widow, 1725, Peter II, his grandson, 1727, d. 1730; Anne, Duchess of Courland, 1730, daughter of Peter the Great's brother, Czar Ivan; Ivan VI, 1740-1741,

great grandson of Ivan V, child, kept in prison and murdered 1764; Elizabeth, daughter of Peter I, 1741; Peter III, grandson of Peter I, 1761, deposed 1762 for his consort, Catherine II, former princess of Anhalt Zerbst (German) who is known as Catherine the Great, 1762-1796; Paul I, her son, 1796, killed 1801. Alexander I, son of Paul, 1801-1825, defeated Napoleon; Nicholas I, his brother, 1825; Alexander II, son of Nicholas, 1855, assassinated 1881 by terrorists; Alexander III, son, 1881-1894.

Nicholas II, son, 1894-1917, last Czar of Russia, was forced to abdicate by the Revolution that followed defeat by Germany. The Czar, the Czarina, the Czarevitch (Crown Prince) and the Czar's 4 daughters were murdered by the Bolsheviks in Ekaterinburg, July 17, 1918.

Provisional Government—Prince Georgi Lvov and Alexander Kerensky, premiers, 1917.

UNION OF SOVIET SOCIALIST REPUBLICS

Bolshevik Revolution, Nov. 7, 1917, displaced Kerensky; Council of People's Commissars formed, Nicolai Lenin, premier. Lenin died Jan. 21, 1924. Alexei Rykov (executed 1938) and V. M. Molotov held the office, but actual ruler was Joseph Stalin (Joseph Vissarionovich Djugashvili), general secretary of the Central Committee of the Communist Party. Stalin became president of the Council of Ministers (premier) May 7, 1941, died Mar. 5, 1953. Succeeded by Georgi M. Malenkov, as head of the Council and premier and Nikita S. Khrushchev, first secretary of the Central Committee. Malenkov resigned Feb. 8, 1955, became deputy premier, was dropped July 3, 1957. Marshal Nikolai A. Bulganin became premier. Marshal Georgi K. Zhukov became minister of defense, was dropped Nov. 1, 1957. Bulganin was demoted and Khrushchev became premier Mar. 27, 1958. Khrushchev was ousted Dec. 14-15, 1964, replaced by Leonid I. Brezhnev as first secretary of the party and by Aleksei N. Kosygin as premier.

Rulers of Modern Spain

From 8th to 11th centuries Spain was dominated by the Moors (Arabs and Berbers). The Christian reconquest established small competing kingdoms of the Asturias, Aragon, Castile, Catalonia, Leon, Navarre and Valencia. In 1474 Isabella (Isabel) b. 1451, became queen of Castile & Leon. Her husband, Ferdinand, b. 1452, inherited Aragon, 1474, with Catalonia, Valencia and the Balearic Islands, became Ferdinand V of Castile. By Isabella's request Pope Sixtus IV established the Inquisition, 1478. Last Moorish kingdom, Granada, fell 1492. Columbus opened New World of colonies, 1492. Isabella died 1504, succeeded by her daughter, Juana "the Mad," but Ferdinand ruled until his death 1516.

Charles I, b. 1500, son of Juana and grandson of Ferdinand & Isabella and of Maximilian I of Hapsburg; succeeded latter as Holy Roman Emperor, Charles V, 1520. Abdicated 1556. Philip II, son, 1556-1598, inherited only Spanish throne; conquered Portugal, fought Turks, persecuted non-Catholics, sent Armada vs. England. Was briefly married to Mary I of England, 1554-1558. Succession: Philip III, 1598-1621; Philip IV, 1621-1665; Charles II, 1665-1700, left Spain to Philip of Anjou, grandson of Louis XIV, who as Philip V, 1700-1746, founded Bourbon dynasty. Ferdinand IV, 1746-1759; Charles III, 1759-1788; Charles IV, 1788-1808, abdicated.

Napoleon now dominated politics and made his brother Joseph King of Spain but the Spanish ousted him finally in 1813. Ferdinand VII, 1814-1833, lost American colonies; succeeded by daughter, Isabella II, aged 3, with wife Maria Christina of Naples regent until 1843. Isabella deposed by revolution, 1868. Prince Amadeo of

Savoy, 1870-1873. First republic, 1873-1874. Alphonso XII 1875-1885. His posthumous son was Alphonso XIII, with his mother, Queen Maria Christina regent; Spanish-American war, Spain lost Cuba, gave up Puerto Rico, Philippines, Sulu Isl., Marianas. Alphonso took throne 1902, aged 18, married British Princess Victoria Eugenia of Battenberg. The dictatorship of Primo de Rivera, 1923-30, precipitated the revolution of 1931. Alphonso agreed to leave without formal abdication. The monarchy was abolished and the second republic established, with strong socialist backing. Presidents were Niceto Alcala Zamora, to 1936, when Manuel Anzana was chosen.

In July, 1936, the army in Morocco revolted against the government and General Francisco Franco led the troops into Spain. The revolution succeeded by February, 1939, when Anzana resigned. Franco became chief of state, with provisions that if he is incapacitated the Regency Council by two-thirds vote may propose a king to the Cortes, which must have a two-thirds majority to elect him.

Alphonso XIII died in Rome Feb. 28, 1941, aged 54. His property and citizenship had been restored.

A succession law theoretically restoring the monarchy was approved in a 1947 referendum. A new Constitution, approved by referendum Dec. 14, 1966, affirmed Spain's status as a monarchy under a king or a regent. Pretender to the throne, should the monarchy actually be restored, was Don Juan de Borbon y Battenberg, 3rd son of Alphonso XIII. Also favored above other claimants was Don Juan's son, Prince Juan Carlos.

Leaders in the South American Wars of Liberation

Simon Bolivar (1783-1830), Jose Francisco de San Martin (1783-1850) and Francisco Antonio Gabriel Miranda (1750-1816) are among the heroes of the early 19th century struggles of South American nations to free themselves from Spain. All three, and their contemporaries, operated in periods of intense factional strife, during which soldiers and civilians suffered.

Miranda, a Venezuelan, who had served with the French in the American Revolution and commanded parts of the French Revolutionary armies in the Netherlands, attempted to start a revolt in Venezuela in 1806 and failed. In 1810, with British and American backing, he returned and was briefly a dictator, until the British withdrew their support. In 1812 he was overcome by the royalists in Venezuela and taken prisoner, dying in a Spanish prison in 1816.

San Martin was born in Argentina and during 1789-1811 served in campaigns of the Spanish armies in Europe and Africa. He first joined the independence movement in Argentina in 1812 and then in 1817 invaded Chile with 4,000 men over the high mountain passes. Here he and General Bernardo O'Higgins (1778-1842) defeated the Spaniards at Chacabuco, 1817, and O'Higgins was named Liberator and became first dictator of Chile, 1817-1823. In 1821 San Martin occupied Lima and Callao, Peru, and became Protector of Peru.

Bolivar, the greatest leader of South American liberation from Spain, was born in Venezuela, the son of an aristocratic family. His organizing and administrative abilities were superior and he foresaw many of the political difficul-

ties of the future. He first served under Miranda in 1812 and in 1813 captured Caracas, where he was named Liberator. Forced out next year by civil strife, he led a campaign that captured Bogota in 1814. In 1817 he was again in control of Venezuela and was named dictator. He organized Nueva Granada with the help of General Francisco de Paula Santander (1792-1840). By joining Nueva Granada, Venezuela and the present terrain of Panama and Ecuador, the republic of Colombia was formed with Bolivar president. After numerous setbacks he decisively defeated the Spaniards in the second battle of Carabobo, Venezuela, June 24, 1821.

In May, 1822, Gen. Antonio Jose de Sucre, Bolivar's trusted lieutenant, took Quito, Bolivar went to Guayaquil to confer with San Martin, who resigned as Protector of Peru and withdrew from politics. With a new army of Colombians and Peruvians Bolivar defeated the Spaniards in a saber battle at Junin in 1824 and cleared Peru.

De Sucre organized Charcas (Upper Peru) as Republica Bolivar (now Bolivia) and acted as president in place of Bolivar, who wrote its constitution. Sucre defeated the Spanish faction of Peru at Ayacucho, Dec. 19, 1824.

Continued civil strife finally caused the Colombian federation to break apart. Santander turned against Bolivar, but the latter defeated him and banished him. In 1828 Bolivar gave up the presidency he had held precariously for 14 years. He became ill from tuberculosis and died Dec. 17, 1830. He was honored as the great liberator and is buried in the national pantheon in Caracas.

Poets Laureate of England

There is no authentic record of the origin of the office of Poet Laureate of England. According to Warton, there was a Versificator Regis, or King's Poet, in the reign of Henry III (1216-1272), and he was paid 100 shillings a year. Geoffrey Chaucer (1340-1400) assumed the title of Poet Laureate, and in 1389 got a royal grant of a yearly allowance of wine. In the reign of Edward IV (1461-1483), John Kay held the post. Under Henry VII (1485-1509), Andrew Bernard was the Poet Laureate, and was succeeded under Henry VIII (1509-1547) by John Skelton. Next came Edmund Spenser, who died in 1599; then Samuel Daniel, who died in 1619, and then Ben Jonson (appointed 1619). Sir

William D'Avenant was appointed in 1638. He was a godson of William Shakespeare.

Others were John Dryden, 1670-1688; Thomas Shadwell, 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; the Rev. Laurence Eusden, 1718; Colly Cibber, 1730; William Whitehead, 1758, on the refusal of Gray; Rev. Thomas Warton, 1785, on the refusal of Mason; Henry J. Pye, 1790; Robert Southey, 1813, on the refusal of Sir Walter Scott; William Wordsworth, 1843; Alfred Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913 (died 1930); John Masefield, 1930 (died May 12, 1967).

Cecil Day Lewis was appointed to the post Jan. 1, 1968.

U. S. Passport, Visa and Health Requirements

Source: Passport Office, U. S. Dept. of State and U. S. Public Health Service

Passports are issued by the United States Department of State to citizens and nationals of the United States for the purpose of documenting them for their foreign travel and to identify them as Americans. Some countries require a visa, or stamp of approval, to be affixed to the passport by the consulate of the country to be visited, while others waive this formality. Also some countries, which do not require visas, require tourist cards from visitors making a short stay.

Passports may not be used for travel into or through Cuba, Mainland China, North Korea or North Vietnam unless specifically endorsed for such travel.

HOW TO OBTAIN A PASSPORT

An applicant for a passport who has never been previously issued a passport in his own name, must execute an application in person before a clerk of a Federal court or a State court having naturalization jurisdiction, or before an Agent of the Passport Office or before a diplomatic or consular officer of the U. S. abroad. A spouse who is to be included in the application must appear with the applicant and execute the application. Passport Agents are located at Boston (John F. Kennedy Bldg., Government Center), Chicago (Fed. Office Bldg., 219 S. Dearborn); Honolulu (Fed. Bldg.); Los Angeles (Fed. Office Bldg., 300 N. Los Angeles St.); Miami (51 S.W. First Ave.); New Orleans (U. S. Customs House, 423 Canal St.); New York (630 Fifth Ave.); Philadelphia (401 N. Broad St.); San Francisco (Fed. Office Bldg., 450 Golden Gate Ave.); Seattle (1410 Fifth Ave.); Washington D. C. (Passport Office, 17th and H Sts., N. W.).

An applicant may submit a prior passport in lieu of evidence of citizenship. A native-born citizen must submit an acceptable birth certificate, or baptismal certificate. A notice by appropriate authorities indicating no birth record exists must be submitted with evidence other than birth certificate or baptismal certificate. A baptismal certificate or certified copy of record of baptism showing baptism occurred shortly after birth should bear the full name, date and place of birth, and the seal, name, and location of the church. In the absence of the above, other evidence, such as census records, newspaper files, school records or affidavits of persons having personal knowledge of the facts of birth may be submitted for consideration.

A person in the U. S. who has been issued a passport in his own name within the last eight years may obtain a new passport by filling out, signing and mailing a special application form together with his previous passport, two duplicate signed photographs taken within the last 6 months and the established fee to the nearest Passport Agency or to the Passport Office in Wash., D. C. If, however, an applicant is applying for a passport for the first time, if his prior passport was issued before his 18th birthday, if he wishes to include a person other than himself in the passport, or if he is applying for an official or diplomatic passport, he must execute a regular passport application in person before a clerk of court or Passport Agent.

A naturalized citizen should present his naturalization certificate. A person claiming citizenship through either a native-born or naturalized citizen must submit a certificate of citizenship issued by the Attorney General; or a Consular Report of Birth or Certification of Birth issued by the Dept. of State. If one of the above documents has not been obtained, he must submit evidence of citizenship of the parent(s) through whom citizenship is claimed and evidence which would establish the parent/child relationship. Additionally, if through birth to one American and one alien parent, an affidavit showing periods and places of residence in the United States and abroad, specifying periods in Armed Forces of U. S.; if through naturalization of parents, evidence of admission to the United States for permanent residence.

A married woman must submit evidence of citizenship and, under certain conditions, marriage. Special regulations govern women married prior to Dec. 22, 1922; check a Passport Agency.

The applicant shall establish his identity to the satisfaction of the Clerk of Court or Passport Agent. Proof of identity may be established

through a personal knowledge of the applicant by the Clerk or Agent or by an item which contains the signature and either a physical description or photograph of the applicant. The following items of identification are acceptable: Previous United States Passport; naturalization certificate; driver's license; a Federal, state, municipal identification card or pass; an industrial or business identification card or pass.

If the applicant is not able to establish his identity by personal knowledge or by one of the above items, he shall have an identifying witness who has known him at least 2 years. The witness himself must have acceptable identification.

Aliens—An alien leaving the U. S. must request passport facilities from his home government. He must have a permit from his local Collector of Internal Revenue, and if he wishes to return he should request a re-entry permit from the Immigration and Naturalization Service if it is required.

Contract Employees—Persons traveling because of a contract with the Government must submit with their applications letters from their employer stating position, destination and purpose of travel and Armed Forces contract number when pertinent.

Persons of military draft age may receive passports but should inform their draft boards of their travel plans.

PHOTOGRAPHS AND FEES

Photographs—Two recent duplicate photographs, both signed by the applicant and which are a good likeness, must accompany the passport application. A group photograph is preferred if more than one person is included in the passport. Photographs may be in color or in black and white. They must be full face, printed on thin, unglazed paper base on a light background and must be no smaller than 2½ x 2½ inches nor larger than 3 x 3 inches in size. They must also be capable of withstanding a mounting temperature of over 200° F.

Fees—The passport fee is \$10, plus an execution fee of \$2 whenever an application is executed in person before a clerk of court, Passport Agent or diplomatic or consular officer abroad. No execution fee is payable where a passport is applied for by mail. All applicants must pay the passport fee and, where applicable, the execution fee unless specifically exempted by law. A person who is proceeding abroad on official Government business should submit a sponsoring letter from his employing Agency instead of the passport fee. This letter will also excuse the payment of an execution fee if an application is executed before a Federal official. Where, however, an application is executed before a clerk of State court the latter is authorized by law to collect and retain the \$2 fee. Emergency clearance costs \$2 at all Passport Agencies except New York and Philadelphia where it is \$1. An emergency service fee of \$10 is charged in addition to all other fees where work must be performed after hours. The only other fees are for postage and emergency charges. "A passport is valid for five years. The validity period of all passports outstanding (i.e., unexpired passports) within five years of their issue dates) on Aug. 26, 1968 was automatically extended by Act of Congress to five years from the original date of issue without the need of renewal. Upon expiration, passports may no longer be renewed. New passports must be obtained."

During the calendar year 1967 the Passport Office, Dept. of State, issued 1,685,512 new and renewed passports to American citizens.

If passport is lost notify the Passport Office, Dept. of State, Wash., D. C. 20524. If lost abroad, report loss to U. S. Consul.

FOREIGN REGULATIONS

A visa is an endorsement or a notation, usually rubber stamped in a passport by a representative of the country to be visited. It certifies that the bearer of the passport is to be entitled to enter the country for a certain purpose and length of time. With the exception of the Iron Curtain countries, no visas are required for brief tourist travel to Western European countries. Authoritative visa information can be obtained by writing directly to foreign consular officials. The locations of foreign consular offices in the U. S. may be obtained by consulting the Congressional Directory available in most libraries. (Check appropriate city telephone directories for complete address.)

HEALTH ADVICE

Smallpox vaccination is required by most countries for entry and by the United States for re-entry. The United States does not require smallpox of travelers whose trips are restricted to Aruba, Bahamas, British Virgin Islands, Canada, Canal Zone, Curacao, Greenland, Iceland, Jamaica, Mexico, and St. Pierre and Miquelon. Vaccination is valid for three years.

Yellow fever is required for entry to certain infected countries and when traveling from infected to "receptive" areas. It can be performed only at certain Centers designated by the Public Health Service, and is valid for 10 years.

Cholera is generally required when traveling to or from infected areas. It is valid for 6 months only.

Smallpox, yellow fever, and cholera vaccinations must be recorded on PHS Form 731, International Certificates of Vaccination. These are generally available from state and local health departments and offices issuing passports (including clerks of courts), or from the Superintendent of Documents, U. S. Government Printing Office, Wash., D. C.

Liberalized U. S. Immigration Law in Effect

The national origins quota system disappeared from United States immigration procedures July 1, 1968, as provided by the Act. of Oct. 3, 1965, which amended the Immigration and Nationality Act.

The Immigration and Nationality Act, as amended, provides for numerical limitations on immigration from the Eastern and Western Hemispheres. Not subject to any numerical limitations, however, are immigrants who are spouses or children of U. S. citizens, or parents of citizens who are 21 years of age or older; returning residents; certain former U. S. citizens; ministers of religion; and certain long-term U. S. Government employees.

The Act of Oct. 3, 1965, established new controls to protect the American labor market from an influx of skilled and unskilled foreign labor. The primary responsibility was placed on the would-be immigrant to obtain the Secretary of Labor's clearance, prior to the issuance of a visa, establishing that there are not sufficient workers in the U. S. at the alien's designation who are able, willing and qualified to perform the skilled or unskilled labor; and that the employment of the alien will not adversely affect wages and working conditions of U. S. citizens similarly employed.

EASTERN HEMISPHERE IMMIGRANTS

Persons born in countries of the Eastern Hemisphere and dependent areas thereof are subject to an annual limitation of 170,000. Within this numerical limitation there is an annual limitation of 20,000 for each country and 200 for each dependent area. Applicants are classified as either preference or nonpreference.

The preference visa categories are based on certain relationships to persons in the U. S.: i.e., unmarried sons and daughters of United States citizens, spouses and unmarried sons and daughters of resident aliens, married sons and daughters of U. S. citizens, and brothers and sisters of U. S. citizens (first, second, fourth, and fifth preference, respectively); certain professions and skills (third preference); and certain categories of workers which are in short supply in the U. S. (sixth preference). Spouses and children of preference applicants are entitled to the same preference if accompanying or following to join such persons.

Preference status is based on approved petitions, filed with the Immigration and Naturalization Service, by the applicable relatives or employers. Visa numbers for qualified preference applicants are made available in the order of the preference classes and, within such classes, in the order of the

20402, for 10¢ apiece. The traveler and his physician should fill in the requested information, and the certificate then must be stamped to be valid. The stamp usually is applied by the state or local health department to which certificates may be either mailed or taken in person.

The following immunizations are suggested for all travelers: typhoid, tetanus, diphtheria, polio, and measles. Travelers to South and Central America (except urban Mexico), Africa, Asia and the South Pacific (except Japan, Australia, New Zealand) should receive Immune Serum Globulin (Human) for protection against hepatitis. Travelers to areas infected with malaria should receive preventive treatment. All travelers are advised to take adequate supplies of any medicines they may need and either an extra pair of or prescription for their glasses.

Specific requirements by country are published in "Immunization Information for International Travel" (Government Printing Office, 40¢). Additional information may be obtained from Foreign Quarantine Program, National Communicable Disease Center, Atlanta, Georgia 30333.

filing dates of the petitions.

Immigrants not entitled to classification within one of the above-mentioned preference groups are nonpreference applicants and receive only those visa numbers not needed by preference applicants.

As the preference categories appear likely to take all but a very few of the 170,000 immigrant visa numbers authorized, most applicants without preference status will be unable to immigrate to the United States in the foreseeable future under existing legislation. Further, a heavy demand in some of the preference classes has resulted in extended waiting periods for many applicants in those classes. Also, the higher preference categories may utilize the entire numerical limitation in some countries and dependent areas, which will prevent any visa numbers becoming available for persons from such countries or areas in any of the lower preference categories for that year.

WESTERN HEMISPHERE IMMIGRANTS

The Act establishes an annual ceiling of 120,000 on immigration by persons born in independent countries of the Western Hemisphere (Canada, Mexico, Central and South America and the Caribbean Area). Within this over-all ceiling there is no numerical limitation set for individual countries, and no preference classes have been established for such applicants. Visas within the 120,000 limitation will be made available to qualified applicants in the chronological order of their priority dates. An applicant's priority is based on the date a labor certification is approved or the date proof is received by the consular officer that a labor certification is not required.

EXCLUDABLE ALIENS

Among aliens who are excludable are persons mentally retarded, insane, psychopathic, mentally defective, sexual deviates, and those afflicted with any dangerous contagious disease or having a physical defect impairing the ability to earn a living. Also chronic alcoholics, narcotic addicts, paupers, beggars, stowaways and prostitutes. Also persons convicted of crimes such as narcotics trafficking or commercialized vice. Also persons who try to enter the U. S. by fraud, illiterates, and persons who left the U. S. to avoid military service. Also anarchists and those who teach or advocate overthrow of the U. S. Government by force or violence.

For more detailed information consult the nearest office of the U. S. Immigration & Naturalization Service, or any U. S. Consul abroad.

Great Seal of the United States

The Great Seal of the United States was first adopted by the Continental Congress, June 20, 1782, and by the Federal Government Sept. 16, 1789. The Secretary of State is its custodian. Only one face is used on documents.

A representation of the Great Seal is in the hands of every American citizen who possesses a \$1 bill. On the back of the bill both sides of the seal are shown. The face of the seal, on the right hand side of the bill, shows an American eagle with wings and talons outstretched. Above his head is a circle containing 13 "pieces argent," or silver buttons; the eagle's breast holds a shield with 13 stripes; the right talon holds an olive

branch and the left talon a bundle of 13 arrows. In its beak the eagle holds a ribbon with the motto E Pluribus Unum—Out of Many, One, referring to the union of the states.

On the reverse the seal shows an unfinished pyramid. Above the pyramid is a "glory" or burst of light, with an eye inside a triangle, referring to the Eternal Eye of God, and above it is the motto Annuit Coeptis, meaning He Has Favored Our Undertaking. The base of the pyramid bears the numerals MDCCLXXVI, or 1776, and below it is the motto Novus Ordo Seclorum, or A New Order of the Ages. The pyramid has 13 steps and signifies the strength of the union.

Naturalization: How to Become an American Citizen

Source: The Federal Statutes

A person who desires to be naturalized as a citizen of the United States may obtain the necessary application form as well as detailed information from the nearest office of the Immigration and Naturalization Service or from the clerk of a court handling naturalization cases.

There are no racial bars to naturalization. Women have the same right as men to become naturalized.

An applicant must be at least 18 years old. He must have been a lawful resident of the United States continuously for 5 years. For husbands and wives of U. S. citizens the period is 3 years in most instances. Special provisions apply to certain veterans of the Armed Forces.

An applicant must have been physically present in this country for at least one-half of the required 5 years' residence.

Every applicant for naturalization must:

(1) sign the petition in his own handwriting, if physically able to write;

(2) demonstrate an understanding of the English language, including an ability to read, write, and speak words in ordinary usage in the English language (persons physically unable to do so, and persons who were on December 24, 1952 over 50 years of age and had been residing in the United States for 20 years are excepted).

(3) have been a person of good moral character, attached to the principles of the Constitution, and well disposed to the good order and happiness of the United States for five years just before filing the petition or for whatever other period of residence is required in his case and continue to be such a person until admitted to citizenship; and

(4) demonstrate a knowledge and understanding of the fundamentals of the history, and the principles and form of government, of the U. S.

The petitioner also is obliged to have two credible citizen witnesses. These witnesses must have personal knowledge of the applicant's character, residence, loyalty, and other qualifications.

A person not of good moral character includes a habitual drunkard, an adulterer, a polygamist, a violator of criminal law, a gambler, one who gave false testimony to obtain a benefit under the immigration law, one in prison for 180 days or more, one convicted of murder.

Naturalization is denied to any person who, within 10 years, has been subversive, including communists and others who favor totalitarian government, and who were members of a proscribed organization, unless the petitioner was under 16 or joined under duress.

A law approved Aug. 20, 1953, provides for the expeditious naturalization of alien spouses and adopted children of U. S. citizens who are missionaries or performing religious duties and are stationed abroad.

When the applicant files his petition he pays the court clerk \$10. At the preliminary hearing he may be represented by a lawyer or social service agency. There is a 30-day wait. If action is favorable, there is a final hearing before a judge, who administers the following oath of allegiance:

OATH OF ALLEGIANCE

I hereby declare, on oath, that I absolutely and entirely renounce and abjure all allegiance and fidelity to any foreign prince, potentate, state or sovereignty, of whom or which I have heretofore been a subject or citizen; that I will support and defend the Constitution and laws of the United States of America against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I will bear arms on behalf of the United States when required by the law; that I will perform noncombatant service in the armed forces of the United States when required by the law; that I will perform work of national importance under civilian direction when required by the law, and that I take this obligation freely without any mental reservation or purpose of evasion; so help me God.

Customs Exemptions and Advice to Travelers

United States residents returning after a stay abroad of at least 48 hours are, generally speaking, granted customs exemptions of \$100 each. Each returning resident may bring home free of duty articles totaling \$100 in retail value in the country of acquisition, subject to limitations on liquors and cigars. These articles must accompany the traveler at the time of his return, must be for his personal or household use, must have been acquired as an incident of his trip, and must be properly declared to Customs. Not more than one quart of alcoholic beverages may be included in the \$100 exemption.

If a U. S. resident arrives directly or indirectly from American Samoa, Guam, or the Virgin Islands of the United States, his purchases may be valued up to \$200 fair retail value, but not more than \$100 of the exemption be applied to the value of articles acquired elsewhere than in such insular possessions, and one gallon of alcoholic beverages may be included in his exemption, but not more than 1 quart of such beverages may have been acquired elsewhere than in the designated islands.

The exemption for articles acquired in the Virgin Islands of the United States and in Mexico is not conditional upon the 48-hour absence requirement.

In either case, the exemption for alcoholic beverages is accorded only when the returning resident has attained 21 years of age at the time of his arrival. One hundred cigars may be included (except Cuban products) in either the \$100 or \$200 exemption only if the exemption, or any part of it, has not been used within the preceding 30-day period.

Bona fide gifts costing no more than \$10 fair retail value may be mailed to friends at home duty-free; addressee cannot receive in a single day gifts exceeding the \$10 limitation.

PRECAUTIONS FOR TRAVEL

In some cases naturalized United States citizens desiring to visit the countries of their birth, and sometimes their American-born children traveling to those countries, may be subject to military service and other regulations there. The United States Department of State advises such travelers to get specific information from the consulates of

the countries concerned before departure.

A Briton who becomes a naturalized United States citizen is considered a British citizen by the British until he makes a formal renunciation of British nationality before British authorities.

A French person who has attained majority loses French nationality by voluntary acquisition of U. S. or other nationality. However, French male persons with military service obligations do not lose French nationality unless authorized by the French Government. Authorization is granted when the applicant acquired a foreign nationality after age 50. A female U. S. citizen who marries a Frenchman acquires French nationality unless prior to her marriage she declined it.

Portugal will recognize U. S. naturalization of a Portuguese if the latter has resided five years in the United States.

Greece regards citizens: (1) former Greek nationals naturalized abroad after 1914 without authorization from Greece; (2) persons born abroad of parents considered by Greece to have Greek nationality, even though they may have acquired citizenship elsewhere; (3) Greeks who were former subjects of Turkish territory, except Istanbul; (4) Greeks formerly of Istanbul who left before Aug. 1, 1929 without Turkish passports.

Israel has two types of visas: visitors' visas and immigration visas. A visitor's visa is limited to 3 mos. and may be renewed. A person who wishes to live in Israel permanently must obtain an immigration visa. This person will be required to give military service if a male between 18 and 49, inclusive, or a female between 18 and 38, inclusive, and must obtain authorization from the Ministry of Defense if he or she desires to leave the country before completing military service. A U. S. citizen who voluntarily joins a foreign army loses his U. S. citizenship unless he has written consent of the U. S. Government to do so. Jews arriving in Israel with immigration visas or obtaining such visas while in Israel are automatically granted Israeli nationality unless they declare to a Consul of Israel or to the Israeli Government that they do not want to be nationals of Israel.

Status of American Woman Who Marries a Foreigner

Source: United Nations

She will automatically acquire the nationality of:

Afghanistan	Gabon*	Ivory Coast*	Liechtenstein	Philippines	Spain
Austria	Greece*	Italy	Monaco	Portugal*	Switzerland
Cambodia	Haiti	Jordan	Nepal	Rwanda (e)	Togo*
Ethiopia	Iran	Korea (Rep.)	Niger*	Saudi Arabia	Turkey
Finland	Iraq	Liberia	Peru	Somalia	

Automatically gains husband's nationality if she loses her own:

Belgium*	Sen. African	Congo (a)	Rep.*	Malagasy Rep.(b)	Tunisia
Cameroon*	Rep.*	Costa Rica (b)	France*	Mauritania*	
	China	Dominican	Laos*	Somalland	

May acquire husband's nationality if she chooses:

Algeria (c)	Ghana	Lebanon	New Zealand	Sierra Leone	United Kingdom
Andorra	Guyana	Libya	Nicaragua	Sudan	Upper Volta
Barbados	Indonesia	Luxemburg	Nigeria	Tanganyika	Venezuela
Bolivia	Ireland	Mali	Pakistan	Thailand	Vietnam, Rep.
Chad (d)	Jamaica	Mexico	Poland	United Arab	Zambia
Ecuador	Kenya	Morocco	San Marino	Rep.	
Gambia	Kuwait	Netherlands	Senegal		

May acquire husband's nationality more easily than other aliens:

Australia	Colombia	Hungary	Malta	Syrian Arab	Rep. of S.
Brazil	Cuba	India	Norway	Rep.	Africa
Burma	Czechoslovakia	Israel	Panama	Trinidad	Uruguay
Canada	Denmark	Japan	Singapore	Tobago	Western Samoa
Ceylon	El Salvador	Malawi	Sweden (b)	Uganda	Yugoslavia
Chile	Guatemala	Malaysia			

No effect on her nationality:

Albania	Argentina	Bulgaria	Honduras	Paraguay	USSR
		Germany (West)	Iceland	Romania	

^aShe may decline her husband's nationality. ^bShe may acquire her husband's nationality if she resides in the country 5 years following the marriage and unless she declines before the expiration of this date.^cShe may acquire her husband's nationality by declaration. ^dShe must formally declare before the marriage that she repudiates her nationality of origin. ^eApplies only to marriages celebrated in Chad.^fMarriage must be registered in civil office of Rwanda Government, which reserves right to oppose within one year the acquisition of nationality.

EXPLORATION

Arctic Operations—1967-1968

Source: National Geographic Society and contemporary records.

A National Geographic Society-National Museum of Canada expedition, under the leadership of Dr. Charles F. Merbs, University of Chicago anthropologist, began excavating historic Thule Eskimo sites along the coast of Roes Welcome Sound and the Wager Bay-Chesterfield Inlet areas in northern Canada to study their culture, burial patterns and gather skeletal remains for analysis. These areas are rich in artifacts.

Thule Eskimos, from which the modern Canadian Eskimo is descended racially and culturally, began migrating from the northern Alaska coast about 1,000 years ago, some settling in the Thule region of Greenland and others along the Hudson Bay's western shore and the Labrador coast.

In March, 1968, five Americans and a Canadian, driving motorized sleds, set out to retrace Commodore Peary's 1909 route to the North Pole. On Apr. 19, after 44 days of travel, all but two of the men reached the Pole, where they spent nearly a day before being picked up by plane and returned to their base camp on Ward Hunt Island.

Guided by Ralph Plaisted, who led a similar but unsuccessful expedition the previous year, the amateur explorers started out 15 miles from where Commodore Peary started. Although the Pole was only 475 miles distant on a straight line measurement from their starting point, they zig-zagged more than 800 miles to reach their destination.

A 4-man British expedition set out from Point Barrow, Alaska, on Feb. 21, 1968, with 4 sleds and 40 dogs for Vest Spitsbergen, north of Norway, via the North Pole, several thousand miles and an estimated 16 months away.

Sponsored by the Royal Geographical Society of Britain, the expedition is led by Wally W. Herbert of York, a veteran polar explorer, accompanied by Capt. K. Hedges of the Royal Army Medical Corps. Alan Gill of Bradford, a photographer, and Dr. Roy M. Koerner of Ohio State University, glaciologist. Cost of the expedition is estimated at \$150,000.

The men have been making daily weather observations, gathering data on ice, thickness snow density, measuring the disintegration and ablation of sea ice, sea temperatures and incoming reflected solar radiation, as well as recording physiological and psychological reactions. They are also keeping notes of bears, seals and birds shot and eaten. Little is known of the wanderings of polar bears and what they feed on. Also contemplated is a geophysical traverse across the sub-marine Lomonosov Ridge, during which they will record depth soundings and magnetometer and gravity measurements.

The hike has 5 phases. The first: hard sledding to cover as many miles as possible; the second, a "breather" during the summer, when open water and heavy fog often slowed their progress; the third, more sledding in the autumn, after correcting their course to place them in the best position to take advantage of the winter drift; the fourth, 5 months spent in a hut air-dropped to them; and the final phase begins when they abandon their hut in the spring of 1969 and start on the last leg of their hike.

At the start they had hoped to take advantage of favorable ice drift by using a route a few degrees west of true north to add two miles of travel per day to the 8 they hoped to average. Before starting out several days were spent in a plane looking for the "road" (flat ice on which they travelled east for about 60 miles) for their highway through a 100-mile stretch of shattered inshore ice to the safer polar ice. But shifting ice, winds, ridges 15 feet high, low temperatures and open water were all problems as soon as they set out. They had planned to traverse the 380 miles from Barrow in 4 weeks; they covered 50. By mid-May they were nearly 600 miles north of Point Barrow.

Huskies able to pull sleds long distances were purchased from Eskimos living about 160 miles north of Thule, Greenland. Two types of sleds are in use—the Greenland Eskimo sled (200 lbs.) and the Nansen-type (120 lbs.) with hickory runners. Both are convertible into boats by using skis for ribs and covering the new outline with canvas, thus broadening the beam.

Squadron Leader F. Church, RAF, set up a radio station at Barrow and kept in touch until the men were out of range (about 350 miles), then moved it to the U. S. weather station on Fletcher's

Ice Island T-3, drifting in the Arctic Ocean. He left T-3 in October, on orders, but hoped to return in Feb. 1969, to follow the men on the remainder of their trip.

Cape Morris Jesup, Greenland, may be an island and not a peninsula as well as being cartographically misplaced—if the findings of an expedition to Greenland are correct.

Sponsored by the Control Data Corporation and the National Broadcasting Company, a four-man team flew to Cape Morris Jesup in early May, the fourth party to visit there since it was discovered by Adm. Peary in 1900. Using surveying instruments, they took readings at a number of points where lines from the sun and the moon intersected.

If their findings and calculations are correct (and they are being reviewed by the Army Map Service, Washington, and the National Geodetic Institute of Denmark) Cape Jesup is a mile north and 12 miles east of where it is shown on maps; it is an island and not a peninsula, and maps of the area will have to be revised. Map revision is important for safe submarine navigation under the polar ice.

The new measurements, if verified, do not reflect unfavorably on the work of early surveyors but come from refinement of surveying equipment and methods.

An average of 7,500 sizable icebergs (frozen fresh water) break off glaciers along the west coast of Greenland each year. Of the 400 that drift south of the 48th parallel, the latitude of Newfoundland, about 40 will drift to the vicinity of the 42nd parallel. Drift speed ranges from 5 to 40 miles per day.

The U. S. Coast Guard has been operating the International Ice Patrol since 1914. Today it maintains continuous aerial reconnaissance over more than 33,000 square miles of the North Atlantic. Seventeen nations underwrite the cost, their payments being related to the tonnage of shipping each has in these waters.

When a pilot sees an iceberg he drops a gallon jug of dye on it, marking it for tracking purposes. No practical way has been found to destroy icebergs. As they approach the Gulf Stream sea temperature rises to more than 60°F. and they melt swiftly, usually within two weeks.

The tallest iceberg recorded was found by the Coast Guard icebreaker *Eastwind* in 1957. The portion above water (550 feet) was about one-eighth of its total mass.

To aid in preserving polar bears (more than 10,000 are estimated to be alive now), the International Union for the Conservation of Nature and Natural Resources has listed this creature with other endangered species, and is gathering information on the size and distribution of polar bear populations and migrations. Theo Larsen has reported on aerial surveying, trapping and tagging carried out on Norway's Svalbard archipelago under the sponsorship of Oslo University and the Norsk Polarinstitut. The aerial surveys point to a heavier population there than in Alaska. The numerous tracks sighted suggest there is a strong migration of bears eastward from Svalbard in the spring, leading to speculation that there is a connection between the polar bear populations of Svalbard and the western Soviet Arctic. This study began in 1966 and will continue into 1970.

The National Research Council announced that the United States, Canada, Denmark and France have joined in a study to find out how Eskimos have managed to survive in a hostile environment. The study will be under the auspices of the 56-nation International Biological Program.

Scientists, using a Convair jet plane, made a series of flights 8 miles above the Arctic land mass gathering data on the northern lights. NASA reports the flights were coordinated with observations from ground stations, with sounding rocket missions and with observations from its OGO-4 (Orbiting Geophysical Observatory) which is more than 250 miles above the earth. The "how" and "why" of the multicolored auroras, often hundreds of miles long and observed as much as 200 miles above the earth's surface, is unknown.

Several dozen men from the Patuxent Naval Air Station, Maryland, spent several weeks in July, 1968, flying over Arctic areas gathering data for the U. S. Naval Oceanographic Office.

The purpose of the flight (one of many these

men undertake for the Naval Oceanographic Office) is to record sea ice conditions and the distribution and spacing of pack ice, the latter information so important to submariners as well as to the planning of mine and undersea war strategy.

EARLY EXPLORERS

1587—John Davis (England). Davis Strait to Sanderson's Hope, 72°12'N.

1596—Willem Barents and Jacob van Heemskerck (Holland). Discovered Bear Island, touched northwest tip of Spitsbergen, 79°49'N., rounded Novaya Zemlya, wintered at Ice Haven.

1607—Henry Hudson (England). North along Greenland's east coast to Cape Hold-with-Hope, 73°30', then north of Spitsbergen to 80°23'. Returning he discovered Hudson's Trenches (Jan Mayen).

1616—William Baffin and Robert Bylot (England). Baffin Bay to Smith Sound.

1728—Vitus Bering (Russia). Proved Asia and America were separate by sailing through strait.

1733-40—Great Northern Expedition (Russia). Surveyed Siberian Arctic coast.

1741—Vitus Bering (Russia). Sighted Alaska from sea, named Mount St. Elias. His lieutenant, Chirikof, discovered coast.

1771—Samuel Hearne (Hudson's Bay Co.). Overland from Prince of Wales Fort (Churchill) on Hudson Bay to mouth of Coppermine River.

1778—James Cook (Britain). Through Bering Strait to Icy Cape, Alaska, and North Cape, Siberia.

1789—Alexander Mackenzie (North West Co., Britain). Montreal to mouth of Mackenzie River.

1806—William Scoresby (Britain). North of Spitsbergen to 81°30'.

1820-2—Ferdinand von Wrangel (Russia). Completed a survey of Siberian Arctic coast. His exploration joined that of James Cook at North Cape, confirming separation of the continents.

1845—Sir John Franklin (Britain) was one of many to seek the Northwest Passage—an ocean route connecting the Atlantic and Pacific via the Arctic. His two ships, (the Erebus and Terror), were last seen entering Lancaster Sound July 26.

1888—Fridtjof Nansen (Norway) Crossed Greenland's icecap. 1893-96—Nansen in Fram drifted from New Siberian Isls. to Spitsbergen; tried Polar dash in 1895, reached Franz Josef Land.

1896—Solomon A. Andrée (Sweden) and companion, in June, made first attempt to reach North Pole by balloon; failed and returned in August. On July 11, 1897, Andrée and 2 others started in balloon from Danes Is., Spitsbergen, to drift across Pole to America, and disappeared. Over 33 years later, Aug. 6, 1930, Dr. Gunnar Horn (Norway) found their frozen bodies on White Is., 82° 56' N, 29° 52' E.

1903-06—Roald Amundsen (Norway) first sailed Northwest Passage.

DISCOVERY OF NORTH POLE

Robert E. Peary began exploring in 1886 on Greenland, when he was 30. With his hq. at McCormick Bay he explored Greenland's coast 1891-92, tried for North Pole 1893, returned with large meteorites. In 1900 he reached northern

limit of Greenland and 83° 50' N.; in 1902 he reached 84° 17' N.; in 1906 he went from Ellesmere Is. to 87° 06' N. He sailed in the Roosevelt, July, 1908, to winter off Cape Sheridan, Grant Land. The dash for the North Pole began Mar. 1 from Cape Columbia, Ellesmere Land. Peary reached the Pole, 90° N., April 6, 1909.

Peary had several supporting groups carrying supplies until the last group, under Capt. Robt. A. Bartlett, turned back at 87°47'N. Peary, Matthew Henson and 4 Eskimos proceeded with dog teams and sleds. They crossed Pole several times, finally built an igloo at 90°, remained 36 hours. Started south Apr. 7 at 4 p.m. for Cape Columbia. Eskimos were Coqueeh, Ootah, Eginwah and Seegloo. Adm. Peary died Feb. 20, 1920. Henson, a Negro, born Aug. 8, 1866, died in New York, N. Y., Mar. 9, 1955, aged 88. Ootah, last survivor, died near Thule, Greenland, May, 1955, aged 80.

1914—Donald MacMillan (U. S.). Northwest, 200 miles, from Axel Heiberg Island to seek Peary's Crocker Land.

1915-17—Vilhjalmur Stefansson (Canada) discovered Borden, Brock, Meighen and Loughheed Islands.

1918-20—Amundsen sailed Northeast Passage.

1926—Richard E. Byrd and Floyd Bennett (U. S.). Reached 87°44'N. in attempt to fly to North Pole from Spitsbergen.

1926—Richard E. Byrd and Floyd Bennett (U. S.). First over North Pole by air, May 9.

1926—Amundsen, Ellsworth, and Umberto Nobile (Italy) flew from Spitsbergen over North Pole May 12, to Teller, Alaska, in dirigible Norge.

1928—Nobile crossed North Pole in airship Italia May 24, crashed May 25. Amundsen lost while trying to effect rescue by plane.

1928—Sir Hubert Wilkins and Eielson. Flew from Point Barrow to Spitsbergen, 84°N.

SUBMARINE RECORDS

On Aug. 3, 1958, the Nautilus, under Comdr. William R. Anderson, became the first ship to cross the North Pole beneath the Arctic ice.

On Aug. 12, 1958, the nuclear submarine Skate, Comdr. James F. Calvert, became the second ship to make an underwater crossing of the North Pole.

In March, 1959, the Skate returned to the Arctic and, on its third attempt broke through at the North Pole, the first time any ship had been on the surface at 90° N.

The nuclear-powered U. S. submarine Seadragon, Comdr. George P. Steele II, made the first east-west underwater transit through the Northwest Passage during August, 1960. It sailed from Portsmouth, N. H., headed between Greenland and Labrador through Baffin Bay, then west through Lancaster Sound and McClure Strait to the Beaufort Sea. Traveling submerged for the most part, the submarine made 850 miles from Baffin Bay to the Beaufort Sea in six days. The vessel made a 300-foot dive to sail under an iceberg in Baffin Bay.

In February, 1960, the nuclear submarine Sargo traveled under the Arctic ice pack to and around the North Pole. The Sargo departed from and returned to Honolulu, and spent 31 days and 4 hours under the ice. The submarine successfully smashed its way through ice three feet thick.

Polar Expeditions—Antarctic, 1967-1968

The water dripping from an ice core into a beaker in a laboratory at the U. S. Naval Academy on July 10, 1968, was originally snow falling on Antarctica while Christ walked the Holy Land.

Army Engineers from the Cold Regions Research and Engineering Laboratory, New Hampshire, who completed the first drilling through the Antarctic Ice Cap, 7,100 feet, removed this 15-foot ice core from 850 feet below the surface of Byrd Station. Scientists determined by radiation measurement and a count of the layers of ice formed by summer thaws that was one of the layers was formed the year Christ was born.

Penetration of the Ice Cap, which holds about 9/10ths of the world's fresh water, was accomplished about 1½ miles below the surface. Studies of portions of the core samples of air, volcanic ash, ice and some rock from near the bottom will reveal much about the rate of snowfall, temperature variations and composition of the earth's atmosphere for thousands of years. The isotopes trapped within the samples constitute a historical thermometer and can be compared with established temperature-isotope tables to determine age spans.

If this ice sheet ever melts the Statue of Liberty will have water up to her nose and all major

seaports will be flooded for the Oceans will have risen about 200 feet, scientists estimate.

Scientists found dormant algae, fungi and bacteria in soil removed from ice-free Taylor Valley, where there is no snow or ice. Inactive during the winter months' low temperatures, these life forms are activated by summer run-off waters from the glaciers in the mountains above the valleys.

This area—the Dry Valleys of Antarctica—is valued by scientists who are developing equipment capable of detecting life on Mars, for it most nearly duplicates a Mars-like atmosphere.

Ten of 21 men living in isolation under the ice and snow of the South Pole—and removed from contact with the outside world—are the subjects of intensive medical studies directed by two psychiatrists.

Working under a grant from the National Science Foundation, these men submitted to many tests to establish their "normal" physical and mental bases before leaving the United States. Their daily activities are being observed and periodic recordings are made of their brain waves, heart action and electrical resistance of their skin. It has been found that men who live closely for long times under stress are subject to drastic emotional upsets.

January, 1968, saw the completion of an 815-mile two-month traverse across barren Queen Maude Land, between the South Pole and the Princess Ragnhild Coast.

Sponsored by the U. S. Coast and Geodetic Survey and financed by the National Science Foundation, the personnel of the expedition made the trip on Sno-cats. Their trip began at Plateau Station and ended at a point about 900 miles from the South Pole, and took them through a wind-swept desert where the temperature was often 50° below zero. A new low temperature mark for U. S. Antarctic bases of —123.1 F. was set at Plateau Station July 29, 1968.

The National Science Foundation reports that the 12-year-old Amundsen-Scott Station, now under 16 feet of drifted snow, will have to be modernized or replaced. Plans are being made to build a new station in the next several years.

McMurdo Station, also a dozen years old, is beset with urban sprawl and renewal plans. Steel structures are replacing the huts and shacks of 1957, with several dozen more to be added in the next 10 years.

For the summer population, which exceeds 1,000 men, there are 3 bars, 3 theaters, a bus line, a gymnasium, a power plant, junk yard and a garbage dump! All water pipes to the buildings must be heated to prevent freezing. On July 26, 1968, a wind velocity of 116.15 mph was recorded, a record for the station.

Antarctic survey ships have been aided by the United States satellite ESSA 3, orbiting 200 miles above the South Pole. Photographs made each day by the satellite were sent to the British Antarctic Survey at Cambridge, where they were studied for the location of open water leads and thick ice.

The International Weddell Sea Oceanographic Expedition, (IWSOE) aided by the U. S. Coast Guard icebreaker Glacier and Argentina's icebreaker San Martin initiated a comprehensive survey of the Weddell Sea, the first major work in the area since Sir Ernest Shackleton visited it in 1915.

Satellite signals relayed to the Glacier were particularly helpful. The signal information as to ice pack and cloud cover conditions enabled the Glacier to move around with a minimum loss of time and scientists established 70 scientific stations (more than planned), 90% of them in areas where no previous oceanographic data had been obtained.

The signals also enabled the Glacier to navigate these waters with greater than normal precision.

Through the joint cooperation of the British Antarctic Survey, the National Science Foundation and the Scott Polar Research Institute, a three-summer program has been laid out to record airborne radio echo soundings of ice depth over the whole of Antarctica.

During the first season's operations it was found that bottom reflections were generally constant to an ice depth of 6,500 feet, intermittent beyond that. Also, greater depths were recorded in those areas where the surface elevation was more than 11,450 feet. The maximum depth recorded was 13,780 feet, in the vicinity of Sovetskaya station.

FOREIGN OPERATIONS

Australians set up the Amery Ice Shelf Glaciological Research Station, stocking it with more than 40 tons of materials and supplies and four men who wintered there. This site was selected after radar-mapping the entire 153-mile front of the shelf, a line of 130-foot high ice cliffs.

Four tons of snow—from the "cleanest spot on earth"—were shipped from Plateau Station to Brussels, Belgium.

Dr. E. E. Picciotto, an authority on snow chemistry, will analyze the snow to determine the rate of fall of dust particles to the earth in the hope of gaining insight into the evolution of the earth and the solar system.

A 6-foot core of this snow equals 25 years of history, and its purity greatly exceeds that of the highest quality distilled laboratory water.

Belgian and South African scientists worked together in geological, glaciological and photogrammetric studies 250 miles to the south of the SANAE base and 560 miles west of Belgium's Roi Baudouin base. Dog teams and tracked vehicles transported the men in the field. Supplies were dropped them by plane.

Chileans continued their marine biology studies by taking another census of marine mammals to

ascertain the seal population and the annual loss of same. Such counts have been made since 1965.

Twelve men making up Japan's Ninth Antarctic expedition sought to complete a more than 1,500-mile overland hike from Japan's Showa base to the South Pole by Christmas Day, 1968. Their leader is M. Murayama, director of Tokyo's National Science Museum, a prominent polar researcher and mountaineer.

New Zealanders re-surveyed for the final time the stations set on the McMurdo Ice Shelf in 1963-64, for some markers were buried as much as 5 feet. A major part of the survey work was devoted to measuring surface elevation, from which it is hoped to produce a contour map of the ice shelf, an unknown characteristic of the Shelf.

The USSR established its fifth permanent Antarctic base, Bellingshausen Station, on King George Island in the South Shetland group, joining Britain, Argentina and Chile in the warmest part of Antarctica. The other bases are Vostok, Mirny, Molodezhnaya and Novolazarevskaya.

The United Kingdom's survey and geological research in the vicinity of Palmer Land-Alexander Island was restored with the re-stocking and re-opening of the Fossil Bluff station in George VI Sound, and the establishment of other depots in Palmer Land. Geologists concentrated their work on the nunatak region along western Palmer Land and eastern Alexander Island's Ablation Valley. The surveyors extended their work northwards along George VI Sound. Geophysical studies continued at the observatory on Argentine Island.

A number of small groups continued glaciological studies of the Brunt Ice Shelf.

EARLY HISTORY

Antarctica has been approached since 1773-75, when Capt. Jas. Cook (Britain) reached 71°10' S. Many sea and landmarks bear names of early explorers. Bellingshausen (Russia), discovered Peter I and Alexander I Islands, 1819-21. Nathaniel Palmer (U. S.) discovered Palmer Peninsula, 60° W. 1820, without realizing that this was a continent. Jas. Weddell (Britain) found Weddell Sea, 74°15' S., 1823.

First to announce existence of the continent of Antarctica was Charles Wilkes (U. S.), who followed the coast for 1,500 mi., 1840. Adelle Coast, 140° E., was found by Dumont d'Urville (France), 1840. Ross Ice Shelf was found by Jas. Clark Ross (Britain), 1841-42.

1895—Leonard Kristensen, Norwegian whaling captain, landed a party on the coast of Victoria Land in Jan. 1895. They were the first ashore on the main continental mass. C. E. Borchgrevink, a member of that party, returned in 1899 with a British expedition, first to winter on Antarctica.

1902-04—Robert F. Scott (Britain) discovered Edward VII Peninsula. In 1902 he reached 82°17' S., 146°33' E. from McMurdo Sound.

1908-09—Ernest Shackleton in 1908 introduced the use of Manchurian ponies in Antarctic sledding. In 1909 he reached 86°23' S., discovering a route on to the plateau by way of the Beardmore Glacier and pioneering the way to the Pole.

DISCOVERY OF SOUTH POLE

1911—Roald Amundsen (Norway) with four men and dog teams reached the Pole Dec. 14, 1911.

1912—Capt. Scott reached the Pole from Ross Island Jan. 18, 1912, with four companions (Dr. E. A. Wilson, Lt. Bowers, Capt. Oates, and Petty Officer Edgar Evans), where they found Amundsen's tent. Of Scott's party, Oates and Evans died first; Scott, Wilson and Bowers died in a tent around March 29. They were found Nov. 12, 1912.

1928—First man to use an airplane over Antarctica was Hubert Wilkins (Britain).

1929—Richard E. Byrd (U. S.) established Little America on Bay of Whales. On 1600-mi. airplane flight begun Nov. 28 he crossed South Pole Nov. 29 with pilot Bernt Balchen, a radio operator and a photographer. Dropped U. S. flag over Pole, temp. 16° below zero.

1934-35—Richard E. Byrd (U. S.) led second expedition to Little America, which explored 450,000 sq. mi. Byrd wintered alone at an advance weather station in 80°08' S.

1934-37—John Rymill led British Graham Land expedition of 1934-37; discovered that Palmer Peninsula is part of Antarctic mainland.

1940—Richard E. Byrd (U. S.) charted most of coast between Ross Sea and Palmer Peninsula.

1946-47—U. S. Navy undertook Operation Highjump under Rear Admiral Byrd. Ships were commanded by Rear Admiral Richard H. Cruzen. Expedition included 13 ships and 4,000 men. 29

land-based flights from Little America and 35 by seaplanes from tenders, photomapped coastline and penetrated beyond Pole.

1946-48—Ronne Antarctic Research Expedition, Comdr. Finn Ronne, USNR, determined the Antarctic to be only one continent, with no strait between Weddell Sea and Ross Sea; discovered 250,000 sq. miles of land by flights to 79°S. Lat., and made 14,000 aerial photographs over 450,000 sq. miles of land. Mrs. Ronne and Mrs. H. Darlington, who accompanied their husbands, were the first women to winter on Antarctica.

1955-57—U. S. Navy's Operation Deep Freeze led by Adm. Richard E. Byrd. Supporting U. S. scientific efforts for the International Geophysical Year, the Operation was commanded by Rear Adm. George Dufek. It established five coastal stations fronting the Indian, Pacific, and Atlantic Oceans and also three interior stations; explored more

than 1,000,000 sq. miles in Wilkes Land. Seven Navy men under Adm. Dufek landed by plane at the Pole Oct. 31, 1956, and landed radar reflectors.

1957-58—During the International Geophysical Year, July, 1957 through Dec., 1958, scientists from 12 countries conducted ambitious programs of Antarctic research. A network of some 60 stations on the continent and sub-Arctic islands studied oceanography, glaciology, meteorology, seismology, geomagnetism, the ionosphere, cosmic rays, aurora and airglow. A party from Ellsworth IGY station (US) south of Weddell Sea under the direction of Captain Finn Ronne explored beyond 1947 flight and delineated Berkner Island imbedded in the Filchner Ice Shelf. Pensacola Mountains, first sighted by Argentines in Oct., 1955 and seen by U. S. Navy in Jan., 1956, were accurately located. New mountain ranges about 11,000 ft. high were discovered in Edith Ronne Land.

Mountaineering, 1968

Source: National Geographic Society, Washington, D. C.

The North Ridge of Mount Kennedy (13,905 feet), Canada, was scaled for the first time by 4 Dartmouth College students in July. Their efforts included climbing nearly a mile up a vertical face which did not have a ledge more than a foot wide and working their way around several overhangs. One man was buried by an avalanche of snow and came through it unharmed.

Climbing the North Ridge is considered by some to present more challenges than climbing Mount Everest.

A 72-year-old woman, accompanied by her 77- and 75-year-old brothers, defied sub-zero weather and high winds in mid-August and climbed to the peak of Mount Whitney (14,494 feet), California, in 7½ hours.

The efforts of a 10-man Japanese team to scale the unclimbed South Ridge of the Yukon's Mount Vancouver (15,750 feet) in mid-June terminated when 3 of the climbers were killed by an avalanche. The 7 survivors returned to Japan.

A 6-man team (5 New Zealanders and an Italian journalist) reached the summit of 12,450 foot Mount Erebus, Antarctica, early in January.

The primary purpose of their climb was to gather snow accumulation data for a glaciological study, from stations spaced 1,000 feet apart on the mountain. They also tested a new motorized toboggan being considered for field work.

After spending several hours at the peak the team went on to Mount Terra Nova, which they peaked the following day. Lack of fuel prevented their going an additional 15-20 miles to reach the upper slope of Mount Terror, 10,075 feet.

Mont Blanc, 15,771 feet, is being used as a cosmic ray filter. Approximately 6 tons of geiger counters and other electronic components have been parked along the sides of the highway tunnel between French Savoy and Italy's Valle d'Aosta to measure the intensity of incoming low angle cosmic rays. The data obtained will be correlated with known vertical arrival figures and, hopefully, this will yield insight into the source of cosmic rays.

At the end of August the government of Nepal partially lifted a ban on the climbing of Himalayan peaks and will now permit the scaling of 38, including Mount Everest. The ban was placed in effect in 1965 for security reasons.

A 10-woman Japanese-Indian climbing party scaled 22,028-foot Kailas, Tibet, in mid-May. They had planned to climb other Himalayan peaks but a combination of bad weather, the death of one guide and the injury of another cancelled the additional climbs.

Six Australians, 4 of them women, attempted to climb Mount Everest at the turn of the year. They climbed as far as Khumbu Glacier, about 18,000 feet, at which point they were forced to turn back for the lack of special equipment needed to climb higher.

SOME EARLIER RECORDS

Mt. Everest, 29,028 ft. (India survey) Nepal-Tibet, was conquered May 29, 1953, when Edmund Hillary, New Zealand, and Tenzing Norkay, a Sherpa of Nepal, scaled its southwest face. They were members of a Royal Geographical Society-Alpine Club expedition. See note on height of Everest, page 720.

Two successful climbs were made in May, 1956. Three more occurred in May, 1963, by members of an expedition led by Norman G. Dyhrenfurth,

sponsored by the National Geographic Society.

Mt. Godwin Austen (K2), 28,250 ft., Kashmir, was surmounted July 31, 1954.

Mt. Kanchenjunga, 28,208 ft., Nepal-Sikkim, was conquered May 25, 1955, by a British team. The final six feet were left unscaled as a concession to the natives.

Lhotse I, 27,923 ft., Nepal-Tibet, was scaled May 18, 1956, by a Swiss team.

Mt. Makalu, 27,824 ft., Nepal-Tibet, conquered by a French Alpine Club team in May, 1955.

Mt. Dhaulagiri, 26,810 ft., Nepal, was scaled by a Swiss team on May 13, 1960.

Mt. Manaslu, 26,760 ft., Nepal, was climbed May, 1956, by a Japanese team.

Mt. Cho Oyu, 26,750 ft., Nepal-Tibet, was climbed Oct. 19, 1954, by 3 Austrians and a Sherpa guide. In 1964 5 W. Germans and 2 Sherpas made camp at 10,000 ft. From there 2 Germans on skis and 2 ski-less Sherpas set out for the peak, a German and a Sherpa reaching it.

Mt. Nanga Parbat, 26,660 ft., Kashmir, was scaled July 4, 1953, by an Austrian.

Mt. Annapurna, 26,504 ft., Nepal, was conquered by a Frenchman on June 3, 1950.

Mt. Gasherbrum I, 26,470 ft., Kashmir, was scaled July 5, 1953.

Mt. Gosaithan, 26,291 ft., Tibet, Scaled May 2, 1964, by a Chinese team which reported placing a bust of Mao Tse-tung atop it.

Mt. Gyachung Kang, 25,910 ft., Nepal-Tibet peak, was bested in April, 1964, by a Japanese team.

Mt. Nuptse, 25,726 ft., Nepal-Tibet, first ascended May 16, 1961, by a British team.

Mt. Ishtoro Nal, 24,240 ft. W. Pakistan peak, was scaled June 8, 1955, by an American team.

Mt. Api, 23,399 ft., Nepal, bested by an Italian team in 1954.

Mt. Kokthang, 23,000 ft., Sikkim, scaled by an Indian team April 26, 1962.

Mt. Aconcagua, 22,834 ft., Argentina, was first scaled in 1897 by Mathias Zurbriggen.

Mt. Numbur, 22,800 ft., Nepal, scaled in May, 1963, by a Japanese team.

Mt. Ama Dablam, 22,500 ft., Nepal, was first scaled in March, 1961, by a 4-man team.

Mt. Kangtega, 22,340 ft., Nepal, was scaled by an American in June, 1963.

Mt. Thamserku, 21,730 ft., Nepal, scaled by Edmund Hillary in 1964.

Mt. McKinley, Alaska, 20,320 ft. South face climbed first in 1961 by Italian team. Two New Jersey men climbed southeast spur June, 1962. Six U. S. guides climbed east buttress, May, 1963.

Mt. Kilimanjaro, 19,340 ft., Tanzania, Africa, scaled in 1962.

Mt. St. Elias, 18,008 ft., Alaska, scaled in 1964 for third time. It was first scaled in 1897 and again in 1946.

Mt. Eiger, 13,025 ft., Switz. The difficult mile-high north face was scaled for the first time in the summer of 1964 by a woman and a companion. Other women have scaled it by easier routes. Swiss climbers scaled it in 1963. On Mar. 12, 1961, a German team made the first winter ascent of the north face.

Aiguille du Midi, 12,608 ft., France, was scaled in 1964 by 3 Frenchmen in the first successful winter climb up the southwest face.

Mt. Huntington, 12,240 ft., Alaska, was scaled for the first time in 1964.

El Capitan, 9,920 ft., Yellowstone National Park, was scaled by 2 Americans and a Canadian over its southwest face in 1962.

Early Explorers of the Western Hemisphere

The first men to discover the New World or Western Hemisphere are believed to have walked across a "land bridge" from Siberia to Alaska, an isthmus since broken by Bering Strait. From Alaska, these ancestors of the Indians spread through North, Central and South America. Anthropologists have placed these crossings at between 18,000 and 14,000 B.C.; but evidence found in 1967 near Pueblo, Mex., indicates mankind reached there as early as 35,000-40,000 years ago.

At first, these people were hunters using flint weapons and tools. In Mexico, about 7000-6000 B.C., they founded farming cultures, developing corn, squash, etc. Eventually, they created complex civilizations—Olmec, Toltec, Aztec and Maya and, in South America, Inca. In what is now the eastern U. S., others created the Hopewell Culture, also based on farming, about 1000 B.C.; remains of it are seen today in large mounds in Ohio and elsewhere.

Norsemen (Norwegian Vikings sailing out of Iceland and Greenland) are credited by most scholars with being the first Europeans to discover America, with at least five voyages around 1000 A.D. to areas they called Helluland, Markland and Vinland—possibly Labrador, Nova Scotia or Newfoundland, and New England.

The remains of a settlement at L'Anse-au-Meadow, near the northern tip of Newfoundland, were uncovered by Dr. and Mrs. Helge Ingstad, Norwegian archeologists, 1960-63, with the aid of a grant from the National Geographic Society. They identified the settlement as Norse. Carbon-14 tests from hearths and the remains of a smithy indicated the site was occupied about 900 A.D. and during several hundred years before and after.

In 1965 Yale University announced the discovery of a map, drawn about 1440 and apparently based on earlier maps, showing an area southwest of Greenland labeled Vinland. The map also bore an inscription crediting the discovery of Vinland to Leif Ericsson and Bjarni (Herjolafsson), who are among leaders named in early Norse sagas describing voyages to Vinland.

Christopher Columbus, most famous of the discoverers, was born at Genoa, Italy, but made his discoveries sailing for the Spanish rulers Ferdinand and Isabella. Dates of his voyages, places he discovered and other information follow:

1492—First voyage. Left Palos, Spain, Aug. 3 with 88 men (est.). Discovered San Salvador (Guanahani or Watling Isl., Bahamas) Oct. 12. Also Cuba, Hispaniola (San Domingo); built Fort La Navidad on latter.

1493—Second voyage, first part, Sept. 25, with 17 ships, 1,500 men. Dominica (Lesser Antilles) Nov. 3; Guadalupe, Montserrat, Antigua, San Martin, Santa Cruz, Puerto Rico, Virgin Islds. Settled Isabella on San Domingo. **Second part** (Columbus having remained in Western Hemisphere), Jamaica, Isle of Pines, La Mona Isl.

1498—Third voyage. Left Spain May 30, 1498, 6 ships. Discovered Trinidad, Saw South American continent Aug. 1, 1498, but called it Isla Sancta (Holy Island). Entered Gulf of Paria and landed, first time on continental soil. At mouth of Orinoco Aug. 14 he decided this was mainland.

1500—Fourth voyage, 4 caravels, 150 men. St. Lucia, Guanaja off Honduras; Cape Gracias a Dios, Honduras; San Juan R. and Laguna de Chiriqui, Costa Rica; Veragua, Puerto Bello, Almirante (Isthmus of Panama).

A.D.	Explorer	Nationality and Employer	Discovery or Exploration
1497	John Cabot	Italian-English	Cape Breton Isl.
1498	John and Sebastian Cabot	Italian-English	Labrador to Hatteras
1499	Alonso de Ojeda	Spanish	South American coast, Venezuela

1831-36	Benj. de Bonneville	American	Rockies, California
1842	John C. Fremont	American	Rockies, Pacific Coast

Developments in the Earth Sciences

United States Geological Survey

Studying the Earth from Space: Photographs of the Earth's surface obtained from manned and unmanned satellites are providing scientists with new tools to investigate the Earth and its environment, to record changes in the environment, and to collect data that help to make the best use of the assets of our planet. Scientists of the U. S. Department of Interior's Geological Survey, in cooperation with the National Aeronautics and Space Administration (NASA), recently embarked on a program that will provide for the use of resources data acquired from Earth orbital satellites carrying remote-sensing instruments.

The first data to be applied to large operational resources problems will be acquired by an unmanned satellite. This satellite will use a multi-spectral television system to transmit pictures to receiving stations on the Earth. Each picture will cover an area 100 miles square with a ground resolution of 100-200 feet. Complete coverage of the globe would be achieved every 18 days. Later satellites will carry new, more highly sophisticated sensing devices to further enhance our ability to study the Earth from space. Sensing devices that may be carried by orbital satellites include photographic-cameras, radar, infrared and microwave imagers and radiometers, gravimeters, and luminescence sensors.

Hydrology: Implementation of the satellite program will provide a wide range of information that is important in water-resources planning and management, such as data on the runoff and water retention characteristics of drainage basins, measurements of evapotranspiration, water-surface roughness, the flow of major rivers, and groundwater discharge. It may become possible to determine rates of reservoir sedimentation and the growth of deltas; to assess some aspects of water pollution; and to monitor and assess erosion, sedimentation, and other changes in the hydrologic environment brought about by man's activities.

Geology: Satellite photography is unequalled for geologic interpretations of very large areas because geologic structures are easier to see on the synoptic, orbital-height photograph than on a mosaic of hundreds of aerial photographs. This is particularly true of long, linear features such as faults which are sometimes associated with deposits of valuable minerals.

Satellite studies can help in the search for new sources of petroleum by showing the broad, gentle folds in the Earth's crust that commonly serve as reservoirs for petroleum.

Airborne ultraviolet sensors are already helping scientists locate certain types of minerals, such as the highly luminescent phosphates. Infrared images from Nimbus satellites, for example, have provided information on the temperature and emissive characteristics of terrain and water surfaces and on volcanic activity. Radar images can be particularly useful in structural mapping. Because radar is remarkably sensitive to gross roughness, faults, fractures, and folds in the Earth's surface are generally well defined.

Cartography: A photomap of the southwestern United States, covering 270,000 square miles and compiled from photos taken by Gemini astronauts, was prepared in 1968. This 1:1,000,000 scale map is part of a program to show the feasibility and economy of evaluating earth features from space.

Space-acquired data about the Earth afford several advantages to map makers; particularly important are speed of data collection and economy of data utilization. Also data from satellites in a circular, sun-synchronous orbit are comparable for the entire earth, and provide a uniformly reliable basis for mapping and charting. By using orbital photography and other remote-sensor data, the publication of a truly up-to-date world map at the scale of 1:1,000,000 will be possible.

Ecology: Management and conservation of public lands will be greatly improved through the use of remote-sensing devices because detailed land studies of features or conditions that change with time (such as the distribution, health, and vigor of vegetation) will be supported by general views from space.

Flood-plain mapping: Mapping of the parts of flood plains inundated by major floods is a prerequisite to the delineation and possible flood-zoning

of these hazard-prone areas. The U. S. Geological Survey has published nearly 100 flood-plain maps and many other maps of this kind have been prepared in limited editions for the use of public officials and other interested citizens. The Survey's flood-mapping program is now being greatly accelerated under a cooperative effort being coordinated by the U. S. Army, Corps of Engineers.

Urban Hydrology: In 1968, the Geological Survey published "Water Data for Metropolitan Areas—a summary of data from 222 areas in the United States." For each Metropolitan area the report identifies the principal sources of municipal and industrial water supply, summarizes the principal water problems, and identifies the types of water data currently being collected by the Survey.

Regional water-resources appraisals: Comprehensive studies of water resources continued in the basins of the Arkansas, Brazos, Colorado, Patuxent, Potomac, and Willamette Rivers, and a 5-year study of the Delmarva Peninsula (Del.-Md.-Va.) was begun in 1968. These regional appraisals, when completed, will provide a quantitative analysis of the entire hydrologic system of which the river is a part, sufficient to explain and predict the flow characteristics of the river, the influence of ground water, and the effects of human activities upon the system.

Mineral Resources: The U. S. Geological Survey is conducting research in a wide variety of geological environments in a search for clues to new sources of ores, fertilizer minerals, fossil fuels and construction materials. These programs consist of field research in the distribution, structure, chemical and physical properties of the rocks of the earth, supported by laboratory research and development of new tools and techniques to aid in discovery of the needed mineral raw materials.

Existing analytical techniques have been extended and new techniques have been developed to determine very low concentrations (background levels) of certain chemical elements in rocks and minerals. Using these newly-developed tools and techniques, Survey scientists are identifying mineral target areas considering to be worthy of more detailed exploration and appraisal by private interests.

Natural Hazards: Cities and towns continue to encroach into areas susceptible to natural hazards, chief among which are earthquakes. Ways to live safely in earthquake-prone areas are being sought by the Survey through basic geologic studies of broad areas and intensive research on active fault zones, particularly in the western United States. Scientists from the National Center for Earthquake Research in Menlo Park, Calif., are using a wide array of refined seismographs, tiltmeters, strainmeters, magnetometers, and gravity meters to "take the pulse" of the earth along known zones of crustal weakness. Continued research on the causes and nature of volcanic activity and its dangers is concentrated at the Survey's Hawaiian Volcano Observatory, located on the rim of Kilauea Volcano on the island of Hawaii.

Research under the sea: Recognizing the sea floor as a likely target for mineral exploration, the Geological Survey is conducting a broad program of research in cooperation with universities and other Federal agencies, designed to decipher the geologic environment of the continental shelf areas and to identify favorable target areas which may become sources of metals, minerals, and oil and gas. In particular the shelf areas now under study include the Carolina coastal margins, the sea floor off Washington and Alaska, and the sea floor off Puerto Rico.

Lunar Geology: The Geological Survey is carrying out a program of lunar research in support of the goals of the National Aeronautic and Space Administration. The Survey's current work consists of lunar geologic mapping, studies in cosmic chemistry and petrography (meteorite, tektites, and cosmic dust), geologic study of terrestrial analogs of lunar features, and development of research instruments and techniques needed to effectively support manned and unmanned geologic exploration of the lunar surface. Based on interpretations of lunar geology, the Survey has recommended prime sites for the first Apollo moon landing.

International Cooperation: For more than 25 years the Geological Survey has provided developing nations with technical assistance in appraising their natural resources and in training their earth scientists at the request of the various foreign governments. During the past year the Geological Survey provided 144 specialists to 35 countries and arranged academic or practical training in the United States for 87 earth scientists and engineers from 25 foreign countries.

Topographic Mapping: The principal function of the Topographic Division of the Survey is to produce topographic maps of appropriate scale and accuracy to meet the Nation's many needs for general-purpose maps. The USGS publishes about 30,000 different maps in several standard scales and quadrangle sizes. These maps provide a wealth of information needed for planning and executing various projects. Nearly 8,000,000 copies were distributed in 1968.

Topographic map revision: A new "photorevision" technique has been developed by the Survey which will permit topographic maps to be updated more rapidly. Aerial photographs are used to locate various features such as new interstate highways, industrial plants, suburban housing, shopping centers, dams, and relocated streams. No field checking or contour line changes are involved. The newly added data are printed on the map in purple clearly showing the changes and additions which have occurred, thus providing a historical comparison that is useful to city planners, geographers, earth scientists, and engineers.

"Orthophotomapping"—A New Technique: Ortho-

photomaps have been officially introduced into the National Topographic Program. This new map product, as prepared by the Survey, is a topographic map on which the natural and cultural features are portrayed by color-enhanced photographic images in true position. Cartographic symbols are added as needed for interpretation by map users. In 1968 the last of the 16 orthophotomaps covering the entire Okefenokee Swamp were published. Hence, for the first time in nine decades, an entirely new map product has replaced the standard topographic map.

National Atlas: The USGS continues its preparation of a 500-page National Atlas of the United States, which in a single volume will provide an accurate composite record of the physical environment of the nation, its resources, economy, industry, population, history and social culture, and political subdivisions. All pages of this unique reference and research tool were in some phase of preparation in late 1968 and 18 maps had been published and were available for purchase. Publication of the bound volume is planned for the fall of 1969.

Conservation: The Federal outer continental shelves off Louisiana, Texas, and California continue to attract the attention of the petroleum industry. Bonuses for the right to explore and develop offshore oil and gas lease tracts amounted to nearly \$1.2 billion in fiscal 1968. Recent discoveries on the Arctic Slope of Alaska confirm the existence of large hitherto unknown deposits of petroleum on both state and Federal lands which will substantially increase the nation's energy resources.

Mineral Production, Value and Royalty (Fiscal Year 1968a)

Lands	Oil	Gas	Gas Liquids		Value	Royalty
			Gallons	Tons		
Public	189,000,000	1,000 cu. ft.	500,000,000	25,600,000	\$829,000,000	\$85,000,000
Acquired	11,000,000	28,000,000	500,000	265,000	51,000,000	6,000,000
Indian	31,000,000	125,000,000	65,000,000	11,628,000	132,000,000	16,000,000
Military	1,500,000	48,000,000	50,000,000		15,500,000	2,200,000
Outer continental shelf	260,000,000	1,400,000,000		1,900,000	1,103,000,000	180,000,000
Naval petroleum res. no. 2	3,000,000	5,000,000	14,000,000		10,000,000	1,200,000
Total	495,500,000	2,506,000,000	629,500,000	39,393,000	2,139,500,000	290,400,000

*Estimated in part. ^bAll minerals except petroleum products; includes coal, potassium, sodium, etc.

The Continental Divide

Source: U. S. Geological Survey, Department of the Interior

Continental Divide: watershed, created by mountain ranges or table-lands of the Rocky Mountains, from which the drainage is easterly or westerly; the easterly flowing waters reaching the Atlantic Ocean chiefly through the Gulf of Mexico, and the westerly flowing waters reaching the Pacific Ocean through the Columbia River, or through the Colorado River, which flows into the Gulf of California.

The location and route of the Continental Divide across the United States may briefly be described as follows:

Beginning at point of crossing the United States-Mexican boundary, near long. 108° 45' W., the Divide, in a northerly direction, crosses New Mexico along the western edge of the Rio Grande drainage basin, entering Colorado near long. 106° 41'.

Thence by a very irregular route northerly across Colorado along the western summits of the Rio Grande and of the Arkansas, the South Platte, and the North Platte River basins, and across Rocky Mountain National Park, entering Wyoming near long. 106° 52'.

Then in a northwesterly direction, forming the western rims of the North Platte, Big Horn, and Yellowstone River basins, crossing the southwestern portion of Yellowstone National Park.

Thence in a westerly and then a northerly direction forming the common boundary of Idaho and Montana, to a point on said boundary near long. 114° 00' W.

Thence northeasterly and northwesterly through Montana and the Glacier National Park, entering Canada near long. 114° 04' W.

World's Tallest Known Trees

The world's tallest living thing, the *Howard Libbey Tree*—a California redwood—was found by Dr. Paul A. Zahl, staff member of the National Geographic, on the east bank of Redwood Creek in Humboldt County, Calif., in 1963. When discovered it measured 367.8 ft. high with a girth of 44 ft. Remeasured four years later, it was found to be 367.6 ft. high. The *Harry W. Cole Tree* was

originally 367.4 ft. but on remeasurement found to be 365.4 ft., and the *National Geographic Tree* was originally 364.3 ft., but is now 364.5 ft. high.

Only California and a pocket in southern Oregon produce earth's tallest living things—the coast redwoods, *Sequoia sempervirens*. Trees grow in a belt 500 miles long and about 30 miles wide.

Forest monarchs of three other species grow in Pacific Coast States, Australia and Tasmania. They include a 324-foot Douglas Fir (*Pseudotsuga Taxifolia*) at Rydewater, Wash.; a 322-foot Eucalyptus tree (*Eucalyptus Regnans*) in the Styx River Valley of Tasmania; a 306-foot tree of the same species in Victoria, Australia; the 291-foot McKinley Tree and the 272-foot General Sherman, both redwoods (*Sequoia Gigantea*) in Sequoia National Park, Calif.

Height	All in California	
367.6	Howard Libbey Tree....	In Redwood
365.4	Harry W. Cole Tree....	Creek grove
364.5	National Geographic Tree	Humboldt Co.
356.5	Rockefeller Tree....	Humboldt Red-
352.6	Founders Tree....	woods State Park
352.3	Redwood Creek grove	

Undersea Craft to Observe Marine Life in Gulf Stream

Construction continues on the PX-15 mesoscaph, a new undersea craft designed by Dr. Jacques Piccard. In this 48-foot vessel he and several associates will drift for 6 weeks along the west

edge of the Gulf Stream, from South Florida to Nova Scotia (about 1,500 miles) at depths up to 2,000 feet, observing marine life through 29 portholes.

1968 Oceanographic Events

Source: National Geographic Society, Washington, D. C.

The third open-ocean phase of the U. S. Navy's "Man in the Sea" program began in the fall of 1968. In preparation for the use of Sealab III, aquanauts tested experimental salvage techniques, conducted oceanographic and marine biological research and ran a series of physiological and human performance tests on the ocean bottom off San Clemente Island, Calif.

Each of five 8-man diving teams, made up of scientists and Navy divers, spent 12 days in the submerged Sealab III, which was anchored in 600 feet of water. Fifty-seven feet long and 12 feet in diameter, this non-propelled vessel is cylinder-shaped, with two rooms attached to the top of it. The teams travel back and forth between the craft and the mother ship in a special pressurized elevator.

Specially designed equipment, called the Bottom Environmental Sensing System, was lowered to gather bottom data around the Sealab III site. It photographed the bottom, recorded current information, took temperature readings and measured sediment and visibility. The bottom in this area is generally sandy and alternates from smooth and flat to steep and boulder-strewn.

The Glomar Challenger, which has in place of a mast an oil field tower rig that stands 170 feet above the waterline, is drilling into ocean floors at 50 sites around the world to gather data on the oceans and their record of changing climates and evolving life.

First drillings were in the Atlantic Ocean. Core samples were taken from the first 3 borings only because the process is so time-consuming. The ship then moved to the southern half of the Gulf of Mexico to explore an unusual formation there that may be an oil field comparable to the one in the Louisiana-Texas region.

Sonic sounding devices have located under the sediment in the deepest part of the Gulf a number of domes similar to salt domes typical of oil fields. Since these domes have never been tapped, there is uncertainty as to what will happen when the drill penetrates and releases oil which is under great pressure. The highest oil well pressure recorded is 8,000 pounds to the square inch—and some think that if the drill does penetrate an untapped dome where there is oil under such pressure the pipe would be blown out, wrecking the equipment. Others believe that the 6,000 pounds per square inch water pressure at the bottom of the Gulf would dampen any such explosion. But no one knows for sure.

The general plan calls for drilling each hole until the bit wears out, then moving to the next site. Hopefully, the floors can be drilled to 2,500 feet beyond a water depth of as much as 4 miles.

Sound waves emanating from two sonar beacons dropped to the bottom are picked up by hydrophones attached to the ship's hull and the signal is fed into a shipboard computer which controls the position of the ship. A pair of large-diameter tubes pass sideways through the hull, one such pair built into the bow area and another pair in the stern area, and each tube has a computer-controlled propeller. The computer determines the direction and distance the ship is to be rotated and actuates the propellers within the tubes to move the ship the required distance; at the same time it controls the main screws to keep the ship headed into the wind and current.

Guinea Tide

The recently discovered and little-known Guinea Tide, which originates in the Gulf of Guinea, just beneath Africa's western land bulge, is the Atlantic home of the highly prized yellowfin and skipjack tuna. Discovery of the Tide was accidental—it came to light when fishing boats working an area of the Atlantic new to them made repeated substantial catches of yellowfins.

Oceanographers spent 4 months and traveled nearly 18,000 miles on the Bureau of Commercial Fisheries' Undaunted to study this phenomenon. They ascertained that this is a different temperature body of water moving into adjoining water and not a true tide. They also ascertained that its movement is seasonal and powerful; that when it does begin to move it heads southward and has a force as strong as any oceanic tide: its daily speed rate averages 7 to 8 miles and it is centered in a little-traveled and little-fished area.

Pacific waters are also being searched for these fish (abundant until 1966) by the Bureau of Commercial Fisheries, the Scripps Institution of Oceanography and scientists from Chile, Ecuador, Mexico and Peru. The search area is some 7,000,000 miles and extends as much as 3,000 miles from the coast lines of these countries. Information is also being gathered on the unexplained shift of current which occurs every 10 years off the coast of Peru.

Underwater archeological excavation of Port Royal, Jamaica, continues into its fourth year, under the guidance of Robert Marx.

An earthquake in 1692 dropped Port Royal beneath the sea. Marx and his aides have recovered many rare and valuable objects from the bottom—watches, church-warden clay pipes with hallmarks, onion bottles, human hair, and a tobacco leaf.

French archeologists will probe the bottom of St. Ann's Bay, Jamaica, to see whether or not two wrecks under 10 feet of mud are caravels abandoned by Columbus in 1503, on his last trip to the New World.

One of the wrecks was found in 1966 by Marx, who removed from the hulk some wood, nails, ceramics, and flint for analysis.

Columbus' records do not give the exact measurements of the ships, but his general description suggests they were about 70 feet long, drew 9 feet of water, had a 23-foot beam, and carried a crew of 30-40 men.

It is not expected that the hulks will contain highly valuable treasures, but if enough of the keel and ribs can be salvaged reconstruction will be fairly easy.

The oceanographic ships USNS Kane and the USS San Pablo spent the summer surveying the Caribbean and the Gulf of Mexico. The data gathered (which included such things as water chemistry, acoustical measurements, bathymetric, seismic and magnetic measurements, etc.) were fed into a computer. When the data are published they will be released through the Naval Oceanographic Office and the National Oceanographic Data Center in Washington.

For the first time in history a sea-borne IBM computer and a Navy satellite have been joined together in a year-long geological-geophysical study of the Atlantic, Indian and Pacific Oceans. Feeding satellite navigation signals into the computer enabled scientists aboard the research

ship *Argo* to pin-point scientific data gathered within a tenth of a mile of the ship's exact position. Upon completion of the cruise in March, 1969, the *Argo* will have traveled 61,000 miles to make this study for the Scripps Institution of Oceanography.

The U. S. Coast and Geodetic Survey ship Oceanographer found 25 new submerged mountains in the South Pacific Ocean, some standing 10,800 feet above the bottom; also a number of north-south fractures (at right angles to those found in the North Pacific), and areas of the ocean basin that are as much as 3,000 feet deeper than expected.

A 180-foot buoy was attached to the top of Cobb Seamount, an underwater "island" about 250 miles west of Washington state. Cobb rises to within about 120 feet of the surface of the Pacific Ocean. Various instruments for gathering weather and oceanographic information have been attached to the 60-foot portion of the buoy above water. Since most of the Pacific Northwest weather passes over this area en route east, the climatological instruments will give advance notice of weather conditions.

Penetration of Daylight

The Navy Oceanographic Office reports that data gathered by 5 different research submarines show that daylight penetrates the ocean as much as 2,300 feet. Maximum penetration was observed when the research submarine *Alvin* descended in the Tongue of the Ocean, Bahamas, between 2,100 and 2,300 feet. Personnel working in another vessel reported that natural light at a 600-foot depth off the coast of San Diego, Calif., offered a greater viewing range than the vessel's artificial lighting offered because of the lesser effects of scattering.

Four men in the 40-foot submarine *Deep Quest* set a new submarine diving record when they descended more than 8,100 feet in Pacific waters, 90 miles southwest of San Diego. An American flag was attached to the outside of the vessel and

when it reached bottom one of the men within it actuated a firing mechanism which not only released the flag but drove the flagstaff into the ocean bottom.

The Scottish Oceanographic Laboratory began a 5-year study of the top 300 feet of the North Atlantic Ocean. Cargo and weather ships will tow special equipment about 120,000 miles each year to gather data on temperature, chemical pollution, salinity, plankton, etc. It is hoped that the information gathered will aid the world's food supply.

Scientists are evaluating data gathered pertaining to a 175-mile long sea channel, which they believe once joined the Aleutian Abyssal Plain with the North American continent. They are hopeful that this channel, 3 miles beneath the surface of the Pacific Ocean, will provide substantial new information on the geology of the area. It is thought that the same geological shifts which formed the Aleutian Trench nearly 15,000,000 years ago broke the channel.

A representative of the Woods Hole Oceanographic Institution suggests that legal changes are necessary to encourage private industry to raise food in the sea, for in the United States most fishing grounds are in the public domain. He points out that under 5% of U. S. oyster grounds are privately owned (about 165,000 acres) but more oysters are harvested from them than from more than 4,000,000 public acres.

An area the size of Long Island Sound, maintained for the raft culture of shellfish, could produce an annual crop of mussel meat equal to the entire World's commercial fish landings.

Minerals of 35 of the major elements can be extracted from sea water or mined economically; means will be found to use tides for power generation, and fish farming will double within the decade and redouble by 1975, predicts Dr. N. Fleming of the United Kingdom's National Institute of Oceanography after an 18-month study of the potential benefits which may be harvested from the sea.

The Average Rise and Fall of Tides

*In statute miles (April 1, 1961). (—) Represents zero.

¹ Figures are lengths of general outline of seacoast. Measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. Coastline of sounds and bays is included to a point where they narrow to width of unit measure, and includes the distance across at such point.

² Figures obtained in 1939-40 with a recording instrument on the largest-scale charts and maps then available. Shoreline of outer coast, offshore islands, sounds, bays, rivers, and creeks is included to the head of tidewater or to a point where tidal waters narrow to a width of 100 feet.

Ocean Area and Average Depth

Four major bodies of water are recognized by geographers and mapmakers. They are: the Pacific, Atlantic, Indian and Arctic oceans.

The Atlantic and Pacific Oceans are considered divided at the equator into the No. Atlantic and So. Atlantic; the No. Pacific and So. Pacific.

The Arctic Ocean is the name for waters north of the continental land masses in the region of the Arctic Circle. The term Antarctic Ocean is used by some cartographers to describe the waters around Antarctica, but no fixed geographic points locate its northern limits.

The Malayan Sea is not considered a geographical entity but a term used for convenience for waters between the South Pacific and the Indian Ocean.

Geologic Time—The Age of the Earth

by William L. Newman, Geologist, U. S. Geological Survey

The earth is at least four and a half billion years old, according to recent estimates. This vast span of time, called geologic time by earth scientists and believed by some to reach back to the birth of the Solar System itself, is difficult if not impossible to understand in the familiar units of months and years, or even centuries. How then do scientists reckon geologic time and why do they believe the earth is so old?

The evidence for an ancient earth is concealed in the rocks so liberally displayed on the earth's surface. Their ages vary widely but, like pages in a long and complicated history, they record the earth-shaping events of the past such as mountain building, cycles of erosion and deposition, and sea encroachment.

Two scales are used to date the various episodes and to measure the age of the earth—a relative time scale, based on the sequence of layering of the rocks and the slow but progressive development of life as displayed by fossils preserved in the rocks; and an atomic time scale, based on the natural radioactivity of chemical elements in the rocks.

James Hutton, in 1785, first proposed the most fundamental principle used to determine the relative ages of rocks: the law of superposition. He proposed that wherever untruncated layers of rocks are exposed, the bottommost layer was deposited first and is, therefore, the oldest exposed; each succeeding layer is progressively younger.

William Smith discovered in 1798 that certain layers of rocks contained fossils unlike those in other layers, and that rocks of the same age could be identified by their similar or related fossil assemblages. By combining the study of fossils (paleontology) with the study of rock layers (stratigraphy), geologists are able to match or "correlate" strata of the same age throughout a large region and even throughout the world.

Recurring events in the earth's history such as mountain building and sea encroachment, of which the rock layers themselves are records, comprise units of geologic time even though the actual dates of the events are unknown. Human events are commonly dated in relative terms as having taken place either B.C. or A.D.—broad divisions of time. Shorter spans are measured by the dynasties of ancient Egypt or by the reigns of kings and queens in Europe. Similarly, geologists have divided relative time into *Eras*—broad spans based on the general character of life that existed during those times, and *Periods*—shorter spans based partly on evidence of major disturbances of the earth's crust. Periods are further subdivided into *Epochs*.

The atomic time scale is an outgrowth of Henri Becquerel's discovery in 1896 of the natural radioactive decay of uranium. Radioactive decay is a spontaneous process in which an atom (the parent) loses particles from its nucleus to form an atom (the daughter) of a different element. The rate of decay is conveniently expressed in terms of the atom's *half-life*. The atoms (isotopes) of certain elements decay slowly and several of these are used as atomic clocks:

Parent (isotope)	Daughter (isotope)	Currently accepted Half-life values
Potassium ⁴⁰	Argon ⁴⁰	1.3 billion years
Rubidium ⁸⁷	Strontium ⁸⁷	50 billion years
Thorium ²³²	Lead ²⁰⁸	14.1 billion years
Uranium ²³⁵	Lead ²⁰⁷	713 million years

Dating rocks by the atomic clock method is simple in theory but the laboratory procedures are complex. The numbers of parent and daughter atoms in each specimen must be determined in order to tell how long the radioactive process has been going on, or—in other words—the age of the rock. The principal difficulty lies in measuring precisely very tiny amounts of atoms.

Interweaving the relative time scale with atomic time poses certain problems because not all types of rocks can be dated directly by atomic methods. Igneous rocks, such as granite and basalt which crystallize from a molten state, are most useful for this purpose. By bracketing sedimentary rock layers within time zones determined by dating appropriately selected igneous rocks, however, the following time chart combining both relative geologic time and atomic time has been constructed:

RELATIVE GEOLOGIC TIME

Era	Period		Epoch	Atomic time*
Cenozoic	Quaternary		Holocene	2-3
			Pleistocene	23
	Tertiary		Pliocene	12
			Miocene	26
			Oligocene	37-38

12,000,000-year-old Stone Hammer Found by Dr. Leakey

Source: National Geographic Society, Washington, D. C.

A pre-human African hominid, *Kenyapithecus wickeri*, added animal food to his diet by hammering open skulls and bones to reach brains and marrow, using a crude stone hammer found at Fort Ternan, Kenya, by Dr. Louis S. B. Leakey.

The hammer, which shows considerable damage along two angular edges as a result of usage, is an important milestone in our understanding of man's evolution as a toolmaker. Also found at the site were fossil bones of animal skulls and bones which showed evidence of deliberate fracture.

The discoveries were made under a grant from the National Geographic Society, a long-time sponsor of Dr. Leakey's research.

Homo habilis had a kit of several kinds of stone tools. However, the much older find suggests that, in time, stone tools made during the Pliocene age will be found, thus dating the start of toolmaking as much as 10,000,000 years before *Homo habilis*.

Work at the site exposed a rich fossil deposit of the Upper Miocene age, also about 12,000,000 years old.

Another discovery was that of a complete fossil elephant, 2,000,000 years old, found in 1967 in the Baringo area of Kenya by the Leakeys' son and daughter-in-law. The brittle fossil stood 13 ft. high at the shoulder, two feet taller than today's largest elephants, and had straight tusks which reached to the ground. It is now in the collection of the Kenya National Museum Centre for Pre-history and Paleontology at Nairobi.

The most famous of discoveries by Dr. and Mrs. Leakey were remains of the three species of hominids found in Olduvai Gorge, Tanzania, where they may have lived alongside one another nearly 1,800,000 years ago. The Gorge is a rich fossil site near Serengeti National Park, cut away by erosion; its cliffs reveal the geological sediments of 2,000,000 years.

Volcanoes of the World: Eruptions of 1968

Source: National Geographic Society, Washington, D. C.

(E) Eruption, year in parentheses (R) Rumbling (St) Steaming (D) Dormant

Another volcano in Antarctica made itself known Dec. 4, 1967, when a 10-mile-wide crater-lake began erupting about a mile and a half from the Chilean Antarctic Station on Deception Island, some 6.3 miles south of Tierra del Fuego. Personnel manning Argentina's, Chile's and Great Britain's stations on the island were forced to flee their buildings and await evacuation by helicopter. Rescue ships could not enter the horseshoe-shaped bay because the water rose and fell rapidly, the heat was intense and the bay was being showered with rock and ash; the helicopters were forced to fly shuttle trips across the bay.

In the month prior to the initial eruption, a seismograph at the Chilean base recorded nearly 350 tremors.

The Chilean station was covered with nearly a foot of ash. One crater was found only three-fourths of a mile from the Chilean base. About two inches of ash settled on the British station.

The eruptions created a new 200-foot-high island in Telefon Bay which measures about a half-mile wide by three-quarters of a mile long and is composed of volcanic ash and scoriae. British scientists are studying this island.

Of particular interest is the fact that penguins and skua gulls fled their rookeries several hours before the men on the island felt the first tremors. Scientists would like to know whether or not their departure was coincidence or if they have an "early warning system" that is better than man-made machines.

Antarctica has been one of the quietest areas on the earth so far as earthquakes and volcanoes are concerned. But this may be changing with the discovery several years ago of the active volcano Mount Melbourne, 8,500 feet, nearly 200 miles from Mount Erebus, and now Deception's shift from passive to active. Recently made infrared aerial photographs show molten lava in the summit crater of Mount Erebus.

One theory about the change of role is that the harbor area of Deception Island is a water-covered volcano, just as is Crater Lake, Oregon, and that, with the passage of time, enough water seeped through and became so highly heated that it created sufficient steam to cause the eruptions. Another thought is that internal pressures may have caused it to become active.

On July 29, 1968, for the first time in more than 500 years, Mount Arenal, 5,092 feet, Costa Rica, erupted, with blasts continuing over several days. Some of the smoke and ash was projected 45,000 feet into the sky and carried as far as 250 miles to the north to fall on Managua, Nicaragua.

Puerto Nuevo, a village of more than 8,000 residents near the base of the volcano and about 50 miles north of San José, was partially destroyed. Nearly 100 persons have been killed by this volcano.

It is estimated that it will take Costa Rica 20 years to recover from the nearly \$50,000,000 damages these eruptions have caused.

The U. S. Geological Survey advises that Mount Shasta and Lassen Peak, Calif., and Mount St. Helens, Wash., are volcanoes similar to Arenal: dormant, not necessarily dead. It is also believed that Mount Rainier erupted about the same time as Arenal did 500 or so years ago.

Mayon, 8,284 feet, in the Philippines, erupted in 1968, its first eruption since 1947 and its 32nd eruption since 1814. It erupted 82 times in the 10 days following its initial eruption in April, 1968, causing tens of thousands of its residents to leave their homes because of the danger of hot mud flows and floods.

One blast was reportedly so strong that it jolted the recording pen off a nearby seismograph.

Four refugees returning to their homes died from inhaling volcanic ash, causing police to arrest refugees trying to enter the evacuated areas.

Also in the Philippines, 984-foot Mount Taal, south of Manila erupted again on Jan. 31, the fourth time in a year.

Mount Etna continued its rumblings, with an occasional mild eruption. As of mid-year none of the eruptions had been violent nor had the lava flow threatened nearby towns.

Kilauea volcano's Hiiaaka crater erupted the morning of Aug. 22 with 75-foot fountains, the first time in history this crater had erupted.

Mt. Vesuvius, dominating the Bay of Naples, is the most famous of volcanoes. In August, 79 A. D., it buried Pompeii (c. 20,000 pop.) under hot ash and Herculaneum and Stabiae under mud flows. Three-fifths of Pompeii has been excavated; also part of Herculaneum, most of which lies under Resina. Stabiae has been Castellammare. There was a big eruption in 1139, and a major one in December, 1631, when 15 towns were destroyed and 4,000 people killed. Minor eruptions have occurred in 1779, 1793, 1872, 1906 and 1944, sometimes with loss of life.

Krakatau on an island in the Sunda Strait between Sumatra and Java exploded Aug. 27, 1883, creating a depth of 1,000 ft. in the ocean. The explosion was heard 2,500 mi. away, and tidal waves killed 35,000. In 1927 Krakatau formed the island of Anak Krakatau, which exploded, 1929, depositing an island in the hole caused in 1883.

Mont Pelee, Martinique, destroyed St. Pierre and more than 30,000 people May 8, 1902. Eruptions slightly less powerful occurred May 20 and Aug. 30, 1902. A major eruption began Sept. 16, 1929, and lasted 3 years.

Mt. Agung, 10,308 ft., on the island of Bali, erupted in January, March and May, 1963; the last two eruptions claimed a total of more than 1,500 lives and a third of Bali's farm land, and left 87,000 homeless. Bali's Mt. Batur, 5,636 ft., erupted in September, 1963, forcing 1,200 persons to leave their homes at its base; rumblings and explosions could be heard for 50 miles.

In Alaska's Valley of 10,000 Smokes, the lowest of Mt. Trident's 3 peaks erupted Apr. 1, 1963; the cloud of smoke and dust was visible 100 miles away.

The Great Lakes

Source: U. S. Army Engineer District, Lake Survey, Detroit, Mich.

The Great Lakes form the largest body of fresh water in the world and with their connecting waterways are the largest inland water transportation unit. Draining the great North Central basin of the U. S., they enable shipping to reach the Atlantic via their outlet, the St. Lawrence R., and also the Gulf of Mexico via the Illinois Waterway, from Lake Michigan to the Mississippi R. A third outlet connects with the Hudson R. and thence the Atlantic via the N. Y. State Barge Canal System.

Only one of the lakes, Lake Michigan, is wholly in the United States; the others are shared with Canada. Ships carrying grain, lumber and iron ore move from the shores of Lake Superior to Whitefish Bay at the east end of the lake, thence through the Soo (Sault Ste. Marie) locks, through the St. Mary's River and into Lake Huron. To reach the steel mills at Gary, Ind. and South Chicago, Ill., ore ships move west from Lake Huron to Lake

Michigan through the Straits of Mackinac.

Lake Huron discharges its waters into Lake Erie through a narrow waterway, the St. Clair R., Lake St. Clair and the Detroit R. Lake St. Clair, a marshy basin, is 26 miles long and 24 miles wide at its maximum. A ship channel has been dredged through the lake. Detroit lies on the east side of Michigan. The Detroit-Canada tunnel provides vehicular access to Canada under Detroit R. and the Ambassador Bridge links Detroit and Windsor.

Lake Superior is 600 feet above mean water level at Father Point, Quebec, on the International Great Lakes Datum (1955). From Duluth, Minn., to the eastern end of Lake Ontario is 1,156 mi.

The Lake Survey is one of the 3 nautical charting agencies of the U. S. Govt. Besides charting, it maintains water level records, makes special hydraulics and hydrology studies, and conducts oceanographic-type research on the Gt. Lakes.

Lakes of the World

Source: National Geographic Society, Washington, D. C.

A lake is a body of water surrounded by land. Although some lakes are called seas, they are lakes by definition. The Caspian Sea is bounded by the Soviet Union and Iran and is fed by eight rivers.

Famous Waterfalls

Source: National Geographic Society, Washington, D. C.

Height=total drop in one or more leaps. †=falls of more than one leap; *=falls that diminish greatly seasonally; **=falls that reduce to a trickle or are dry for part of each year. If river names not shown, they are same as the falls. R.=river; L.=lake; (C)=cascade-type. See notes following list.

The earth has thousands of waterfalls, some of considerable magnitude. Their importance is determined not only by height but volume of flow, steadiness of flow, crest width, whether the water drops sheerly or over a sloping surface, and one leap or a succession of leaps. A series of low falls flowing over a considerable distance is known as a cascade.

Sete Quedas or Guaira is the world's greatest waterfall when its mean annual flow (estimated at 470,000 cusecs, cubic feet per second) is combined with height. A greater volume of water passes over Stanley Falls, though not one of its seven cataracts, spread over nearly 60 miles of the Congo River, exceeds 10 feet.

Estimated mean annual flow, in cusecs, of other major waterfalls are: Niagara, 212,200; Paulo Afonso, 100,000; Urubupunga, 97,000; Iguazu, 61,600; Patos-Maribondo, 53,000; Victoria, 38,400; Churchill, Labrador, 40,000; and Kaieteur, 23,400.

Cauvery, India, is the most variable of the world's known waterfalls. It fluctuates from a trickle in dry periods to 667,470 cusecs during monsoons.

The Niagara River carries the water of Lake Erie to Lake Ontario, a descent of about 326 feet in 36 miles. It flows over two cataracts at Niagara: the Horseshoe or Canadian Fall and the American Fall. Since the opening of new hydroelectric stations on both the United States and Canadian sides of the river, the height of the falls is constantly changing. As water is taken from the river by these stations the level of the pool below the falls rises and lowers by as much as 30 feet. At their maximum height, which is only at night and during the off-tourist season, the Canadian Fall is 186 feet high and the American Fall 193 feet high.

Highest and Lowest Continental Altitudes

HEIGHT OF MOUNT EVEREST

Mt. Everest was 29,002 ft. tall when Edmund Hillary and Tenzing Norkey scaled it in 1953. This triangulation figure had been accepted since 1850. In 1954 the Surveyor General of the Republic of India set the height at 29,028 ft. plus or minus 10 ft. because of snow. The National Geographic Society accepts the new figure, but many mountaineering groups still use 29,002 ft.

The Seven Wonders of the Ancient World

The Pyramids of Egypt. These pyramids, the monumental tombs of ancient Egyptian pharaohs, were constructed 3000 B.C. to 1800 B.C. The oldest is at Sakkara. The largest are at Gizeh, near Cairo. Of these, the Great Pyramid of Cheops has a base covering over 13 acres; originally it was 481 ft. high, each base side was 754.5 ft. long; its size was reduced by removal of the facing stone and top stone, leaving its height 450 ft.

The Hanging Gardens of Babylon. Built by Nebuchadnezzar, King of Babylonia, about 600 B.C. in what is now Iraq, the gardens consisted according to legend of 5 terraces, each 50 ft. above the other. No traces remain.

The Statue of Zeus at Olympia. This 40-ft. marble statue decorated with ivory and beaten gold, was created by the Greek sculptor Phidias about 432 B.C. Considered the greatest masterpiece of Greek sculpture, the statue stood in the temple of Zeus at Olympia, in the western Peloponnese, scene of the ancient Olympic games. The statue was removed and destroyed.

The Temple of Artemis at Ephesus. South of what is now Izmir, Turkey, the Ionian Greeks erected this famous temple in the latter part of the 4th Century B.C., on the site of earlier temples, the last of which had been destroyed by one Herostratus in 356 B.C., supposedly on the night in which Alexander the Great was born. The new

temple had Ionic columns over 60 ft. tall. It was destroyed by the Goths in 262 A.D.

The Mausoleum at Halicarnassus. After Prince Mausolus of Caria in SW Asia Minor died, 353 B.C. his widow, Queen Artemisia, built a huge marble tomb, completed about 325 B.C. in his memory at Halicarnassus (Now Bodrum, Turkey). Its name, the Mausoleum, came to be the generic term for monumental tombs. It was destroyed by an earthquake. Fragments of the Greek sculptures from the edifice are on exhibit at the British Museum, London.

The Colossus of Rhodes. This huge bronze statue of Helios, the Greek god of the sun (usually identified with Apollo), stood in the harbor of Rhodes on the island of Rhodes, SW of Asia Minor. Constructed by the sculptor Chares, 282-280 B.C. it is variously reported as having been 105 to 117 ft. tall (New York's Statue of Liberty is 111 ft. from heel to top of head). Thrown down by an earthquake, about 224 B.C., it lay prone for hundreds of years before being sold off as scrap.

The Pharos of Alexandria. A white marble tower in pyramidal stages, this famous lighthouse was completed about 280 B.C. on the peninsula of Pharos (formerly an island) at Alexandria in Egypt. It was built during the reign of Ptolemy Philadelphus (Ptolemy II) and may have been designed by the architect Sostratus. It is variously reported as having been 400-600 ft. tall. It was destroyed by an earthquake, 1375 A.D.

Important Islands and Their Areas

Source: National Geographic Society, Washington, D. C.

Figure in parentheses shows rank among the world's ten largest islands. Some islands have not been surveyed accurately; in such cases estimated areas are shown. *See footnotes.

Earthquakes Perform Necessary Function

Earthquakes continue to cause damage and loss of life around the globe but scientists point out that they are vital to the continued development of our earth. There are more than 1,200 seismograph stations around the world, which detect 500,000 tremors a year, the National Geographic Society says. Of these, 100,000 can be heard or felt and some 1,000 cause damage. Scientists assert that this repeated uplifting of the earth's crust, with the quakes that go with it, is essential to life. With mountains constantly eroding, if they were not raised again the world would become a place of stagnant seas and swamps.

No place is immune from the possibility of an earthquake, but four out of five occur around the edge of the Pacific Ocean. A second major trouble zone extends from the West Indies across the Atlantic and Mediterranean to the Himalayas and the East Indies. Today's most widely accepted theory of quakes holds that they are caused by titanic shifts in the earth's crust along cracks or fracture lines called faults. When the rock gives way under the strain at some weak point, often far below the surface, powerful shock waves are released. Some circle the globe; others pass through the earth, at 8 miles a second.

San Juan	Junction of South and Middle Forks, Madera County, Calif.	Suisun Bay	350
Santee	Silver Lake, Archuleta County, Colo.	Colorado River, Utah	360
Santee-Waterree-Catawba	Junction of Waterree and Congaree Rivers, Richland, S. C.	Atlantic Ocean	143
Savannah	McDowell County, N. C.	Atlantic Ocean, S. C.	538
Schuykill	Junction of Seneca and Tugaloo Rivers, Anderson County, S. C.	Atlantic Ocean, Ga.-S. C.	314
Scioto	Near Tuscarora, Schuykill County, Pa.	Delaware River	131
Smoky Hill	Auglaize County, Ohio	Ohio River	237
Snake	Cheyenne County, Colo.	Kansas River, Kan.	540
South Fork Shenandoah	Ocean Plateau, Teton County, Wyo.	Columbia River, Wash.	1,038
South Platte	Junction of North and South Rivers at Port Republic, Va.	Shenandoah River	100
Susquehanna	Junction of South and Middle Forks, Park County, Colo.	Platte River, Nebr.	424
Swansee	Osage Lake County, N. Y.	Chesapeake Bay, Md.	444
Tallahatchie	Junction of North and Log Rivers, Charlton County, Ga.	Gulf of Mexico	190
Tallahassee	Tippah County, Miss.	Yazoo River, Miss.	301
Tanana	Near Embury in Paulding County, Ga.	Alabama River	268
Tar-Pamlico	Wrangell Mts. (Yukon Territory, Can.)	Yukon River, Alaska	800
Tennessee	Person County, N. C.	Pamlico Bay	215
Tennessee-French Broad	Junction of French Broad and Holston Rivers, Knox County, Tenn.	Ohio River, Ky.	652
Tombigbee	Junction of North and West Forks of French Broad, Transylvania County, N. C.	Ohio River	862
Tongue	Junction of East and West Forks, Monroe County, Miss.	Mobile River, Ala.	409
Trinity	Junction of North and South Forks, Sheridan County, Wyo.	Yellowstone River	246
Wabash	Junction of East and West Forks, Kaufman County, Tex.	Galveston Bay, Texas	360
Washita	Darke County, Ohio	Ohio River, Ill.-Ind.	475
West Branch Penobscot	Hemphill County, Tex.	Red River, Okla.	500
White (Ark.-Mo.)	Junction of North and South Branches, Somerset County, Maine	Penobscot River	112
Willamette	Madison County, Ark.	Mississippi River	690
Wisconsin	Junction of Coast and Middle Forks, near Eugene, Ore.	Columbia River	190
Yazoo	Le Vieux Desert, Vilas County, Wis.	Mississippi River	430
Yellowstone	Junction of Tallahatchie and Yalobusha Rivers, Leflore County, Miss.	Mississippi River	188
Yukon	Park County, Wyo.	Missouri River, N. D.	671
	Junction of Lewes and Pelly Rivers, Yukon Territory, Canada	Bering Sea, Alaska	1,800

Notable Bridges in the United States

Source: U. S. Coast Guard and other official sources

Asterisk (*) designates Railroad Bridge. Span of a bridge is distance between its supports.

Construction Details of Large Bridges

Verrazano-Narrows Bridge, between Staten Island and Brooklyn, N. Y., has a suspension span of 4,260 ft., longest in the world and exceeding the Golden Gate Bridge, San Francisco, by 60 ft. One level in use November, 1964. The name is a compromise; it spans the Narrows and commemorates a visit to New York harbor in April, 1524, deduced from certain general notes left by Giovanni da Verrazano, Italian navigator sailing for Francis I of France. Second level to be opened in 1969.

Angostura, suspension type, span 2,336 feet, 1967, at Ciudad Bolivar, Venezuela. Total length 5,507. **Braga Bridge** over Taunton River between Fall River and Somerset, Mass. It is 5,800 feet long.

Bendorf Bridge on the Rhine River, 5 mi. n. of Coblenz, completed 1965, is a 3-span cement girder bridge, 3,378 ft. overall length, 102 ft. wide, with the main span 682 ft.

Champlain Bridge at Montreal crossing the St. Lawrence River was opened 1962. It is 4 mt. long. Three other connect Montreal with the South Bank, the Jacques Cartier, Victoria and Mercier bridges. **Corpus Christi**, Texas, has a high level port entrance bridge. It is a cantilever truss with anchor spans 310 ft. and main span 620 ft., total length approx. 5,862 ft.

Delaware Memorial Bridge over Delaware River near Wilmington. A twin suspension bridge paralleling the original 250 ft. upstream has a 2,150-ft. main span suspended from 440-ft. towers.

Gerald Desmond Bridge at Long Beach Harbor, Calif., a cantilever, 1,050 feet long.

Gladesville Bridge at Sydney, Australia, has the longest concrete arch in the world (1,000 ft. span).

George Washington Bridge, New York City, 4th longest suspension bridge in the world, spans the Hudson River between W. 178th St., Manhattan, and Ft. Lee, N. J.; 4,760 ft. between anchorages, two levels, 14 traffic lanes. **Triborough Bridge** connects Manhattan, the Bronx and Queens; project comprises a suspension bridge, a vertical lift bridge, and a fixed bridge, all connected by long viaducts. The famous **Brooklyn Bridge** over the East River, connecting Manhattan and Brooklyn, was completed in 1883, breaking all previous records by spanning 1,595 ft.

Golden Gate Bridge, crossing San Francisco Bay, has the second longest single span, 4,200 ft.

Hampton Roads Bridge-Tunnel, Va. A crossing completed in 1957 consisting of two man-made islands, two concrete trestle bridges, and one tunnel, under Hampton Roads with a length of 7,479 ft.

Lake Pontchartrain Causeway, a concrete trestle bridge, 24 miles long, carries traffic to New Orleans. **Lake Washington Floating Bridge**, Seattle, is built on 25 floating concrete sections. Floating structure 6,566 feet long. Bridge with approaches 8,583 feet.

Narragansett Bridge between Newport and Jamestown, R. I. Total length 11,225 ft., a main suspension span of 1,600 feet, two side suspension spans each 687 feet long.

New York City bridges, see **Verrazano-Narrows Bridge** and **George Washington Bridge** above.

Oosterscheldebrug, opened Dec. 15, 1965, is a 3,125-mile causeway for automobiles over a sea arm in Zeeland, the Netherlands. It completes a direct connection between Flushing and Rotterdam.

Quebec Road, suspension, span 2,190 feet, 1969, Quebec, Canada.

Royal Gorge Bridge, 1,053 ft. above the Arkansas River in Colorado, is the highest bridge above water. Opened Dec. 8, 1929, it is 1,260 ft. long with a main span of 880 ft., width 18 ft.

San Mateo-Hayward Bridge across San Francisco Bay is first major orthotropic bridge in U. S. It is 6.7 miles long, 4.9-mile low-level concrete trestle and 1.8 miles high-level steel bridge.

Seaway Skyway Bridge across the St. Lawrence River from Ogdensburg, N. Y., to Johnston, Ont., opened 1960, is 13,510 ft. long with approaches and 7,260 ft. between abutments.

Seven Mile Bridge is the longest of an expanse of bridges connecting the Florida Keys. It was built by the Florida East Coast Railway between 1904 and 1916, now a state highway.

Seyvern Bridge, with a main span of 3,240 ft., crosses the Seyvern River, linking England and Wales.

Straits of Mackinac Bridge, opened June 28, 1958, is the longest suspension bridge between anchorages and with approaches extends nearly 5 mi. between Mackinaw City and St. Ignace, Mich.

Sunshine Skyway, a 15-mile-long bridge-causeway with twin roadbeds that crosses Tampa Bay at St. Petersburg, Fla., a system of twin bridges 864 feet long and 4 smaller bridges with 6 causeways.

Tagus River Bridge near Lisbon, Portugal, longest suspension bridge outside the United States, has a 3,323-ft. main span. Opened Aug. 6, 1966, it was named Salazar Bridge for the former premier.

Thatcher Ferry Bridge, opened 1962, spans Panama Canal 201 ft. above the water, level near Balboa.

Thomas A. Edison Memorial Bridge (causeway) across Sandusky Bay between Martin Point and Danbury, Ohio, is 2,67 miles long. The main bridge is 2,044 feet long.

Thousand Island Bridge, St. Lawrence River. American span 800 ft.; Canadian 750 ft.

Woodrow Wilson Memorial Bridge across the Potomac River at Staunton, Va. is over a mile long.

Zoo Bridge across the Rhine at Cologne, with steel box girders, has a main span of 850 ft.

Japanese Plan Undersea Tunnel Linking Hokkaido and Honshu

Preliminary engineering studies began in 1963 on a project for a 22.5-mile undersea tunnel to link Hokkaido, Japan's northern island, with the main Japanese island of Honshu. The tunnel, to be used by electric trains, would be the longest of its kind in the world. Completion by 1975 was contemplated.

Meanwhile, plans were being pushed for construction of a tunnel under the English Channel to link Britain and France. Construction was expected to begin in 1969 and to take 6 years. Two tubes enclosing railroad tracks are planned, with automobiles to be carried on special railroad cars. Cost of the tunnel between Dover and Calais was estimated at \$600,000,000. Distance between terminals would be some 40 miles, 20 of it under water.

Orange-Fish Rivers Tunnel, expected to be the world's longest, is under construction as part of a \$602,000,000 project to irrigate and develop the arid heart of South Africa. Preliminary excavation

for the 51½-mile tunnel began in 1967.

Canadian Bridge-Tunnel. The Canadian Government started construction early in 1966 of a \$148,-000,000 tunnel-bridge-causeway project across Northumberland Strait linking New Brunswick and Prince Edward Island. The 9-mile crossing will carry both a railway and a highway. Completion is expected in 1971.

Chesapeake Bay Bridge-Tunnel, 17.6 mi. long, was opened for traffic April 15, 1964. It has 12½ mi. of concrete trestles 30 ft. above mean low water, 2 one-mile tunnels, 2 steel bridges, 4-man-made islands, 1½ mi. of earthfill causeway and approx. 5½ mi. of approach roadway, most of the latter 28 ft. wide. It connects Cape Charles, on the Eastern Shore of Virginia, with Chesapeake Beach between Norfolk and Virginia Beach on the mainland, thus providing a new route to Florida via the New Jersey Turnpike and U. S. 13. Cost of the project was over \$200,000,000.

U. S. Geodetic Datum Point

The geodetic datum point of the United States is the Coast and Geodetic Survey's triangulation station *Meades Ranch* in Osborne County, Kansas, at latitude 39°13'26".686 N and longitude 98°32'30".506 W. (Frequently this is referred to as the geodetic center of the U. S., which has no meaning.) This geodetic datum point is a fundamental point from which all latitude and longitude computations originate for North America and Central America.

Dams and Reservoirs; Water Conservation

Source: Bureau of Reclamation

Colorado River Storage Project. Morrow Point Dam on the Gunnison River in Colo. was completed in 1968 by the Bureau of Reclamation. A principal feature of the Curecanti Storage Unit of the Colorado River Storage Project, the concrete dam is 468 feet high and 720 feet long. It is a landmark structure, incorporating three "firsts" for the Bureau: use of a thin-arch, double curvature design; location of the powerplant underground; and a free-fall spillway employing gates at the top of the dam (creating a waterfall twice as high as Niagara Falls). The powerplant is under construction. Also on the Curecanti Unit, the second of the two 30,000 kilowatt generators of the Blue Mesa powerplant went into operation in 1968. **Blue Mesa Dam** on the Gunnison River has been in operation several years. The unit's **Crystal Dam** and powerplant are still to be built. The other three storage units of the CRSP are fully in operation: **Glen Canyon Dam**, reservoir, and powerplant on the Colorado River in Utah and Arizona; **Flaming Gorge Dam**, reservoir, and powerplant on the Green in Utah and Wyoming; and **Navajo Dam** and reservoir in New Mexico and Colorado.

The **Azotea Tunnel**, a feature of the San Juan-Chama participating project in New Mexico, was "holed through" 1,200 feet beneath the crest of the Continental Divide during the year. It will be capable of conveying water by gravity at the rate of 950 cfs from the tributary streams of the Colorado River basin on the west side of the Rockies into the Rio Grande basin on the east. The project's two other tunnels, which will funnel water to the Azotea, were also virtually completed in 1968. Construction began on **Heron Dam** high up on the eastern slope. It will impound the water from the western slope and release it to flow down the Rio Chama and the Rio Grande for municipal and industrial use in Albuquerque and for the irrigation of farmlands in the Rio Grande basin.

Since authorization of the Colorado River Storage Project in 1956, about \$696,000,000 of Federal funds has been converted into dams, reservoirs, powerplants, transmission facilities systems, and other facilities of the five-state project.

Central Valley Project, California. Pre-construction work began in 1968 on the Bureau of Reclamation's \$200,000,000 **Auburn Dam**, chief feature of the Auburn-Folsom South Unit of the Central Valley Project. On the North Fork of the American River, this structure will be Reclamation's longest and highest double curvature concrete dam, spanning 3,500 feet at its crest 680 feet above bedrock. Its reservoir, with 2,500,000 acre-feet storage capacity, will yield 390,000 acre-feet of water annually to irrigate 413,000 acres and to supply municipal and industrial water for communities in the area, as well as to furnish recreational and fish and wildlife benefits. A powerplant having an initial capacity of 300,000 kilowatts will be constructed at the toe of the dam. Another unit feature, the 67-mile long **Folsom South canal** on the American River downstream from the dam will deliver the water to the farmlands and communities and will serve as the first reach of the Eastside division of the Central Valley Project planned for future development.

Three features of the San Luis unit were dedicated in 1968: the 382-foot high **San Luis Dam**, most massive earth-filled dam ever constructed by Reclamation; O'Neill regulating dam; and the **San Luis Pumping-Generating plant**. This complex will store winter-time run-off from northern California streams. The river-size **San Luis Canal** will start it on its way to beneficial use in the southern two-thirds of the state. Construction has continued on the gigantic **Westlands Irrigation system**, which has made initial deliveries to farmlands in the San Joaquin Valley. Ultimately this system will contain more than 1,000 miles of pipeline.

The **San Luis Unit** will make some 1,200,000 acre-feet of irrigation water available to about 614,000 acres of agricultural land and will provide 45,000 acre-feet (14.6 billion gallons) of municipal and industrial water annually. This unit is a unique joint Federal-State development, which not only will serve the Federal irrigation project, but will store and transport California State Water Project water. **Oroville Dam**, chief feature of the State project, was dedicated in 1968. The highest earth-fill dam in the world, the 770-foot structure

straddles the Feather River about 60 miles north of Sacramento.

Water deliveries through the 500-mile-long **Central Valley project** in 1967 reached 2,700,000 acre-feet, largely for irrigating some 1,600,000 acres of land which produce crops valued at nearly \$600,000,000. Project powerplants produce about 5.5 billion kilowatt hours a year, and approximately 7,600,000 visitor days' recreation use is recorded at the project's man-made lakes.

Third Powerplant at Grand Coulee Dam. Excavation for the third powerplant has commenced and contracts have been let for the first three turbines and generators, largest ever manufactured. These three units are the first of six which will be installed in the Grand Coulee facility to bring its present 2,000,000 kilowatt capacity to 5,600,000. The plan now is to double the capacity of the third powerplant at some future date to bring the total capacity of Grand Coulee to 9,200,000 kilowatts. Congressional authorization will be needed for this addition.

Fryingpan-Arkansas Project. Construction continued in 1968 on **Sugar Loaf** and **Ruedi Dams**, major earthfill impoundment structures. The former, east of the Continental Divide, will result in the enlargement of **Turquoise Lake** from 17,000 to 130,000 acre-feet. **Ruedi Dam** on the western slope will create a 101,000 acre-foot impoundment on the **Fryingpan River**, compensating water users in western Colorado for the supply diverted at higher elevations through the **Divide Tunnel** into **Turquoise Lake** for use in the **Arkansas basin**. The 5.3-mile-long tunnel under the Continental Divide and two small shorter tunnels were virtually completed in 1968, and pre-construction work commenced for **Pueblo Dam** and reservoir on the eastern slope. **Pueblo Reservoir** will impound 357,000 acre-feet of water.

The multiple-purpose **Fryingpan-Arkansas Project** will provide water for supplemental irrigation of 280,000 acres and for domestic and industrial uses, will generate 111,000 kilowatt hours of hydroelectric power, and will provide flood control, fish and wildlife, and recreation benefits.

Missouri River Basin Project. Construction began on the **Snake Creek pumping plant**, key feature of the **Garrison Diversion Unit**, which will provide irrigation for 250,000 acres of land in North Dakota, will supply municipal and industrial water to 14 towns and cities, and will provide recreation and fish and wildlife enhancement benefits. The **Snake Creek plant** will pump water from the reservoir behind the **Corp of Engineers Garrison Dam** on the **Missouri** into an adjacent lake from where it will be conveyed to the farms and communities.

Two other units of the **Missouri River Basin Project** were authorized in fiscal year 1968 for construction. **Nebraska Midstate**, which will provide a surface and groundwater supply to irrigate approximately 140,000 acres along the **Platte River** and will replenish the groundwater which is being rapidly depleted; and **Oahe Unit** in **South Dakota** which will pump water from the **Corps of Engineers Oahe reservoir** on the mainstream to irrigate, in its first stage, about 190,000 acres, furnish municipal and industrial water supply, and provide flood control, recreation opportunities, and fish and wildlife benefits.

Pacific Northwest-Pacific Southwest Intertie. The 500-transmission kilovolt line from the Oregon border 94 miles south to **Round Mountain** in California has been completed by the Bureau of Reclamation and the first electric energy was transported from the **Pacific Northwest** to the **Central Valley project**. The intertie, most extensive electrical transmission system ever undertaken in the United States, is being built by Federal, other public, and private utilities to tie together, for their mutual benefit, the transmission systems of 11 western states.

Southern Nevada Water Project. Construction began on a 4-mile tunnel through the **River Mountains**, which lie between the **Las Vegas Valley** and **Lake Mead** behind **Hoover Dam** on the **Colorado River**. The project will pump water from **Mead** and distribute it to meet municipal and industrial water needs of **Las Vegas**, **Nellis Air Force Base**, and other communities and industries in the area.

Project "Skywater." During 1968 the Bureau of Reclamation continued its "Project Skywater," an

extensive program of research in atmospheric water resources. The project, financed by appropriations of \$5,015,000 during fiscal 1968 and with \$4,750,000 allotted for 1969, involves investigations of weather modification—principally precipitation from clouds when they are transporting large quantities of moisture. The runoff produced by the precipitation obtained from the air masses can be subsequently stored in reservoirs for many beneficial uses on Reclamation projects in the western states. Advances in technology indicate a capability of adding some 475,000,000 acre-feet of new water annually to the nation's water supply. Production costs of \$1 to \$4 per acre-foot are expected, with benefits ranging from \$5 to \$50 and higher per acre-foot.

Federal Reclamation Program

The Federal Reclamation program was authorized in 1902 to reclaim arid lands of the West by developing irrigation water supplies. The scope of its purpose was subsequently enlarged to include hydropower generation, municipal and industrial water supply, flood control, river regulation, water quality control, fish and wildlife enhancement, and recreation. To provide these benefits the Bureau has completed or has under construction 273 storage dams and dikes, with reservoirs having a combined total capacity of nearly 135,000,000 acre-feet of water. 53 hydroelectric plants with an ultimate installed capacity of 11,300,000 kilowatts; 16,150 circuit miles of transmission line; 98 major pumping plants; 6,800 miles of supply canals; nearly 200 miles of tunnels; and various other physical structures to carry out its prescribed functions.

Nearly unique among Federal programs, Reclamation in large measure pays its own way. Close to 90% of the Federal cost of construction is returned to the Treasury by project beneficiaries. The water-using beneficiaries also assume operation and maintenance of project water delivery systems.

The Bureau of Reclamation markets power from 51 Bureau-built powerplants, 6 Corps of Engineers plants, and the Falcon Plant of the International Boundary and Water Commission. During fiscal year 1968 the Bureau sold 42.6 billion kilowatt-hours of electric power, with revenues of \$136,200,000, including sales associated with power deliveries to Bonneville Power Administration for marketing.

Power Administration

Southeastern Power Administration (Dept. of the Interior) markets power produced at projects controlled by the Corps of Engineers in Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Alabama, Mississippi, and Tennessee. Power is sold to 159 customers from plants in operation at Allatoona, Georgia; Buford, Georgia; Clark Hill, Georgia-South Carolina; Hartwell, Georgia-South Carolina; Jim Woodruff, Georgia-Florida; Walter F. George, Georgia-Alabama; John H. Kerr, Virginia-North Carolina; Philpott, Virginia; Wolf Creek, Kentucky; Barkley, Kentucky; Dale Hollow, Tennessee-Kentucky; Center Hill, Tennessee; Old Hickory, Tennessee; and Cheatham, Tennessee, with a capacity of 1,807,000 kilowatts. Seven plants are under construction with 905,375 kws capacity.

During the year ended June 30, 1968, SEPA sold 6,323,558,728 kilowatt-hours, gross revenue \$31,709,992.37.

Southwestern Power Administration, with hq in

Tulsa, Okla., is the agency of the Dept. of the Interior designated to market surplus hydroelectric power and energy generated at Federal multiple purpose reservoirs in the southwest. Of 23 hydroelectric plants 15 are in commercial operation, and 8 are under construction.

SPA operates 1,515 miles of high-voltage transmission line and 35 substations and switching stations, including a 161,000 volt interconnection with the Bureau of Reclamation. This inter-tie, the first between federally owned systems, permits interchange of up to 50,000 kw between the two agencies by taking advantage of the daily and seasonal diversities between the two areas served.

During fiscal year 1968, SPA energy sales amounted to 4,462,000,000 kwh, compared to 3,035,598,542 kwh in 1967, an increase of 1,426,401,458 kwh. Gross revenues for 1968 totaled \$32,187,197, as opposed to \$28,924,961 for the same period in 1966-67, an 11.3% increase. In 1968, 51% of the energy marketed by SPA was sold to REA Cooperatives, 13% to municipalities, 3% to public authorities, 13% to aluminum industry and 20% to private utility companies.

[A kilowatt hour (kwh) represents 1 hour of 1,000 watts. A kilowatt (kw) equals about 1½ horsepower.]

Tennessee Valley Authority

TVA is a corporate agency of the Federal government, established by Congress in 1933 to develop the Tennessee River system and to aid in the development of other resources of the Tennessee Valley region. This includes work in flood control, navigation, electric power, recreation, agriculture, forestry, and water quality resource development.

TVA has built or acquired 26 major dams on the Tennessee and its tributary rivers, and by agreement with Alcoa controls water releases at 6 of its major dams. These structures make the main stream of the Tennessee navigable over its 650-mile length from Knoxville to the Ohio River, regulate flood waters, and generate hydroelectric power.

TVA is wholesale power supplier to 160 local electric systems serving 2 million customers in parts of 7 states, and sells power directly to several large atomic, military, and industrial installations. Fiscal year 1968 power sales were \$5 billion kwh, about 60 times as much electricity as the region used in 1933. Since about 1950, when the region's hydroelectric potential was largely developed, most of the additional generating capacity built to meet this rapid growth in power demands has been in coal-fired steam plants. In 1968 system capacity was 18,000,000 kw, with another 9,500,000 kw in nuclear and coal-fired power plants scheduled for operation by 1974.

The TVA power system is financially self-supporting and self-liquidating and power funds are accounted for separately from funds used for non-power activities. Funds for new power construction are obtained primarily from the earnings of the system and bonds and notes sold in the public markets. U.S. appropriations for power purposes are being repaid to the Treasury on a regular schedule, plus a return on the portion unrepaid. The repayment in 1968 was \$15,000,000 and the return, computed at a rate of 4.1% was \$46,862,000. Substantial payments are made to state and local governments in lieu of taxes.

At the end of fiscal 1968, TVA had 19,717 employees.

California State Water Project

Source: California Resources Agency, Department of Water Resources

California's State Water Project is the nation's first statewide water resources development, according to its builder and operator, the California Department of Water Resources. That agency says the California project will move more water a longer distance than any other distribution system; that it is the first water supply system to have recreation features planned from the beginning and built along with delivery works. Its key facility is Oroville Dam, highest dam in the United States. The project stretches from 5 small dams and reservoirs in Northern California to the terminal reservoir at Perris in Southern California, a distance of about 650 miles.

Water conserved behind the giant embankment at Oroville Dam will move through the Feather and Sacramento River channels to the Sacramento-San Joaquin Delta.

From that point the State Water Project water will travel through the 444-mile-long California Aqueduct for distribution to homes, farms and

factories in Central, Coastal and Southern California.

Part of the Calif. Aqueduct contains the San Luis unit, a joint-use facility of dams, pumping plants and canals in which the State and Federal Governments share costs, operation and maintenance.

Water deliveries to the San Joaquin Valley began in 1968 and are scheduled to be made to Castaic Lake in Los Angeles County in 1971 and to Lake Perris in Riverside County in 1972.

Water deliveries have been made since 1962 to water agencies south of San Francisco Bay through the South Bay Aqueduct, first completed aqueduct of the project.

At the Tehachapi Mountains, which the California Aqueduct crosses enroute to Southern California, the Edmonston Pumping Plant will pump more water higher than any other pumping plant in the world—110,000,000 gallons per hour one-third of a mile up—according to the California Department of Water Resources.

Major World Dams

Major Public and Private Dams and Reservoirs in U. S.

HEIGHT—OVER 250 FEET, VOLUME—OVER 1,000,000 CUBIC YARDS

Source: Bureau of Reclamation, Dept. of the Interior Corps of Engineers, U. S. Army and Tennessee Valley Authority

Where reservoir name is different it is shown in italics

Height—Difference in elevation in feet, between lowest point in foundation and top of dam, exclusive of parapet or other projections.

Length—Overall length of barrier in feet; main dam and its integral features as located between natural abutments.

Volume—Total volume in cubic yards of all material in main dam and its appurtenant works.

Year—Date structure was originally completed for use. (1) Under construction subject to revision.

River—Main stream.

Purpose: Irr or I—Irrigation; FC—Flood Control; P—Power Production; N—Navigation; WS—Water Supply; RR—River Regulation; DC—Debris Control.

Parentheses after name indicate type of dam as follows: (C)—Concrete; (E)—Earth; (G)—Gravity; (M)—Masonry; (R)—Rock Fill.

*Replacing existing dam.

Centennial Planned for Grand Canyon Explorer

The United States will honor one of its most remarkable pioneers, explorer-scientist John Wesley Powell, with a national centennial in 1969.

The one-armed veteran of the Civil War survived boat crashes and near-drowning to make the pioneer exploration of the Green and Colorado Rivers through forbidding canyon country from Wyoming to Nevada. He set out from Green River, Wyo., with 9 men and 4 boats in May, 1869.

Major Powell's bold exploration of the Colorado traversed an unknown region of 56,000 square miles. A self-made scientist, he alone comprehended the potential of the arid West, and made far-reaching contributions to knowledge of its resources and also its Indian tribes.

To pay homage due to this man, the U. S. Department of the Interior, the Smithsonian Institution, and National Geographic Society are joint sponsors of the centennial on the 100th an-

niversary of Major Powell's journey down the perilous river through the Grand Canyon.

Conquest of the Colorado in 1869 made the former geology teacher a romantic and respected hero. His journals, scientific works and lectures spread his fame.

Major Powell became the most powerful scientist in the nation's capital. He helped found the Interior Department's Geological Survey and the Smithsonian's Bureau of American Ethnology, serving both as director. He helped establish the Geological Society of America and the National Geographic Society.

Soon after Major Powell's death in 1902, the National Geographic wrote: "Few men in the history of the United States have left behind them such a deep and lasting impression on the scientific work of the Nation." Yet knowledge of his adventures and achievements has faded in the 20th century.

Niagara Power Project

With an installed capacity of 2,190,000 kw., the Niagara Power Project of the Power Authority of the State of New York is the largest in the Western World. That huge capacity is reached with the Robert Moses Niagara Power Plant, whose 13 generators have a total capacity of 1,950,000 kw., and the 12 generating units of the Lewiston Pump Generating Plant, total capacity 240,000 kw. First power was delivered as scheduled on Feb. 10, 1961, and the final generating unit was placed on the line Nov. 11, 1962. The project was certified as completed Nov. 30, 1963.

Water for the operation is obtained from the Niagara River, 2½ miles above Niagara Falls. Two huge conduits conveying water under the city of Niagara Falls to the plants 4 miles below the

Falls. Under the 1950 treaty with Canada more water may be drawn at night and during winter than during daylight hours of the summer tourist season. Power is sold to municipalities, rural electric cooperatives, industries and private utilities.

Niagara Power Project was financed by \$37,000,000 worth of bonds sold to private investors and no government credit or tax money is used. The bonds are paid from revenue derived from the sale of power.

The Power Authority also financed, built and is operating the United States half of the St. Lawrence Power Project, at Massena, N. Y., which has a total (United States and Canada) installed capacity of 1,824,008 kw.

How the Military Hand Salute Originated

Hand-raising as a formal greeting probably originated with the cavemen, who wanted to prove to one another that they carried no weapons, according to the National Geographic Society. Later an armored knight raised his right arm to lift his helmet visor and to show friendship by keeping his sword hand away from the weapon. Before the 19th Century, British soldiers saluted by tipping their hats. In the modern U. S. military salute the right hand is raised smartly so the forefinger touches the forehead just above and to the right of the right eye, thumb and fingers extended, forearm and wrist at a 45-degree angle. This salute, with variations, is common among military forces around the world.

Hall of Heroes for Medal of Honor Winners

The names of all recipients of the Medal of Honor, the nation's highest military award for heroism, are now enshrined in a Hall of Heroes in the Pentagon in Washington, D. C. The Hall of Heroes is located in the "A" ring of the Pentagon at the end of the corridor from the Mall entrance. Its walls are lined with plaques bearing the names of the more than 3,200 recipients of the Medal of Honor. When the Hall was dedicated on May 14, 1968, the totals by Service were: Army 2,215, Navy 731, Marine Corps 245, Air Force 46, and Coast Guard 1.

Medal of Honor Winners in Vietnam War

(Chronologically through presentation of Oct. 17, 1968)

- Capt. Roger H. C. Donlon**, U. S. Army, of Saugerties, N. Y.
- *Sgt. Larry F. Pierce**, U. S. Army, of Wasco, Calif.

- *First Lt. Frank S. Reasoner**, U. S. Marine Corps, of Kellogg, Idaho.
- *Lance Corp. Joe C. Paul**, U. S. Marine Corps, of Vandalia, Ohio.
- Capt. Harvey C. Barnum, Jr.**, U. S. Marine Corps, of Cheshire, Conn.
- Specialist 6 Lawrence Joel**, U. S. Army, of Winston-Salem, N. C.
- *Specialist 4 Daniel Fernandez**, U. S. Army, of Los Lunas, N. M.
- *Staff Sgt. Peter S. Connor**, U. S. Marine Corps, a native of Orange, N. J.
- *Sgt. James W. Robinson, Jr.**, U. S. Army, of Annandale, Va.
- Gunnery Sgt. Jimmie E. Howard**, U. S. Marine Corps, of San Diego, Calif.
- *Staff Sgt. Jimmy G. Stewart**, U. S. Army, of Columbus, Ga.
- Sgt. David C. Dolby**, U. S. Army, of Oaks, Pa.
- *First Lt. James A. Gardner**, U. S. Army, of Dyersburg, Tenn.
- Maj. Howard V. Lee**, U. S. Marine Corps, of New York City.
- Staff Sgt. Charles B. Morris**, U. S. Army, of Galax, Va.
- *Capt. Joseph X. Grant**, U. S. Army, of Cambridge, Mass.
- *Capt. Hilliard A. Wilbanks**, U. S. Air Force, of Glen Allan, Miss.
- *Seaman David G. Ouellet**, U. S. Navy, of Wellesley, Mass.
- Maj. Merlyn H. Dethlefsen**, U. S. Air Force, of Derby, Kan.
- *Sgt. Donald R. Long**, U. S. Army, a native of Blackfork, Ohio.
- *Pfc. Lewis Albanese**, U. S. Army, of Seattle, Wash.
- Maj. Robert J. Modrzejewski**, U. S. Marine Corps, of Annapolis, Md.
- 2nd Lt. John J. McGinty, 3rd**, U. S. Marine Corps of Laurel Bay, S. C.
- *Pfc. Douglas E. Dickey**, U. S. Marine Corps, a native of Greenville, Ohio.
- Sgt. John F. Baker, Jr.**, U. S. Army, a native of Davenport, Iowa.
- Capt. Robert F. Foley**, U. S. Army, a native of Newton, Mass.
- Capt. Gerald O. Young**, U. S. Air Force, of Anacortes, Wash.
- Boatswain's Mate 1st Cl. James E. Williams**, U. S. Navy, of Darlington, S. C.
- Sgt. Richard A. Pittman**, U. S. Marine Corps, of Stockton, Calif.
- Specialist 5 Charles C. Hagemeister**, U. S. Army, of Lincoln, Neb.
- *Specialist 4 Donald W. Evans, Jr.**, U. S. Army, a native of Covina, Calif.
- *1st Lt. George K. Sisler**, U. S. Army, of Dexter, Mo.
- *Capt. Euripides Rubio, Jr.**, U. S. Army, of Ponce, Puerto Rico.
- *Pfc. Billy L. Lauffer**, U. S. Army, of Tucson, Ariz.
- *Pfc. James Anderson, Jr.**, U. S. Marine Corps, of Compton, Calif.
- *2nd Lt. John P. Bobo**, U. S. Marine Corps, of Niagara Falls, N. Y.
- *Sgt. Walter K. Singleton**, U. S. Marine Corps, of Memphis, Tenn.
- *Pfc. Louis E. Willett**, U. S. Army, a native of Brooklyn, N. Y.
- Staff Sgt. Delbert O. Jennings**, U. S. Army, of Stockton, Calif.
- Sgt. Leonard B. Keller**, U. S. Army, of Rockford, Ill.
- Specialist 4 Raymond R. Wright**, U. S. Army, of Mineville, N. Y.
- 1st Sgt. David H. Mc Nerney**, U. S. Army, of Fort Dix, N. J.
- Staff Sgt. Kenneth E. Stumpf**, U. S. Army, of Menasha, Wis.
- *Lance Corp. Roy M. Wheat**, U. S. Marine Corps, of Moselle, Miss.
- *Sgt. Elmelindo Rodrigues Smith**, U. S. Army, a native of Hawaii.
- *Pfc. James H. Monroe**, U. S. Army, of Wheaton, Ill.

*Awarded posthumously.

Medal of Honor Awarded to Skipper of U.S.S. Liberty

The Medal of Honor was presented June 11, 1968, to Capt. William L. McGonagle of the U. S. Navy, skipper of the U.S.S. Liberty, which was nearly destroyed by Israeli warplanes and torpedo boats in the Mediterranean Sea in 1967, with the loss of 34 American lives. Secy. of the Navy Paul R. Ignatius said McGonagle "was responsible for saving the lives of many of his crew and for saving the ship."

The Medal of Honor: Other Top U. S. Military Awards

The Medal of Honor is the highest military award for bravery that can be given to any individual in the United States of America. It is presented to its recipients, usually by the President, "in the name of the Congress of the United States," and for this reason it is often called the Congressional Medal of Honor.

The law, as amended in 1963, provides that the President may award the Medal of Honor to any person who, while a member of the armed forces, "distinguished himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty—(1) while engaged in an action against an enemy of the United States; (2) while engaged in military operations involving conflict with an opposing foreign force; or (3) while serving with friendly foreign forces engaged in an armed conflict against an opposing armed force in which the United States is not a belligerent party."

Criteria for awarding the medal to officers or enlisted men of the Army, Navy, Marine Corps, Air Force and Coast Guard are identical although the actual medals vary slightly in design. On rare occasions, Congress has enacted special legislation to award the Medal of Honor for individual exploits in peacetime. The Navy Medal of Honor has been awarded for heroism by noncombatants on several occasions.

Distinguished Service Cross, Navy Cross, Air Force Cross. These decorations, all ranked on the same level, may be awarded to a person who, while serving in any capacity with the Army, Navy, Marine Corps or Air Force, "distinguishes himself by extraordinary heroism not justifying the award of a Medal of Honor."

Distinguished Service Medal. Awarded to any person who, while serving with the armed forces in any capacity, "distinguishes himself by exceptionally meritorious service to the United States in a

duty of great responsibility."

Silver Star. Awarded to a person who, while serving in any capacity with the armed forces, "is cited for gallantry in action that does not warrant a Medal of Honor or Distinguished Service Cross."

Other Awards. Lesser awards for heroism or extraordinary achievement include the Bronze Star, Distinguished Flying Cross, Soldiers Medal, Navy and Marine Corps Medal, and Airman's Medal. The Purple Heart, originally for bravery, is now given to those wounded in action.

(a) Excludes expenditures for all civil functions as defined in "The Budget of the United States Government." Data for fiscal years to 1947 include all Army Air Force expenditures.

U. S. Army Insignia and Chevrons

Source: Department of the Army

Grade Insignia

General of the Armies

(General John J. Pershing, the only person to have held this rank, was authorized to prescribe his own insignia, but never wore in excess of four stars. The rank originally was established by Congress for George Washington in 1799, but no record has been found to show that the appointment was made.)

General of the Army..... Five silver stars fastened together in a circle and the coat of arms of the United States in gold color metal with shield and crest enameled

General..... Four silver stars
Lieutenant General..... Three silver stars
Major General..... Two silver stars
Brigadier General..... One silver star
Colonel..... Silver eagle
Lieutenant Colonel..... Silver oak leaf
Major..... Gold oak leaf
Captain..... Two silver bars
First Lieutenant..... One silver bar
Second Lieutenant..... One gold bar

Warrant officers

Grade Four—Silver bar with three enamel brown bands
Grade Three—Silver bar with two enamel brown bands
Grade Two—Gold bar with three enamel brown bands
Grade One—Gold bar with two enamel brown bands

Non-commissioned officers

Sergeant Major of the Army (E-9)..... Three

chevrons above the three arcs with a five-pointed star between the chevrons and arcs.

Sergeant Major (E-9)..... Three chevrons above the three arcs with a five-pointed star between the chevrons and arcs.

First Sergeant (E-8)..... Three chevrons above three arcs with a lozenge between the chevrons and arcs.

Master Sergeant (E-8)..... Three chevrons above three arcs.

Platoon Sergeant or Sergeant First Class (E-7)..... Three chevrons above two arcs.

Staff Sergeant (E-6)..... Three chevrons above one arc.

Sergeant (E-5)..... Three chevrons.

Corporal (E-4)..... Two chevrons.

Specialists

Specialist Nine (E-9)..... Three arcs above the eagle device and two chevrons below.

Specialist Eight (E-8)..... Three arcs above the eagle device and one chevron below.

Specialist Seven (E-7)..... Three arcs above the eagle device.

Specialist Six (E-6)..... Two arcs above the eagle device.

Specialist Five (E-5)..... One arc above the eagle device.

Specialist Four (E-4)..... Eagle device only.

Other Enlisted

Private First Class (E-3)..... One chevron above one arc.

Private (E-2)..... One chevron.

Private (E-1)..... None.

U. S. Navy Insignia

NAVY
Stripes and corps device are of gold embroidery.

	Stripes
Fleet Admiral.....	1 two inch with 4 one-half inch.
Admiral.....	1 two inch with 3 one-half inch.
Vice Admiral.....	1 two inch with 2 one-half inch.
Rear Admiral.....	1 two inch with 1 one-half inch.
Commodore	
(war time only).....	1 two inch.
Captain.....	4 one-half inch.
Commander.....	3 one-half inch.
Lieut. Commander.....	2 one-half inch. with 1 one quarter inch between.
Lieutenant.....	2 one-half inch.
Lieutenant (j.g.).....	1 one-half inch with 1 one quarter inch above.
Ensign.....	1 one-half inch.
Warrant Officers—One ½" (¾" for warrant officer W-1) broken with ½" intervals of blue as follows:	
Chief Warrant Officer W-4—1 break	

Chief Warrant Officer W-3—2 breaks, 2" apart
Chief Warrant Officer W-2—3 breaks, 2" apart
Warrant Officer W-1—3 breaks, 2" apart
(on ¼" gold)

Enlisted personnel... A rating badge worn on the left arm, consisting of a spread eagle and chevrons, with the appropriate specialty centered between.

MARINE CORPS

Marine Corps and Army have similar insignia except for color and fewer Marine Corps subdivisions. Its distinctive cap and collar ornament is the combination of the American eagle, anchor and globe.

COAST GUARD

Coast Guard insignia follow Navy custom, with certain minor changes such as the officer cap insignia. The Coast Guard shield is worn on both sleeves of officers and on the right sleeve of all enlisted men.

Armed Services Appoint Senior Enlisted Adviser

The U. S. Army, Navy and Air Force in 1966-67 each created a new position of senior enlisted adviser whose primary job is to represent the point of view of his services' enlisted men and women on matters of welfare, morale and any problem concerning enlisted personnel. The senior adviser will have direct access to the military chief of his branch of service and policy-making bodies. The Marine Corps has had such a position for many years.

The senior enlisted adviser for each of the four Military Departments is:

Army—Sgt. Major of the Army George W. Dunaway.

Navy—Master Chief Gunner's Mate Delbert D. Black.

Air Force—Chief Master Sgt. of the Air Force Paul W. Airey.

Marines—Sgt. Major Herbert J. Sweet.

United States Air Force

Source: Department of the Air Force

The Army Air Forces were started Aug. 1, 1907, as the Aeronautical Division of the Signal Corps, U. S. Army. The division consisted of one officer and two enlisted men, and it was more than a year before it carried out its first mission in an airplane of its own. When the U. S. entered World War I (April 6, 1917), the Aviation Service, as it was called then, had 55 planes and 85 officers, only 35 of whom were fliers. On the day the Japanese

struck at Pearl Harbor (Dec. 7, 1941), the Army Air Forces, as they had been renamed six months previously, had 10,329 planes, of which only 2,848 were suited for combat service. But when the Army's air arm reached its peak during World War II (in July, 1944), it had 79,908 of all types of aircraft and (in May, 1945) 43,248 combat aircraft and (in March, 1944) 2,411,294 officers and enlisted men. The Air Force was established under the Armed Services Unification Act of July 26, 1947.

Military Units, U. S. Army and Air Force

Army units. Squad. In infantry usually ten men under a staff sergeant. Platoon. Small military unit usually under a lieutenant. Company. Headquarters and three more platoons under a captain. Battalion. (Battalion-size unit in the cavalry is a squadron.) Headquarters and three or more companies (Company in the artillery is a battery; in the cavalry it is a troop), under a lieutenant colonel. Squadron. Headquarters and three or more troops of cavalry under a colonel (in time of war the Infantry Brigade is commanded by the brigadier general). Division. Headquarters and three infantry brigades with artillery and auxiliary troops under a major general. Army Corps. Two to five divisions with corps troops under a lieutenant general. Army. Headquarters and two or more corps with auxiliary troops under a general.

Air Force Units. Flight. Small components of a squadron organized for special purpose such as medical evacuation flights. Squadron. The basic organized unit of the Air Force, used by operational as well as support forces but not limited by numbers of personnel assigned; two to three tactical squadrons are assigned to a tactical wing. Group. Terminology used for special tactical forces and for many support elements. They do not necessarily have subordinate units assigned. Wing. Used for tactical and support forces. A tactical wing usually has two to three operational squadrons assigned. Division. An organizational component of operational numbered Air Forces consisting of two to three wings, also used to designate numerous support and research components. Air Force. An intermediate echelon of command directly under the headquarters of a large operational command, usually with four to seven subordinate divisions. Major command. A major subdivision of the Air Force that is assigned a major segment of the USAF mission, usually two to four subordinate Air Force elements in operational command.

National Guard of the United States

Source: National Guard Bureau, Washington, D.C. 20310

The National Guard of the United States originated with the Old North Regiment of the Colonial Militia in Massachusetts in 1636. It is the oldest military force in the country and has participated in all U.S. wars and conflicts from the Revolutionary War to the Vietnam war.

Today the Army and Air National Guard total over 450,000 men, serving in over 3,790 Army and Air National Guard units in more than 2,700 communities in all 50 States, Puerto Rico and the District of Columbia.

By act of Congress, the Guard is the primary reserve of the U. S. Army and Air Force. In peacetime, it is commanded by the State governors and serves in State emergencies, disasters, and civil disturbances.

The Army National Guard as of June 30, 1968, had Federal equipment and vehicles valued at \$1.6 billion and a Federal budget appropriation

of approximately \$89,000,000. The Air National Guard had Federal equipment and aircraft valued at \$2 billion and a budget of about \$370,670,000. The States provide substantial support to the Guard each year in various types of indirect support such as donation of land, police and fire protection, and maintenance of roads.

Besides being a reserve force available for war and civil emergencies, the Guard is now a full-time partner in the air defense network in the Nike Hercules missile sites around key cities and in the fighter-interceptor planes and pilots on round-the-clock runway alert.

The National Guard is administered by the National Guard Bureau, a joint office of the Departments of the Army and the Air Force, in the Pentagon. Chief of the Bureau is Major General Winston P. Wilson of Arkansas, first Air National Guard general to hold the office.

United States Military Academy, West Point, N. Y.

The United States Military Academy is located on the Hudson River some fifty miles from New York City. The service rendered to the nation by the Academy has been widely acclaimed during its 167 years in existence. Its graduates are loyal to its ideals of "Duty, Honor, Country."

The Academy was established on March 16, 1802 with the first class, numbering 10 cadets, entering on July 4, 1802. West Point has been a military post since Jan. 20, 1778.

Requirements for admission to the Military Academy differ somewhat from those for admission to a civilian college in that each prospective cadet must first be designated a candidate from one of the sources of nomination listed below. Usually the candidate obtains his nomination either from the Representative in Congress from his Congressional district or from one of his Senators.

Admission to the Military Academy may be gained only by appointment to one of the cadetships authorized by law. Graduation of the senior class normally leaves about 1000 vacant cadetships each year and candidates may be nominated for these vacancies only during the year preceding the admission day in the first week in July. The cadetships authorized are allocated among the various sources of nomination as follows:

CONGRESSIONAL

435 Representatives (5 each)	2175
100 Senators (5 each)	500

Other

Vice Presidential	5
District of Columbia	5
Canal Zone	1
Puerto Rico	6
Guam, Virgin Islands, American Samoa	1

COMPETITIVE

Army: Regular Components	Annually 85
Reserve Components	Annually 85
Presidential	Annually 100
Sons of Veterans	20
Honor Military and Honor Naval Schools	Annually 13

Sons of Medal of Honor Winners	Unlimited
Foreign Cadets	24

(The number of cadetships under the competitive category shown above will not be fully implemented until the early 1970s.)

For each vacancy from a State or Congressional District 10 candidates may be nominated by one of two methods. Either the Principal-Alternate method whereby candidates are listed in order of Priority as Principal, 1st, 2nd, 3rd, 4th, 5th Alternate etc., or the Congressional Competitive method whereby the best qualified nominee is selected by the Academic Board. USMA may be used. Selection of candidates is left to Senator or Representative.

Candidates must be U. S. citizens, and must not have reached 22nd birthday, good moral character, and must never have been married. After being designated candidates, they take three types of examination: academic, medical, and physical aptitude. The academic qualification for admission is determined by an analysis of the candidate's scholastic record and his performance on tests of the College Entrance Examination Board. The tests are: scholastic aptitude, achievement in English composition and mathematics.

Congressional candidates may offer for admission their scores on any of the College Board examinations: all competitive candidates, however, must take tests at specified dates in the year prior to entrance. All candidates also must qualify in a thorough medical examination and a test of physical aptitude designed to measure strength, agility, endurance, and muscular coordination. Upon receipt of a nomination, the candidate may immediately take the medical examination and thereby satisfy the medical entrance requirement. All three examinations are given in December, January and March at designated military installations located in this country and in certain foreign countries. Candidates should consult the USMA catalogue for test dates.

Prospective cadets who completed their entrance examinations are notified of the results of the examinations beginning Jan. 1 thru Apr. 15. Those fully qualified and for whom a vacancy exists report to West Point in the first week in July. Upon admission each cadet takes the oath of allegiance and agrees to serve as a commissioned officer for not less than 5 years immediately following graduation.

All expenses necessary to the education and training of cadets at the U. S. Military Academy are borne by the Government. Cadets, as members of the Regular Army, receive pay and allowances as provided by law (currently in excess of \$2,000 per year, plus rations). From this pay, cadets are required to purchase uniforms, textbooks, and some incidental items. To defray the cost of the initial issues of uniforms and equipment a deposit of \$300 is required.

Summer periods are primarily devoted to practical military instruction but approximately 4 weeks' leave is granted cadets each summer after completion of their first year. The academic year runs from September through May. Upon successful completion of the 4-year course, the graduate receives the B.S. degree and is commissioned a 2d Lieutenant in the Regular Army.

In addition to the U. S. citizens, the Secretary of the Army is authorized to permit not exceeding four Filipinos (one for each entering class), to be designated by the President of the Republic of the Philippines, to receive instruction at the Academy.

The act of June 26, 1946 (as amended) authorizes the President of the United States to permit not exceeding 20 persons at a time from the American republics to receive instruction at the Academy, provided not more than three from any one country are there at the same time.

Citizens of other foreign countries have been permitted from time to time to attend the Military Academy upon specific authorization of the United States Congress in each case but are not entitled by reason of their graduation therefrom to appointment to any office or position in the United States.

The Superintendent of the Military Academy is Maj. Gen. S. W. Koster, U. S. A., the Dean of the Academy Board is Brig. Gen. John R. Jannarone, U. S. A., the Commandant of Cadets is Brig. Gen. Bernard W. Rogers, U. S. A.

Requests for information and for the Academy catalog should be sent to the Director of Admissions, U. S. Military Academy, West Point, N. Y. 10996.

United States Naval Academy at Annapolis

The United States Naval Academy was established as the Naval School Oct. 10, 1845 at Annapolis, Maryland. It was renamed the U. S. Naval Academy in 1850. A four-year course was adopted a year later. From the first, the faculty has been composed about equally of officers and civilians.

The Academy is the undergraduate college of the U. S. Navy. Its purpose is to educate and train young men for careers in the naval service. Leadership and character development and physical fitness are stressed. The Academy is accredited by the Middle States Association of Colleges and Secondary Schools. Graduates of its 4-year course are awarded the Bachelor of Science degree and are commissioned ensigns in the U. S. Navy or second lieutenants in the U. S. Marine Corps.

The head and Superintendent is a Rear Admiral. A navy captain commands the 4,200-man Brigade of Midshipmen. The Academic Dean and head of the academic program is a civilian. Religious activities are headed by a senior navy chaplain.

The basic curriculum consists of a core curriculum (85%) devoted to basic courses in science, naval science, engineering, social sciences, and the humanities plus electives (15%) in the area of the midshipman's selected minor or major (23 minors/23 majors offered). Provision is made for validation of previous college-level work. In addition,

superior students may carry more than the required number of courses. Over 300 electives are offered.

Selected seniors, Trident Scholars, pursue independent study and research programs under a faculty advisor. In addition, graduate-level courses are offered which are creditable toward advanced degrees following graduation.

Majors offered include: Aerospace Engineering, Mechanical Engineering, Naval Engineering, History, Literature, Foreign Affairs, Politics and Economics, French, German, Italian, Portuguese, Russian, Spanish, Applied Mathematics, Theoretical Mathematics, Oceanography, Management, Operations Analysis, Chemistry, Physics, Applied Science, Electrical Science, and Systems Engineering (Weapons).

To have basic eligibility for admission a candidate must be: A citizen of the United States; of good moral character; at least 17 and not yet 22 years of age on July 1st of their entering year; a high school graduate or its equivalent; and unmarried and not previously married.

If basically eligible, candidates must: Obtain a nomination; qualify academically; qualify medically and physically; be selected for appointment. They may qualify academically by submitting an acceptable secondary record and acceptable scores on College Entrance Examination Board aptitude

(verbal and math) and achievement (Eng. composition and either Math I or II) tests, or, in the case of certain Congressional nominees, by presenting an acceptable secondary record and an acceptable transcript for one year of college.

Physically, candidates must be at least 5'4" and not over 6'6" tall. They must have 20/20 vision in both eyes. (The Academy will consider granting a limited number of waivers to 6'8" in height and to 20/100 in vision (correctable to 20/20 for candidates with outstanding academic and leadership accomplishments.)

The primary avenues to selection for appointment as midshipmen follow:

85, yearly, from regular armed forces personnel.

85, yearly, from Navy and Marine Corps reserves.

100, annually, to sons of regular members of the armed forces, active, retired, or deceased.

150, annually, selected from qualified congressional alternates.

20, annually, from honor military schools (10) and NROTC units, contract students only (10).

40 sons of deceased or disabled veterans may be at the Academy at any one time. Eligibility is limited to sons of veterans killed in action, or dead or with service-connected disability rated at 100% from wounds, injuries, or disease contracted in or aggravated by active service.

Congressman, the Vice President, the District (D. C.) Commissioner, and the Resident Commissioner of Puerto Rico may each have 5 midshipmen at the Academy at any one time. Congressmen may nominate 10 candidates for each vacancy. Over half of the 1,350 appointments as midshipmen made annually originate from these sources.

In addition there are limited numbers of appointments available (annually) from the Philippines (4); the Canal Zone (1); Virgin Islands/Guam/American Samoa (1); and the American republics (20).

The President appoints the best-qualified of the 40 sons of deceased veterans, and the 100 best-qualified sons of officers and enlisted men in the regular Armed Services. He also appoints sons of Medal of Honor holders.

The Secretary of the Navy awards the 170 (85+85) appointments to regular and reserve personnel, and the 150 to alternate congressional nominees,

all on a competitive, best-qualified basis. He may also make a limited number of additional appointments each year, to bring the Brigade to authorized strength, from among qualified congressional and competitive nominees, all on a best-qualified basis.

On being appointed a midshipman, candidates must subscribe (with consent of parent or guardian if a minor) to serve for at least six years (5 on active duty) following their graduation and commissioning. In addition, each civilian appointee assumes a separate 6-year military obligation under the Universal Military Service and Training Act under which he may be transferred to the Naval or Marine Corps Reserve if separated from the Academy prior to graduation. Those having an enlisted or officer status prior to appointment and who are separated prior to graduation must fulfill the military obligation assumed at the time of their initial enlistment, induction or appointment. Academy time counts toward fulfillment of total military obligation, but does not serve in place of required service under draft.

Tuition, board and lodging, and medical care are provided. Midshipmen receive \$171.10 per month for books, uniforms, and personal needs. Midshipmen may not marry while at the Academy.

For full information write: Dean of Admissions, Naval Academy, Annapolis, Md. 21402 or the Chief of Naval Personnel, Navy Dept., Wash., D. C. 20370.

Naval Academy Museum

The Naval Academy Museum is headed by a navy captain reporting directly to the Superintendent. The Museum serves as inspiration to the men of the Brigade by providing tangible evidence of some of the most glorious episodes in the nation's history. In addition, its collection of more than 50,000 items provides an important reference source for the study of naval history by faculty, midshipmen, and other interested scholars. Among the many original documents are the contracts for building our first naval ships; letters of John Paul Jones; and memorials of steamboat inventors John Fitch, James Rumsey, and Robert Fulton. In addition, the museum is well-known for its distinguished Rogers Collection of Ship Models; seascapes by Edward Moran; and the Beverly R. Robinson collection of over 1,000 historic naval prints.

United States Air Force Academy

The United States Air Force Academy, the nation's newest service academy, is located at the foot of the Rampart Range of the Rocky Mountains near Colorado Springs, Colo. Established April 1, 1954, the Academy occupied temporary quarters on Lowry Air Force Base in Denver till moved to the permanent campus in 1958. The first class of cadets was graduated in June, 1959.

Most of the Academy's graduates have gone on to Air Force pilot training. A percentage of each class has entered institutions of higher learning for graduate work in technical and professional fields.

To enter the Academy immediately after graduation from high school, a student should apply to nominating authorities during the spring months of his junior year. To qualify, an applicant must be at least 17 and not yet 22 on July 1 of the year he enters the Academy; be a male citizen of the United States, morally and physically fit, and must never have been married.

A resident of the United States who meets the eligibility requirements may apply for a nomination by writing to a U. S. Senator from his state or a U. S. Representative from his Congressional district. In such a letter the applicant should state briefly his qualifications, parents' name, place of residence, and educational background. Approximately 85% of the vacancies in each class are reserved for Congressional nominees.

Each member of Congress may nominate one principal and 9 alternate candidates for each existing vacancy. If the principal candidate qualifies on the entrance examinations, he will be selected. If he does not pass the examination, the

first qualified alternate will be chosen or a Senator or Representative may authorize the Academy to select the best qualified of his 10 candidates on a competitive basis.

Candidates are selected under several other nominating categories, primarily sons of career members of the armed forces and members of the Regular and Reserve components of the Air Force.

All candidates will be required to take the following examinations, usually scheduled from December through April: physical aptitude; the College Entrance Examination Board tests; and the Air Force medical examination.

Cadets spend four years at the Air Force Academy engaging in scientific and liberal arts studies, along with military training. Upon graduation they receive a Bachelor of Science degree, with a major in one or more of 28 fields of study, and a second lieutenant's commission in the Regular Air Force. Those physically qualified may elect to undergo a course in pilot or navigator training after graduation.

Cadets receive their education, quarters, medical and dental care at Government expense. In addition, they receive \$171.60 per month for books, clothing, and personal expenses.

The Cadets in the first class chose the falcon as the mascot of the Academy.

Superintendent of the Academy is Lt. Gen. Thomas S. Moorman, USAF. Commandant of Cadets is Brig. Gen. Robin Olds, USAF. Dean of the Faculty is Brig. Gen. William T. Woodyard, USAF.

Requests for catalog and information should go to Registrar, U. S. Air Force Academy, Colo. 80340.

U. S. Coast Guard Academy

The United States Coast Guard Academy, New London, Conn., was founded in 1876. The administration building is named Hamilton Hall in honor of Alexander Hamilton, first Secretary of the Treasury, who founded the Coast Guard (1790).

The Academy's four-year course embraces engineering, military science, cultural and other professional subjects. Cadets are paid \$1,823.40 a year with rations and are credited with the sum of \$600 to defray the cost of their initial clothing and equipment, this sum to be deducted subsequently

from their pay. In addition each cadet upon appointment is required to deposit \$300 with the Superintendent of the Academy to help defray additional clothing and equipment costs. Cadets are appointed solely on the basis of a nationwide competition which begins with December college board tests.

Upon graduation, a Cadet receives a bachelor of science degree and is commissioned by the President as an Ensign in the Coast Guard, receiving the same pay and allowances as an officer of similar rank in the other armed services.

The United States Marine Corps in 1968

On Jan. 1, 1968, Gen. Leonard F. Chapman, Jr., became Commandant of the Marine Corps.

By September, Corps strength was more than 307,000 with approximately 84,000 Marines in Vietnam. In their 4th year of fighting in Vietnam, Marines fought numerous sustained actions against Vietcong and North Vietnamese (NVA) forces in the northern provinces of South Vietnam. They inflicted heavy losses in the enemy-initiated Tet Offensive, notably in the battle of Hue. The 70-day action at the Khe Sanh prevented an estimated 20,000 North Vietnamese soldiers from gaining free access to the northern provinces. In February, because of the enemy's increased activity, the 27th Marine Regiment was deployed from Camp Pendleton to Vietnam temporarily. In August, Marines crossed the DMZ for the first time since July of 1967 in pursuit of fleeing NVA troops. As of September, 14 Marines had earned the Medal of Honor for heroism.

The Marines in Vietnam were members of the III Marine Amphibious Force (III MAF), comprised of the 1st and 3rd Marine Division reinforced by part of the 5th Marine Division, the heavily 1st Marine Aircraft Wing, and a Force Logistics Command. III MAF was the major part of Fleet Marine Force, Pacific (FMFPac), headquartered in Hawaii. Other FMFPac subordinate commands included the Okinawa-based 9th Marine Amphibious Brigade, which, in turn, was the parent unit for Special Landing Forces based aboard Navy 7th Fleet ships in the China Sea; the 1st Marine Brigade in Hawaii; and the California-based 3rd Marine Aircraft Wing, 5th Marine Division, and Force Troops, FMFPac (combat support units).

The Marine Corps' second complete air/ground team is Fleet Marine Force, Atlantic (FMFLant),

headquartered in Norfolk, Va. Its major elements include the 2nd Marine Division; 2nd Marine Aircraft Wing; and Force Troops, FMFLant, all based in North Carolina. FMFLant landing teams are constantly deployed with Navy ships in the Mediterranean and Caribbean, and as a defense force for the Naval Base, Guantanamo Bay, Cuba.

Marines returning from Vietnam raised the combat-experience level of the Corps and of the 48,000-man Marine Corps Reserve. The 4th Marine Aircraft Wing is the air/ground team of the Marine Corps Reserve, available for combat if called upon.

Recruit Depots at Parris Island, S.C. and San Diego, Calif., gave approximately 89,000 recruits 8 weeks of "boot camp." At the major Marine Corps bases—Camp Lejeune, N.C. and Camp Pendleton, Calif.—new Marines received an additional two to 4 weeks of individual combat, basic specialist, and Vietnam-oriented training. Officer candidate and basic officer classes were conducted at the Marine Corps Development and Education Command, Quantico, Va., and 2,881 officer candidates were commissioned.

Basic flight training was given at Naval Air Stations in Pensacola, Fla., and Corpus Christi, Tex.; and, since 1967, with all Air Force Air Training Command bases. A total of 665 Marine student pilots received their wings in 1968. In addition, Marine pilots received helicopter flight training at Army training bases in Texas and Georgia. Advanced aviation training was provided by Marine Aircraft Wings and Marine Air Stations at Cherry Point, N.C., and El Toro, Calif., and by the Marine Air Reserve Training Command at Glenview, Ill.

In 1968, a formal Computer Sciences School was established at Marine Corps Development and Education Command, Quantico.

United States Merchant Marine Academy

The United States Merchant Marine Academy—the fifth permanent Federal Academy for officer training—has an authorized peacetime complement of approximately 1000 Midshipmen from every state in the Union, Puerto Rico, District of Columbia, Canal Zone, Guam, American Samoa, and the Virgin Islands.

On completion of courses, graduates receive their original Merchant Marine license as deck or engineer officers qualified to serve in any ship in the United States Merchant Marine. Graduates also receive B.S. degrees and commissions as Ensigns in the U. S. Naval Reserve.

Appointments to the Academy are governed by a state and territory quota based on population. All candidates must be nominated by a member of Congress to compete for appointment, possess a minimum of 15 units from accredited schools, qualify in a national competitive examination, and pass a Naval Officer physical examination and security investigation. Each Member of Congress may nominate up to 10 candidates for each class.

A candidate must be an unmarried male citizen

of the U. S., not less than 17 years of age and not over 22 by July 1 of the year in which admission is sought. He must be of good moral character, sound constitution and not less than 5 ft. 4 in. or more than 6 ft. 6 in. in height. A candidate for appointment as a deck midshipman must have minimum uncorrected visual acuity of at least 20/40 in one eye and 20/70 in the other; as an engineering midshipman he must have at least 20/50 in one eye and 20/70 in the other. All candidates must have corrected visual acuity of 20/20 in each eye and normal color perception. Waivers for failure to meet physical requirements will not be granted.

Under Federal legislation the Academy is authorized to admit students from American republics for the four-year program. Enrollment is limited to 12 students at any time.

The Academy grounds at Kings Point, N. Y., covers 65 acres on the north shore of Long Island. The Superintendent of the Academy is Rear Admiral Gordon McIntock, USMS.

Requests for further information should be addressed to the Admission Office, U. S. Merchant Marine Academy, Kings Point, N. Y. 11024.

Personal Salutes and Honors

The national salute is 21 guns. It is also the salute to a national flag. The salute to the Union, commemorative of the Declaration of Independence and consisting of one gun for each State, will be fired at noon on July 4 at every post provided with suitable artillery.

A 21-gun salute on arrival and departure, with 4 ruffles and flourishes, is rendered to the President of the United States, to an ex-President and to a President-elect. The national anthem or *Hail to the Chief*, as appropriate, is played for the President, and the national anthem for the others. A 21-gun salute on arrival and departure, with 4 ruffles and flourishes, also is rendered to the sovereign or chief of state of a foreign country or a member of a reigning royal family; the national anthem of his or her country is played. The music is considered an inseparable part of the salute and will immediately follow the ruffles and flourishes without pause.

Rank	Salute—guns		Ruffles flourishes	Music
	Arrive	Leave		
Vice President of United States, Speaker of House.....	19	..	4	March
American or foreign ambassador.....	19	..	4	Nat. anthem, of official
Premier or prime minister.....	19	..	4	Nat. anthem, of official
Secretary of Defense, Army, Navy or Air Force.....	19	19	4	March
Other Cabinet members, Senate President pro tempore, Governor, or Chief Justice of U. S.....	19	19	4	March
Chairman, Joint Chiefs of Staff.....	19	19	4	General's or Admiral's March
Army Chief of Staff, Chief of Naval Operations, Air Force Chief of Staff, Marine Commandant.....	19	19	4	
Army General; Air Force General; Fleet Admiral.....	19	19	4	
Generals, Admirals.....	17	17	4	March
Assistant Secretaries of Defense, Army, Navy or Air Force.....	17	17	4	March
Chairman of a Committee of Congress.....	17	..	4	March

Other salutes (on arrival only) include 15 guns for American envoys or ministers and foreign envoys or ministers accredited to the United States; 15 guns for a lieutenant general or vice admiral; 13 guns for a major general or rear admiral; 13 guns for American ministers resident and ministers resident accredited to the U. S.; 11 guns for a brigadier general or commodore; 11 guns for American charges d'affaires and like officials accredited to U. S.; and 11 guns for consuls general accredited to U. S.

Women's Branches of the U. S. Military Service

WOMEN'S ARMY CORPS

Colonel Elizabeth P. Holsington, GS, Director, Department of the Army, Pentagon, Wash., D. C.

The Women's Army Corps, an outgrowth of the WAAC in World War II, was established as a component of the Regular Army and Army Reserve by Congress in 1948. The WAC makes available to the Army volunteer womanpower, trained in non-combat occupational skills to support the peacetime forces and to serve as a base upon which use of the nation's womanpower could be rapidly expanded in time of emergency. To be eligible for membership, applicants must be U. S. citizens (or have been lawfully admitted for permanent residence), have no dependents under 18 and meet certain specific standards. Enlistment is open to women between the ages of 18 to 34 inclusive, who have high school diplomas or equivalent. Students in their junior year of college may apply for the 4-week College Junior summer training program. Outstanding students of the program may be further selected for participation during their senior year of college in the Student Officer Program. Graduates of accredited colleges and universities, ages 20 to 30, may apply for direct appointment and active duty as officers. Enlisted women may also become officers through attendance at Officer Candidate School. Basic training for officers and enlisted women is given at the U. S. WAC Center and School, Fort McClellan, Alabama. In addition, WAC members receive advanced training along with men in the Army Service Schools.

ARMY NURSE CORPS

Colonel Anna Mae Hays, Chief, Army Nurse Corps, Office of The Surgeon General, Department of the Army, Main Navy Building, Washington, D. C., 20315.

The Army Nurse Corps, established in 1901 as a part of the Army Medical Service, is the oldest of the women's services in the Armed Forces. An officer corps of registered professional nurses, its proud history includes significant and courageous contributions to our Nation in two world wars and in the Korean and Vietnamese Conflicts. Army nurses serve in ranks from second lieutenant to colonel, based upon qualifications and length of service. Male nurses have been commissioned in the Corps since 1955.

Graduates of hospital or university schools of nursing accredited by the National League for Nursing and/or acceptable to The Surgeon General, who are currently registered to practice nursing in one state of the United States or in Puerto Rico may apply for a commission provided they are less than 35 years of age and U. S. citizens or have been admitted for permanent residence.

The Registered Nurse Student Program is available to nurses who can complete requirements for a baccalaureate or higher degree within 24 months. Participants receive pay and allowances of a commissioned officer and are obligated to serve on active duty for a period not to exceed three years.

The Army Student Nurse Program offers financial assistance to students enrolled in a hospital or university school of nursing. Participants in hospital programs in nursing may receive a maximum of 12 months financial assistance and are obligated to serve two years as an Army Nurse Corps officer following licensure to practice nursing. Participants in university programs of nursing may receive a maximum of 24 months of financial assistance. These participants are commissioned as officers six months prior to graduation and following graduation and licensure are obligated to serve as Army Nurse Corps officers for a period not to exceed three years.

The Walter Reed Army Institute of Nursing Program offers a unique opportunity to a limited number of high school graduates annually to acquire a baccalaureate degree in nursing. Selected candidates enroll in an accredited college of their choice for the first two years and transfer to the University of Maryland School of Nursing for the final two years to complete the requirements for a bachelor of science degree and obtain state licensure. Candidates are commissioned second lieutenants in the Army Nurse Corps and incur a three year obligation to serve on active duty.

Educational opportunities for Army Nurse Corps officers on active duty are available in advanced clinical specialization and education through pro-

fessional programs, postgraduate short courses and workshops conducted at military installations and civilian institutions.

Army nurses serve throughout the world wherever American troops are stationed.

ARMY MEDICAL SPECIALIST CORPS

Colonel Mary Lipscomb Hamrick, Chief, Army Medical Specialist Corps, Office of The Surgeon General, Dept. of the Army, Wash., D. C. 20315.

The Women's Medical Specialist Corps was established as a Regular Army component of the Medical Department in 1947. The name was changed to Army Medical Specialist Corps in 1955, when male dietitians, physical and occupational therapists were authorized for its Reserve Section. Regular Army commissions were established for male officers in 1956.

Direct commissions are available to qualified U. S. citizens with a bachelor's degree, who have completed the required specialty training and are under 35. Applicants with academic degrees may enroll for professional training courses offered by the Army Medical Dept. The dietetic internship and physical therapy course take 12 months; a 9-month clinical affiliation program in occupational therapy is available to students who have completed the didactic portion at an approved school.

Financial assistance during the last 2 years in approved colleges is available to qualified students in dietetic and occupational therapy courses. Participants are commissioned in the AMSC on graduation, and serve on active duty for 3 or 4 years.

Summer practicums, with no service obligation incurred, are available to college students in home economics, physical and occupational therapy courses at selected Army hospitals.

AMSC officers serve in Army hospitals in the United States and overseas.

NAVY AND NAVAL RESERVE

Capt. Rita Lenihan, Assistant Chief of Naval Personnel for Women and Director of the WAVES, Bureau of Naval Personnel, Navy Department, Washington, D. C. 20370.

WAVES is the popular name for the women in the United States Navy.

Women officers in the Navy must hold a baccalaureate degree to qualify for a commission and are required to serve on active duty for two years. They are assigned to duty in the Naval Shore Establishment in the same fields in which male officers serve, including personnel management, comptrollership, computer programming, intelligence and logistics. Staff officers (Medical Corps, Supply Corps, Medical Service Corps and Judge Advocate General Corps) are assigned duty in their specialties.

Enlisted women in the Navy must be a high school graduate and enlist for at least 3 years. There are over 20 different ratings open to enlisted women, including such specialties as: air traffic control, data processing, electronics, journalism, photography, radio and communications, weather forecasting, and yeoman (secretarial) duties.

Assignment of WAVES is made interchangeably with Navy men, excepting duties at sea. WAVES may not be assigned to duty aboard Navy ships other than hospital ships and transports, nor may they serve in aircraft engaged in combat missions. They are, however, assigned to duty overseas.

All provisions of law relating to pay, money allowances, leave, and other benefits applicable to male personnel also apply to women.

NURSE CORPS, USN AND USNR

Captain Veronica M. Bulshefski, NC, USN, Director, Navy Nurse Corps, Bureau of Medicine and Surgery, Navy Department, Washington, D. C.

Navy Nurse Corps officers provide nursing care of patients, supervise and instruct hospital corpsmen and other nursing personnel. They serve in hospitals, dispensaries, Hospital Corps Schools, at domestic and overseas stations, and aboard USS Hospital Ships.

Female or male applicants for direct appointments between ages 20 to 34, must be registered professional nurses who meet eligibility requirements for commission in the Navy. All appointments are made in the Nurse Corps, U. S. Naval Reserve in ranks of ensign, lieutenant (j.g.), or lieutenant, depending on education, professional experience and age.

The Navy Nurse Corps Candidate Program provides financial assistance to those qualified junior and senior nursing students and registered nurses who are matriculated in a nurse baccalaureate de-

gree or higher degree program in approved universities. Students participating in the program receive tuition, fees, allowances for books and pay, quarters, and subsistence commensurate with the grade in which they serve. Six months prior to completion of degree requirements, students are commissioned as Ensign, 1905, USNR and receive the base pay and allowance of that rank. Following graduation participants will be ordered to the U. S. Naval Schools Command, Newport, R. I., for a 4 week indoctrination course after which they will be commissioned in the Naval Reserve as Nurse Corps officers (2905). The graduate will be commissioned to the grade of ensign, lieutenant (j.g.) or lieutenant (s.g.) depending on education, professional experience and age. Candidates serve on active duty for 2 years for one year of subsidized education or 3 years for more than one year of subsidized education.

WOMEN IN THE U. S. AIR FORCE (WAF)

Colonel Jeanne M. Holm, Director, Hq USAF, the Pentagon, Washington, D. C. 20330.

During World War II, 40,000 women served as members of the Air WAC on duty with the Army Air Corps and Army Air Forces. In September, 1947, the separate Department of the Air Force was established. The following year the Women's Armed Services Integration Act of 1948 authorized the appointment and enlistment of women in the Regular Air Force and the Air Force Reserve.

The WAF is not a constituted corps or a separate program but is an integral part of the Air Force military personnel program. In most cases, WAF are completely interchangeable with their male contemporaries on a job-for-job basis and the same general Air Force policies are equally applicable to men and women. Women in the Air Force serve at Air Force installations all over the U. S. and at many overseas locations, including Southeast Asia.

During 1968 there was 900 WAF officers and 6,500 enlisted women. By the mid-1970s, approximately 14,000 will be serving.

AIR FORCE NURSE CORPS

Colonel Ethel A. Hoefly, Chief, Office of the Surgeon General, USAF, Washington, D. C. 20333.

The Air Force Nurse Corps was established as an integral part of the Air Force Medical Service in 1949. The majority of Air Force Nurses are on duty in Air Force hospitals as general duty staff nurses. Others work in specialties such as, anesthesia, operating room, psychiatry, obstetrics, research, aerospace, or teaching. A limited number are assigned as flight nurses in the aeromedical evacuation of patients by air. A selected number of nurses are enrolled in both military and civilian schools and universities for advanced professional education. Nurses in the Air Force are assigned on a world wide basis.

An applicant must be a citizen, at least 20 but not more than 35 years of age; physically qualified for military nursing; a graduate of a school of nursing offering a minimum 3-year basic curriculum, acceptable to the Surgeon General, USAF, and registered to practice professional nursing. The rank she receives depends on professional experience and educational background. Initial appointments to the Regular Air Force are made from Reserve Nurses on active duty. Air Force Nurses have rank and pay as officers in the USAF.

AIR FORCE MEDICAL SPECIALISTS

Col. Frances G. Ballentine, Chief, Office of the Surgeon General, USAF, Washington, D. C. 20333.

The Medical Specialists as a corps was organized 1949 when the USAF Medical Service was established. In 1965 all medical specialists were transferred to the Biomedical Sciences Corps which was organized as a new corps within the Office of the Surgeon General. Air Force dietitians, occupational therapists and physical therapists continue to be identified as medical specialists within the new Biomedical Sciences Corps.

Initial appointments are made in the USAF Reserve. Eligibility for commissions require that the applicant must be a citizen, physically and educationally qualified, between 21 and 35 years of age.

The educational requirements for appointment require a minimum of a baccalaureate degree and completion of approved courses in the candidate's specialty.

Applicants between 21 and 28 years of age may be commissioned as Second Lieutenants for the purpose of completing an approved dietetic internship, physical or occupational therapy courses (not to exceed 12 months). Initial appointments to the Regular Air Force are selected from Reserve medical specialists on active duty. Air Force Medical Specialists enjoy the rank and pay as commissioned officers in the USAF.

WOMEN MARINES

The first women in the Marine Corps served for one year during World War I when 305 women, called Marinettes, performed primarily clerical duties in Washington, D. C. During World War II, twenty-five years later, women were again called upon to free Marines to fight. The Women Marine Reserve was authorized on February 13, 1943 and by 1945, a total of 23,145 women had answered the call to perform more than 200 different military duties from typists to parachute riggers to map makers. Following the war, a few volunteers remained on active duty and with the passage of the Womens Armed Services Integration Act of 1948, Women Marines became a component part of the Marine Corps. On June 30, 1968, there were approximately 225 women Marine officers and 2,555 enlisted women serving throughout the continental United States, Hawaii, England, Italy, Germany, Okinawa, Japan and Vietnam.

An applicant for enlistment must be between 18 and 28 years inclusive, a high school graduate or able to complete the General Educational Development test at a high school level, have parents' consent if under 21, and be single with no dependents, though she may marry after training at Parris Island, South Carolina.

Officer candidates must be over 18 to enroll for training and between 21 and 29 to be commissioned. Civilian trainees must receive a baccalaureate degree from an accredited college or university prior to commissioning. Enlisted Women Marines and Women Reservists may apply for officer training if they are college graduates or if they successfully complete an officer's selection test.

The Director of Women Marines, selected every 4 years from the senior women Marine Officers, is a member of the staff at Headquarters Marine Corps, Washington, D. C.

COAST GUARD SPARS

Headquarters for U. S. Coast Guard is Washington, D. C. Senior SPAR officer on duty is Commander Elizabeth B. Hall, stationed at Cape May, N. J.

The Coast Guard's SPAR organization was established during World War II on November 23, 1942. Recruit training was first at Hunter College, N. Y., then at Palm Beach, Florida. By war's end, approximately 1,000 officers and 10,000 enlisted women were serving in the Coast Guard.

After World War II, the SPARS were largely demobilized, but were reactivated by the outbreak of the Korean War. At that time a number of SPARS returned to active duty to take over specialized jobs. At present, there are nine SPAR officers and 34 enlisted women on active duty throughout the United States.

SPAR recruits must be between 20 and 30 and unmarried. They undergo basic training at the U. S. Naval Training School at Bainbridge, Maryland. On completion of their training, they are given specialized instruction in the Yeoman and Storekeeper rates at the Coast Guard training facility in Groton, Connecticut.

Public Fallout Shelter Space for 176,000,000 Located

Source: Office of Civil Defense, Dept. of the Army

Civil defense is a key element of national defense in the nuclear age. The U. S. civil defense effort is centered on providing protection for the population against the radioactive fallout that would accompany a nuclear attack. All the states and thousands of local governments participate in the national effort with guidance and assistance from the

Office of Civil Defense of the Department of Defense. The primary objective is to establish a system of shelters with supporting systems for warning people and sustaining them in shelter during a fallout emergency, for monitoring and reporting fallout and for initiating recovery efforts. In addition to attack preparedness missions, most state and

local civil defense organizations are charged by law with responsibility for preparedness against natural disaster and with the direction of natural disaster control and relief operations.

Shelters. By Mid-1968, public fallout shelter space for more than 176,000,000 persons had been located and survival supplies for sustaining almost 80,000,000 persons for up to eight days were stocked in marked public shelters.

These shelters are being established by virtue of the fact that many existing large buildings contain areas with inherent protective features against fallout radiation.

In 1966, the national shelter survey was expanded to include smaller buildings, including private dwellings, to add their shelter potential to the national inventory.

By mid-1968, home surveys had been undertaken in R. I., Maine, Minn., Iowa, Kan., W. Va., Colo., Wyo., N. H., Vt., Idaho, Wis., Wash., Mont., Alaska, S. D., N. D., Utah, Nebr., Mich., Ore., Va., Md., Del., Conn., Mass., Long Island and Dist. of Col.

To encourage the incorporation of shelter in new construction, OCD has developed design techniques which add protective features to structures such as

schools, office buildings and public buildings at little or no additional cost, without loss of esthetic values and without interfering with the normal, peacetime use of the shelter area in the buildings.

A-Community Shelter Planning (CSP) program, tested in every state in previous years, was deployed in 1966 as an essential part of emergency preparedness. The basic purpose of this program is to develop in each community—with the assistance of local or state planning professionals—practical procedures for making efficient use of the best fallout protection available in the event of attack, get this information to each citizen, and prepare each department of local government to support the plan and meet its responsibilities in time of major disaster. CSP projects are under way in 725 localities involving 60,000,000 people.

CD Organization. The Office of Civil Defense was created in 1961 with the transfer of civil defense responsibilities from the Executive Office of the President to the Secretary of Defense. In 1964, OCD was transferred to the Office of the Secretary of the Army. Joseph Romm is the acting national Director of Civil Defense. OCD has eight regional offices and operates a Staff College and three warning centers. The transfer of civil defense functions to the Office of the Secretary of the Army has facilitated plans for support of government by the armed services in a nuclear attack.

Civil Air Patrol Trains Pilots of Both Sexes

Civil Air Patrol, organized in 1941 by civilians to help the Office of Civil Defense, in 1948 became an auxiliary of the United States Air Force, not as an agency of the Government but as a civilian organization of adults and youngsters with interest in aviation and aerospace projects. It provides instruction and training for cadets, who may be male or female from age 13 to 18. It has 2,337 units in the various states and 85,000 members, including 47,000 teenage cadets; nearly 20% of its membership is female. It has a National Commander and Headquarters at Maxwell AFB, Alabama.

American Military Cemeteries and Memorials on Foreign Soil

Administered by the American Battle Monuments Commission, Washington, D. C.
(Numbers of graves, and numbers of commemorated missing in parentheses)

WORLD WAR I CEMETERIES

Aisne-Marne, near Belleau (Aisne) France (2288-1060)
Brookwood (Surrey) England (468-863)
Flanders Field, Waregem, Belgium (368-43)
Meuse-Argonne, Romagne (Meuse), France (14,246-954)
Oise-Aisne, Serignes (Aisne), near Fere-en-Tardenois (Aisne), France (8012-241)
St. Mihiel, Thiaucourt (M. et M.), France (4,152-284)
Somme, Bony (Aisne), France (1837-333)
Suresnes (Seine), France (1541-974). In this cemetery rest also 24 of our unknown Dead of World War II. The World War I chapel was, by the addition of two loggias, converted into a shrine to commemorate our Dead of both Wars. Senior representatives of the American and French governments assemble here on ceremonial occasions to pay homage to our military Dead of these wars.

MONUMENTS

Andenarde, Belgium.

Normandy, near St. Laurent (Calvados), France (9,386-1557)
North Africa, Carthage, Tunisia (2,840-3724)
Rhône, Dragunigan (Var), France (861-293)
Sicily-Rome, Nettuno, Italy (7,862-3094)

To commemorate those who met their deaths in the American coastal waters of the Atlantic and Pacific Oceans the Commission has erected a memorial in Battery Park, New York City, on which are inscribed 4,596 names, and at the Presidio of San Francisco, California, which carries 412 names.

World War II dead are also buried in Sitka National Cemetery, Sitka, Alaska, Puerto Rico National Cemetery, Bayamon, Puerto Rico, and the National Memorial Cemetery of the Pacific, Honolulu, Hawaii. These cemeteries, all on American soil, are under the jurisdiction of The Office of the Chief of Support Services, Department of the Army, Washington, D. C. 20315. At the Honolulu Cemetery the American Battle Monuments Commission has erected a memorial which records the names of 18,093 Missing of World War II and 8,187 Missing resulting from the Korean operations.

The Commission also maintains a cemetery in Mexico City where the remains of 750 Americans who gave their lives in the Mexican War (1846-1848) are buried.

The decoration of graves with natural cut flowers only, is permitted in the cemeteries under the control of The American Battle Monuments Commission. The Commission is glad to assist interested persons in arranging with local florists in foreign countries to furnish such decorations.

Arlington National Cemetery. Va., contains Tomb of the Unknown Soldier. See Index.
Yorktown (2.91), Yorktown, Va.
The Department of the Interior has jurisdiction over 86 other National Cemeteries (3,435 acres) situated in the United States and its possessions. The American Battle Monuments Commission administers the United States Military Cemeteries and Memorials on foreign soil.

United States Coast Guard

The U. S. Coast Guard dates its origin from Aug. 4, 1790, when the First Congress authorized the construction of a revenue fleet known as the Revenue Marine. The Revenue Marine, later known as the Revenue Cutter Service, ultimately developed into the present-day Coast Guard. However, the modern era of the Service began on Jan. 28, 1915, when Pres. Wilson signed legislation combining the Revenue Cutter Service and the historic Life Saving Service into a single organization to be called the U. S. Coast Guard.

The United States Coast Guard is responsible for a wide range of duties which are concerned with maintaining safety and order upon the high seas and navigable waters subject to the jurisdiction of the United States. The primary purpose of most of these duties is to prevent loss of life and property due to unsafe or illegal practices. The maintenance of safety and order is not limited to enforcement of laws. The Coast Guard also directs a program of education among ship operators and boatmen, and enlists their cooperation in the prevention of marine casualties. This role includes maintenance of more than 44,000 aids to navigation—lighthouses, buoys, bells, etc.—along 40,000 miles of waters; lifesaving activities; removal of derelicts and other menaces to navigation; marine inspection; Oceanographic Research; ice-breaking; medical aid to seamen; law enforcement on the high seas and navigable waters of the United States; the prevention of smuggling; patrol of the North Pacific Ocean and Bering Sea, to regulate the taking of fur-bearing sea mammals and fish; aid during flood and hurricanes; maintenance of the International Ice Patrol to report the amount of iceberg drift for the benefit of vessels crossing the North Atlantic; maintaining ocean weather stations; and supervising the engagement, records and discipline of officers and seamen serving in the Merchant Marine. To carry out its many functions, the Coast Guard has a fleet of more

than 2,900 floating craft of all types plus 166 fixed and rotary-wing aircraft.

The Coast Guard is administered by the Commandant of the Coast Guard, at Headquarters in Washington, D. C., through a field organization of 12 District Coast Guard Offices in the continental United States, Hawaii and Alaska. A military service constituting a branch of the armed forces of the United States at all times the Coast Guard operates as a service of the Transportation Dept., to which it was transferred on April 1, 1967. Until then it was in the Treasury Dept. In time of war, or on direction of the President it operates as part of the Navy.

The Coast Guard Auxiliary is a nonmilitary organization administered by the Commandant, with more than 25,000 members in about 700 communities. Its primary activity is to assist the Coast Guard in the promotion of safety and efficiency in the operation of small boats.

Training facilities include a recruit receiving center at Cape May, N. J., and at Alameda, Calif., various service schools for enlisted men, the Coast Guard Academy in New London, Conn., for officer candidates, and the Reserve Training Center at Yorktown, Va.

The Search and Rescue Agency has the Commandant of the Coast Guard as its head.

Congress on May 14, 1960, enacted a law to improve Coast Guard organization by (1) increasing present limitation of 4 years applicable to extension of enlistments to 6 years; (2) raising the limitation on 3,000 commissioned officer personnel to 3,500; (3) improving civilian teaching staff and commissioned teaching staff at Coast Guard Academy; (4) providing for increased grade of admiral for officer serving as commandant and of vice admiral for officer serving as asst. commandant; eliminating the position of engineer-in-chief and the term of four years for asst. commandant.

¹Authoritative statistics for the Confederate Forces are not available. An estimated 26,000-31,000 Confederate personnel died in Union prisons.

²Data are for the period Dec. 1, 1941 through Dec. 31, 1946 when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of Allied peace terms on Aug. 14, 1945. Numbers serving from Dec. 1, 1941-Aug. 31, 1945 were: Total—14,908,213; Army—10,420,000; Navy—3,883,520; and Marine Corps—599,693.

³Tentative final data based upon information available as of Sept. 30, 1954, at which time 24 persons were still carried as missing in action.

⁴Number serving covers the period April 21-Aug. 13, 1898, while dead and wounded data are for the period May 1-Aug. 31, 1898. Active hostilities ceased on Aug. 13, 1898, but ratifications of the treaty of peace were not exchanged between the United States and Spain until April 11, 1899.

⁵Includes Air Service. Battle deaths and wounds not mortal include casualties suffered by American forces in Northern Russia to Aug. 25, 1919 and in Siberia to April 1, 1920. Other deaths cover the period April 1, 1917-Dec. 31, 1918. ⁶Includes Army Air Forces.

⁷Battle deaths and wounds not mortal include casualties incurred in Oct. 1941 due to hostile action.

⁸Marine Corps data for World War II, the Spanish-American War and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.

⁹As reported by the Commissioner of Pensions in his Annual Report for Fiscal Year 1903.

American Military Action, 1900-1968

1900—Occupation of Puerto Rico (annexed 1899).
1900—2,500 Marines help relieve Peking in Boxer Rebellion.

1900-1902—Occupation of Cuba.

1900-1902—Guerrilla war in Philippines.

1903—Sailors and Marines from U. S. S. Nashville stop Colombian Army at Panama.

1904—Brief intervention in Dominican Republic.

1906-1909—Intervention in Cuba.

1909—Brief intervention in Honduras.

1911—Intervention (to collect customs) in Honduras, Nicaragua, Dominican Republic.

1914—Apr. 21 to Nov. 23. Marines in Vera Cruz; also Atlantic fleet and Brig. Gen. Fredk. Funston.

1914—Marines enter Haiti, stay until 1934.

1916—Gen. John J. Pershing and 12,000 into Northern Mexico to stop raids by Villa, Mar. 15-Nov. 24.

1916-1924—Marines in Dominican Republic.

1917—Apr. 6 to Nov. 11, 1918. War with Germany, Austria-Hungary.

1918-1920—Expedition into Russia, Siberia.

1918-1923—Occupation of Germany.

1922-24—Marines in Nicaragua.

1926-33—Marines in Nicaragua.

1927—1,000 U. S. Marines in China.

1941-1945—War with Japan, Germany, Italy and allies. Army units posted in Japan and West Germany.

1950-1953—U. S. and other U.N. countries aid the Republic of Korea to repel North Korean invaders; U. S. Navy protects Taiwan.

1957—U. S. Fleet to Near East.

1958—Marines and Army units support Lebanon.

1960—Navy patrol in Caribbean to protect Guatemala and Nicaragua.

1961—Army units to Vietnam.

1962—Units of U. S. Navy on Cuban blockade duty. Marines in Thailand.

1962-65—U. S. Military Assistance Command, Vietnam; units of U. S. Army, Navy, Air Force, Marine Corps, Coast Guard.

1965—Marines, U. S. Army units to Dominican Republic.

1965—American commanders in Vietnam authorized to send U.S. Armed Force into combat.

ADJUTANT GENERAL'S FIGURES OF CIVIL WAR DEATHS

Figures reported from the Adjutant General's Office previous to the above revision, and accepted for many years, are as follows:

Union Army, according to records in the office of the Adjutant General of the War Department in Washington—killed or died of wounds, 110,070 (6,365 officers, 103,705 men); died of disease, 224,586 (2,795 officers, 221,791 men); other deaths, 24,872 (424 officers, 24,448 men). **Totals**, 359,528 (9,584 officers, 349,944 men).

Confederate Army, estimated, no official records in the office of the Adjutant General of the War Department in Washington—killed in battle, 52,954 (2,086 officers, 50,868 men); died of wounds, 21,570 (1,246 officers, 20,324 men); died of disease, 59,297 (1,294 officers, 58,003 men). **Total**, 113,821 (4,626 officers, 129,195 men).

WORLD WAR II MERCHANT MARINE CASUALTIES

Source: U. S. Coast Guard

Died from direct causes while serving on American flag ships, 345; died in prisoner-of-war camps, 37; listed as missing, 4,780.

There were 572 released prisoners of war, and one prisoner unaccounted for. Another 500 men died while serving on foreign flag ships under U. S. control.

The number of U. S. flag ships lost was 605 of 6,000,000 deadweight tons.

Death of Last U. S. Cavalry Horse Ends an Era

Chief, a bay gelding who was the last Cavalry horse on the rolls of the United States Army, died May 24, 1968, at Fort Riley, Kan. He was 36 years old and had lived for 18 years in semi-retirement. The Army held an elaborate military funeral to mark the end of an era.

Veterans' Benefits Further Improved by 1968 Legislation

Source: Veterans Administration, William J. Driver, Administrator, Washington, D. C. 20420

The chief laws in behalf of veterans and their dependents enacted by Congress in 1968 assured that veterans receiving pensions will not suffer pension cuts because of increases in their Social Security benefits, raised the home loan guarantee ceiling from \$7,500 to \$12,500; and increased compensation payments by up to \$100 monthly. The year also saw the veteran population of the nation climb by more than 1,000,000 to a total of 26,314,000.

Major veterans legislation was passed in 1966 when all veterans who served in the Armed Forces after Jan. 31, 1955 (official termination of the Korean Conflict) were provided a permanent program of educational assistance and other benefits by the Veterans Readjustment Benefits Act of 1966. In 1967, with the U. S. Armed Forces serving in Vietnam, Congress responded to the President's request to provide war-time benefits to Vietnam veterans as well as increased benefits for older veterans. Public Law 90-77, the Veterans Pension and Readjustment Assistance Act of 1967, became fully effective Oct. 1, 1967.

One of the most popular provisions with young veterans was the increase in educational assistance allowances. The law provides that veterans of active duty in the Armed Forces for more than 180 days, any part of which was after Jan. 1 1955, are entitled to receive monthly educational allowances according to the following table:

Kind of training	Dependents			
	None	One	Two	Above 2*
School:				
Full-time....	\$130	\$155	\$175	\$10
¾ Time.....	95	115	135	7
½ Time.....	60	75	85	5
Cooperative..	105	115	145	7

*The amount in column for 2 plus the amount shown for each dependent.

Entitlement is on a basis of one month of schooling for each month of service, up to 36 months, or the equivalent in part-time education. Eligibility ceases at the end of 8 years from the date of the veteran's last release from active duty after Jan. 31, 1955. Entitlement is also extended to any person on active duty in the Armed Forces who has served for at least two years and continues on active duty.

Full-time training consists of 14 semester hours or the equivalent, three-quarter time consists of 10 to 13 semester hours, and half-time is 7 to 9 semester hours or the equivalent. A cooperative program is a full-time program of education consisting of institutional courses and alternate phases of training in a business or industry.

Full education assistance allowances were made available to "educationally disadvantaged" veterans so they can complete high school without reducing their eligibility for advanced educational benefits.

Also, monthly allowances for apprenticeships and on-the-job training have been provided. Payments range from \$80 a month for a single veteran to \$100 a month when there are two or more dependents. The allowances are reduced for succeeding six-month periods.

Monthly allowances for farm cooperative training cover institutional agricultural courses with a minimum of 12 clock hours per week in addition to related work on the farm. Allowances range from \$105 a month for the single veteran

to \$145 a month when there are two dependents, plus an additional \$7 a month for each additional dependent.

Flight training leading to a commercial license was added to educational benefits by the 1967 legislation which authorizes such training at approved flying schools only for veterans who have a private flying license or who have satisfactorily completed the required flying and ground school instruction for a private license. Allowances range from \$130 per month for single veterans in full programs to \$175 for those with two dependents plus \$10 per month for each additional dependent. Unlike ordinary classroom study, flight training allowances are based on cost. VA pays 90% of the ordinary costs of the training up to the limit of a veteran's total eligibility for educational assistance. For each \$130 a veteran receives for flight training assistance, his eligibility is charged one month.

Under the current law, eligible veterans and servicemen may obtain GI loans made by private lenders and guaranteed by the VA, for the purchase of homes or farms. In certain rural areas where ordinary lending facilities are not available, direct loans may be made by the VA for the purchase of homes and farmhouses. The effect of the Government's guarantee is intended to be to eliminate or reduce the amount of the down payment the lender normally requires. The VA may guarantee a home loan made by a private lender up to \$12,500 or 60% of the loan, whichever is less. The guarantee on a farm real estate loan other than to acquire a home may not exceed \$4,000 or 50% of the loan. Not more than \$2,000 or 50% of the loan may be guaranteed for non-real estate farm loans. GI loans bear interest not to exceed 6.75%. There is no maximum on the amount of a guaranteed loan, the only limit is on the amount of the guarantee. Direct loans made by the VA may not exceed \$17,500.

The law now provides complete hospital service for veterans with service-connected disabilities and care (if beds are available) to veterans of the Spanish-American War, World War I, World War II, and the Korean Conflict and all veterans since that time. Veterans with non-service-connected disabilities are admitted if a bed is available and if they are unable to defray the cost.

The law also provides civil service preference in Federal employment and extends to these veterans job counseling and employment placement service under the supervision of the U. S. Department of Labor.

Unemployment compensation is also administered by the U. S. Department of Labor through State Employment Service offices. The amount of the unemployment pay for which most veterans may become eligible depends upon the laws of the state in which the veteran lives.

Prior laws granted compensation to veterans who are disabled by injury or disease incurred in or aggravated by active service in the line of duty. Payments are based on the degree of disability.

Certain pension payments were increased by the 1967 legislation and various other benefits were also increased.

For the very seriously disabled veterans the VA may provide specially equipped automobiles, as well as prosthetic devices, and grants for the purchase or construction of "wheelchair homes."

(a) Payable only when serviceman authorizes deduction of a specified amount from his basic pay—\$40 to \$80 depending on grade.

BASIC ALLOWANCES FOR SUBSISTENCE

This allowance, the quarters allowance, and any other allowance are not subject to income tax. Officers—Subsistence (food) is paid to all officers regardless of rank.....\$47.88 per month

Enlisted members:

When rations in kind are not available \$2.57 per day
When permission is granted to mess off the base \$1.10 per day or \$33.00 per month
When assigned to duty under emergency conditions where no government messing facilities are available \$3.42 per day (maximum rate)

FAMILY SEPARATION ALLOWANCE

Under certain conditions of family separation of more than 30 days, members in Pay Grades E-4 (with over 4 years' service) and above will be allowed \$30 a month in addition to any other allowances to which he is entitled.

UNIFORM ALLOWANCE

Enlisted personnel receive an initial uniform allowance valued at \$164 to \$285, with variations between Services. After 6 months and up to the 36th month, a monthly maintenance allowance of \$4.20 is paid. After 36 months the monthly allowance varies between \$5.40 and \$6.00.

REENLISTMENT BONUS

Reenlistment bonuses are paid to enlisted personnel, ranging from \$400 for third reenlistment to \$820 for first reenlistment; maximum cumulative bonus \$2,000.

SPECIAL PAY

Members of the uniformed services entitled to receive basic pay shall, in addition thereto, be entitled to receive incentive pay for the performance of hazardous duty required by competent orders. The President may, in time of war, suspend the payment of incentive pay for the performance of any or all hazardous duty. Officers receive no additional pay for overseas or sea duty.

DUTY SUBJECT TO HOSTILE FIRE

Except in time of war declared by the Congress, a special pay of \$55 a month is allotted to any member of the Uniformed Services during any month in which he was subject to hostile fire.

MEDICAL AND DENTAL CORPS

Commissioned officers in the Medical, Dental and Veterinary Corps of the Regular Army, Navy and Air Force and commissioned medical, dental, and veterinary officers of the Regular Corps of the Public Health Service receive special pay based on cumulative years of service as follows: 0-2 years, \$100; 2 to 6 years, \$150; 6 to 10 years, \$250; over 10 years \$350. These rates are in addition to basic pay and allowance.

NEW DEFENSE DEPARTMENT PAY POLICY

The Defense Dept. announced June 21, 1965, a new policy under which military men in South Vietnam will be eligible for \$55 a month extra in combat pay. The new policy also made special combat pay available to men injured or wounded by hostile fire, explosion of enemy mines, or other hostile action in the Dominican Republic.

***Military Pay Scale**

A pay rise bill for the members of the armed forces was approved in 1967 by Congress and signed by the President. The bill provided for increases in 3 steps, first in Oct. 1, 1967, the second for July 1, 1968 (shown above) and the third April 1, 1969.

Selective Service System; Military Selective Service Act

Source: Selective Service System, Washington, D. C.

Legislation providing for Selective Service has been in effect continuously since 1948. The induction provisions of the Military Selective Service Act of 1967 were extended until July 1, 1971, by Act of Congress, June 30, 1967.

The Selective Service System registers, classifies, selects and delivers men for induction into the Armed Forces. Most of the needs of the services are met by enlistments. But it is generally recognized that most men who enlist do so in order to choose a time to serve and a service of their choice, as an alternative to later induction. The military services rely on the prospect of induction to prompt enlistments. The Selective Service System, by induction, supplies the balance required to meet service needs.

The System also aids in maintaining the strength and the stability of the Reserve and National Guard. Deferments are provided for continued satisfactory participation in these reserve programs. Sufficient satisfactory participation in the Ready Reserve qualifies a man for Class IV-A as having completed service under the Military Selective Service Act of 1967.

The draft of married men into the Armed Forces was delayed by Pres. Kennedy Sept. 10, 1963. The order changed the sequence of selection so that married non-fathers would be called only after all single men 19-26 had been called. Pres. Johnson on Aug. 26, 1965 changed the order of selection to place childless married men in the same draft classification as single men. This was necessary because the pool of single men was no longer ample to fill draft quotas to meet the increased needs of the Armed Forces.

STANDBY RESERVE

In addition to helping maintain the active and reserve forces, the Selective Service System has statutory responsibility for the selective recall of the nation's Standby Reserve when their recall to duty is authorized. The System must make and keep current a determination of which individual members of the Standby Reserve are available for recall and which should remain in the civilian economy because of occupations vital to the nation or because recall would result in extreme hardship to dependents. The System is thus responsible for the proper utilization of this segment of the manpower resource, numbering at this time 466,554 men and women as of June 30, 1968.

DEFERMENTS AND EXEMPTIONS

The law states that selection for service is to be accomplished in a manner "consistent with the maintenance of an effective national economy." The operation of the System has had the effect, through the prospect of deferment, of inducing men to prepare for, enter into, and remain in, civilian activities essential to national strength. The Act of 1967 provides for the deferment of persons satisfactorily pursuing a full-time course of instruction at a college, university, or similar institution of learning who request such deferment. Such deferment shall continue until the registrant completes the requirements of his baccalaureate degree, fails to pursue satisfactorily a full-time course of instruction, or attains the age of 24, whichever occurs first.

A registrant who has received a student deferment after July 1, 1967, and has been awarded a baccalaureate degree may not subsequently be classified in I-S (C) or III-A on the sole basis of fatherhood.

After Oct. 1, 1967, only graduate students pursuing medical studies or in other fields identified by the Director of Selective Service after receiving advice from the National Security Council may receive graduate student deferments. Students who entered their second or subsequent year of graduate school without interruption by Oct. 1, 1967 may be deferred for one additional year to earn a master's degree or not to exceed a total of five years to earn a doctorate or professional degree or one additional year whichever is greater.

Deferments also are provided for fathers, ex-

treme hardship to dependents, agricultural and industrial occupations, apprentices, some officials, sole surviving sons, some aliens, and for those physically, mentally, or morally not qualified for military service. Ministers and divinity students are exempted from service but not from registration.

INDUCTIONS

The number of men inducted since 1948 through June 1968 was 4,213,678 which included 108,632 for the Marine Corps and 30,092 for the Navy. Calls by month since January 1968 were: Jan. 34,000; Feb. 23,300; Mar. 41,000; Apr. 48,000; May 45,900; June 20,000; July 15,000; Aug. 18,300; Sept. 12,200; Oct. 13,300; Nov. 10,000.

Physicians, dentists and allied specialist categories are liable for service under the same conditions that apply to all registrants. The law gives the President authority to order these registrants to active duty involuntarily from the Reserve. It also provides that the Secretary of Defense may requisition registrants by specialty. The prospect of induction of these registrants on special calls influence them to apply for and accept reserve commissions. They are then ordered to two years of active duty as service needs dictate.

SEQUENCE OF SELECTION

Registrants are selected for induction in the following order: (1) Delinquents 19 and older with the oldest selected first; (2) Volunteers 17-25 in sequence in which they volunteer for induction; (3) Nonvolunteers 19-25 single or married after Aug. 26, 1965, with the oldest selected first; (4) Nonvolunteers 19-25 married on or before Aug. 26, 1965 with the oldest selected first; (5) Nonvolunteers 26 and older with the youngest selected first; (6) Nonvolunteers 18½ to 19 with the oldest selected first.

CLASSIFICATION

The registrant is placed by the local board in one of the following classes:

Class I-A: Available for military service.

Class I-A-O: Conscientious objector available for non-combatant military service only.

Class I-C: Member of the Armed Forces of the United States, Environmental Science Services Administration, or the Public Health Service.

Class I-D: Member of reserve component or student studying military training.

Class I-O: Conscientious objector available for civilian work contributing to the maintenance of the national health, safety, or interest.

Class I-S: Student deferred by law until graduation from high school or attainment of age of 20, or until end of his academic year at a college or university.

Class I-W: Conscientious objector performing civilian work contributing to the maintenance of the national health, safety, or interest, or who has completed such work.

Class I-Y: Registrant qualified for military service only in time of war or national emergency.

Class II-A: Registrant deferred because of civilian occupation (except agriculture and activity in study).

Class II-C: Registrant deferred because of agricultural occupation.

Class II-S: Registrant deferred because of activity in study.

Class III-A: Registrant with a child or children; and registrant deferred by reason of extreme hardship to dependents.

Class IV-A: Registrant who has completed service; sole surviving son.

Class IV-B: Officials deferred by law.

Class IV-C: Aliens not currently liable for military service.

Class IV-D: Ministers of religion or divinity students.

Class IV-F: Registrant not qualified for any military service.

Class V-A: Registrant over the age of liability for military service.

SELECTIVE SERVICE SYSTEM

The Selective Service System has a National Headquarters at 1724 F Street N. W., Washington, D. C. 20435; a state hq. in each state and similar hq. for New York City, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, and the Panama Canal Zone—a total of 56. Approximately 4,000 local draft boards of 3 or more unpaid civilians, function one in each county except in sparsely populated areas, or in heavily populated urban areas. An appeal board is situated in each Federal judicial district.

VITAL STATISTICS

Source: Division of Vital Statistics, National Center for Health Statistics, Public Health Service
U. S. Dept. of Health, Education & Welfare

First Half-Year, January-June 1968

BIRTHS

The birth rate and the fertility rate continued to decline during the first half of 1968. Live births during the 6 months totaled 1,645,000, a decrease of 71,000 from the figure for the corresponding 6 months in 1967. The fertility rate for the first half of 1968 was 84.4 births per 1,000 women aged 15-44, or 4% below the rate of 88.4 for the first half of 1967.

MARRIAGES

An estimated 951,000 marriages were performed in the first half of 1968 or 78,000 more than during the corresponding period in 1967. During June 1968 the marriage rate was 15.7 per 1,000 population, compared with 14.7 for June 1967.

DIVORCES

The January-June 1968 divorce total for 40 reporting areas was about 208,000, nearly 8% more than were granted for the same period in 1967.

DEATHS

The death rate for the first half of 1968 was 3.2% higher than the corresponding rate for 1967, due to the relatively high death rates recorded in January and February of 1968.

For the first 6 months of 1968 the infant mortality rate for each month has been lower than the rate observed in the corresponding months of 1967. Cumulatively for this period the 1968 rate was 22.2 per 1,000 live births, a drop of 3.1% from the rate of 22.9 recorded in 1967.

PROVISIONAL STATISTICS

12 Months Ending with June 1968

	Number		Rate	
	1968	1967	1968	1967
Live births	3,465,000	3,582,000	17.4	18.2
Marriages	1,990,000	1,870,000	10.0	9.5
Deaths	1,891,000	1,844,000	9.5	9.4
Infant deaths	75,600	81,700	21.8	22.8
Population base (in millions)			199.0	196.9

Annual Report for the Year 1967

Provisional Statistics

With only minute changes the general trends observed for several years past continued in 1967. The birth rate decreased by less than 1% for the 10th consecutive year. The marriage rate showed its 5th annual increase. The death rate was .1% upward. The divorce rate was the highest since 1949.

BIRTHS

The birth and fertility rates continued to decline from their most recent peaks, which were reached in 1957. In 1967 the birth rate was 17.9 births per 1,000 population, and the fertility rate was 87.8 births per 1,000 women 15-44 years of age.

The current decline in fertility (which began in the late 1950's) has been brought about in part by changes in the age pattern of child-bearing. Women who are now 25 years of age are having relatively low birth rates because they had unusually high birth rates when they were younger. At the same time, women who are now under 25 years of age are having relatively low birth rates because they are apparently delaying some births until they are a little older. Also, these younger women may have fewer children altogether than did women who began their families in the late 1940's and the 1950's.

MARRIAGE AND DIVORCE

The number of men and women in the United States who marry each year has increased substantially and without interruption since 1962. Not since the close of World War II have marriages reached the current figure of 1,913,000, and not since the end of the Korean Conflict has the marriage rate reached its present level of 9.7 marriages per 1,000 population. The magnitude of the marriage boom is indicated by annual increases in marriages between 1962 and 1967 which have averaged 65,000, well above average annual increases in marriages for any other 5-year period since World War II.

Although marriages have increased both in absolute numbers and in proportion to the total population since 1962, only about 1 of every 14 women of eligible age married during 1967 as compared to 1 of every 8 in 1946. High postwar birth rates resulting in current large numbers of young people of marriageable age are the key factor affecting the upward swing in the number of marriages. Is it likely that there will be a continuing high level of marriages through 1970.

An estimated 534,000 decrees of divorce or annulment were granted in the United States in 1967. Compared with an estimated 494,000 for 1966, this is an increase of 40,000, or 8.0%; the increase in divorce between 1965 and 1966 was only 2.7%. The divorce rate per 1,000 population also increased from 2.5 in 1966 to 2.7 in 1967. The rate for 1967 is the highest national divorce rate since 1949.

DEATHS

An estimated 1,852,000 deaths occurred in the United States in 1967. This provisional rate is higher than the final rate of 951 deaths per 100,000 for 1966. In turn the final rate for 1966 was higher than that for 1965 (943 deaths per 100,000).

Rank	Causes of death	Death rate deaths	% of
1	All causes	936.0	100.0
1	Diseases of heart	366.2	39.1
2	Malignant neoplasms	159.0	17.0
3	Vascular lesions	102.6	11.0
4	Accidents	55.1	5.9
5	Influenza and pneumonia	28.5	3.0
6	Certain diseases of early infancy	24.1	2.6
7	General arteriosclerosis	19.0	2.0
8	Diabetes mellitus	17.4	1.9
9	Diseases of circulatory system	15.3	1.6
10	Other bronchopulmonary diseases	14.8	1.6
	All other causes	134.0	14.3

Diseases of Heart—The death rate for diseases of heart (the leading cause of death) decreased from 371.2 per 100,000 population in 1966 to an estimated 366.2 in 1967, a reduction of about 1½%.

Malignant Neoplasms—The death rate for Malignant neoplasms continued to increase, reaching a high of 159.0 per 100,000 population in 1967. This was mainly due to increases in the rates for Malignant neoplasms of respiratory system and Malignant neoplasms of other and unspecified sites.

Accidents—The death rate for Accidents was 5% lower in 1967 than in 1966. This reduction was almost entirely due to a decrease in the death rate for Accidents exclusive of motor vehicle accidents while the rate for Motor vehicle accidents remained approximately the same.

Influenza and Pneumonia—The death rate for Pneumonia, except pneumonia of newborn, reached its lowest point in more than a decade in 1967, falling to a rate of 27.8 per 100,000 population. The death rate for Influenza, 50% lower than in 1966, was also at its lowest point in several years.

Other Diseases of Circulatory System—While the death rate for Diseases of heart showed a slight decline in 1967, the rate for Other diseases of the circulatory system evidenced an increase of almost 5% over 1966. About 40% of the total number of deaths in this category were attributed to its largest component, Aortic aneurysm, non-syphilitic, and dissecting aneurysm.

Certain Diseases of Early Infancy—The death rate for Certain diseases of early infancy decreased from 26.4 per 100,000 population in 1966 to an estimate 24.1 in 1967, a reduction of about 8.7%. This decrease can be only partially explained by the fact that the birth rate is declining since the birth rate fell only 2.7% during the same period.

Other Bronchopulmonary Diseases—The death rate for Other bronchopulmonary diseases continued its slow but steady rise, reaching an all time high of 14.8 deaths per 100,000 population in 1967. This was an increase of 2.1% over the rate observed in 1966. Emphysema without mention of bronchitis, the major component, accounted for about 70% of the 1967 deaths in this category.

Births and Deaths by States

BIRTHS AND DEATHS IN THE UNITED STATES

Data refer only to events occurring within the United States, including Alaska beginning in 1959 and Hawaii in 1960. Excludes fetal deaths. Rates per 1,000 population enumerated as of April 1 for 1940, 1950, and 1960; estimated as of July 1 for all other years. ¹Births based on a 50 percent sample.

Year	Births			Rate	Deaths			Rate
	Males	Females	Totals		Males	Females	Totals	
1940.....	1,211,684	1,148,715	2,360,399	17.9	791,003	626,266	1,417,269	10.8

ACCIDENTAL INJURIES BY SEVERITY OF INJURY

1967 Severity of injury	Total*	Motor vehicle	Work	Home	Public Non-motor vehicle
All injuries	10,900,000	1,950,000	2,200,000	4,350,000	2,500,000
Deaths	112,000	53,100	14,200	28,500	20,000
Nonfatal injuries	10,800,000	1,900,000	2,200,000	4,300,000	2,500,000
Permanent impairments	400,000	160,000	90,000	110,000	60,000
Temporary total disabilities	10,400,000	1,750,000	2,100,000	4,200,000	2,450,000

CERTAIN COSTS OF ACCIDENTAL INJURIES, 1967

	Total	Motor vehicle	Work	Home	Public Non-motor vehicle
Wages lost	\$13,000,000,000	\$7,300,000,000	\$3,200,000,000	\$1,500,000,000	\$1,200,000,000
Medical expense	6,000,000,000	2,700,000,000	1,500,000,000	1,000,000,000	950,000,000
Overhead cost of insurance	2,200,000,000	700,000,000	800,000,000	500,000,000	250,000,000
	4,800,000,000	3,900,000,000	900,000,000	10,000,000	10,000,000

*Duplications between motor-vehicle, work and home are eliminated in total.

Marriage Information

Source: Compiled by William E. Mariano: Council on Marriage Relations, Inc.,
110 East 42 St., New York, N. Y. 10017 (as of Oct. 15, 1968)

Marriageable age, by states, for both males and females with and without consent of parents or guardians. But in most states, the court has authority in an emergency, to marry young couples below the ordinary age of consent, where due regard for their morals and welfare so requires.

State	With consent		Without consent		Blood test		Wait for license	Wait after license

(a) Special laws applicable to non-residents. (b) Special laws applicable to those under 21 years; Alabama—bond required if male is under 21, female under 18. (c) 24 hours if one or both parties resident of state; 96 hours if both parties are non-residents. (d) None, but male must file affidavit. (e) Parental consent plus Court's consent required. (f) None, but a medical certificate is required. (g) Wait for license from time blood test is taken; Arizona, 48 hours. (h) Marriage may not be solemnized within 3 days from date of blood test. (i) If either under 21: Idaho, 3 days; Oklahoma, 72 hrs.

Wedding Anniversaries

The traditional names for wedding anniversaries go back many years in social usage. As such names as wooden, crystal, silver and golden were applied it was considered proper to present the married pair with gifts made of these products or of something related. While the list of permissible gifts is extensive, gifts are most appropriate when retaining a suggestion of the originals. Thus the wooden anniversary may call for anything of wood, including furniture, but as the years mount the gifts become more valuable until the 60th or diamond anniversary, calls for diamonds. The traditional list follows, with a few allowable revisions in parentheses.

1st—Paper	6th—Iron	11th—Steel	20th—China	45th—Sapphire
2nd—Cotton	7th—Wool, copper	12th—Silk	25th—Silver	50th—Gold
3rd—Leather	8th—Bronze	13th—Lace	30th—Pearl	55th—Emerald
4th—Linen, (silk)	9th—Pottery, (china)	14th—Ivory	35th—Coral	60th—Diamond
5th—Wood	10th—Tin, (aluminum)	15th—Crystal	40th—Ruby	

Birth Stones

Source: Retail Jewelers of America, Inc.

Month	Ancient	Modern	Month	Ancient	Modern	Month	Ancient	Modern
January	Garnet.....	Garnet	May.....	Agate.....	Emerald	September	Chrysolite	Sapphire
February	Amethyst.....	Amethyst	June.....	Emerald	Pearl, Moonstone or Alexandrite	October..	Aquamarine	Opal or Tourmaline
March.....	Jasper.....	Bloodstone or Aquamarine	July.....	Onyx.....	Ruby	November	Topaz.....	Opal
April.....	Sapphire.....	Diamond	August..	Carnelian	Sardonyx or Peridot	December	Ruby.....	Turquoise or Zircon

The term precious stones actually applies only to diamonds, rubies, sapphires and emeralds. All others are semiprecious. Precious gems are minerals brought to perfection by the lapidary's art. The pearl, often a gem of great value, is not a precious stone.

Grounds for Divorce

Source: Compiled by William E. Mariano: Council on Marriage Relations, Inc., 110 East 42nd Street, New York 17, N. Y. Persons contemplating divorce should study latest decisions or secure legal advice before initiating proceedings since different interpretations or exceptions in each case can change the conclusion reached. Some states apply statutes strictly, others are more lenient.

*Exceptions are to be noted. †Determined by court order. *No minimum residence required in adultery cases.

A—Violence. B—Indignities. C—Loathsome disease. D—Joining religious order disbelieving in marriage. E—Unchaste behavior. F—Criminal character. G—Incompatibility. H—Any gross misbehavior or wickedness. I—Wife being a prostitute. J—Husband being a vagrant. K—5 years insanity; exceptions: 18 months Alaska; 2 years Georgia, Nevada, Oregon, Washington and Wyoming; 3 years Arkansas, California, Colorado, Kansas, Hawaii, Maryland, Mississippi; 6 years Idaho. M—Consanguinity. N—In cruelty cases, one year to remarry. O—Plaintiff, six months; defendant, two years to remarry. P—If guilty spouse is sentenced to infamous punishment. Q—Crime against nature. R—Sixty days to remarry. S—One year to remarry; Hawaii; one year with minor child. T—Six months to remarry; in Kansas 30 days. U—Adultery cases, remarriage in discretion of Court. W—Separation for three years after decree for same. In Alabama four years. In Minnesota two years and Wisconsin five years. X—Separation no cohabitation—five years. Exceptions: Louisiana, Virginia, Wyoming and New York (under agreement) two years; Texas 3 years and Rhode Island 10 years. Y—Separation no cohabitation—three years. Exception: North Carolina, one year if caused by criminal act of defendant. Dist. of Columbia and Nevada, one year; Maryland, 18 mos. Washington, two years. Z—Separation for two years after decree for same. District of Columbia and Louisiana one year. AA—Mental incapacity at time of marriage. BB—Procurement of out-of-state divorce. CC—Gross neglect of duty. DD—Bigamy. EE—Attempted homicide. FF—Plaintiff under age at time of marriage.

The plaintiff can invariably remarry in the same State where he or she procured a decree of divorce for annulment. Not so the defendant, who is barred, in certain States for some offenses. After a period of time has elapsed even the offender can apply for special permission.

The U. S. Supreme Court in a 5 to 4 opinion, ruled April 18, 1949, that one-sided quick divorces could be challenged as illegal if notice of the action was not served on the divorced partner within the divorcing States, excepting where the partner was represented at the proceedings.

Enoch Arden Laws. Disappearance and unknown to be alive—Connecticut 7 years absence; New Hampshire, 2 years; New York, 5 years (called dissolution); Vermont, 7 years.

Blue Cross Plans are local non-profit organizations that provide hospital service to members. Enrollment as of Dec. 31, 1967 constituted 33.1% of the population of the United States served by Blue Cross and 26.7% of the seven provinces served by the four Canadian Plans. During 1967, Blue Cross paid \$3.5 billion to hospitals for 13-500,000 hospital admissions and outpatient visits and 58,100,000 days of care. This amount represents 90% of total earned income, the remainder being devoted to operating expenses (5.4% of total income); 4.6% was added to reserves.

Blue Cross Plans provide services for periods ranging from 21 to 730 days at full benefits, plus occasionally a period of partial benefits ranging from 30 to 245 days. All plans provide board and room, general nursing care, use of operating and delivery rooms, routine laboratory service, routine drugs and medications, routine dressings and

casts. Many of the plans cover the following services in varying degrees: special diets, emergency room care, anesthesia, X-Ray, electrocardiograms, basal metabolism tests, physical therapy, oxygen therapy, pathology, special drugs and medications, and other hospital services.

Members of one Plan moving into the area of another Plan usually must transfer their membership. A reciprocal program, the Inter-Plan Service Benefits Bank, supplemented by schedules of benefits in non-member hospitals, assures receipt of care in any recognized general hospital in the world. Health Service, Incorporated, a Blue Cross-owned stock company, provides a means for enrollment of employees of national firms. Medical and surgical care are available through non-profit prepayment Plans, most of which are known as Blue Shield Plans.

Blue Shield Plans offer prepaid coverage for medical-surgical expenses. They are nonprofit in operation and are approved by local medical societies or physician communities. Total underwritten enrollment consisted of 29.3% of the population of the United States served by the 72 U. S. Blue Shield Plans on March 31, 1968.

Canadian enrollment consisted of 26.5% of the population served by the 9 Canadian Blue Shield Plans. The underwritten enrollment of the Blue Shield Plan in Puerto Rico amounted to 5.5% of the population. During the first quarter of 1968, Blue Shield paid \$411,758,702 for medical care of Blue Shield members. This amount represented 87.7% of total income, 9.5% was devoted to operating expense and 2.8% was added to reserves.

Blue Shield Plans provide paid-in-full, service and indemnity benefits. Paid-in-full programs provide benefits without any income limitations. Service programs provide paid-in-full benefits, providing the subscriber is within certain income

limitations. On the average, income limits are \$6,000 for individuals and \$7,500 for families. When the member's annual income exceeds the income limits, payments are made as indemnities toward the cost of covered services. Indemnity benefits provide cash allowances toward the cost of services.

Basic Blue Shield benefits include medical service, surgical and obstetrical care, laboratory examinations, radiology and anesthesia. In addition, many Plans provide coverage for medical examinations, assistant surgeons' fees, and consultants' services. New benefit areas such as prescription drugs, home and office care, dental care and others have been implemented by some Plans and are being widely studied by others.

Members of one Plan moving into the area of another must usually transfer their membership. The majority of Blue Shield Plans are coordinated with Blue Cross Plans.

Health Insurance Coverage by Insurance Companies

Source: Health Insurance Institute, New York, N. Y.

At the beginning of 1968 insurance companies writing health insurance policies in the U. S. provided hospital expense protection to a net total of 100,298,000 persons. At the beginning of 1967, there were 1,045 companies writing these policies. Many of these companies were licensed to operate in all 50 states and the District of Columbia, some were licensed to operate in several states, and a few were licensed in only one state. In 1940, they covered some 3,700,000 persons with hospital insurance.

There have been significant increases in four other types of health insurance provided by insurance companies—surgical expense insurance, regular medical expense insurance, major medical expense insurance, and loss of income insurance. As of Dec. 31, 1967, insurance companies provided protection against the cost of surgery to 93,618,000 persons, compared with 2,280,000 in 1940. Coverage under regular medical insurance, which pays for doctor's calls and other non-surgical care by doctors, was held by 64,604,000 persons at the end of 1967 compared with 200,000 in 1944, the first

year insurance companies offered regular medical expense protection. Major medical expense insurance, which normally provides benefits of \$10,000 or more to pay for virtually all types of medical services, covered 62,226,000 persons at the end of 1967, compared with 108,000 in 1951, the first year major medical insurance was introduced nationally. Disability income insurance, which replaces income lost as a result of sickness or injury, protected through insurance company policies a total of 43,512,000 workers at the close of 1967 compared with 14,369,000 in 1946.

In 1967 insurance companies paid out \$6,629,000,000 in health insurance benefits. This total included \$1,211,000 in loss of income benefit payments.

The Health Insurance Council in its 22nd annual survey of the extent of voluntary health insurance coverage in the United States, reported that at the end of 1967 insurance companies, Blue Cross-Blue Shield and other health care plans, provided hospital insurance to 162,853,000 persons and paid out \$11,037,000 in benefits.

Baby Colors—Blue for boys. Pink for girls.

Estimated Number of Illegitimate Births

Source: Division of Statistics, Natl. Center for Health Statistics, U. S. Dept. H.E.W.

Ratio Per 1,000 Unmarried Women

	1965 ¹	1964 ¹	1960 ¹	1950	1940
15-44 years ² (total)	23.5	23.0	21.6	14.1	7.1
15-44 " (white)	11.6	11.0	9.2	6.1	3.6
15-44 " (non-white)	97.6	97.2	98.3	71.2	35.6

¹Based on a 50% sample of births. ²Rates computed by relating total births, regardless of age of mother, to women, 15-44.

Only 34 states and the District of Columbia currently report illegitimacy. Among the nonreporting states are New York, California and Massachusetts, together account for 21% of all births in 1964. To obtain national estimates all states are grouped into geographic divisions. The ratio per 1,000 of illegitimate births reported for each division is then assumed to be the same for nonreporting states.

1964 State	Total	White	Negro	Other	1964 State	Total	White	Negro	Other

*Provisional data. †Net release alive from hospital is defined as the excess number of patients released alive from the hospital over those returning to the hospital from all leave statuses. National data on placements and returns from extramural care are not available but net releases may be computed from less detailed movement data as: Net Live Releases = Resident Patients beginning of year - Admissions, minus Deaths in Hospitals, minus Resident Patients end of year. †For 1966, only data on first admissions and resident patients collected. ‡This is the number of first admissions (admissions with no prior psychiatric experience) reported by 152 of 174 hospitals. §As of December 31, 1966. ¶Includes clinics of the Veterans Administration. ¶Patients on the books of the clinics. ¶Patients terminated from the clinic rolls.

**Rates are the number of deaths per 100,000,000 passenger miles. ¹(NSC estimate) Pilots and other crew members are considered passengers for general aviation only.

Federal Bureau of Investigation

The Federal Bureau of Investigation (FBI) is an activity of the Department of Justice, and is located at 9th St. and Pennsylvania Ave., Washington, D. C. It investigates all violations of Federal laws except those specifically assigned to some other agency by legislative action, such violations including counterfeiting, and internal revenue, postal and customs violations. It also investigates espionage, sabotage, treason and other matters affecting internal security, as well as kidnapping, transportation of stolen goods across state lines, interstate traffic in prostitution and violations of the Federal bank and atomic energy laws.

The FBI collects and classifies police and crime reports for the nation. The Identification Division had 129,154,682 fingerprint cards on file Sept. 1, 1967. While this division is of great usefulness in detecting criminals, it serves a wider purpose in recording the fingerprints of many other citizens who voluntarily make this record.

The FBI has 58 field divisions in the principal cities of the country. Consult telephone directories for location and phone numbers.

An applicant for the position of Special Agent of the FBI must be at least 23 and under 41 years old

and graduate of a state-accredited resident law school or from a resident four-year college with a major in accounting with at least three years of practical accounting and/or auditing experience. An agent gets 14 weeks of training, during which he learns techniques of investigation and arrest and recognition of evidence.

J. Edgar Hoover has been director since 1924. He was born in Washington, D. C. in 1895, and was graduated from George Washington U. in 1916.

21% Increase in Crime in U. S. Reported in 1968

The Federal Bureau of Investigation's Uniform Crime Reports have disclosed that crime in United States cities, suburbs and rural areas increased an average of 21% during the first 6 months of 1968 when compared to the corresponding period of 1967.

Crimes of violence increased 21% as a group, with individual increases of 29% in robbery, 17% in murder, 14% in aggravated assault and 15% in forcible rape, according to the crime reports voluntarily submitted to the FBI by law enforcement agencies throughout the country.

In crimes against property, which as a group increased 20%, auto theft was up 24%, burglary 17% and larceny \$50 and over 23% in the 6 months, the FBI said.

All cities when grouped by population size reported increases ranging from 17% in cities under 10,000 population to 24% in cities 250,000 to 500,000 inhabitants. The increase was 21% in suburban areas and rural areas reported a jump of 14%. The upward trend was consistent for all geographic areas of the country, according to the reports.

Secret Service Protects Major National Candidates

United States Secret Service protection was extended to all major Presidential and Vice Presidential candidates by legislation passed by Congress and signed by President Johnson June 6, 1968. The Secret Service, an agency of the Treasury Dept., protects the President and members of his immediate family, the President-elect, the Vice President and the Vice President-elect. The Service is also authorized to protect a former President and his wife during his lifetime and the person of a widow and minor children of a former President.

The Secret Service detects and arrests persons committing any offense against U. S. laws relating to coins, obligations and securities of the U. S. and foreign governments.

During fiscal 1968 the Service arrested

1,370 persons for violating the counterfeiting laws and recovered more than \$13,000,000 in counterfeit currency, an all-time high in both categories. The loss to the public amounted to over \$2,860,000. Coin counterfeiting in the U. S. increased from \$15,000 in fiscal 1967 to about \$26,000 in fiscal 1968.

Forged Government-check cases investigated by the Service during fiscal 1968 numbered 52,667 and involved an amount of more than \$5,500,000. A total of 2,422 persons were arrested for Government-check violations.

The Service also investigated 11,505 cases involving the forgery and fraudulent negotiation of U. S. Savings Bonds having a value at maturity of \$1,242,000. The Service made 146 arrests in connection with these crimes.

INTERPOL (International Criminal Police Organization)

The United States is one of 101 countries that are members of INTERPOL, the International Criminal Police Organization. United States participation in INTERPOL was authorized by Congress in 1958. Because of the Treasury Dept.'s activities in the suppression of counterfeiting, smuggling and the narcotics traffic, all of which have international ramifications, that department was designated as U. S. representative to INTERPOL.

Each member nation has one vote at a general assembly of INTERPOL held annually at a site chosen by the delegates at the previous year's assembly. The chairman of the U. S. delegation attending such meetings is the Special Assistant to the Secretary of the Treasury (for Enforcement).

INTERPOL dates from 1914, but World War I brought suspension of all its activities until 1923. The organization's first constitution was drawn up in that year. Files on international criminals were built up gradually to a point where their value to the police of member nations became apparent. During World War II the files disappeared from Vienna, where the General Secretariat of INTERPOL was located.

The organization was reconstituted at the end of World War II. The General

Secretariat was moved to Paris and is now located in the Parisian suburb of Saint-Cloud. Information concerning thousands of international criminals is received there, sorted and disseminated to INTERPOL National Central Bureaus in the member countries. Besides handling voluminous mail, the General Secretariat receives and transmits over 118,000 messages a year over its radio network.

INTERPOL does not employ any investigators as such. The General Secretariat refers inquiries to the appropriate National Central Bureau. Also, the National Central Bureaus correspond between themselves and send copies of their correspondence to the Secretary General in Paris.

In the United States all inquiries, both incoming and outgoing, are channeled through the National Central Bureau in Washington. Investigations required in this country are conducted by the U. S. Secret Service, Customs Agency Service, and Internal Revenue Service, all agencies of the Treasury Dept. Frequently, also, inquiries are referred by the National Central Bureau at Washington to police and other enforcement agencies on the municipal, county, state and Federal levels for investigation.

Police Roster

Police officers and civilian employees in large cities as of Jan. 1, 1968

City	Officers	Civilian	City	Officers	Civilian	City	Officers	Civilian
New York	27,462	2,643	Cleveland	2,199	270	Houston	1,436	294

Building Fire Losses By Causes

Source: National Fire Protection Assn. Copyright 1968

These are estimated figures intended to show the relative order of magnitude of fire losses by cause. These figures by themselves do not show the relative safety in utilization of various types of materials, devices, fuels or services. They are approximations based on experience in typical states.

1967	Number of fires	Losses
Heating and cooking	128,600	\$127,000,000
Equipment, defective or overheated	69,200	\$73,300,000
Chimneys, flues defective or overheated	23,300	17,200,000
Hot ashes and coals	7,700	8,500,000
Combustibles near heaters	28,400	28,000,000
Smoking and matches	160,100	75,300,000
Electrical	144,600	193,600,000
Fixed services, fires due to wiring, equipment, etc.	87,400	135,300,000
Power-consuming appliances	57,200	58,300,000
Rubbish, source of ignition unknown	23,800	16,300,000
Flammable liquid fires and explosions not reported in heating and cooking	51,300	59,400,000
Open flames and sparks	65,500	95,700,000
Sparks on roof	2,900	1,600,000
Welding and cutting	5,800	16,500,000
Sparks from machinery, friction	11,100	12,200,000
Thawing pipes	3,200	5,100,000
Miscellaneous open flames and sparks	42,500	60,300,000
Lighting	21,100	30,600,000
Children and matches	84,000	59,700,000
Exposure	22,200	33,800,000
Incendiar, suspicious	44,100	141,700,000
Spontaneous ignition	18,100	27,200,000
Gas fires and explosions not reported in heating and cooking	7,500	17,000,000
Explosions, miscellaneous and unclassified	6,000	24,500,000
Fireworks, firecrackers and rockets	3,000	1,400,000
Miscellaneous known causes	56,900	88,900,000
Unknown or undetermined	124,100	630,900,000
Totals	960,900	\$1,623,000,000

Weighted calendar year prices for livestock and livestock products other than wool, 1943 through 1963, wool prices are weighted on marketing year basis. *Weighted crop year prices. Crop years are as follows: Apples, June-May; wheat, oats, barley, hay and potatoes, July-June; cotton, rice, peanuts and cottonseed, August-July; soybeans, September-August; and corn and sorghum grain, October-September. Prices for apples are quoted in cents per pound beginning in 1959. Quoted prior as dollars per bushel (48 lbs.).

¹Includes artichokes, asparagus, barley, beans (dry edible), beans (lima), beans (snap), beets, broccoli, brussels sprouts, cabbage, cabbage (sauerkraut), carrots, cauliflower, celery, fennel (all), corn (broom), corn (sweet), cotton, cowpeas (for peas), cucumbers, eggplant, escarole, flaxseed, garlic, hay (all), kale, lettuce, melons (all, incl. cantaloupes, honeydews, muskmelons, and watermelons), oats, onions, peas (dry field), peas (green), peanuts (harvested for nuts), peppers (green), potatoes (sweet), potatoes (white), rice, rye, shallots, sorghums (for grain), sorghums (for forage and silage), soybeans (for beans), spinach, sugar beets, sugarcane (all), sweetclover seed, timothy seed, tobacco, tomatoes, and wheat (spring and winter).

Alfalfa seed, red clover seed and Lespedeza seed are included in the count of crops; partially duplicated in acreage.

Better Wheat Seed Available to Midwest Farmers

Purdue University has announced that seed of a new soft red winter wheat, yielding 6 bushels an acre more than the next best variety of this pastry flour grain, will be available to Midwest farmers in the Fall of 1969. Development of the new wheat, named Arthur after the first head of Purdue's botany and plant pathology department, took over 35 years of research and breeding.

Recommended Daily Dietary Allowances

Source: Home and Garden Bulletin No. 72, U. S. Department of Agriculture

The Recommended Daily Dietary Allowances are amounts of nutrients recommended by the Food and Nutrition Board of the National Research Council as adequate for maintenance of good nutrition in healthy persons in the U. S. Calorie allowances apply to persons engaged in moderate physical activity; they are excessive for persons in sedentary occupation.

Person	Age in years	Weight in pounds	Height in inches	Food energy (calories)	Protein (grams)	Calcium (grams)	Iron (milligrams)	Vitamin A (int'l units)	Thiamin (milligrams)	Riboflavin (milligrams)	Niacin (milligrams)	Ascorbic acid (milligrams)	Vitamin D (int'l units)

¹Excludes Alaska, Hawaii, Territories and possessions.²Includes regular mortgages, purchase-money mortgages, and sales contracts.³Direct farm loans only. Includes farm-purchase, farm-enlargement, farm-development and loans primarily for refinancing purposes, project-liquidation, rural-housing (excludes nonfarm), and soil and water loans to individuals, and loans for these purposes from State Corporation trust funds.⁴Estimates based on direct reports from life insurance companies and official reports submitted to State insurance commissioners. Includes legal reserve companies only and regular mortgages, purchase-money mortgages, and unpaid principal sales contracts. Beginning 1965, excludes sales contracts.⁵All operating banks. Includes bank holdings of soil and water loans and farm-ownership loans insured by the Farmers Home Administration.⁶The amounts shown are residuals or differences between the amounts reported by institutional lenders and the estimates of total farm-mortgage debt. They may be taken as a rough measure of the farm-mortgage debt held by individuals and other nonreporting lenders.

Fire Season on Forest Lands

Source: Forest Service, U. S. Dept. of Agriculture (As of Sept. 30, 1968)

Periods of above normal fire danger in some far western areas during 1968 increased the total National Forest protection area burned to above that of the previous year.

Arizona and New Mexico National Forests experienced a very severe fire season for the 2nd year in a row, with losses in excess of 40,000 acres—more than twice the five-year average. In the Northwest, warm, dry weather produced high fire dangers during July and early Aug., then eased abruptly in mid-August with the advent of unseasonably wet weather, but not before nearly 50,000 acres had burned in the National Forests across Washington, Oregon, Idaho, and Montana. Serious problems developed early in California, with a fire in June which blackened more than 50,000 acres on the Angeles National Forest and adjacent areas, and continued into the Fall. Fire losses generally were near or below normal in the rest of the country.

The National Forest protected area burned in 1968 through September 30, totaled approximately 205,000 acres. In 1967, losses for the same period amounted to 182,000 acres, and for the full year, 204,000 acres.

Forest Fires in 1967

On all Federal, State and private forest lands during 1967 a total of 125,025 fires were reported, an increase of 2,525 over the 122,500 fires reported during 1966. Acreage burned on all lands totalled 4,658,586 acres, an increase of 84,197 acres above the 4,574,389 acres burned over in 1966.

Through carelessness or incendiaryism, man continues to cause the largest portion of all forest fires. During 1967, 103,427 fires or 91% of the 113,762 fires reported as having burned on protected lands, were man-caused. Lightning caused 10,335 fires or 9% of the total protected area fires. Causes of the 11,263 fires which occurred on unprotected land are unknown.

More than 479,000,000 acres of State and private forest land are protected under the Federal-State Cooperative Fire Control Program. The area qualifying for protec-

tion under this program is now in excess of 517,000,000 acres. The goal of the cooperative program is to bring protection to the nearly 38,000,000 acres not now receiving protection. All States participate in the Cooperative Forest Fire Protection effort.

National Forest System

Administered by the Forest Service, U.S. Dept. of Agriculture, the National Forest System is made up of 154 National Forests, 19 National Grasslands, and other minor acreages which total 186,799,021 acres in 45 States, Puerto Rico, and the Virgin Islands. All lands within the National Forest System are managed under two guiding principles: multiple use—the management of lands to make each area yield the combination of uses best suited to public needs; and sustained yield—maintenance of a continuous supply of all forest resources through wise use, management, and protection.

National Forest lands which supply water for agriculture, industry, recreation, and domestic use, for example, also are managed to prevent erosion and help control floods, yet there also may be camping, skiing, and timber harvesting on the same land.

The scenic beauty and recreation opportunities available on National Forests yearly draw millions of Americans to these lands to hunt, fish, camp, picnic, boat, swim, hike, ski, and to make pack trips into the wilderness. Use reached 150 million visitor days during calendar year 1967.

Record State & Private Protected Lands:

Conservation Concept Needs Broader Definition in Modern Day

In the light of the growing threat of air and water pollution, officials of the U. S. Department of Agriculture believe that most current dictionaries carry wholly inadequate definitions of the word "conservation." The conservation movement sprang directly from the forest movement in the United States, in large measure under the leadership of Gifford Pinchot (1865-1964), American forestry expert and pioneering chief of the Division of Forestry (now the Forest Service of the Dept. of Agriculture). Pinchot is credited with being

among the first to realize that the use and misuse of all natural resources are interdependent, that conservation of these natural resources is essential to the national and individual welfare. He was the originator of the present-day concept of conservation—"the use of the earth for the good of man"—which he and President Theodore Roosevelt planted on the American scene. The original concept was broadened by Secy. of Agriculture Orville L. Freeman, who stressed in 1966 the need for "the conservation of man's total environment."

Animals in Natural Settings in U. S. Zoos

Source: Edward R. Ricciuti, Curator Publications & Public Relations, N. Y. Zoological Society

Not far from the Bronx Zoo's famed "African Plains," a roughly circular building, massive but gracefully simple and clean in architecture, unfailingly provokes comment and expectant glances from zoo visitors. This is the "World of Darkness," scheduled for opening in spring 1969. In recent years probably no other zoo exhibits complex has created such widespread public interest before opening.

The World of Darkness is an exhibits building centered on a key zoological fact: that many—if not the majority—of the Earth's higher animals are most active after dark.

In this and in other respects the World of Darkness represents a challenging concept of zoo exhibition that has taken hold in the nation's leading zoos. These zoos are no longer places where the citizen goes merely to stare at wild animals enclosed in barren cages. True, the animals are still there. So are many cages, which present views obstructed by steel bars and wire. But the bars and wire are going the way of the cigar-store Indian. They are as foreign to modern zoo planning as the birch switch is to contemporary education.

The best zoos are no longer content to present animals in a vacuum. Instead, the new type of zoo exhibit is aimed at teaching man about the relationship between animals and the rest of nature. This means presenting animals in their natural environment and building exhibits around important scientific principles.

Instead of the "Big Cat Building," today's zoo planners are more likely to conceive an "African Forest," or a "Life in the Marsh" exhibit. Zoos around the United States are striving to present animals in natural settings so like the wild that visitors will be able to appreciate the animal in the context of its environment.

During the year, for example, the Bronx Zoo (October) opened a large North American outdoor exhibit where polar bears and Kodiak bears—world's largest living land carnivores—roam a landscaped panorama and live in dens hewn out of natural rock. There are no bars—only moats separate visitor and bear.

A series of exhibits at the Milwaukee Zoo illustrates the relationship of predator and prey. Lions range what appear to be the same African savannahs as zebras. Jaguars, great spotted cats of the New World, seem to share the same landscape with inoffensive tapirs. Tigers prowl with deer browsing not far away. Actually prey and predator are separated by moats, but these are hidden from public view.

At the San Diego zoo, visitors readily can appreciate how various wild sheep have adapted to a mountainous environment. These agile creatures live in an exhibit on a rocky hillside, that for its appearance could be in a wilderness half a world away from crowded southern California. Also in San Diego, aardvarks are to be seen in a natural-appearing tunnel exhibit, and visitors may walk through vast cages where brilliant tropical birds fly about.

The reptile house at Brookfield Zoo has several exhibits that illustrate the various ecological niches occupied by different animals. Brookfield's reptile house has several "mixed exhibits"—each containing a group of animals interested in different kinds of living quarters.

Several species of tropical birds live in a swamp exhibit with different reptiles, including green iguanas and a pair of boa constrictors. Cotton-top marmosets—small monkeys—scamper about the treetops in this exhibit.

Ultimately, this type of zoo exhibit is aimed at interpreting the living world of nature for zoo visitors, especially urban dwellers who seldom if ever chance to see vast stretches of forest, unmarred seashore, or silent deserts. Zoos have a new sense of mission in this regard for, zoo professionals believe, when man begins to understand the place of living creatures in nature, humanity will better understand man's own position in the natural scheme of things.

At the same time, particularly since the nation's major zoos are in or near large cities, zoo planners design their exhibit areas so that these will improve the quality of urban living.

The need for more sophisticated exhibits has brought a new kind of specialist into the zoological park field. This is the professional trained in graphic arts. A forerunner in promoting this field was the Arizona-Sonora Desert Museum, really more like a zoo than a museum. The Bronx Zoo in 1964 established a Department of Exhibition and Graphic Arts. Since then Chicago's Brookfield Zoo and the Philadelphia Zoo have created similar departments. Other zoos are using consultants or are planning similar departments.

To educate and entertain, modern zoo exhibits depend on a variety of media: graphics, electronics, and the printed word. Inside the Bronx Zoo's Aquatic Birds Building visitors look out over a wild beach, listen to the sound of surf upon shore, and watch shore birds skitter along the water's edge picking up morsels of food. A "wave machine" sends ripples through the water. Better yet, the only thing between visitors and birds is air. There are no bars, not even glass, in this exhibit.

A graphic display on the wall opposite the seashore exhibits tells visitors where they can see shore birds within a 2-hour drive of Manhattan—while around the corner other graphics detail the biology of flight.

By combining the talents of the exhibits specialists with those of zoologists (many of whom have had to become part-time exhibit designers) modern zoos are helping man to understand his world.

Outside of the exhibits field, of course, there were many important developments in United States zoos during the year. Here are some of these, taken from the pages of *ANIMAL KINGDOM*, national magazine of zoos and aquariums published by the New York Zoological Society:

—Twin orangutans were born in February at Seattle's Woodland Park Zoo.

—The Woodland Park Zoo also obtained five sea otters from an expedition sent to Amchitka Island in the Aleutians.

—The Bronx Zoo added a third takin to its collection, the only group of these rare animals in the western world. These shaggy, horned "goat-antelopes" are native to southern Asia.

—Snow leopard cubs—two of them—were born at the Oklahoma City Zoo, offspring of that zoo's female, "Tanya," and the Bronx Zoo's "Bowser II."

—The Philadelphia Zoo put the first zoo monorail into operation (scheduled for fall). The monorail, traveling some 15 feet above ground, takes visitors on a 15-minute tour of the zoo.

—A black rhinoceros was born at Oklahoma City Zoo in May.

—Twenty-two reticulated pythons, first of their kind from zoo-bred animals in the United States, were hatched at the Bronx Zoo from eggs produced in February.

Aquariums

Killer whales, so-called "wolves of the sea," were to be attractions at several of the nation's aquariums during the year. These huge sea mammals were scheduled for appearance at the New York Aquarium, the Seattle Marine Aquarium, ABC Marine World, Marineland of the Pacific, Sea World, and the Miami Seaquarium.

The Seattle aquarium supplied a 5,800-pound female killer whale, "Lupa," to the New York Aquarium. Lupa was airlifted cross country by jet freighter. During the trip she was cradled in a sling-like stretcher suspended within the aircraft. A battery-operated pump sprayed cold water over the whale during the flight.

The whale was hauled from the John F. Kennedy International Airport to the New York Aquarium, Coney Island, on a flatbed truck. A huge crane lifted the 18-foot-long sea mammal into her exhibit pool.

An aquarium—the New England Aquarium—was opened at Boston's Central Wharf, overlooking Boston Harbor.

This large new institution is operated by the New England Aquarium Corporation. Construction began in 1965. The aquarium has a large variety of marine animals on display in well-designed settings.

A Collection of Animal Collectives

The English language boasts an abundance of nouns used to describe groups of things, particularly pairs or aggregations of animals. Some of these words have fallen into comparative disuse, but many of them are still in service, helping to enrich the vocabularies of those who like their language to be precise, who tire of hearing a group referred to as "a bunch of," or who enjoy the sound of words that aren't overworked.

Here is a lexicon of some of these "collectives":

band of gorillas	exaltation of larks	pair of horses
bed of clams, oysters	flight of birds	pod of whales, seals
bey of quail, swans	flock of sheep, geese	pride of lions
brace of ducks	gaggle of geese	school of fish
brood of chicks	gam of whales	sedge or siege of cranes, bitterns
cast of hawks	gang of elk	shoal of fish, pilchards
cete of badgers	grist of bees	skain of geese
charm of goldfinches	herd of curlews, elephants, etc.	skulk of foxes
chattering of choughs	hive of bees	slueth of bears
cloud of gnats	horde of gnats	sunder of boars, swine
clowder of cats	husk of hares	span of mules
clutch of chicks	kindle or kindle of kittens	spring of teal
clutter of cats	leap of leopards	swarm of bees
colony of ants	leash of greyhounds, foxes	team of ducks, horses
congregation of plovers	bitter of pigs	tribe of goats
covert of coots	murder of crows	troop of kangaroos, monkeys
covey of quail, partridge	muster of peacocks	volery of birds
down of hares	mute of hounds	watch of nightingales
draught of fish	nest of vipers	wing of plovers
drift of swine	nest, nide or nye of pheasants	yoke of oxen
drove of cattle, sheep	pack of hounds, wolves	

Gestation, Longevity and Incubation

Note: The figures on gestation, incubation and longevity given below are averages based on estimates by leading authorities. The potential life span of mammals is rarely attained in nature. The longevity figures for wild animals listed below were based on experience with such animals in zoos.

Animal	Gestation (days)	Longevity (years)	Animal	Gestation (days)	Longevity (years)	Animal	Gestation (days)	Longevity (years)
Ass	365	24	Elephant	645	47	Pig	112	14
Baboon	187	27	Elk	250	22	Puma	90	11
Badger	60	15	Fox	52	8	Rabbit	37	5
Bat		6	Giraffe	425	10	Rhinoceros	450	27
Bear			Goat (dom.)	151		Sea Lion	350	19
Black	219	19	Goat (mntn.)	184	9	Sheep	154	13
Grizzly	225	31	Gorilla	257	25	Squirrel	44	8
Polar	240	31	Guinea Pig	68	4	Tiger	105	19
Beaver	122	13	Horse	330	27	Whale	365	37
Buffalo	278	20	Kangaroo	42	19	Wolf	63	12
Camel	406	20	Leopard	98	17	Zebra	365	20
Cat (domestic)	63	15	Lion	100	15-29	Incubation Time		
Chimpanzee	231	30	Monkey	164	7	Chicken	21	
Chipmunk	31	7	Moose	240	8	Duck	30	
Cow	284	18	Meadow	21	4	Goose	30	
Deer	201	17	Opossum	14-17	4	Pigeon	18	
Dog	61	16				Turkey	26	

Things Looking Up for the Whooping Crane

The successful hatching at the Patuxent Wildlife Research Center, Laurel, Md., in 1968 of all the whooping crane eggs taken from the Canadian wilds late in May was hailed by Secy. of the Interior Stewart L. Udall as a "major success in man's battle to preserve this rare bird."

The only known flock of wild whooping cranes has its winter home at the Aransas National Wildlife Refuge in Texas. In 1938, when the official count began, only 18 were known to exist. By 1941, the number returning to Aransas for the winter had dropped to 15. Then conservation efforts turned the tide, and a new record number of 48 left Aransas in 1968 for summer nesting grounds near the Arctic

Circle. In addition, there are at least 22 cranes in captivity, bringing the total to around 70.

The 1968 egg-hunting expedition to the nesting grounds near the Arctic Circle was staged by the Canadian Wildlife Service and the Interior Dept.'s Bureau of Sport Fisheries and Wildlife. Nine whooper eggs and one newly hatched whooper were removed from nests. Four young whoopers had been raised successfully at Patuxent from the first egg-hunting expedition, a year earlier.

A baby whooper being raised at Patuxent was hatched successfully in 1967 by a mating pair at the San Antonio Zoo, the only breeding adult whoopers in captivity.

†Estimates for Alaska & Hawaii included in the United States totals beginning with 1961.

‡The total estimated value on farms as of Jan. 1, 1967 was as follows (average value per head in parentheses): All cattle \$16,183,380,000 (\$149); milk cows \$3,679,000,000 (\$251); stock sheep \$367,407,000 (\$19.20); hogs \$1,610,510,000 (\$29.70); chickens \$466,598,000 (\$1.10); turkeys \$34,121,000 (\$4.68).

Fish and Game Regulations

All 50 States, D.C., and 10 Canadian Provinces

Compiled by the World Almanac from official state and province sources

These regulations are the latest available for this edition of the World Almanac and indicate what the sportsman may expect to find. Because of possible changes, local exceptions and additional details, copies of current regulations should be obtained from the agencies listed below with each state. Some states have fish or game possession limits which further restrict daily limits. Some have special licenses for juveniles and others. Some require training in safe handling of firearms.

Seasons and bag limits on migratory game birds (ducks, geese, woodcock, etc.) are set by the U. S. Secretary of the Interior; some states have additional restrictions. Persons 16 and over must have a \$3 Federal Duck Stamp (obtainable at post offices) to hunt migratory waterfowl, in addition to a state license. Details are obtainable from state offices (shown below) and the U. S. Fish & Wildlife Service, Washington, D.C. 20240. In Canada, migratory bird regulations are set by the Canadian Wildlife Service, Dept. of Northern Affairs and Natural Resources, Ottawa.

ALABAMA

FISH: Res. lic. \$2.15; non-res. \$5, 7-days \$2. No closed season, no size lim. Daily lim. varies 3-50.

GAME: Res. \$3 (state) or \$1 (county); non-res. \$25.15, 7-days \$10.15, small game \$7.15. Deer: opens early Nov. for 1 mo. in some areas, 2 in others; antlered bucks only 1 day. Turkey: early Nov.-early Jan., Mar. 20-Apr. 25, some counties; Mar. 20-Apr. 25 only, in others; 1 gobbler a day, 5 per season. Raccoon, opossum, Oct. 15-Feb. 28, no limit. Fox, beaver, bobcat, no lim., no closed seas. Details: Dept. of Conservation, Game & Fish Div., Montgomery, 36104.

ALASKA

FISH: Res. lic. \$5; non-res. \$10. Open season year 'round, with local exceptions. Freshwater daily lim. 10 in some areas, 15 in others, exceptions. Saltwater, no bag limits, some exceptions.

GAME: Res. \$7; non-res. \$10; plus non-res. big game tags \$10 to \$150 each. Big game seasons open Aug. or Sept., run for several months, some exceptions. Bag limits: moose 1; deer 4 most areas; caribou no closed season, no lim. most areas; elk 1; mt. goat 2; mt. sheep 1; brown or grizzly bear 1; black bear 3; polar bear 1; wolf, wolverine, no lim. most areas; fur animals, no lim. most areas; small game, 5-20 daily; walrus, no closed seas, no lim., some areas (1 adult bull for non-res.); seals, sea lion, porpoise, beluga, no closed seas, no lim. Details: Dept. of Fish and Game, Subport Bldg., Juneau 99801.

ARIZONA

FISH: Res. lic. \$3 plus \$2 for trout; non-res. \$9 plus \$6 for trout, 5-days \$3 plus \$2; other, special licenses. No closed season. No daily lims. except black bass 10; striped bass 3; trout, salmon, grayling, total 10; catfish 25, some exceptions.

GAME: Res. \$5, fish-game \$9; non-res. \$20, fish-game \$25, arch. \$15. Plus big game tags. Deer: 1 per yr.; guns, 2 wks. in Nov.; arch., 2 wks. in Sept. Elk, antelope: 1 each in 3 yrs. Buffalo (res. only), bighorn: 1 each in lifetime. Turkey: 9 days in Oct., 1 only. Quail: Oct. and Dec.-Jan., 15 daily. Details: Game & Fish Dept., Ariz. State Bldg., Phoenix 85007.

ARKANSAS

FISH: Res. lic. \$3.50; non-res. \$6, 14-days \$3.50. No closed seas. Daily lim.: trout, walleye, sauger, 6; black bass 10; crappie 20; catfish 10; white bass 25; bream, sunfish, perch 50; pickerel 6; total 75 game fish daily.

GAME: Res. \$3.50; non-res. \$20, including deer and turkey \$30. Turkey: gun and arch., part of Oct.; 2 gobblers per year. Deer: gun, 6 days in Nov., 6 in Dec., arch., Oct. 1-Jan. 31, 1 per period, 2 yr. yr. Squirrel, rabbit, Oct. 1-Oct. 31, 8 each daily. Quail: Dec. 1-mid Feb., 8 daily. Details: Game & Fish Commission, Little Rock 72201.

CALIFORNIA

FISH: Res. lic. \$3; non-res. \$10, 10-days \$3. 3-days ocean, \$1. Plus stamp inland, \$1. Most freshwater, no closed seas, with exceptions; daily lims. on most fish. Trout: south, all year; rest, May-Nov.; daily lims. 10 summer, 5 winter. Saltwater: some lims., seasons.

GAME: Res. \$4, deer tag \$2; non-res. \$25, deer tag \$10. Plus bear tag \$1; pheasant tags, \$2. Deer: early seas. some areas, part Aug.-part Sept.; late, other areas, part Sept.-Oct., some areas 1, some 2 bucks per yr. Bear, late Sept.-early Jan., 2 per seas. Pheasant: mostly late Nov.-early Dec., 2 male daily, 10 per seas. Quail: most areas Nov.-Jan., 10 daily. Details: Dept. of Fish & Game, 1416 9th St., Sacramento 95814.

COLORADO

FISH: Res. lic. \$6; non-res. \$10, 10-days \$5. No closed seas, no min. length, except some areas. Trout: min. lengths some waters; 6 daily, some areas 10. Pike: 6 daily. Bass: 10 daily. Crappie, white bass, etc. 30 daily.

GAME: Res. (deer, elk, small game, bear, mtn. lion, fish) \$30; non-res. (same group) \$135, small game \$15 (some single lic. for single game). Big game seas, opens 3rd Sat. in Oct. Details: Game, Fish & Parks Dept., 6060 Broadway, Denver 80216.

CONNECTICUT

FISH: Res. lic. \$4.35; non-res. \$6.35, 3-days \$1.85. Most streams, mid Apr.-Oct. 31: trout, kokanee, char, 8 daily, no more than 5 trout or char; black bass, pickerel, no lim.; northern pike, min. 20", 6 daily. Lakes and ponds mostly mid Apr.-late Feb. Trout, northern pike, same as streams; pickerel, min. 15", 6 daily; black bass, min. 12", 6 daily.

GAME: Res. \$4.35, non-res. \$11.35; fish-game res. \$6.35, non-res. \$15.35; arch.-deer \$5.35. Deer: Nov.-Dec.; arch., 1 per seas.; farmland, shotgun or arch., 1 per permit, 2 per seas., Dec. Pheasant, ruffed grouse: late Oct.-early Dec., 2 daily, 10 seas. Gray squirrel: late Oct.-early Jan., 8 daily, 40 seas.; cottontail, same seas.; 3 daily, 25 seas. Quail: late Oct.-early Nov., 2 daily, 10 seas. Details: Board of Fisheries & Game, State Office Bldg., Hartford 06115.

DELAWARE

FISH: Res. lic. \$2.20, trout stamp \$2.10; non-res., \$7.50, trout stamp \$2.10. No closed seas, min. lengths or daily lims., some exceptions. Trout: mid Apr.-mid Nov., 4 daily. Bass: min. 10", 6 daily, no closed season.

GAME: Res. \$3.20; non-res. \$20. Deer: shotgun; New Castle Co., 2 days Nov., Kent and Sussex Cos., 5 days Nov., 3 days Jan., lim. 1 per season; longbow, Sept. 15-early Nov. Pheasant: usually late Nov.-early Jan., 2 males daily. Generally, daily lims. are 4 animals and 8 local game birds. Board of Game & Fish Commissioners, Dover 19901.

DISTRICT OF COLUMBIA

FISH: No restrictions, except prohibited in some waters. Details: Chief, Metropolitan Police, Washington, D. C. 20001.

GAME: Hunting forbidden.

FLORIDA

Time of Tides at Points on Pacific Coast

Source: Coast and Geodetic Survey, Environmental Science Services Administration

See also Tides and Their Causes on Page 294

The chart below can be used to approximate the time of high or low tide at stations listed by adding or subtracting the mean time difference shown on the chart from the times shown in the tide tables for San Francisco. San Francisco is a semi-diurnal station (two highs and two low tides per day), as are most of the other stations shown. However, at a few of these stations the tide becomes diurnal on occasion (one high and one low tide per day); on such occasions it is not possible to make a correct prediction by referring times to San Francisco.

Harvest Moon and Hunter's Moon

The Harvest Moon, the full moon nearest to the Autumnal equinox, ushers in a period of several successive days when the moon rises soon after sunset. This phenomenon gives farmers in north temperate latitudes extra hours of light in which

to harvest their crops before frost and winter come—hence the name. In 1969 it falls on Sept. 25.

The next full moon after Harvest Moon is called the Hunter's Moon, accompanied by a similar phenomenon but less marked.

1968 World Series Box Scores

The Detroit Tigers became world baseball champions by defeating the St. Louis Cardinals in the 1968 World Series, 4 games to 3. Led by left-hander Mickey Lolich, who won 3 games in the series, the Tigers were forced to win the final three games after falling behind, 3 games to 1. Lolich, by starting, finishing and winning 3 games in one World Series duplicated the feat performed one year earlier by Bob Gibson of the Cardinals.

Receipts since 1948 do not include fees for radio and television rights. This revenue customarily goes to players' pension fund. *Attendance record. **Receipts record for 4-game Series.

How Players Shared 1968 World Series Money

From the player pool of the 1968 World Series (derived from receipts of the first 4 games only), members of the winning Detroit Tigers received \$10,936.66 each and the losing St. Louis Cardinals got \$7,078.71 each. Both winners' and losers' shares were far below the World Series records—\$12,794 each for the winning Los Angeles Dodgers in 1963 and \$8,189 each for the losing Dodgers in 1966.

17 Records Broken, 35 Tied in 1968 World Series

INDIVIDUAL RECORDS BROKEN

Most home runs, pitcher as batter, total Series—2, Bob Gibson, St. Louis.
 Fewest hits, Series, 0, Dal Maxvill, St. Louis, 22 at bats.
 Most games won, consecutive, total Series—7, Gibson.
 Most complete games won, consecutive, total Series—7, Gibson.
 Most complete games, consecutive, total Series—8, Gibson.
 Most strikeouts, game—17, Gibson, Oct. 2.
 Most strikeouts, Series—35, Gibson.
 Most putouts, catcher, Series—61, Tim McCarver, St. Louis.
 Fewest putouts, first baseman, game—1, Orlando Cepeda, St. Louis, Oct. 2.

INDIVIDUAL RECORDS TIED

Hitting home run, first Series at bat—Mickey Lolich, Detroit, Oct. 3.
 Most hits, Series—13, Lou Brock, St. Louis.
 Most total bases, Series—24, Brock.
 Most long hits, Series—6, Lou Brock.
 Hitting in each game—Brock.
 Fewest runs scored, Series—0, Bill Freehan, Detroit.
 Fewest bases on balls, Series—0, Al Kaline, Detroit.
 Most stolen bases, total Series—14, Brock.
 Most stolen bases, Series—7, Brock.
 Most stolen bases, game—3, Brock, Oct. 5.
 Home run, bases full, game—Jim Northrup, Detroit, Oct. 9.
 Most RBI, inning—4, Northrup, 3d inning, Oct. 9.
 Most hits, inning—2, Al Kaline and Norm Cash, Detroit, 3d inning, Oct. 9.
 Most runs scored, inning—2, Dick McAuliffe, Mickey Stanley and Kaline, Detroit, 3d inning, Oct. 9.
 Most at bats, inning—2, Stanley, Kaline, Cash and Northrup, 3d inning, Oct. 9.
 Most bases on balls, inning—2, McAuliffe, 3d inning, Oct. 9.
 Most games won, Series—3, Mickey Lolich, Detroit.

Most games won, no losses, Series—3, Lolich.
 Most games lost, Series—2, Dennis McLain, Detroit.
 Most complete games, Series—3, Gibson, Lolich.
 Most innings, one or more strikeouts, game, 9, Gibson, Oct. 2.
 Most chances, catcher, game, 18, McCarver, Oct. 2.
 Most chances, catcher, inning—3, McCarver, 2d inning and 8th inning, Oct. 2.
 Most putouts, shortstop, inning—3, Stanley, 6th inning, Oct. 10.

CLUB RECORDS BROKEN

Most strikeouts, club, game—17, Detroit, Oct. 2.
 Most strikeouts, club, Series—59, Detroit.
 Most strikeouts, both clubs, Series—99 (Detroit 59 vs. St. Louis 40).
 Most batsmen hit by pitch club, game—3, Detroit by St. Louis, Oct. 9.
 Fewest two-base hits, both clubs, Series—11 (Detroit 4 vs. St. Louis 7).
 Fewest sacrifice hits, both clubs, Series—3 (St. Louis 1 vs. Detroit 2).
 Fewest assists, club, Series—48, St. Louis.
 Fewest assists, club, game—2, St. Louis, Oct. 2.

CLUB RECORDS TIED

Most home runs, by pitchers as batters, Series—2 (St. Louis 1 vs. Detroit 1).
 Most strikeouts, both clubs, inning—5 (Detroit 3 vs. St. Louis 2, 2d inning, Oct. 2).
 Most pinch-hitters, club, inning—3, St. Louis, 8th inning, Oct. 7.
 Most three-base hits, both clubs, Series—6 (Detroit 3 vs. St. Louis 3).
 Fewest two-base hits, club, Series—4, Detroit.
 Fewest stolen bases, club, Series—0, Detroit.
 Fewest sacrifice hits, club, Series—1, St. Louis.
 Most runs scored, inning—10, Detroit, 3d inning, Oct. 9.
 Most batsmen facing pitcher, inning—15, Detroit, 3d inning, Oct. 9.
 Most RBI, inning—10, Detroit, 3d inning, Oct. 9.
 Most pitchers used, inning—4, St. Louis, 3d inning, Oct. 9.

All-time Major League Record (154-game Season)—60—Babe Ruth, New York Yankees (A.), 1927. (162-game Season)—61—Roger Maris, New York Yankees, 1961. Prior to the 1931 season, a batted ball that bounced into the stands was a home run (now a ground-rule double). None of Babe Ruth's record 60 homers bounced into the stands.

1968—Sept. 18.....	Ray Washburn	St. Louis-San Francisco N	2-0

(1) Perfect game and first World Series no-hitter. (2) Pitched 12 perfect innings. He allowed one hit in the 13th and lost the game. (3) Lost game on two errors in ninth inning. (4) Perfect game. (5) Maloney pitched ten hitless innings, then allowed two hits in the eleventh. Struck out eighteen batters. (6) Ten innings. (7) Barber pitched 8½ innings, Miller ½ of an inning. Detroit scored two 9th-inning runs on a wild pitch and an error.

Leading Pitchers—Earned-Run Average

Based on 10 complete games through 1950 then 154 innings until A. L. expanded in '61, N. L. in '62, then 162 innings. Bob Gibson of the Cardinals set NL record in 1968 with a 1.12 ERA.

 Exhibition Game—93,103—Game honoring Roy Campanella; New York Yankees vs. Los Angeles Dodgers, Los Angeles Coliseum, May 7, 1959.

1968 All-Major League Baseball Team

The following is the second annual All-Players All-Star Baseball Team as selected by the players of both leagues in a poll conducted by Newspaper Enterprise Assn. Players could not vote for members of their own team.

Name	Team	Votes	Name	Team	Votes
First Base			Catcher		
Willie McCovey, San Francisco (NL)		264	Matty Alou, Pittsburgh (NL)		44
Rusty Staub, Houston (NL)		84	Billy Williams, Chicago (NL)		39
Ernie Banks, Chicago (NL)		76	Tony Oliva, Minnesota (AL)		34
Boog Powell, Baltimore (AL)		76	Henry Aaron, Atlanta (NL)		27
Orlando Cepeda, St. Louis (NL)		17	Carl Yastrzemski, Boston (AL)		26
Mickey Mantle, New York (AL)		3	Lou Brock, St. Louis (NL)		21
Second Base			Willie Mays, San Francisco (NL)		19
Tommy Helms, Cincinnati (NL)		187	Bobby Bonds, San Francisco (NL)		9
Rod Carew, Minnesota (AL)		96	Alex Johnson, Cincinnati (NL)		3
Glenn Beckert, Chicago (NL)		74	Rick Monday, Oakland (AL)		2
Dick McAuliffe, Detroit (AL)		69	Joe Pepitone, New York (AL)		2
Mike Andrews, Boston (AL)		55	Reggie Smith, Boston (AL)		1
Ken Boswell, New York (NL)		20	Roberto Clemente, Pittsburgh (NL)		1
Bill Mazeroski, Pittsburgh (NL)		19	Del Unser, Washington (AL)		1
Felix Millan, Atlanta (NL)		7	Jose Tartabull, Boston (AL)		1
Cookie Rojas, Philadelphia (NL)		5	Starting Pitcher		
Julian Javier, St. Louis (NL)		4	Bill Freehan, Detroit (AL)		174
Third Base			John Bench, Cincinnati (NL)		126
Brooks Robinson, Baltimore (AL)		171	Tom Haller, Los Angeles (NL)		95
Ron Santo, Chicago (NL)		162	Tim McCarver, St. Louis (NL)		74
Mike Shannon, St. Louis (NL)		58	Joe Torre, Atlanta (NL)		62
Tony Perez, Cincinnati (NL)		43	Jerry Grote, New York (NL)		15
Richie Allen, Philadelphia (NL)		18	Joe Azcue, Cleveland (AL)		9
Mauri Wills, Pittsburgh (NL)		14	Mike Ryan, Philadelphia (NL)		4
Jim Hart, San Francisco (NL)		12	Relief Pitcher		
Bobby Cox, New York (AL)		11	Denny McLain, Detroit (AL)		164
Ed Charles, New York (NL)		3	Bob Gibson, St. Louis (NL)		150
Ron Clark, Minnesota (AL)		2	Juan Marichal, San Francisco (NL)		132
Shortstop			Jerry Koosman, New York (NL)		9
Jim Fregosi, California (AL)		156	Don Drysdale, Los Angeles (NL)		6
Luis Aparicio, Chicago (AL)		101	Luis Tiant, Cleveland (AL)		4
Don Kessinger, Chicago (NL)		32	Outfield		
Gene Alie, Pittsburgh (NL)		16	Curt Flood, St. Louis (NL)		242
Campy Campaneris, Oakland (AL)		11	Pete Rose, Cincinnati (NL)		214
Dal Maxvill, St. Louis (NL)		7	Ken Harrelson, Boston (AL)		190
Rico Petrocelli, Boston (AL)		2	Frank Howard, Washington (AL)		132
Zoilo Versalles, Los Angeles (NL)		2	Willie Horton, Detroit (AL)		60

Cy Young Award Winners

1966—Don Newcombe, Dodgers	1961—Whitey Ford, Yankees	1966—Sandy Koufax, Dodgers
1957—Warren Spahn, Braves	1962—Don Drysdale, Dodgers	1967—(NL) Mike McCormick, Giants
1958—Bob Turley, Yankees	1963—Sandy Koufax, Dodgers	(AL) Jim Lonborg, Red Sox
1959—Early Wynn, White Sox	1964—Dean Chance, Angels	1968—(NL) Bob Gibson, Cardinals
1960—Vernon Law, Pirates	1965—Sandy Koufax, Dodgers	(AL) Dennis McLain, Tigers

1968 Little League World Series

The 22nd annual Little League World Series was won by Wakayama (Japan) as they defeated Richmond (Virginia) by the score of 1-0 on Aug. 24, 1968, at Williamsport, Pa. This was the second straight year that a Japanese team won the Little League title. West Tokyo was the winner in 1967.

Minor League Player of the Year

Toila (Tony) Solaita, 20, a native of Samoa, has been named Minor League Player of the Year for 1968. A lefthanded hitting first baseman, Solaita batted .302 and hit 49 home runs for High Point-Thomasville in the Carolina League before being called up by the New York

Yankees late in the season. He received the Topps Award and the J.G. Taylor Spink Memorial Award. For his selection as the outstanding player in his league he also received a George M. Trautman Memorial Plaque.

Record of All-Star Baseball Games, 1933-1968

All-Star games are played annually by teams composed of players from the American and National Leagues. Formerly the teams were selected by a nationwide poll of fans, but beginning in 1958 the procedure was changed to one in which the players, coaches and managers make the selections. From the receipts of the game, plus radio and television receipts of the world series, \$4,100,000 goes into the players' pension fund. The game was not played in 1945.

Game	Year	Winner	Score	Location	Game	Year	Winner	Score	Location

Jim Hunter Pitches a Perfect Game

Jim (Catfish) Hunter of the Oakland Athletics became the 10th pitcher in baseball history to hurl a perfect game when he retired all 27 Minnesota Twin batters at Oakland, Calif., on May 8, 1968. The game was witnessed by 6,298 spectators. A list of perfect game hurlers since 1880 follows:

Year	Pitcher	Club	Date	Score
1880.....	John L. Richmond.....	Worcester vs. Cleveland (N.).....	June 12.....	1—0
	John M. Ward.....	Providence vs. Buffalo (N.).....	June 17.....	5—0
1904.....	Denton T. Young.....	Boston vs. Philadelphia (A.).....	May 5.....	3—0
1908.....	Adrian C. Joss.....	Cleveland vs. Chicago (A.).....	Oct. 2.....	1—0
1912.....	Ernest C. Shore.....	Boston vs. Washington (A.).....	June 23.....	4—0
1956.....	Donald J. Larsen.....	Chicago vs. Detroit (A.).....	April 30.....	2—0
1964.....	James P. Bunning.....	New York (A.) vs. Brooklyn (N.).....	Oct. 8.....	2—0
1965.....	Sanford Koufax.....	Philadelphia vs. New York (N.).....	June 21.....	6—0
1968.....	Jim Hunter.....	Los Angeles vs. Chicago (A.).....	Sept. 9.....	1—0
		Oakland vs. Minnesota (A.).....	May 8.....	4—0

*Babe Ruth, the starting pitcher, was banished from the game after walking the first batter. That batter was caught stealing and Shore retired the next 26 batters.

†World Series game.

Queen's Plate

The Queen's Plate (known as King's Plate during reign of male), Canada's most famous thoroughbred race, is the oldest continuously run stakes race in North America. Originated in 1860 over 1 1/4 miles (now 1 1/2 miles) for 3-year-olds, Canadian-foaled, race is staged under Royal tutelage for trophy and 50 gold sovereigns plus purse. Trophy is not a plate but a foot-high gold cup valued at \$5,000. However, race is identified as a plate race because of 17th Century English tradition of awarding plates.

(A) This race was won by Dancer's Image, who was disqualified after chemical tests disclosed he had run with a pain-killing drug, phenyltolazone, in his system. All wagers were paid on Dancer's Image and the winning time is for that horse.

The Kentucky Derby has been won five times by one jockey—Eddie Arcaro, 1938, 1941, 1945, 1948 and 1952; four times by Bill Hartack, 1957, 1960, 1962 and 1964; and three times by each of three jockeys—Isaac Murphy, 1884, 1890 and 1891; Earle Sande, 1923, 1925 and 1930, and Willie Shoemaker, 1955, 1958, 1965. *Regret only filly ever to win the Derby.

12 Gauge—John R. and Sallie H. Durbin, 499 x 500.
20 Gauge—John R. and Sallie H. Durbin, 197 x 200.
28 Gauge—Fred and Esther Schmitt, Peoria, Ill., 191 x 200.
410 Gauge—John R. and Sallie H. Durbin, 187 x 200.

CHAMPION OF CHAMPIONS

Champion, 4 guns, 25 Targets each—James W. Austin, Honolulu, Hawaii, 100 x 100.

Junior—Doug Bedwell, Brazil, Ind., 199x200
Industry—Lee Davidson, Tipp City, O., 200x200
Veterans—Oz Conrad, Stillwater, Minn., 97x100
Husband & Wife—Ed and Mary Beranek, Strongsville, O., 392x400
Parent & Child—Gene and Garland Sears, El Reno, Okla., 394x400
Brothers—Fred and Tony Vasaturo, Staten Island & Brooklyn, N. Y., 396x400

Champion of Champions

Men—Mark Huff, Minot, N. D., 100x100
Women—Nadine Ljutic, Yakima, Wash., 99x100
Junior—W. David Iseley, Gaston, Ind., 100x100
Zone—Southwestern, 989x1000

Doubles Championships

Men—Hugh Driggs, Palmyra, Mich., 100x100
Women—Marian Harrison, Los Angeles, 92x100
Juniors—Jim Burke, Los Alamitos, Calif., 98x100
Veterans—Walter Johnson, Inglewood, Calif., 94x100
Industry—Walt Langhorst, Salt Lake City, Utah, 98x100

Vandalia Handicap

Men—Pete Kennedy, Cranston, R. I., 99x100
Women—Linda Goachee, Ft. Myers, Fla., 98x100
Juniors—Robert Green, Flint, Mich., 97x100
Veterans—George Tony, Indianapolis, 94x100
Industry—Lee Davidson, Tipp City, O., 95x100

High Over-All

Men—Hugh Driggs, Palmyra, Mich., 985x1000
Women—Loral I. Delaney, Anoka, Minn., 949x1000
Junior—Doug Bedwell, Brazil, Ind., 980x1000
Veteran—J. O. Bates, Ft. Worth, Tex., 963x1000
Industry—Lee Davidson, Tipp City, O., 971x1000
All-Around—Hugh Driggs, 395x 400

NEA All-America Team, 1968

The following is the 1968 college All-America team selected for Newspaper Enterprise Assn. by the 12 NBA coaches and their talent scouts.

Name	First Team School
Lew Alcindor, UCLA	
Elvin Hayes, Houston	
Pete Maravich, LSU	
Don May, Dayton	
Westley Unsel, Louisville	

Name	Second Team School
Larry Miller, North Carolina	
Calvin Murphy, Niagara	
Jo Jo White, Kansas	
Bob Lanier, St. Bonaventure	
Don Smith, Iowa State	

SPECIAL MENTION

Lucius Allen, UCLA; Mike Lewis, Duke; Butch Beard, Louisville; Henry Logan, Western Carolina; Charlie Scott, North Carolina; Simmie Hill, West Texas State; Mervin Jackson, Utah; Shaler Hallmon, Utah State; Ron Williams, West Virginia; Tom Boerwinkle, Tennessee; Harry Hollins, Denver.

Basketball Hall of Fame

Springfield, Mass.

The Naismith Memorial Basketball Hall of Fame was incorporated in 1959 to serve as a memorial to James Naismith, who invented the game of basketball for students of the School for Christian Workers (now Springfield College) in December, 1891, at Springfield, Mass. The following persons have been enshrined in the Basketball Hall of Fame for outstanding contributions to basketball:

College Players

Harold (Bud) Foster, Wisconsin; Victor Hanson, Syracuse; Charles (Chuck) Hyatt, Pittsburgh; Robert Kurland, Oklahoma State; Angelo (Hank) Luisetti, Stanford; Branch McCracken, Indiana; C. Edward Macauley, St. Louis; George Mikan, DePaul; Charles (Stretch) Murphy, Purdue; H. O. (Pat) Page, Chicago; Andy Phillip, Illinois; John Roosma, U. S. Military Academy; John Schommer, Chicago; Christian Steinmetz, Wisconsin; J. A. (Cat) Thompson, Montana State; John R. Wooden, Purdue.

Professional Players

Bennie Borgmann, Nat Holman, Joe Lapchick, John (Honey) Russell, Barney Sedran, Edward A. Wachter.

AAU Players

Forrest S. DeBernardi, Robert (Ace) Gruenig, Jack McCracken.

Coaches

Ernest A. Blood, Howard G. Cann, Dr. H. Clifford Carlson, Everett S. Dean, Amory T. Gill, Howard A. Hobson, Alvin F. Julian, Frank Keane, George E. Keogan, Ward (Piggy) Lambert, Kenneth Loeffler, Dr. Walter E. Meanwell, Leonard D. Sachs.

Referees

George Hepbrun, George Hoyt, Matthew P. Kennedy, Ernest Quigley, David Tobey, David Walsh.

The World Cup

The World Cup, emblematic of international soccer supremacy, was won by England on July 20, 1966, by defeating West Germany, 4-2 in overtime. For this eighth tournament, 14 teams besides England and West Germany were entered. The others were Argentina, Bulgaria, Chile, France, Hungary, No. Korea, Mexico, Portugal, Spain, Switzerland, the Soviet Union, Italy, Uruguay and Brazil. Winners and sites of previous World Cup play follow:

Year	Winner	Site	Year	Winner	Site
1930	Uruguay	Uruguay	1954	W. Germany	Switzerland
1934	Italy	Italy	1958	Brazil	Sweden
1938	Italy	France	1962	Brazil	Chile
1950	Uruguay	Brazil	1966	England	England

Crane Wins Pocket Billiard Championship

Irving Crane of Rochester, N. Y., won his fourth world pocket billiard championship by defeating Luther Lassiter, the defending champion, in a playoff match at the Statler Hilton Hotel, N. Y., on Apr. 20, 1968. Crane was awarded \$3,000 for his victory. Lassiter's second-place finish netted him \$1,500. The following is the final standing of the championship event.

	W	L		W	L
Irving Crane, Rochester, N. Y.	11	3	Jack Colavita, West Caldwell, N. J.	6	8
Luther Lassiter, Elizabeth City, N. C.	11	3	Danny Gartner, Newark, N. J.	5	9
Steve Mizerak, Jr., Perth Amboy, N. J.	10	4	Jimmy Relihan, Springfield, Mass.	5	9
Frank McGown, Brooklyn, N. Y.	10	4	Cicero Murphy, Brooklyn, N. Y.	4	10
Lou Butera, West Pittston, Pa.	9	5	Petey Margo, Union City, N. J.	3	11
Joe Balsis, Minersville, Pa.	9	5	Bill Amodeo, Baldwin, L. I.	3	11
Art Cranfield, Syracuse, N. Y.	8	6	Onofrio Lauri, Seaford, L. I.	3	11
Dallas West, Rockford, Ill.	7	7			

Helms World Trophy Winners

The Helms World Trophy Award, instituted in 1949, recognizing the six foremost amateur athletes of the six continents, is an annual project of the Helms Athletic Foundation, Los Angeles, Calif. Selections are retroactive to 1896, year of the first modern Olympiad. The trophy itself, made of bronze, silver and gold and standing six feet high, bears the names of those honored. Those chosen receive silver plaques commemorating their recognition.

WORLD TROPHY WINNERS, 1967

Continent	Winner	Country	Sport
North America	Randy Matson	United States	Track and Field
South America	Jose Silvio Fiolo	Brazil	Swimming
Europe	Liesel Westermann	West Germany	Track and Field
Africa	Naftali Temu	Kenya	Track and Field
Asia	Kenji Kimihara	Japan	Marathon
Australasia	Judy Pollock	Australia	Track and Field

World Swimming Records

Approved by International Swimming Federation to Sept. 15, 1968

Under a F.I.N.A. decision of May 1, 1957, only records made in 55-yards or 50-meter pools are accepted as world marks. A number of new records await confirmation.

Course record for four miles—18:12.6 (California in 1939).

(a) Race at 3 miles. (b) Race at 2,000 meters.

Yale-Harvard Rowing

The Yale-Harvard rowing contests were begun in 1852. The original race, the first intercollegiate athletic event, was an 8-oared race with coxswain rowed over a two-mile course at Center Harbor, Lake Winnepesaukee. From 1859 through 1875 coxswains were dispensed with and the 8-oared boats were steered by a rudder controlled by the bow oar, in races at various sites. The two colleges returned to eight oars with cox for their first four-mile race, June 30, 1876, on the Connecticut River at

Springfield, Mass., Yale winning in 22 m. 2 sec. The course was changed to the Thames River at New London, Conn., in 1878.

The race was omitted in 1917, but in 1918 a two-mile race was rowed on the Housatonic River, Derby, Conn., on June 1, which Harvard won, time 10 m. 58 sec. From 1852 to 1923 inclusive Yale won 30 races and Harvard 30.

Yale-Harvard freshmen eights began their contests in 1899 on the Thames, Harvard winning. The 1902 race was a dead heat.

 1965—St. Catharines Rowing Club, 254 points; Detroit Boat Club, 232½ points; Toronto Argonauts Rowing Club, 182½ points.

International Yacht Races for the America's Cup

Competition for the America's Cup grew out of the first contest to establish a world yachting championship, one of the carnival features of the London Exposition of 1851. The race, open to all classes of yachts from all over the world, covered a 60-mile course around the Isle of Wight; the prize was a cup worth about \$500, donated by the Royal Yacht Squadron of England, known as the "America's Cup" because it was first won by the United States yacht America. Successive efforts of British and Australian yachtsmen have failed to win the famous trophy, which remains in the United States. On Sept. 19, 1967, the 12-meter yacht Intrepid won a fourth straight victory over Australia's challenger, Dame Pattie, to keep the symbol of world sailing supremacy in the United States. The U. S. yacht was skippered by Emil (Buse) Mosbacher, Jr., of White Plains, N. Y., and designed by Olin Stephens of Scarsdale, N. Y. Dame Pattie was skippered by Jock Sturrock and designed by Warwick Hood of Australia.

WINNERS OF THE AMERICA'S CUP

1851 America.	1881 Mischief (2 races)	1901 Columbia (3 races)	ish) (2 races)
1870 Magic.	1885 Puritan (2 races)	1903 Reliance (3 races)	1937 Ranger (4 races)
1871 Columbia (2 races);	1886 Mayflower (2 races)	1920 Resolute (best of 7 races)	1958 Columbia (4 races)
Sappho (2 races);	1887 Volunteer (2 races)	1930 Enterprise (4 races)	1962 Weatherly (4-1)
Livonia (British) (1 race)	1893 Vigilant (3 races)	1934 Rainbow (4 races);	1964 Constellation (4-0)
1876 Madeleine (2 races)	1895 Defender (3 races)	Endeavour II (Brit-)	1967 Intrepid (4-0)
	1899 Columbia (3 races)		

North American Yachting Championships in 1968

James Hunt of South Dartmouth, Mass., won the Mallory Cup, symbolic of the men's sailing championship, on Aug. 30. He had a total of 48¾ points for the four-day, eight-race series on San Francisco Bay. Richard Rose of Seattle placed second with 43½ points.

The Adams Cup, symbolic of the women's sailing championship, was won by June Method of the Monmouth Boat Club, Red Bank, N. J., on Aug. 28. She had a total of 50 points in the event, held on Barnegat Bay. Martha McDougle of San Francisco was second with 41½ points.

Boxing Champions by Classes

As of Oct. 15, 1968

Heavyweight	Vacant*
Light-Heavyweight (175 lbs.)	Bob Foster, Washington, D. C.
Middleweight (160 lbs.)	Nino Benvenuti, Italy
Welterweight (147 lbs.)	Curtis Cokes, Dallas, Tex.
Junior Welterweight (140 lbs.)	Paul Fujii, Honolulu
Lightweight (135 lbs.)	Teo Cruz, Dom. Republic
Junior Lightweight (130 lbs.)	Hiroshi Kobayashi, Japan
Featherweight (126 lbs.)	Sho Saito, Japan
Bantamweight (118 lbs.)	Lionel Rose, Australia
Flyweight (112 lbs.)	Chartchai Chionoi, Thailand

*Jimmy Ellis is officially recognized as the heavyweight champion by the majority of state boxing commissions. The remainder recognize Joe Frazier. Ring magazine continues to regard Cassius Clay as champion.

Ring Champions by Years

HEAVYWEIGHTS

1882-1892	John L. Sullivan (A)
1892-1897	James J. Corbett (B)
1897-1899	Robert Fitzsimmons
1899-1905	James J. Jeffries (C)
1905-1906	Marvin Hart
1906-1908	Tommy Burns
1908-1915	Jack Johnson
1915-1919	Jess Willard
1919-1926	Jack Dempsey
1926-1928	Gene Tunney*
1928-1930	Vacant
1930-1932	Max Schmeling
1932	Jack Sharkey
1932	Primo Carnera
1934	Max Baer
1935-1936	James J. Braddock
1937-1949	Joe Louis*
1949-1951	Ezzard Charles
1951-1952	Joe Walcott
1952-1956	Rocky Marciano*
1956-1959	Floyd Patterson
1959	Ingemar Johansson
1960-1962	Floyd Patterson
1962-1963	Sonny Liston
1964-1967	Cassius Clay* (D)
(A) London Prize Ring (bare knuckle champion).	
(B) First Marquis of Queensberry Champion.	
(C) Jeffries abandoned the title (1905) and designated Marvin Hart and Jack Root as logical contenders and agreed to referee a fight between them, the winner to be declared champion. Hart defeated Root in 12 rounds (1905) and in turn was defeated by Tommy Burns (1906) who immediately laid claim to the title. Jack Johnson defeated Burns (1908) and was recognized as champion. He clinched the title by defeating Jeffries in an attempted comeback (1910).	
(D) Title declared vacant by the World Boxing Assn. and other groups in 1967 after Clay's refusal to fulfill his military obligation.	

LIGHT HEAVYWEIGHTS

1965-1966	Dick Tiger
1966-1967	Emile Griffith
1967	Nino Benvenuti
1967-1968	Emile Griffith
1968	Nino Benvenuti
WELTERWEIGHTS	
1892	Danny Needham, Mysterious Billy Smith
1892-1894	Mysterious Billy Smith
1894-1896	Tommy Ryan
1896	Kid McCoy (outgrew class)
1900	Mysterious Billy Smith, Rube Ferns
1901	Matty Matthews
1901-1904	Matty Matthews, Rube Ferns
1904-1906	Dixie Kid, Joe Walcott, Honey Mellody
1907-1911	Mike Sullivan
1911-1915	Vacant
1915-1919	Ted Lewis, Jack Britton
1919-1922	Jack Britton
1922-1926	Mickey Walker
1926	Pete Latzo
1927-1929	Joe Dundee
1929	Jackie Fields
1930	Jackie Fields, Jack Thompson, Tommy Freeman
1931	Freeman, Thompson, Lou Brouillard
1932	Jackie Fields
1933	Young Corbett, Jimmy McLarnin

1934	Barney Ross, Jimmy McLarnin
1935	Jimmy McLarnin, Barney Ross
1936-1938	Barney Ross
1938-1939	Henry Armstrong
1940	Fritzi Zivic
1941-1946	Fred Cochrane
1946-1947	Marty Servo*; Ray Robinson (A)
1947-1950	Ray Robinson
1951	Ray Robinson (England)*; Johnny Bratton (NBA); Kid Gavilan
1951-1953	Kid Gavilan
1954-1955	Johnny Saxton
1955	Tony De Marco; Carmen Basillo
1956	Carmen Basillo, Johnny Saxton, Carmen Basillo
1957	Carmen Basillo*
1958	Virgil Atkins; Don Jordan
1959	Don Jordan
1960	Benny Paret
1961	Emile Griffith, Benny Paret
1962	Benny Paret, Emile Griffith
1963	Luis Rodriguez, Emile Griffith
1964-1966	Emile Griffith* (B)
1966	Curtis Cokes

(A) Robinson gained the title by defeating Tommy Bell in an elimination agreed to by the NY Commission and the NBA. Both claimed Robinson waived his title when he won the middleweight crown from Lemaite in 1951. Gavilan defeated Bratton in an elimination to find a successor.

(B) Title became vacant when Griffith won the middleweight title.

LIGHTWEIGHTS

440 yards: Intermediate hurdles—49.6s., Rex Cawley, Albuquerque, N. M., June 15, 1963.

STEEPLECHASE

3,000 meters—8m. 32.4s., Pat Traynor, Dusseldorf, Ger., Aug. 17, 1967.

2 miles—9m. 49.6s., Charles Jones, Dayton, Ohio, June 22, 1957. *9m. 35.4s., Joseph P. McCluskey, New York, N. Y., Feb. 22, 1941.

JUMPING

Standing high jump—5 ft. 5½ in., Leo Goehring, Travers Island, N. Y., June 14, 1913. *5 ft. 6 in., Harold M. Osborn, St. Louis, Mo., April 4, 1936.

Running high jump—7 ft. 3½ in., John Thomas, Stanford, Calif., July 1, 1960. *7 ft. 3 in., John Thomas, Boston, Mass., Jan. 28, 1961. *John Rambo, San Francisco, Calif., Jan. 7, 1967.

Standing broad jump—11 ft. 4½ in., Ray C. Ewry, St. Louis, Aug. 29, 1904.

Long jump—27 ft. 4½ in., Ralph Boston, Modesto, Calif., May 29, 1965. *26 ft. 1½ in., Robert Beamon, Oakland, Calif., Mar. 4, 1967. *27 ft. 2½ in., Bob Beamon, Detroit, Mar. 15, 1968.

Triple jump—34 ft. 11 in., Art Walker, Los Angeles, Calif., July 23, 1966. *34 ft. 9½ in., Art Walker, Albuquerque, N. M., Mar. 5, 1966.

POLE VAULT

17 ft. 7¾ in., Paul Wilson, Bakersfield, Calif., June 23, 1967. 17 ft. 9 in., Bob Seagren, So. Lake Tahoe, Calif., Sept. 12, 1968. *17 ft. 3 in., Bob Seagren, Cleveland, Ohio, Feb. 18, 1967. 17 ft. 4½ in., Bob Seagren, New York, N. Y., Jan. 25, 1968.

16-LB. HAMMER THROW

Weight (including handle), 16 lbs., entire length 4 feet thrown from 7-foot circle—235 ft. 11 in., Ed Burke, Bakersfield, Calif., June 22, 1967.

PUTTING 16-LB. SHOT

71 ft. 5½ in., Randy Matson, College Station, Tex., Apr. 22, 1967. *67 ft. 10 in., Neal Steinhauer, Portland, Ore., Jan. 28, 1967.

DISCUS THROW

Weight, 4 lbs. 6½ oz. From 8 ft. 2½ in. circle—210 ft. 6 in., Jay Silvester, Long Beach, Calif., June 5, 1965. 218 ft. 4 in., Jay Silvester, Modesto, Calif., May 25, 1968.

JAVELIN THROW

284 ft., John Tusaus, Los Angeles, Calif., May 13, 1966.

THROWING WEIGHTS

56-lb. weight for distance, thrown with both hands from a 7-ft. circle without follow—48 ft. ¾ in., George Frenn, Pasadena, Calif., June 4, 1967.

56-lb. weight for height—16 ft. 11¼ in., P. Donovan, San Francisco, Calif., Feb. 20, 1914.

35-lb. weight for distance—68 ft. 7½ in., George Frenn, Berkeley, Calif., Mar. 4, 1967. Harold Connolly, New York, N. Y., Feb. 20, 1960.

ALL-ROUND TRACK AND FIELD RECORD
 8,265 points, Tom Pagani, Baltimore, Md., Aug. 5, 1962.

DECATHLON

8,230 pts., Russ Hodges, Los Angeles, Calif., July 23-24, 1966.

PENTATHLON

3,765 points, Bill Toomey, Westbrook, Me., July 8, 1964.

61st Annual Wanamaker Millrose Games

Madison Square Garden, New York, N.Y., Jan. 25, 1968

60 Yds.—Lennox Miller, USC. Time—0:06.2.
 500 Yds.—Larry James, Villanova. Time—0:56.1.
 600 Yds.—Marty McGrady, Santa Clara. Time—1:11.1.
 880 Yds.—Ralph Doubell, Australia. Time—1:55.2.
 1,000 Yds.—Byron Dyce, NYU. Time—2:10.1.
 Wanamaker Mile—Preston Davis, U.S. Army. Time—4:03.9.

Three Miles—George Young, Casa Grande, Ariz. Time—13:31.8.
 60 Yd. High Hurdles—Leon Coleman, So. Calif. Striders. Time—0:07.2.
 Women's 880 Yds.—Madeline Manning, Tenn. State. Time—2:13.8.
 Pole Vault—Bob Seagren, USC. 17 ft. 4 1/4 in.
 High Jump—John Thomas, Boston AA. 6 ft. 10 in.

79th Annual Boston Athletic Association Games

Boston, Mass. Jan. 27, 1968

50 Yds.—Lennox Miller, USC. Time—0:05.3.
 440 Yds.—Vince Mathews, J.C. Smith. Time—0:48.8.
 600 Yds.—Tom Farrell, U.S. Army. Time—1:11.1.
 1,000 Yds.—Ralph Doubell, Australia. Time—2:08.0.
 One Mile—Sam Bair, Kent State. Time—4:01.9.
 Two Miles—George Young, Casa Grande, Ariz. Time—8:44.8.
 45 Yd. High Hurdles—Erv Hall, Villanova. Time—0:05.5.

One Mile Walk—Steve Hayden, Long Island AC. Time—6:49.4.
 One Mile Relay—Villanova (Davis, Nichter, James, Prince). Time—3:17.8.
 Pole Vault—Bob Seagren, USC. 17 ft. 3/4 in.
 High Jump—John Thomas, Boston AA. 6 ft. 10 in.
 Shot Put—Dick Benka, Harvard. 54 ft. 1 1/2 in.
 Long Jump—John Pistel, Amherst. 23 ft. 4 in.
 35-lb. Weight Throw—Bob Narcessian, Rhode Island. 59 ft. 8 1/4 in.

49th Annual Knights of Columbus Indoor Track Meet

Madison Square Garden, Feb. 2, 1968

60 Yds.—Bill Gaines, Santa Clara. Time—0:06.2.
 500 Yds.—Jim Kemp, U.S. Army. Time—0:56.2.
 600 Yds.—Martin McGrady, Santa Clara. Time—1:10.8.
 880 Yds.—Ralph Doubell, Australia. Time—1:51.5.
 1,000 Yds.—Bob Zieminski, Georgetown DC. Time—2:11.0.

One Mile—Sam Bair, Kent State. Time—4:03.8.
 Two Miles—Bill Clark, Quantico Marines. Time—8:53.6.
 60 Yd. High Hurdles—Erv Hall, Villanova. Time—0:07.1.
 Pole Vault—Bob Seagren, USC. 16 ft. 6 3/4 in.
 High Jump—John Hartfield, Houston Striders. 7 ft.

9th Los Angeles Times Indoor Track & Field Meet

Los Angeles, Calif., Feb. 10, 1968

60 Yds.—Charles Greene, Cornhuskers TC. Time—0:06.0.
 440 Yards.—Lee Evans, San Jose State. Time—0:47.8.
 500 Yds.—Jim Kemp, U.S. Army. Time—0:57.5.
 600 Yds.—Martin McGrady, Santa Clara. Time—1:10.9.
 1,000 Yds.—Ralph Doubell, Australia. Time—2:08.2.
 One Mile—Tim Danielson, San Diego. Time—4:06.1.
 Two Miles—George Young, Casa Grande, Ariz. Time—8:31.8.
 60 Yd. High Hurdles—Earl McCullough, USC. Time—0:06.9.
 One Mile Relay—U.S. Army (Webster, Jones, Tobler, Kemp). Time—3:16.1.
 Two Mile Relay—U.S. Army (Burleson, Daugherty, Delaney, Mitchell). Time—7:40.4.

One Mile Walk—Ron Laird, NYAC. Time—6:26.3.
 Pole Vault—John Vaughn, UCLA. 17 ft. 1 1/2 in.
 High Jump—Valentine Gavrilov, USSR. 7 ft. 2 in.
 Long Jump—Tonu Lepik, USSR. 25 ft. 8 1/2 in.
 Shot Put—George Woods, Pacific Coast Club. 65 ft. 2 1/2 in.

Women's Events

60 Yds.—Barbara Ferrell, L.A. Mercurettes. Time—0:06.7.
 440 Yds.—Kathy Hammond, Will's Spikettes. Time—0:56.0.
 880 Yds.—Madeline Manning, Tenn. State. Time—2:10.9.
 60 Yd High Hurdles—Cherrie Sherrard, Laurel TC. Time—0:07.7.
 High Jump—Eleanor Montgomery, Tenn. State. 5 ft. 10 in.
 Long Jump—Tatyana Talishova, USSR. 20 ft. 2 1/2 in.

New York Athletic Club Track Meet

Madison Square Garden, Feb. 16, 1968

60 Yds.—Lennox Miller, Univ. of So. Calif. Time—0:06.1.

 High Jump—Valentin Gavrilov, USSR. 7 ft. 1 in.
 Shot Put—George Woods, Pacific CC. 66 ft. 3¼ in.
 35-lb. Weight Throw—Ed Burke, Striders. 65 ft. 3½ in.
 Team Standings—Pacific Coast Club, 30; So. Calif. Striders, 27; Santa Clara Valley Youth Village, 20; New York AC, 13; Southern Calif., 11.

Women's Division

60 Yds.—Barbara Ferrell, L. A. Mercurettes. Time—0:06.7.
 220 Yds.—Vilma Charleton, Crown Cities TC. Time—0:25.1.
 440 Yds.—Lois Drinkwater, Valley of the Sun. Time—0:56.5.
 One Mile—Doris Brown, Falcon TC. Time—4:53.1.
 880 Yds.—Madeline Manning, Tenn. State. Time—2:11.8.
 60 Yds. Hurdles—Pat VanWolvelaere, Angles TC. Time—0:07.4.
 Spring Relay—Tennessee State (Tyus, Daniel, Dennis, Render). Time—1:10.8.
 Spring Medley Relay—Los Angeles Mercurettes (Scott, Wilson, DeBuck, Ferrell). Time—1:45.1.
 Shot Put—Maren Seldier, Shore AC. 48 ft. 9 in.
 Basketball Throw—Barbara Friedrich, Shore AC. 135 ft.
 Long Jump—Tatiana Talisheva, USSR. 20 ft. 4½ in.
 High Jump—Eleanor Montgomery, Tenn. State. 5 ft. 10½ in.
 Team Standings—Tennessee State, 24; Los Angeles Mercurettes, 19; Crown Cities TC, 16; Valley of the Sun, 10; Falcon TC, 9.

6th Annual Telegram-Maple Leaf Indoor Games

Toronto, Ontario, March 2, 1968

Men's Division

50 yd. Hurdles—Willie Davenport, Southern University. Time—0:05.9.
 50 Yds.—Charles Green, Nebraska. Time—0:05.2.
 600 Yds.—Frank Tomeo, New York. Time—1:10.5.
 1,000 Yds.—Bill Crothers, Toronto. Time—2:10.9.
 Canadian Mile—Jim Irons, Toronto. Time—4:18.6.
 Invitational Mile—Dave Bailey, Toronto. Time—4:05.2.
 High Jump—Otis Burrell, University of Nevada. 7 ft.
 Pole Vault—Dennis Phillips, Oregon State University. 16 ft. 6 in.
 Shot Put—Jay Silvester, Utah. 64 ft. 5 in.
 One-Mile Relay—Toronto East York (Brereton,

McMann, Brooks, Powell). Time—3:25.9.
 Two-Mile Relay—University of Toronto (Field, Davis, Bailey, Richards). Time—7:59.3.
 Three-Mile Run—Tracy Smith, U. S. Army. Time—13:15.2.

Women's Division

50 Yd. Hurdles—Mamie Rollins, Chicago. Time—0:06.5.
 50 Yds.—Wyomia Tyus, Tennessee State University. Time—0:05.8.
 300 Yds.—Wyomia Tyus, Tennessee State University. Time—0:35.9.
 880 Yds.—Doris Brown, Seattle. Time—2:11.4.
 High Jump—Pat Winslow, Iowa State University. 5 ft. 6 in.

59th Annual Drake Relays

Des Moines, Iowa, April 26-27, 1968

100 Yds.—Clyde Glosson, Trinity. Time—0:09.5.
 120 Yd. High Hurdles—Mike Butler, Wisconsin. Time—0:13.8.
 440 Yds.—Charles Benson, Southern Illinois. Time—1:46.7.
 440 Yd. Hurdles—Jesse Ball, Prairie View. Time—0:51.7.
 College-University Mile—Al Van Troba, Abeline Christian. Time—4:04.3.
 Invitational Mile—Sam Bair, Kent State. Time—4:06.2.
 Two Miles—Ed Norris, Kent State. Time—8:52.2.
 Three Miles—Van Nelson, St. Cloud State. Time—13:17.4.
 Six Miles—Van Nelson. Time—23:22.1.
 High Jump—Stan Curry, Baylor. 6 ft. 9 in.
 Shot Put—James Bagby, Prairie View. 58 ft. 3 in.
 Pole Vault—Martin Rollins, Texas A. & M. 15 ft. 6 in.
 Javelin—Bill Skinner, Tennessee. 239 ft. 2 in.
 Triple Jump—Lennox Burgher, Nebraska. 52 ft. 11 in.
 Long Jump—Hal Oswalt, Oklahoma State. 24 ft. 7¼ in.

Discus Throw—John Morton, Florida. 178 ft. 3 in.
 Invitational Discus Throw—Parry O'Brien. 180 ft. 2 in.

University Relays

440 Yds.—Oklahoma (W. Long, Smith, Brown, G. Long). Time—0:40.5.
 880 Yds.—Ohio Univ. (Smith, Fuller, Hosler, Taylor). Time—1:23.7.
 One Mile—Texas (McKaniel, Matina, Canada, Morton). Time—3:05.2.
 Two Miles—Kansas (Grindal, Ferrell, McClain, Ryun). Time—7:21.8.
 Four Miles—Drake (Compson, Hoffert, Hunt, Evans). Time—16:39.7.
 Sprint Medley—Kansas State (Collins, Heer, Holbrook, Swenson). Time—3:19.5.
 Distance Medley—Kansas (Grindal, Olsson, McClain, Ryun). Time—9:41.9.
 480 Yd. Shuttle High Hurdles—Kansas (Byers, Gaines, Adams, Stevens). Time—0:56.7.

4th Annual NCAA Indoor Track and Field Championships

Detroit, Mich., March 15-16, 1968. Sponsored by The Detroit News

60 Yds.—Jim Green, Kentucky. Time—0:06.0.
 440 Yds.—Larry James, Villanova. Time—0:47.0.
 600 Yds.—Tom Albright, Colgate. Time—1:10.6.
 880 Yds.—Dave Patrick, Villanova. Time—1:52.0.
 1,000 Yds.—Ray Arrington, Wisconsin. Time—2:09.3.
 One Mile—Jim Ryun, Kansas. Time—4:06.8.
 Two Miles—Jim Ryun, Kansas. Time—8:38.9.
 60 Yd. High Hurdles—Richmond Flowers, Tennessee. Time—0:07.0.
 One Mile Relay—Villanova (Nichter, Davis, Prince, James). Time—3:14.4.

Two Mile Relay—Harvard (Burns, Shaw, Baker, McKelvey). Time—7:26.8.
 Medley Relay—Villanova (Messenger, Whitehead, Donnelly, Murphy). Time—9:49.5.
 Long Jump—Bob Beamon, Texas-El Paso. 27 ft. 2¼ in.
 Shot Put—John Vanreenen, Washington State. 62 ft. 1 in.
 35 lb. Weight Throw—Bob Narcessian, Rhode Island. 65 ft. 5¾ in.
 Pole Vault—Paul Wilson, USC. 16 ft. 8 in.
 Team Champion—Villanova, 35½ pts.; Southern Calif., 25 pts.; Oklahoma, 17 pts.

47th NCAA Outdoor Championships

Berkeley, Calif., June 13-15, 1968

100 Meters—Lennox Miller, Southern Calif. Time—0:10.1.
 200 Meters—Emmett Taylor, Ohio Univ. Time—0:20.8.
 400 Meters—Lee Evans, San Jose State. Time—0:45.0.
 800 Meters—Byron Dyce, NYU. Time—1:47.3.
 1,500 Meters—Dave Patrick, Villanova. Time—3:39.9.
 5,000 Meters—Gerry Lindgren, Washington State. Time—13:57.2.
 10,000 Meters—Gerry Lindgren. Time—29.41.
 110 Meter High Hurdles—Earl McCullouch, So. Calif. Time—0:13.4.
 400 Meter Hurdles—Dave Hemery, Boston Univ. Time—0:49.8.
 3,000 Meter Steeplechase—Kerry Pearce, Texas-

El Paso. Time—8:50.8.
 440 Yard Relay—Southern Calif. Time—0:39.5.
 One Mile Relay—Villanova. Time—3:08.6.
 High Jump—Dick Fosbury, Oregon State. 7 ft. 2 3/4 in.
 Pole Vault—Jon Vaughn, UCLA. 17 ft. 1 1/2 in.
 Long Jump—Pertti Pousi, Brigham Young Univ. 26 ft. 3 3/4 in.
 Triple Jump—Lennox Burgher, Nebraska. 53 ft. 1 1/4 in.
 Shot Put—Steve Marcus, UCLA. 61 ft. 7 3/4 in.
 Discus—John Van Reenen, Wash. St. 194 ft. 10 in.
 Hammer Throw—Bob Narcessian, Rhode Island. 202 ft. 1 in.
 Javelin—Carl O'Donnell, Washington State. 258 ft. 11 in.
 Team—Southern California, 58 pts.

80th Annual AAU Outdoor Track and Field Championships

Sacramento, Calif., June 20-21, 1968

100 Meters—Charlie Greene, Huskers AA. Time—0:10.0.
 200 Meters—Tommie Smith, Santa Clara. Time—0:20.3.
 400 Meters—Lee Evans, Santa Clara Valley Youth Village. Time—0:45.0.
 800 Meters—Wade Bell, Oregon TC. Time—1:45.4.
 1,500 Meters—John Mason, Ft. Hays State. Time—3:43.1.
 5,000 Meters—Bob Day, So. Calif. Striders. Time—13:50.4.
 10,000 Meters—Tracy Smith, U. S. Army. Time—28:47.
 110 Meter Hurdles—Earl McCullouch. Time—0:13.5.
 400 Meter Hurdles—Ron Whitney, So. Calif. Striders. Time—0:49.6.
 3,000 Meter Walk—Don DeNoon. Time—12:37.9.

3,000 Meter Steeplechase—George Young. Time—8:30.5.

Jim Thorpe Trophy Winners

The Jim Thorpe Trophy winner is picked by a Newspaper Enterprise Assn. poll of all NFL players. It goes to the most valuable NFL player and is the oldest and highest professional football award.

Year	Player and Team
1955	Harlon Hill, Chicago Bears
1956	Frank Gifford, N. Y. Giants
1957	John Unitas, Baltimore Colts
1958	Jim Brown, Cleveland Browns
1959	Charley Conerly, N. Y. Giants
1960	Norm Van Brocklin, Philadelphia Eagles
1961	Y. A. Tittle, N. Y. Giants

Year	Player and Team
1962	Jim Taylor, Green Bay Packers
1963	(tie) Jim Brown, Cleveland Browns and Y. A. Tittle, N. Y. Giants
1964	Lenny Moore, Baltimore Colts
1965	Jim Brown, Cleveland Browns
1966	Bart Starr, Green Bay Packers
1967	John Unitas, Baltimore Colts

Green Bay Wins Super Bowl Game

The second professional football game between the champions of the National and American Leagues resulted in a 33-14 victory by the National League Champion Green Bay Packers over the Oakland Raiders on Jan. 14, 1968. The game was played at the Orange Bowl in Miami before 75,546 spectators plus an estimated 50,000,000 television viewers. For their victory each Packer received \$15,000, with \$7,500 going to each losing Raider, in addition to the money the players received for winning their respective league championships.

Professional Football Player Draft

The following are the first round picks of the second combined National Football League-American Football League player draft.

- 1—**Minnesota**—Ron Yary, offensive tackle, Southern California.
- 2—**Cincinnati**—Bob Johnson, center, Tennessee.
- 3—**Atlanta**—Claude Humphrey, defensive tackle, Tennessee A&I.
- 4—**San Diego**—Russ Washington, offensive tackle, Missouri.
- 5—**Green Bay**—Fred Carr, linebacker, University of Texas at El Paso.
- 6—**Boston**—Dennis Byrd, defensive tackle, North Carolina State.
- 7—**New Orleans**—Kevin Hardy, defensive end-tackle, Notre Dame.
- 8—**Miami**—Larry Csonka, fullback, Syracuse.
- 9—**Buffalo**—Haven Moses, flanker, San Diego State.
- 10—**Pittsburgh**—Mike Taylor, defensive tackle, Southern California.
- 11—**Detroit**—Greg Landry, quarterback, Massachusetts.
- 12—**Washington**—Jim Smith, defensive back, Oregon.
- 13—**St. Louis**—MacArthur Lane, halfback, Utah State.
- 14—**Philadelphia**—Tim Rossovich, defensive end, Southern California.
- 15—**San Francisco**—Forrest Blue, center, Auburn.
- 16—**Chicago**—Mike Hull, fullback, Southern California.
- 17—**New York (AFL)**—Lee White, fullback, Weber State.
- 18—**San Diego**—Jim Hill, defensive back, Tennessee A&I.
- 19—**Kansas City**—Maurice (Mo.) Moorman, offensive tackle, Texas A&M.
- 20—**Dallas**—Dennis Homan, flanker, Alabama.
- 21—**Cleveland**—Marvin Upshaw, defensive end, Trinity (Tex.).
- 22—**Kansas City**—George Daney, offensive guard, Texas-El Paso.
- 23—**Baltimore**—John Williams, offensive tackle, Minnesota.
- 24—**Detroit**—Earl McCullough, split end, Southern California.
- 25—**Oakland**—Eldridge Dickey, quarterback, Tennessee A&I.
- 26—**Green Bay**—Bill Lueck, offensive guard, Arizona.
- 27—**Miami**—Doug Crusan, offensive tackle, Indiana.

Canadian Football League (Grey Cup)

Winners of Eastern and Western divisions meet in championship game for Grey Cup (donated by Governor-General Earl Grey in 1909). Canadian football features three downs, 110-yard field, each team dressing 32 players of which 12 can be on field at one time. Each team allowed 14 U. S. imports, who usually dominate the sport.

31st Annual Soap Box Derby

Branch Lew, 11, of Muncie, Ind., won the 31st All-American Soap Box Derby at Akron, Ohio Aug. 24, 1968, besting a field of 243 contestants from 46 states and from Canada, Venezuela, the Philippines, Okinawa and West Germany for the \$7,500 college scholarship. Ronald Alber, 14, of the Bay Area (Fremont), Calif. was awarded a \$5,000 scholarship for second, and Dennis Jett Puckett, 11, of DeKalb County (Decatur), Ga., received a \$4,000 scholarship for third place. A total of \$30,000 in scholarships was awarded to the first 9 place finishers by Chevrolet, national derby sponsor. Each of the 243 contestants received a \$500 United States Savings Bond for victory in his hometown race.

Long Beach, Calif.

Men's Events

All-Around—Makoto Sakamoto, Univ. of Southern Calif.

Floor Exercise—Toby Towson, Michigan State.

Rings—Steve Cohen, Philadelphia.

Parallel Bars—Makoto Sakamoto.

Side Horse—John Russo, Wis.

Long Horse—Makoto Sakamoto.

Horizontal Bar—Makoto Sakamoto.

Trampoline—Dave Jacobs, Michigan Univ.

Tumbling—Doug Roger, Pasadena, Calif.

Women's Events

All-Around—Linda Metheny, Tusculo, Ill.

Vault—Joyce Tanac, Seattle.

Free Exercise—Linda Metheny.

Balance Beam—Linda Metheny.

Uneven Bars—Doris Brause, New Haven, Conn.

Tumbling—Judy Wills, Southern Illinois Univ.

Trampoline—Judy Wills.

Dog Show

Six main classes of dogs are presently recognized: Sporting dogs—Pointers, Retrievers, Setters, Spaniels, Weimaraners; the Hound group; Working dogs, including boxers, collies, Doberman pinschers, Shepherds, mastiffs; the Terrier group; the Toy group, including Chihuahuas, Toy Spaniels, Papillons, Pekingese, Pomeranians, Yorkshires; Non-sporting group—Boston Terriers, bulldogs, Chow Chows, Dalmatians, Keeshonden, Poodles, etc. In all, 115 different breeds are recognized and shown in the United States.

Poodles remained the No. 1 breed in the United States for the eighth straight year according to 1967 pure-bred registration figures released in 1968 by the American Kennel Club. A record 885,800 individual dogs were registered, an increase of 10.1% over the previous year.

Grey Cup Symbolizes Canadian Pro Football Championship

The Grey Cup, donated by Governor-General Earl Grey in 1909, is symbolic of the championship of the Canadian Football League. Each year the winners of the league's Western and Eastern divisions meet to contest for the coveted cup in one of Canada's top professional sports events.

1968 Olympic Games

Mexico City, Oct. 12-27, 1968

Competing in the games of the 19th modern Olympiad, held in Mexico City Oct. 12-27, 1968, were 7,226 athletes from 119 nations. Although it had been feared that the high altitude of Mexico City would have an adverse effect on the athletes, the performances were generally superior and the breaking of world and Olympic records became almost commonplace. The United States won the unofficial team title by taking 107 medals; the Soviet Union won 91. The medal totals by nations and results of major events follow:

	Gold	Silver	Bronze	Total
United States	45	28	34	107
Soviet Union	29	31	31	91
Hungary	10	10	12	32
East Germany	9	9	7	25

100 Meter Butterfly—1, Doug Russell, United

Beamon's Record-Breaking Jump Is Sensation of Olympics

Of the many record-breaking performances in the 1968 Olympics at Mexico City the most phenomenal, in the eyes of most experts, was the long jump of 29 ft. 2½ inches by Bob Beamon. Beamon's leap, made on his first attempt in the finals, shattered the world record of 27 ft. 4¾ inches. Klaus Beer of East Germany took second with 26 ft. 10½ inches and world record holder Ralph Boston of the U. S. finished third with 26 ft. 9¼ inches. All 3 bettered the Olympic record of 26 ft. 7¼ inches held by Boston.

The fact that Beamon's prodigious leap exceeded

the world record by nearly two feet seemed incredible in view of the history of the long jump mark. Jesse Owens' world record of 26 ft. 8¾ inches had stood for 25 years when Boston broke it in 1960. The USSR's Igor Ter-Ovanesyan topped that in 1962, Boston set the record at 27 ft. 4¾ inches in 1965, and Ter-Ovanesyan equalled that unofficially in 1967. But Boston and Ter-Ovanesyan had increased the world mark by only 8½ inches in 8 years of effort until Beamon came along. Beamon, 22, from Jamaica, Queens, in New York City, attends the University of Texas at El Paso.

Olympic Games Records

The modern Olympic Games, first held in Athens, Greece, in 1896, were the result of efforts by Baron Pierre de Coubertin, a French educator, to promote interest in education and culture, also to foster better international understanding through the universal medium of youth's love of athletics.

His source of inspiration for the Olympic Games was the ancient Greek Olympic Games, most notable of the four Panhellenic celebrations. The games were combined patriotic, religious and athletic festivals held every four years. The first such recorded festival was that held in 776 B.C., the date from which the Greeks began to keep their calendar by "Olympiads," or four-year spans between the games.

The first Olympiad is said to have consisted merely of a 200-yard foot race near the small city of Olympia, but the games gained in scope and became demonstrations of national pride. Only Greek citizens—amateurs—were permitted to participate. Winners received laurel, wild olive and palm wreaths and were accorded many special privileges. Under the Roman emperors, the games deteriorated into professional carnivals and circuses. Emperor Theodosius banned them in 394 A.D.

Baron de Coubertin enlisted 9 nations to send athletes to the first modern Olympics in 1896; now more than 100 nations compete. Winter Olympic Games were started in 1924.

1928	Herbert Hoover (R)	21,392,190	444	Robert M. LaFollette (Pr)	4,822,856	13

1840—President Harrison died on April 4, 1841, and Vice President Tyler became President.
1848—President Taylor died in office on July 9, 1850, and Vice President Fillmore became President.

1848—President Taylor died in office on July 9, 1850, was succeeded by Vice President Fillmore.
1864—President Lincoln was shot April 14, 1865, at Ford's Theatre. Vice President Andrew Johnson

1864—President Lincoln was shot April 14, 1865 at Ford's Theatre, Washington, by actor J. Wilkes Booth, and died April 15, whereupon Vice President Andrew Johnson became President.

1876—Florida, Louisiana, Oregon and South Carolina election returns were disputed. A board of Commissioners, referred to as The Electoral Commission, was created by act of Congress (approved Jan. 29, 1877) for the purpose of deciding disputed cases in the 1876 presidential election. It was in session from Feb. 1 to March 2, 1877 and its decisions resulted in the seating of Hayes, the Republican candidate who received the disputed electoral votes. The members of the commission voted on party lines—8 Republicans and 7 Democrats. Congress, in joint session (March 2, 1877) declared Hayes Tilden. The Senate was Republican. The House, which was Democratic, resolved and declared as a separate body (March 3) that Tilden and Hendricks were elected on the face of the returns.

1880—President Garfield was shot July 2, 1881, at Washington, D.C. by James A. Garfield.

1880—President Garfield was shot July 2, 1881, at Washington, D. C., by Charles J. Guiteau of New York and died Sept. 19, whereupon Vice President Chester A. Arthur became President.

1888—On the result of the popular vote Cleveland had more votes than Harrison but the 233 electoral votes cast for Harrison against the 168 for Cleveland elected Harrison president.
1900—President McKinley was shot. Sept. 6, 1901, at the Panama Exposition in Buffalo, N. Y.

1900. President McKinley was shot, Sept. 6, 1901, at the Pan American Exposition, Buffalo, N. Y. He died on Sept. 14, and Vice President Theodore Roosevelt became President. The assassin, Leon Czolgosz, was executed Oct. 29, 1901.

1920—President Harding died at San Francisco, Calif., Aug. 2, 1923, and was succeeded by Vice President Calvin Coolidge.

1944—President Roosevelt died at Warm Springs, Ga., on April 12, 1945, whereupon Vice President Harry S. Truman became President.

1956—Democrats elected 74 electors but one from Alabama refused to vote for Stevenson, voted for Walter B. Jones.

1960—Sen. Harry F. Byrd (D.-Va.) received 15 electoral votes; 6 from unpledged Alabama Democrats, 8 from unpledged Mississippi Democrats, and 1 from defecting Oklahoma Republican elector.

PRESIDENTIAL ELECTION RETURNS BY STATES

The Electoral College

The President and the Vice President of the United States are the only elective Federal officials not elected by direct vote of the people. They are elected by the members of the Electoral College, an institution that has survived since the founding of the nation despite more than 100 attempts in Congress to alter or abolish it. In the elections of 1824, 1876 and 1888 the Presidential candidate receiving the largest popular vote failed to win a majority of the electoral votes.

On Presidential election day, the first Tuesday after the first Monday in November of every fourth year, each state chooses as many electors as it has Senators and Representatives in Congress. In 1964 for the first time, as provided by the 23rd Amendment to the Constitution, the District of Columbia voted for 3 electors. Thus, with 100 Senators and 435 Representatives, there are 538 members of the Electoral College, with a majority of 270 electoral votes needed to elect the President and Vice President.

Political parties customarily nominate their lists of electors at their respective state conventions. An elector cannot be a member of Congress or any person holding Federal office.

Some states print the names of the candidates for President and Vice President at the top of

the ballot while others list only the names of the electors. In either case, the electors of the party receiving the highest vote are elected. The electors meet on the first Monday after the second Wednesday in December in their respective state capitals or in some other place prescribed by State Legislatures. By long-established custom they vote for their party nominee, thus giving all the state's electoral votes to him, although the Constitution does not require them to do so. The only constitutional requirement is that at least one of the persons each elector votes for shall not be an inhabitant of that elector's home state.

Certified and sealed lists of the votes of the electors in each state are mailed to the President of the U. S. Senate. He opens them in the presence of the members of the Senate and House of Representatives in a joint session held on Jan. 6 (the next day if that falls on a Sunday), and the electoral votes of all the states are then counted. If no candidate for President has a majority, the House of Representatives chooses a President from among the three highest candidates, with all Representatives from each state combining to cast one vote for that state. If no candidate for Vice President has a majority, the Senate chooses from the top two, Senators voting as individuals.

THE NINETY-FIRST CONGRESS, FIRST SESSION

As of Nov. 15, 1968

The Congress must meet annually on Jan. 3, unless it has, by law, appointed a different day

The Senate

Terms are for 6 years and end January 3 of the year preceding name. Annual salary \$30,000.

To be eligible for the U. S. Senate, a person must be at least 30 years of age, a citizen of the United States for at least 9 years, and a resident of the state from which he is chosen.

Democrats, 58; Republicans, 42. Total, 100. (*) Asterisk designates senior Senator.

Wallace Tops 3rd Party Candidates Numerically But Not Percentage-Wise

George C. Wallace, running for President in 1968 as a 3rd party candidate, garnered more votes than any other such candidate ever did. But he did not top the percentages of the total vote rolled up by some earlier 3rd spot runners.

His high numerical total was achieved mainly because he was on the ballot in 50 states and because 1968 saw more voters at the polls than any previous Presidential election.

In 1912, former President Theodore Roosevelt, Progressive, won 27.4% of the popular vote and 88 electoral votes; in 1924, Robert M. La Follette, Progressive, had 17% and 13 electoral votes; in 1948, Strom Thurmond, States' Rights, took 2.4% and 39 electoral votes while Henry A. Wallace also got 2.4% but no electoral votes; in 1968, George Wallace won 13.2% and 45 electoral votes.

*Successor picked by Legislature Jan. 1969; (a) Appointed by Interior Dept.; (†) Appointed by President.

Governments of States and Possessions

Compiled by World Almanac from statistics supplied by the Secretaries of State.

Below appears the makeup of each state's government as constituted after 1968 elections except in Arkansas, Illinois, Maine, New Hampshire, North Dakota, Tennessee, and Vermont. In those states, as well as American Samoa and Puerto Rico, an asterisk indicates that information may be outdated because of elections or new appointments. All the governors are listed as after 1968 elections.

Alabama

Governor—Albert P. Brewer, D., \$25,000.
Lt. Governor—Vacant, \$32 per legislative day,
plus annual salary of \$300 per month.
Sec. of State—Mabel S. Amos, D., \$15,000.
Atty. General—MacDonald Gallion, D., \$18,000.
Treasurer—Mrs. Agnes Baggett, D., \$15,000.
Auditor—Melba Thi Allen, D., \$15,000.
Supt. of Educ.—Ernest Stone, D., \$15,000.
Comm. of Agric.—Richard Beard, D., \$15,000.

LEGISLATURE

Meets odd years, 1st Tues. in May, at Montgomery. Members receive \$30 per day during legislative sessions, annual salary of \$300 per month, plus 10¢ per mile travel allowance (one round trip between home and Capitol).

Senate—Dem., 34; Rep., 1. Total, 35.

House—Dem., 106. Total, 106.

Alaska

Governor—Walter J. Hickel, R., \$27,000.
Sec. of State—Keith Miller, R., \$23,700.
Administration—Robert W. Ward, \$23,700.
Education—Dr. Clifford R. Hartman, \$23,700.
Health & Welfare—J. Scott McDonald, \$23,700.
Law—G. Kent Edwards, \$23,700.

LEGISLATURE

Meets annually, in January at Juneau, for as long as may be necessary. First session in odd years. Members receive \$6,000 per year plus \$35 per day while in session, \$500 allowance for secretarial services, plus one round trip first class airfare from residence to Juneau.

Senate—Rep., 11; Dem., 9. Total, 20.

House—Dem., 22; Rep., 18. Total, 40.

Arizona

Governor—John R. Williams, R., \$22,500.
Sec. of State—Wesley Bolin, D., \$13,000.
Atty. General—Gary Nelson, R., \$16,800.
Treasurer—Morris A. Herring, R., \$10,800.

LEGISLATURE

Meets annually, in January, at Phoenix. Members receive \$1,800 for each regular session, plus expenses and travel allowance; \$20 per day for special sessions.

Senate—Dem., 13; Rep., 17. Total, 30.

House—Dem., 26; Rep., 34. Total, 60.

Arkansas

Governor—Winthrop Rockefeller, R., \$10,000.
*Lt. Governor—Footsie Britt, R., \$2,500.
*Sec. of State—Kelly Bryant, D., \$5,000.
*Auditor—Jimmy Jones, D., \$5,000.
*Atty. General—Joseph Purcell, D., \$6,000.
*Treasurer—Mrs. Nancy J. Hall, D., \$5,000.

GENERAL ASSEMBLY

Meets odd year, in January, at Little Rock. Members receive \$2,400 for each two-year period, \$20 a day while in session, plus 5¢ a mile travel expense.

*Senate—Dem., 35 (total).

*House—Dem., 97; Rep., 3. Total, 100.

California

Governor—Ronald Reagan, R., \$44,100.
Lt. Governor—Robert H. Finch, R., \$25,000.
Sec. of State—Frank M. Jordan, R., \$25,000.
Controller—Houston I. Flournoy, R., \$25,000.
Atty. General—Thomas C. Lynch, D., \$32,000.
Treasurer—Ivy Baker Priest, R., \$25,000.
Supt. Public Instr.—Max Rafferty, N.P., \$25,000.

LEGISLATURE

Meets in annual general sessions, unlimited as to duration. Members receive \$16,000 per year plus mileage and \$21 daily expenses while in session. Daily expenses on interim business: \$25.

Senate—Dem., 20; Rep., 20. Total, 40.
Assembly—Dem., 39; Rep., 41. Total, 80.

Colorado

Governor—John A. Love, R., \$20,000.
Lt. Governor—Mark Hogan, D., \$4,800.
Sec. of State—Byron Anderson, R., \$10,000.
Auditor—John R. Proctor, R., \$18,500.
Atty. General—Duke W. Dunbar, R., \$15,000.
Treasurer—Virginia Blue, R., \$10,000.

GENERAL ASSEMBLY

Meets annually, in January, at Denver. Members receive \$3,600 annually plus \$25 per session day with a maximum of 140 days in two years.
Senate—Dem., 11; Rep., 24. Total, 35.
House—Dem., 27; Rep., 38. Total, 65.

Connecticut

Governor—John N. Dempsey, D., \$35,000.
Lt. Governor—A. R. Frassinelli, D., \$10,000.
Sec. of State—Mrs. Ella T. Grasso, D., \$15,000.
Treasurer—Gerald A. Lamb, D., \$15,000.
Comptroller—Louis I. Gladstone, D., \$15,000.
Atty. General—Robert K. Killian, D., \$20,000.

GENERAL ASSEMBLY

Meets odd years, in January, at Hartford. Members receive \$3,250 salary plus \$750 for expenses per term and travel allowance of 10¢ per mile.
Senate—Dem., 24; Rep., 12. Total, 36.
House—Dem., 110; Rep., 67. Total, 177.

Qualifications for Voting by States

Data as of June 30, 1968

A voter must be at least 21 years of age (18 in Georgia and Kentucky, 19 in Alaska, 20 in Hawaii), a citizen; not a convict. Most states require registration. The Voting Rights Act of 1965 suspended literacy tests and other devices to determine qualification of voters in any state or county that had them in force on Nov. 1, 1964, and where less than 50% of the voting age population was registered on that date or voted in the Presidential election.

State	Previous Residence Required in			State	Previous Residence Required in		
	State	County	Precinct		State	County	Precinct
Alabama.....	1 yr.	6 mos.	3 mos.	Montana.....	1 yr.	30 days	30 days

Massachusetts.....	1 yr.		(f) 6 mos.	Washington.....	(b) 1 yr.	30 days	30 days
Michigan.....	6 mos.		30 days	West Virginia.....	1 yr.	60 days	30 days
Minnesota.....	(b) 6 mos.		(g) 30 days	Wisconsin.....	6 mos.		10 days
Mississippi.....	2 yrs.	1 yr.	(h) 1 yr.	Wyoming.....	1 yr.	60 days	10 days
Missouri.....	(b) 1 yr.	60 days	60 days				

(a) Election district. (b) Residence requirement reduced for qualified voters from another state when voting for President and Vice President. (c) Town. (d) Township. (e) 4 months in municipality for municipal elections. (f) Municipality. (g) With certain exceptions. (h) 6 months for ordained ministers and their wives if minister is in charge of a church.

POST OFFICES IN UNITED STATES

As of June 30, 1968 there was a total of 32,261 post offices throughout the United States and Possessions. Of this number 4,953 were First Class; 7,357 Second Class; 12,912 Third Class, and 7,039 Fourth Class.

POSTAL INFORMATION

United States Domestic Rates

FIRST CLASS

Letters written, and matter sealed against inspection, 6¢ for each ounce or fraction. U. S. Postal cards: single 5¢; double 10¢; private postal cards, same.

Exception: Drop letters when deposited for local delivery at offices not having letter-carrier service and not collected or delivered by rural or star route carriers may be sent at other than the first class rate.

First class includes written matter, namely letters, postal cards, post cards (private mailing cards) and all other matter wholly or partly in writing, whether sealed or unsealed, except manuscripts for books, periodical articles and music, manuscript copy accompanying proofsheets or corrected proofsheets of the same and the writing authorized by law on matter of other classes. Also matter sealed or closed against inspection. Bills and statements of accounts.

GREETING CARDS

Under the new regulations in effect January 1968 greeting cards (unsealed) and other single-piece mailings cost 6¢ for the first 2 ounces and 2¢ for each additional ounce or fraction.

AIRMAIL

Air postal or post card 8¢ each, letters and packages (up to 7 ounces) 10¢ an ounce. Airmail other than cards weight under 2 ounces, 10¢ per ounce plus 2¢ per piece, weight over 2 ounces, 10¢ an ounce plus 5¢ per piece. Over 7 ounces air parcel post rates plus 5¢ per piece. This is in the U. S. its territories and possessions, also to Armed Forces outside the U. S. when addressed APO or FPO, New York, N. Y., San Francisco, Calif. or Seattle, Wash. May be certified, registered, sent C.O.D. or special delivery.

SECOND CLASS

Single copy mailings by general public 5¢ for first 2 ounces and 1¢ for each additional ounce. There are special rates for publications, newspapers and bulk mailing, consult local postmasters for rates and permit.

THIRD CLASS

Third Class (limit up to but not including 16 ounces): Mailable matter not in 1st and 2nd classes.

Single mailing: Greeting cards (unsealed), small parcels, printed matter, booklets and catalogs, 6¢ the first 2 ounces and 2 cents for each additional ounce or fraction.

Bulk material: Books, catalogs of 24 pages or more, seeds, cuttings, bulbs, roots, scions and plants; 16¢ for first pound and 16 cents for each additional pound or fraction.

Other matter: Newsletters, shoppers' guides, advertising circulars: 22 cents a pound. Subject to a minimum rate for which Post Office should be consulted. Separate rates for some nonprofit organi-

zations. Bulk mailing fee, \$30 per calendar year. Apply to postmaster for permit.

PARCEL POST—FOURTH CLASS

Fourth Class or Parcel Post (16 ounces and over): Merchandise, printed matter, etc., may be sealed.

On parcels weighing less than 10 lbs. and measuring more than 84 inches, but not more than 100 inches in length and girth combined, the minimum postage charge shall be the zone charge applicable to a 10-pound parcel.

PRIORITY MAIL

First-class mail of more than 13 ounces and airmail of more than 7 ounces have been merged into a "Priority Mail (Heavy Pieces)" service. First-class and airmail weighing up to one pound is charged 80¢ as Priority Mail regardless of its domestic destination. The most expeditious handling and transportation available will be used for fastest delivery.

FORWARDING ADDRESSES

The law that increased postal rates established the return address service for all classes of mail. (First time for first-class mail.) The mailer, in order to obtain a forwarding address, must endorse the envelope or cover "Address Correction Requested." The destination post office then will determine whether a forwarding address has been left on file and provide it for a fee of 10¢.

SPECIAL HANDLING

Fourth class parcels will be handled and delivered as expeditiously as practicable (but not special delivery) upon payment, in addition to the regular postage: Up to 2 lbs., 25¢; over 2 lbs. and up to 10 lbs., 35¢; over 10 lbs., 50¢. Such parcels must be endorsed, Special Handling.

SPECIAL DELIVERY

First class mail, up to 2 lbs., 30¢; over 2 lbs. and up to 10 lbs., 45¢; over 10 lbs., 60¢. 2nd, 3rd and 4th class mail up to 2 lbs., 55¢; over 2 lbs. and up to 10 lbs., 65¢; over 10 lbs., 80¢.

AIR MAIL PARCEL POST

Air Parcel Post (over 7 ounces to 70 lbs.): Packages not to exceed 100 inches in length and girth combined, including written and other matter of the first class, whether sealed or unsealed, fractions of a pound being charged as a full pound. Ten cents an ounce or fraction for all domestic air mail up to and including 7 ounces regardless of distance or zone.

Rates according to zone apply between the U. S. and Puerto Rico and Virgin Isles.

Parcels weighing less than 10 pounds, measuring over 84 inches but not exceeding 100 inches in length and girth combined are chargeable with a minimum rate equal to that for a 10 pound parcel for the zone to which addressed.

Air Mail Parcel Post

Zones	To 1 lb.	1½	2	2½	3	3½	4	4½	5	Each lb. or fract. over 5

8.....	.80	1.24	1.68	2.08	2.48	2.88	3.28	3.68	4.08	.80

Registry. All mailable matter prepaid with postage at the first-class or airmail rate may be registered. The mailer is required to declare the value of mail presented for registration.

Insurance is applicable to 3rd and 4th class matter. Matter for sale addressed to prospective purchasers who have not ordered it or authorized its sending will not be insured.

C.O.D.: Unregistered—is applicable to 3rd and 4th class matter and sealed domestic mail of any class bearing postage at the 1st class rate. Such mail must be based on bona fide orders or be in conformity with agreements between senders and addressees. **Registered**—For details consult postmaster.

Certified mail service is available for any matter having no intrinsic value on which 1st class or air mail postage is paid. Receipt is furnished at time of mailing and evidence of delivery obtained. The fee is 30c in addition to postage. Return receipt, restricted delivery and special delivery are available upon payment of additional fees. No indemnity.

¹The rate is per ounce. ²Small packets not accepted. ³Dutiable merchandise prohibited in letters or letter packages. ⁴Restrictions apply. Consult post office. ⁵The rate is 8¢ per ounce. Prepare all air packages for Canada as letter mail. ⁶The rates for surface packages of merchandise for Canada weighing up to 8 ounces are: 10¢ for 5 ounces or less, 12¢ for 6 ozs., 14¢ for 7 ozs., and 16¢ for 8 ozs. The packages are treated as A0 mail, must be mailed unsealed, and shall bear customs label Form 2976 unless the sender knows the contents are not dutiable. ⁷Surface parcel post for Canada must weigh over 8 ozs. (see ⁶). ⁸Air parcel service not available to northern region of Somal. NOTE: Parcel post service not available to all countries.

INTERNATIONAL MAILS

WEIGHT AND DIMENSIONAL LIMITS AND SURFACE RATES

For air rates see pages 929-931

Letters and letter packages. To Canada and Mexico 6¢ per ounce or fraction; to all other countries 13¢ for the first ounce and 8¢ each additional ounce or fraction. Weight limit: 4 lbs., 6 ounces. except to Canada which is 60 lbs. Maximum dimensions: Length, breadth, and thickness combined, 36 inches; greatest length, 24 inches. Dimensions vary when sent in the form of a roll. Envelopes must measure at least 4½x3 inches.

Postal cards. To Canada and Mexico 5¢ each; 10¢ with reply paid. To all other countries 8¢ each; 16¢ with reply paid. Dimensions in inches: Max. 6x4½, Min. 4½x3. Cards exceeding maximum dimensions must be paid at letter rate.

Printed matter other than books as described below. Canada and Mexico 6¢ first 2 ounces; 2 cents each additional ounce. All other countries 6¢ for the first 2 ounces, and 4¢ each additional 2 ounces or fraction. (Consult post office for special rates on second-class matter and controlled circulation publications mailed by publishers or registered news agent to foreign countries.) Weight limit: For most countries, 6 lbs., 9 ounces for prints in general and 11 lbs. for books. For exceptions, see under exceptional weight limits for printed matter. Dimensions: Same as letters.

Books and Sheet Music: The minimum rate for mailings to all foreign countries 14¢ first 2 ozs. and 1¢ for each additional 2 ozs. or fraction. Weight and dimensions, same as printed matter.

Exceptional Weight Limits for Printed Matter. Printed matter may weigh up to 22 pounds to Bolivia, Brazil, Fernando Po, Rio Muni, Spain including Balearic Islands, Canary Islands, and Spanish Offices in Northern Africa, and Spanish West Africa, and up to 33 pounds to Argentina, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, El Salvador, Uruguay and Venezuela.

INTERNATIONAL PARCEL POST

For rates see pages 929-931

General dimensional limits—Greatest length, 3½ feet; greatest length and girth combined, 6 feet.

Prohibited articles. Before sending goods abroad the mailer should satisfy himself that they will not be confiscated or returned because their importation is prohibited or restricted by the country of address. Information concerning prohibited or restricted articles appears in the Directory of International Mail, which may be consulted at any U. S. post office.

Packing. Parcels for transmission overseas should be even more carefully packed than those intended for delivery within the continental United States. Containers should be used which will be strong enough to protect the contents from the

weight of the blind. Generally mailable at same rates as apply in the domestic mail. Weight limit: 15 lbs. 6 ounces. Dimensions: Same as letters.

Samples of merchandise. Canada and Mexico 6¢ first 2 ounces; 2¢ each additional ounce. Minimum charge, 10 cents. All other countries, 6¢ first 2 ounces; 4¢ each additional 2 ounces or fraction. Minimum charge: 13 cents. Weight limits: 16 ounces to Canada and Mexico; 18 ounces to all other countries. Dimensions: Same as for letters. Samples may not contain any article having a salable value, or sent as gift for personal use.

Small packets. 6¢ each 2 ozs. or fraction. 8¢ to Canada with a weight limit of 8 ozs. Minimum charge: 26¢. Weight limit: 2 lbs., 3 ozs. Dimensions: Same as letters. Some countries do not admit small packets (See footnote ² above).

Registration. In addition to postage. For Postal Union articles, 75¢ to all countries. Registry return receipts: Requested at mailing, 13¢; after 25¢.

Special delivery. In addition to postage. Postal Union articles only: Letter, letter-packages, post cards, and air mail other articles, 30¢ up to 2 lbs.; over 2 lbs. up to 10 lbs., 45¢; over 10 lbs., 60¢. Surface other articles, 55¢ up to 2 lbs.; over 2 lbs. up to 10 lbs., 65¢; over 10 lbs., 80¢: Not available to all countries—consult post office.

Marking. An article intended for special delivery service must have affixed to the cover near the name of the country of destination "EXPRES" (Special Delivery) label, obtainable at the post office, or it may be marked on the cover boldly in red "EXPRES" (Special Delivery).

Prepayment of replies from other countries. A mailer who wishes to prepay a reply by letter from another country may do so by sending his correspondent one or more international reply coupons, which may be purchased at United States post offices. One coupon should be accepted in any country in exchange for stamps to prepay a surface letter of the first unit of weight to the U. S.

weight of other mails, from pressure and friction, climatic changes, and repeated handlings. Contents should be solidly packed in the containers, with cushioning material. When sending liquids or easily liquefiable substances surround the inner container with absorbent material.

Sealing. Registered or insured parcels must be sealed. To some countries the sealing of ordinary (unregistered and uninsured) parcels is optional, and to others compulsory. Consult post office.

Customs declarations, and other forms. A parcel post sticker, and at least one customs declaration giving a complete description of the contents are required for each parcel mailed to another country. Information and forms at post offices.

Post Office-Authorized 2-Letter State Abbreviations

Gradually replacing the traditional abbreviations for the states of the United States are the two-letter ones approved by the Post Office Department when it introduced the ZIP Code in 1963. The official list follows, including the District of Columbia, Guam, Puerto Rico and the Virgin Islands (all capital letters are used):

Alabama	AL	Kentucky	KY	Ohio	OH
Alaska	AK	Louisiana	LA	Oklahoma	OK
Arizona	AZ	Maine	ME	Oregon	OR
Arkansas	AR	Maryland	MD	Pennsylvania	PA
California	CA	Massachusetts	MA	Puerto Rico	PR
Colorado	CO	Michigan	MI	Rhode Island	RI
Connecticut	CT	Minnesota	MN	South Carolina	SC
Delaware	DE	Mississippi	MS	South Dakota	SD
Dist. of Col.	DC	Missouri	MO	Tennessee	TN
Florida	FL	Montana	MT	Texas	TX
Georgia	GA	Nebraska	NB	Utah	UT
Guam	GU	Nevada	NV	Vermont	VT
Hawaii	HI	New Hampshire	NH	Virginia	VA
Idaho	ID	New Jersey	NJ	Virgin Islands	VI
Illinois	IL	New Mexico	NM	Washington	WA
Indiana	IN	New York	NY	West Virginia	WV
Iowa	IA	North Carolina	NC	Wisconsin	WI
Kansas	KS	North Dakota	ND	Wyoming	WY

Also approved for use in addressing mail are the following abbreviations:

Alley	Ally	Drive	Drive	Plaza	Plz
Arcade	Arc	Expressway	Expy	Point	Pt
Avenue	Ave	Extended	Ext	Road	Rd
Boulevard	Blvd	Extension	Ext	Rural	R
Branch	Br	Freeway	Fwy	Square	Sq

Center	Ctr	Heights	Hts	Terrace	Trl
Circle	Cir	Highway	Hwy	Trail	Trl
Court	Ct	Lane	Ln	Turnpike	Tpke
Courts	Cts	Manor	Mnr	Viaduct	Via
Crescent	Cres	Place	Pl	Vista	Vls

United Nations Postage Stamps Issued in 1968

UN stamps, valid for postage only on mail deposited at UN Headquarters, N. Y., may be bought at UN Headquarters, ordered by mail from the UN Postal Administration, New York, N. Y. 10017, or obtained automatically through the Customer Deposit Account Service. Revenue from sale of UN stamps for postage purposes goes to the U. S. Post Office, from philatelic sales goes to the UN.
